Savings Deposits Reach Record in May

Bank Statement as a Whole Indicates Contraction of Business—Increase in Call Loans Reflects Activity in Stock and Bond Markets—Circulation Begins to Decrease

	May, 1918.	April, 1919.	May, 1919.	Yearly inc. or dec.	Monthly inc. or dec.
Deposits on demand	$535,655,731	$ 571,412,857	$ 568,730.118	+ 6.3	— .54
Deposits after notice	947,757,337	1,070,985,080	1,107,983,072	+ 16.9	+ 3.5
Current loans in Canada	894,817,113	1,107,986,523	1,071.447,686	+ 19.8	— 3.3
Current loans elsewhere	99,300,926	125,328,561	127,490,932	+ 28.3	+ 1.6
Loans to municipalities	57,728,226	47,911,199	50,356,227	— 12.3	+ 6.4
Call loans in Canada	78,466,582	86,091,844	89,187,032	+ 14.1	+ 3.5
Call loans elsewhere	172,259,879	155,533,666	157.176,325	+ 8.7	+ 1.3
Circulation	189,748,470	223.763,426	219,287,788	+ 16.8	— 1.5

THE above are the principal changes shown by the statement issued by the Finance Department, made up from returns sent in by chartered banks in Canada as at May 31st. Some of the figures which have been showing a continuous increase for many months past show a decrease in May, indicating a change from expansion to contraction of business. These are current loans, circulation and demand deposits. This movement, if moderate, will help to remove the inflation and high prices; while it necessarily means less business and lower profits, it should be ultimately beneficial in bringing industry back to a sound basis.

The changes for the year are nearly all upward. The decline in bank loans to municipalities is a result of the new financial conditions now existing, which enable municipalities to issue debentures on comparatively favorable terms.

Savings deposits have reached a record level. It is probable that the business reaction will soon affect these deposits, by at least slackening the increase. The following table gives record of deposits for the past thirteen months:—

	Deposits payable on demand.	Deposits payable after notice.
1918—May	$535,655,731	$ 947,757,337
June	549,327,078	965,934,556
July	549,068,651	992,015,137
August	554,906,517	1,014,711,865
September	588,940,119	1,037,498,920
October	644,220,998	1,076,514,627
November	666,366,359	939,329,271
December	711,034,060	958,473,557
1919—January	623,919,410	990,000,085
February	566,775,434	1,018,184,512
March	566,797,268	1,037,851,766
April	571,412,857	1,070,985,080
May	568,730,118	1,107,983,072

The course of the deposits account for the past six years is shown in the following table:—

May.	On demand.	After notice.	Total.
1914	$340,748,488	$ 663,945,753	$1,004,694,241
1915	347,346,119	691,891,287	1,039,237,406
1916	412,301,481	765,064,041	1,177,365,525
1917	443,839,847	892,562,657	1,330,402,504
1918	535,655,731	947,757,337	1,483,413,068
1919	568,730,118	1,107,983,072	1,676,713,190

The trend of the Canadian loans account for the past thirteen months is shown in the following table:—

Loans.	Current in Canada.	Call in Canada.
1918—May	$ 894,817,113	$78,466,582
June	897,226,012	76,970,920
July	905,677,233	74,382,762
August	920,775,269	73,509,571
September	942,802,018	74,137,860
October	1,003,593,603	73,685,136
November	1,082,709,655	85,675,063
December	1,075,640,003	89,120,423
1919—January	1,080,340,861	87,598,427
February	1,095,301,791	79,154,121
March	1,117,197,446	87,601,337
April	1,107,986,523	86,091,844
May	1,071,447.686	89,187,032

The following table shows the call loans abroad in May, as compared with previous returns:—

	1916. $	1917. $	1918. $	1919. $
January	134,248,552	155,747,476	132,687,066	140,819,656
February	139,138,651	162,344,556	160,239,494	155,983,681
March	141,889,989	161,616,735	167,296,701	160,116,443
April	147,146,443	159,156,054	179,818,531	155,533,666
May	163,400,659	168,692,675	172,259,879	157,176,325
June	182,757,015	159,309,133	170,034,476	....
July	177,121,733	151,875,676	167,112,836	....
August	171,380,353	176,610,625	160,544,990	....
September	173,877,586	166,480,004	159,680,810	....
October	189,346,216	151,018,747	157,040,858	....
November	183,250,389	139,832,552	171,035,732	....
December	173,878,134	134,483,482	150,248,322	....

The following table shows the course of principal loan accounts during the past six years:—

May.	Current loans in Canada.	Current loans elsewhere.	Call loans in Canada.	Call loans elsewhere.
1914	$ 838,462,686	$ 51,812,875	$67,210,504	$129,897,328
1915	760,631,113	36,375,658	71,516,953	136,098,835
1916	763,136,917	59,600,342	84,826,636	163,406,059
1917	844,890,589	98,993,197	78,514,798	168,692,675
1918	894,817,113	99,300,926	78,466,582	172,259,879
1919	1,071,447.686	127,490.932	89,187,032	157,176,325

NEW WINNIPEG BOARD OF TRADE COUNCIL

Over 800 votes were polled in the election of the 22 members to the council of the Winnipeg Board of Trade last week. Board members who are already on the council are elected for a term of one year, while members not at present on the council are elected for two years. The list below is compiled under the various classifications, and shows the length of term for which each member will hold office:—

W. H. Carter, one year; J. McDiarmid, one year; F. L. Patton, two years; B. Shaw, one year; W. R. Bawlf, one year; J. E. Botterell, two years; N. J. Breen, two years; W. J. Bulman, one year; J. G. Glassco, two years; A. W. McLimont, one year; J. B. Coyne, K.C., two years; J. G. Sullivan, one year; C. S. Riley, two years; C. D. Shepard, one year; G. W. Markle, one year; H. M. Tucker, one year; H. M. Agnew, two years; J. H. Ashdown, one year; Duncan Cameron, one year; M. F. Christie, two years; John Stovel, two years; R. D. Waugh, one year.

The Motor Union Insurance Company, Toronto, is offering a prize of $100 for the best essay on some phase of automobile insurance. The company is suggesting a number of suitable subjects and essays should be entered not later than July 31st.

T. C. BOVILLE, *Deputy Minister of Finance.*

TORONTO INSURANCE INSTITUTE ANNUAL

The annual meeting of the Insurance Institute of Toronto, was held on July 3rd, in the board room of the Imperial Life Assurance Company. The president, Mr. H. W. Crossin, reported that the membership now stood at 483 as compared with 465 last year and 428 in 1914. There were twenty-one candidates for the examinations recently held, who tried 90 examinations of which 45 were passed. These candidates were all in the life department and there have not for several years been any in the fire or accident and casualty branches.

The vice-president, Mr. J. B. McKechnie, anticipated being absent from the city considerably during the coming year and therefore requested that he should not be nominated for the office of president. Consequently the same officers were elected as for last year. The finances are in good condition, the balance on hand being $2,271.

Royal Commission on Industrial Relations

Majority Report Recommends Eight Hour Day, Minimum Wage, Industrial Councils, and Proportional Representation — State Insurance Against Unemployment Also Suggested—Minority Report Is Less Radical

THE report of the Royal Commission on Industrial Relations which has been holding sittings in Canada during the past few weeks was presented to parliament on July 1st, by the premier. The report is not unanimous, however.

The majority report, which is signed by Judge Mathers, Carl Riordon, Chas. H. Harrison, Tom Moore and John W. Bruce, recommends legislation for a maximum work day of eight hours, with weekly rest of not less than twenty-four hours, minimum wages, especially for women, girls, and unskilled labor; also government action to relieve unemployment through public works, to help the building of workers' homes to restore fullest liberty of speech and press, and to establish a bureau for promoting industrial councils to improve relations between employers and workers. Immediate enquiry by experts is suggested, with a view to early legislation as to the system of proportional representation in parliamentary elections; also state insurance against unemployment, sickness, invalidity and old age. Other general recommendations are: collective bargaining, payment of a living wage, right of workers to organize, recognition of unions, steps towards establishment of joint plant and industrial councils; extension of opportunity to reach highest educational institutions; also that the commission's findings be put into effect in all work controlled by government where the principles of democratic management can be applied; that the report and evidence be printed for general distribution; and that if the Dominion parliament has not power to legislate as proposed by the commission, a conference of premiers and other representatives of provincial governments, also representative labor men and employers, be called in Ottawa in order to reach unanimity on such points and also to unify present provincial and Dominion legislation bearing on relations between employers and employes.

The commission was appointed chiefly to consider and make suggestions for securing permanent improvement in relations between employers and employes. It was deemed necessary to investigate the prevailing unrest, which they ascribed largely to unheavals in Europe and general disturbances, owing to the war, giving rise to a desire on part of workers generally to reach quickly an objective which ordinarily would require a process of evolution covering a long period. Many employers, the report states, agree with the workers as to the need for an ultimate change in the basis of industry, but they do not agree with workers as to methods. Workers also differ among themselves, one group desiring complete possession of the machinery of production, and the full product of their toil, another group simply asking larger purchasing power of their wages, while between these the more moderate, and as the commission, believe, the majority, would welcome co-operation and industrial peace until gradually a system would be evolved by which workers would receive a more adequate share of what their labor produces. The commission holds that as we can see only a little way ahead, all changes should be made step by step, each step being based on experience as it is gained, but the general direction should be determined towards health, happiness and prosperity of workers and the service of the community.

Workers are diligently studying economic questions, and while some of the literature they read may be unsound, or lack of mental training of some workers may prevent their thorough understanding of it, the commissioners are convinced that the good sense and sound judgment of the majority enable them to discriminate, and hence extreme doctrines have been accepted only by a minority.

Unrest was found to be greatest where there was most unemployment, which was found in several large urban centres, though there is little in smaller towns and rural districts, in spite of the number of discharged soldiers and munition workers released. In some manufacturing centres such as Kitchener, Ontario, there was an actual scarcity of Labor. Returned soldiers have to a large extent been reabsorbed into civil life, generally in their old positions. The scarcity of farm help is very pronounced.

Conditions of Labor

At one point the commission learned that the local government employment officer has 1,500 calls from farms, but though 1,000 men on his list were seeking work, none were willing to go on the land, because of the isolation, hard and long hours of work, seasonal employment, bringing wages insufficient to tide over the slack season. Many farmers claim that they cannot compete with the high wages paid by manufacturers. The commissioners believe that if the unemployed of the cities who understand farming methods could be induced to go to the farms, the existing unemployed problem would be largely solved. The commission recommends state social insurance for those unable to work through lack of opportunity, sickness, invalidity or old age.

Owing to unsettled conditions, the commission found everywhere a great reluctance to risk unemployed capital in new enterprises or the expansion of existing ones. The high cost of living was assigned as one, if not the chief, cause of labor unrest, which would largely disappear if living expenses more nearly balanced wages. At present any advance in wages is invariably met by increases in price of prime necessaries of life which many people believe is due to profiteering, chiefly through cold storage plants, which intercept food supplies. They also blame the present expensive system of distribution, and declare there are too many middlemen. The commission notes with pleasure that this matter is being investigated by a special committee of parliament.

The commission approves of the labor declaration in the peace treaty, that "labor should not be regarded merely as a commodity or as an article of commerce." If this basic principle, the report continues, were freely and frankly acknowledged by employers, and acted on in good faith, it would go far to improve their relations with employes. Without any extraordinary upheaval, policies may be adopted which will ensure to the worker a fairer reward for his toil and a living wage, and insure him against want during temporary enforced idleness, from any cause, and during old age. The minimum wage law now administered by boards in Manitoba, British Columbia, Saskatchewan and Quebec should be extended to all the provinces, and should cover unskilled labor as well as women and girls.

At the great majority of places visited the commission found a demand by workers for a shorter working day, based on their desires for more leisure and energy to devote to the things of life other than work. The most common request was for an eight-hour day with the Saturday half-holiday, where already established, and its further extension wherever possible, thus making the 44-hour week. General approval by employers in regard to the shorter working day was coupled with statements of difficulties such as the necessity for using all possible daylight in such industries as farming, fishing, logging, etc., which are subject to climatic conditions and limited season; the disadvantage of a section of an industry working shorter hours, yet competing with other sections within Canada working longer hours; also the fear that Canadian industry with its small home market, might be unable to meet competition in foreign markets if conditions in Canada are advanced too far ahead of countries manufacturing similar products.

THE ROYAL COMMISSION'S REPORT

THE report of the Royal Commission on Industrial Relations, the substance of which is given elsewhere in this issue, is at first sight a disappointing document. It is quite evident that the commissioners have been unable to locate any one cause of the present industrial difficulties; the labor witnesses and the labor commissioners themselves were quite unable to do so. Consequently it is scarcely to be expected that any one remedy would suffice. The commission was not appointed to find a complete solution, however, but to make recommendations to alleviate the situation. Numerous suggestions are made; in fact there are so many that when it comes before the House the debate will probably drift into general lines and the principal issue forgotten.

In addition to these suggestions, generous wishes are expressed for the "uplift" of labor, and the peace treaty's declaration as to the status of labor is approved. But the report seems to pass up the whole issue when it merely advises that these principles be carried out by employer and employee. The Commission was not obliged to approve of all apparently worthy suggestions brought to its attention, and no harm would have been done by omitting all mention of some of the less important. On the other hand the working up of a more definite scheme, to be put into force either by law or by voluntary action, would have brought about more distinct and readily applicable results.

Some consideration must, of course, be given to the fact that the report was hastened for the present session of parliament, and thoroughly matured recommendations could not therefore be expected. Moreover, the opportunity to express views before it, and the evident lack of uniformity of these views, has itself been beneficial. The economic system is benefited by a thorough freedom of expression of all views except those which advocate violence, and a discussion of difficulties emphasizes the foolhardiness of any single panacea for reform.

LIFE COMPANIES & MORTGAGE INVESTMENTS

IT has been urged as a solution of the alleged housing problems in New York City that insurance companies in the State of New York be required to invest their mortgages in property in that city. This would, of course, have the effect of creating an artificial supply of money for this purpose and would lower the interest rate on mortgages in New York City. A measure of this kind has been urged by Mr. Samuel Untermeyer in recommendations to Mr. N. Hirsch, chairman of the Mayor's Committee for the solution of the housing problem.

Commenting upon these recommendations, Mr. William B. Ellison, a prominent New York solicitor, very properly points to the fact that "the funds of insurance companies are held in trust for policyholders, not alone in the city of New York, but throughout the state and throughout the nation; and it may well be that the non-resident policyholders would object seriously to having their security dependent upon New York property under conditions that have prevailed here for some time—political and otherwise."

In explanation Mr. Ellison continues:—

"The last Democratic municipal platform called for municipal ownership and operation of all of our utilities, and the effect of such a proposition upon city real estate is quite apparent. The financial credit of every community in this country that has adopted municipal ownership and operation, has suffered; and so long as there is any danger of such a situation in New York, we must expect the city's credit to be similarly impaired. No government can go or advocate the going, beyond proper governmental functions, and hope to retain its financial credit; indeed, it is a matter of grave doubt whether the city of New York has not already reached, if not passed, the constitutional limitation of its indebtedness. These conditions answer Mr. Untermeyer's suggestion completely, in my opinion.

"It is charged that the insurance companies invest their funds in railroad stocks and bonds. My recollection is that savings banks do likewise. Furthermore, railroad stocks and bonds approved by law as proper mediums of investment were reasonably safe and secure, until they passed under governmental control and operation.

"There was a time when our mortgage market was supplied by money from all parts of the United States seeking investment in New York City property, but that time is not now, and will not come again until the fads and fancies of socialism are relegated to the rear, and we have a government pledged to limit its activities to proper governmental function.

"The excessive assessment and taxation of property within the city of New York has made home-owning and home-building almost impossible; and is it not quite clear, that a similar influence materially retards any material increase in housing facilities? And is it not also clear, that to add to our present facilities under such circumstances, and under the present excessive cost of labor and materials that rentals will necessarily be so high as to still be beyond the small salaried or wage-earning class? Do not these conditions drive out of New York thousands upon thousands of people who would prefer to live within it; and are not our suburban communities benefiting from our own mistakes and bad judgment?

"Under such circumstances, is there much of promise in the conduct of the affairs of this city from a financial point of view that in any material degree adds to the security offered by its real estate; indeed, is there anything within the facts that would prompt policyholders without the city to invest the funds held by the insurance companies in trust for them in New York City mortgages?

"Good, safe, and unquestionable securities will always produce money free for investment; and were our conditions free from doubt there would be no reason for a demand for a compulsory investment of trust funds."

LOOKS FOR CATASTROPHE IN EUROPE

MR. Frank A. Vanderlip, formerly president of the National City Bank of New York, has written a book entitled "What Happened to Europe," to be published shortly, in which he views with great anxiety the future of that continent. The pessimistic views have been the accasion of much criticism on the one hand and commendation on the other. "I have reached what are to me some startling conclusions," he says: "If they were only my own conclusions, there are some of them that I could doubt myself. It is hard to believe, when one sees what is outwardly a perfectly normal country with its people quietly moving about, apparently fed and clothed to a normal standard, that there may be impending a catastrophe for such people—a catastrophe that they themsevles do not dream of at the moment, a catastrophe that may be marching with a grim certainty that marks tragedy. But this catastrophe may be averted if statesmen are wise enough, and if America is wise enough; for America is the last hope of Europe."

INSTALLATION OF OLD DEMURRAGE TOLL

Application has been made to the Board of Railway Commissioners by a number of trade and other organizations in Ontario and Quebec, for the cancellation of the present high car demurrage rates and a restoration of the old demurrage toll, effective prior to August, 1917, of $1 per car per day expiration of free time. Notice has been received by the Montreal Board of Trade from the Board of Railway Commissioners that a session would be held at Ottawa on Tuesday, July 8th, to hear an application of numerous trade organizations, especially in Ontario, to this effect, with the cancellation of Rule 9 regarding demurrage.

The Montreal Trust Company has announced the removal of their Toronto offices from the Royal Bank Building, to 61 Yonge Street.

WESTERN CROP OUTLOOK IS IMPROVED

Rains at End of Month Were Not Too Late to Assist in Growth

DURING the last two or three days of June plentiful rains fell in many parts of Manitoba, Saskatchewan and Alberta. While these rains would have been of more benefit earlier in the summer they are still in sufficient time to benefit the crops substantially. Reports received from Calgary, Alberta, Regina, Prince Albert and Saskatoon, Sask., and from Russell, Manitoba, indicate that those districts at least were especially benefited.

According to a statement issued by the Canadian National Railways, there is scant evidence of pessimism in the detailed crop report, for the week ending June 21st, covering the great areas in Western Ontario, Manitoba, Saskatchewan and Alberta, served by lines of Canadian National Railways. Conditions in the areas served in the central district, which may be considered broadly as western Ontario and Manitoba, are reported as excellent. That for the lines in the prairie district shows considerable improvement over the previous week, as rainfall appears to have been general.

Reports from points along lines in the western district, which lie largely in Alberta, are quite satisfactory, and the growth of the grain appears to be thriving. In all 241 points reported. Of these 156 report conditions as good and the prospects bright. Rain was reported from 119 points. Some 59 indicate a need of more moisture; 12 points show slight damage from insects, and six report slight damage from wind and hail..

The second crop report issued on June 28th, by the Manitoba Free Press, is more favorable than the first which was issued about the middle of the month. Speaking broadly, the reports indicate generally satisfactory conditions in Manitoba, abundance of moisture and little or no wind damage. In Saskatchewan and Alberta the reverse is the case, drought is very general, heat intense, and there has been much hot wind. A number of districts report heavy damage which no later rains can fully restore, but a number of points state that rain within a few days would make fair average crops or half crops. In all the provinces wheat is more satisfactory than any of the coarse grains.

In an interview with *The Monetary Times* on July 3rd, Mr. E. M. Saunders, treasurer of the Canada Life Assurance Company, stated that their reports indicated that the crops would be fair in Manitoba and Alberta, but not very good in Saskatchewan. The Canada Life has five branch offices in the west, of which one is in Manitoba, two in Saskatchewan and two in Alberta, and the inspectors attached to these offices are in close touch with the crop situation. One of the outstanding features this year, he said, is the fact that the crops have ripened early, and the outlook is that there will be an early harvest. The grass-hopper pest was not bad this year. Manitoba should have as good a crop as last year and conditions around Edmonton and throughout Alberta are a fair average. Around Saskatoon they are almost a failure. Live stock are about up to the average. The outlook in the loaning field is, of course, greatly affected by the crop situation, and interest collections of the Canada Life are about the same as last year, while repayments are good. Applications for new loans have, according to the experience of the Canada Life, almost doubled as compared with last year. That conditions are healthy is indicated by the fact that these applications are mostly for development purposes; only about 25 per cent., he thought, at a rough estimate, might be due to crop failures last year.

Another reinsurance company, under the title of Treaty Reinsurance, Ltd., has been formed in London, England, with a capital of £50,000. Its operations will be guaranteed by five companies, the London and Lancashire Life and General Assurance Association, London Guarantee and Accident Company, Century Insurance Company, Western Australia Insurance Company and Atlantic Insurance Company, whose combined funds and assets total £12,000,000.

THE MANAGER, BOND DEPARTMENT,
TORONTO 62

ROYAL COMMISSION ON INDUSTRIAL RELATIONS

(Continued from page 8)

The commission believes that a shorter day is most needed in industries that are fatiguing, monotonous or under trying conditions such as heat, dust, cramped position, etc., and that the number of work hours should be based scientifically upon the demands of industry, and not upon mere ability to work such hours without undue fatigue. The eight-hour day has been recognized by the peace treaty and already adopted in many industries in Canada. The commission recommends that it be established by law throughout Canada with due regard for above considerations. Such legislation should provide for a weekly rest of at least 24 hours, which should include Sunday whenever possible, and should not interfere where a shorter day is now worked, or with its extension.

Recognition of Right to Organize

The commission believe the day has passed when an employer should deny his employees the right to organize—a right claimed by employers themselves and not denied by workers. Employers gain nothing by opposition, because employees organize anyway, and refusal only leaves in their minds a rankling sense of injustice. The prudent employer will recognize such organization and deal with its duly accredited representatives. Distrust and lack of confidence have been sometimes caused because trade agreements have not been faithfully observed; charges were made on both sides to this effect. In some sections, also, local trades unions' representatives have advocated extreme measures—such men and measures being the logical outcome of unjustifiable opposition by some employers, and the sympathetic strike principle has been adopted because of the refusal of groups of employers to grant the claims of organized workers. These factors have been assigned as the chief causes of the non-observance of contracts entered into by workers in numerous cases, especially in western Canada. This policy is not recognized by the international trade unions, who believe in strict observance of agreements. It cannot be denied that trade unions generally have brought many solid advantages to workers in the form of increased wages, shorter hours and improved conditions. When employers in one line of industry are organized and their employees have a central organization, a bargain between the two groups would have the advantage, from the point of view of competition, of equalizing wages, hours and other conditions affecting costs.

The commission defines collective bargaining as the right of workers to group themselves for the purpose of selling their labor power collectively, instead of making individual agreements with the employer. For this purpose men have organized themselves into trade unions, and many of these are federated into central councils such as the Metal Trades Council, etc. Employers, in like manner, sometimes control one factory, sometimes a chain of factories, and in some instances are organized into larger associations of their industry, which again sometimes become part of federations, which local branches, such as the National Association of Building Contractors and Supplymen. Collective bargaining is negotiating for and reaching an agreement between employers or groups of employers, and employees or groups of employees, through the representatives chosen by the respective parties themselves. In the case of larger organizations of workers—for example, where a building contractor employed 19 different classes of tradesmen, all organized into different trade unions—it has been found mutually satisfactory for workers to combine their demands and present them to the employer through the medium of a building-trade federation, and thus settle at one time the conditions for the entire industry.

Many trade unions keep in their employment trained men for the purpose of negotiating their different schedules. As the employer has the right to select any representative or bring in any assistance he may desire in carrying on such negotiations, the commission think there is no logical reason why workers should be denied such right. The employer is justified in knowing that the schedule is presented to him with the concurrence of a fair proportion of his employees, but it does not matter whether it is put before him directly by a committee of his employees, or by a direct representative of the trade union to which they belong, or through the committee of a federation of trade unions, of which their publication forms a part. Entering into agreements and bargaining collectively with trade unions does not mean recognition of the "closed shop" unless the agreements so provides. Numerous cases came before the commission where this method of collective bargaining was carried on when both union and non-union men were employed.

Proportional Representation

In view of complaints at several places that legislation enacted at the request and for the benefit of labor was not adequately enforced, nor increased cost of commodities controlled by governments, both local and federal, the commissioners believe that the system of proportional representation from grouped constituencies which has operated in Belgium and Sweden for some years would be well worth serious study by a committee of parliament.

Some means should also be adopted to meet the difficulty in regard to housing accommodation for workers, which has been made impossible by the high price of building land and material.

Restrictions on freedom of speech or the press should not be imposed unless urgently demanded in the interest of the peace of the whole community, and such restrictions should not apply to prevent criticism of legislative or governmental action.

Industrial Councils

"There is urgent necessity," the commissioners say, "for greater co-operation between employer and employed. The great obstacle to such co-operation is the suspicion and distrust with which in many cases each regards the other. It is only fair to say that in many cases the relations between particular employers and their employees were found to be harmonious. In all such cases the guiding principle was a frank recognition by each of the rights of the other. At present the worker has little or no knowledge of the difficulties which beset his employer, the cost of raw material, the working expenses, the competition which he has to meet, the risks of his capital and the margin of profit which he received; and the employer is equally ignorant of the employee's difficulties and viewpoint. This ignorance gives rise to disputes as to rates of pay, hours of labor and the hundred and one questions which could be largely solved if each side understood what the other had to contend with."

As a means of eliminating that suspicion and distrust, and for securing a permananet improvement in their relations and in the conditions of the worker, several forms of joint works committees or joint industrial councils have been adopted and are now in use in England, Canada, Australia, the United States and elsewhere.

The commission outlines and gives suggestions regarding various types of joint industrial councils. Full details of the British so-called "Whitley Plan" were distributed by the commission while on tour. It has been adopted in about 40 large British industries. Its chief features are national and district councils, composed of equal numbers of representatives of employers and employees, and also works (or plant) committees, which need not be equally divided, as decisions must be arrived at by agreement between the two parties. Under the Whitley plan, the councils are workable only when both parties—employers and workers—in the particlar industry are thoroughly organized, as the councils are composed of representatives nominated by the Employers' Association and the trade unions concerned. Each council arranges its own functions, machinery and methods of working. In Toronto a joint council closely resembling a district joint council under the Whitley Plan is in actual operation, in the building trades, and similar councils for those trades are projected in Ottawa and Montreal. There is also in existence a works' committee in the Coughlan Shipyards at Vancouver, and the formation of councils in other industries is under consideration. The purpose of the

STANDARD RELIANCE ASSETS OVER-VALUED

Statement Issued by Receiver Effects Reduction of $3,118,183 in Assets—Nominal Deficit of $352,078—Plan of Reorganization

On June 20th, a statement was issued by G. T. Clarkson, liquidator of the Standard Reliance Mortgage Corporation. This statement indicates that new valuations placed upon the assets of the company will materially affect the outlook of the depositors, debenture holders and shareholders. The statement is as follows:—

The assets of the Standard Reliance Mortgage Corporation, and its subsidiary, the Dovercourt Land, Building and Savings Company, Limited, consist principally of real estate and mortgages, with agreements covering the sale of land. The real estate is comprised almost wholly of improved properties in the central part of the city of Toronto and subdivisions on its northerly and northeasterly outskirts, part within and part without the city limits. The majority of such properties are subject to mortgages; some of them are free from encumbrances.

Mortgages receivable and agreements covering the sale of land consist almost entirely of three classes, namely:—

(1) Loans to the public, secured by real estate, mostly improved property in various parts of Canada;

(2) Loans to companies owning real estate—largely adjacent to Toronto—for subdivision and sale;

(3) Agreements covering property subdivided and sold by the Dovercourt Land, Building and Savings Company, Limited, and other allied companies.

To a large extent the properties covered by classes 2 and 3 are subject to prior encumbrances. The mortgages in class 1 mentioned are mostly first mortgages, obtained to some extent by the corporation by virtue of the amalgamation between the Standard Loan Company and the Reliance Loan Company, and through its acquisition of the assets of the Sun and Hastings Loan Company.

In the statements submitted, real estate appearing upon the records of the companies as of a net book value of $2,593,927, has been included at $1,249,194, a reduction of $1,344,733; in addition, approximately $925,000 has been written off as the difference between book values and the amounts realized from sales of Lawrence Park properties at a recent auction sale. Mortgages receivable and agreements covering sales of land appearing upon the companies' books at $3,445,321, have been included as of a value of $2,596,571—a reduction of $848,750.

In attributing the values above mentioned, effort has been made to be conservative and fair, having regard to the information available within the short period of time at disposal. At the same time it should be fully appreciated that such estimates of value are matters of opinion only. The amounts which will be realized on such assets will in the end, however, depend very largely upon conditions in the future.

The statement of the Standard Reliance Mortgage Corporation submitted shows assets of $4,756,961, against liabilities—excluding capital stock—of $5,109,039, indicating a nominal deficit of $352,078. This statement should be accepted as the best estimate which it is possible to make at this time, and with information available, as to the situation. If transportation facilities in North Toronto, and conditions pertaining to sale of real estate, shall improve in the next year or two, however, it is entirely possible that a higher return may be obtained from the assets than is allowed for in the statement; on the other hand, if general conditions do not lend themselves to the sale of real estate at fair prices, or extended delays take place in the disposition of assets, an increased impairment must be looked for.

The statement of the assets and liabilities of the Standard Reliance Mortgage Corporation as revised to June 18th, 1919, shows:—

ASSETS

Investments in and advances to the Dovercourt Land, Building and Savings Company, Limited, $5,008,162, valued at $2,150,000.

Mortgages receivable and agreements covering the sale of real estate, $2,379,824, estimated value, $1,752,570.

Stocks, bonds and debentures, $453,632; less loans there against, $100,000; $353,632.

Real estate and office premises, $542,566; estimated value, $343,123; less mortgages there against, $33,000; $310,123.

Loans against shares of company, $7,631. Estimated value, $2,500.

Furniture and chattels, $13,966.

Cash on hand and in banks, $146,105.

Rents accrued, $4,379.

Sundry assets, $51,631. Estimated value, $23,683.

Estimated value of assets, $4,756,961.

LIABILITIES

Deposits, $1,032,409; deposit receipts, $216,029; debentures, $4,024,578. Total, $5,273,017.

Less—Securities held by depositors, $100,000; trustee, $70,164. Total, $170,164. Accounts payable and cheques outstanding, $6,186. Total liabilities, $5,109,039.

Nominal deficiency to creditors, $352,078.

Dovercourt Land Values Cut Down

The Dovercourt Land, Building and Savings Co., Ltd. revised balance sheet as of June 18th, 1919, shows:—

ASSETS

Assets pledged or assigned to the Standard Reliance Mortgage Corporation—Real estate and collateral securities appearing upon company's books as of value of $3,932,182, valued at $2,786,832.

Less prior mortgages thereupon, with accrued interest, $1,491,791. Taxes in arrears and for 1919, $131,029. Total, $1,622,821.

Nominal surplus, $1,164,010.

Mortgages and agreements receivable, including those covering Lawrence Park sales, as per company's books, $1,065,497, valued at $844,000.

Rents accrued, $13,224.

A total of pledged assets of $2,021,235.

Assets not pledged—Stocks, bonds and debentures, as per company's books, $431,326. Valued at $97,050.

Loans against securities, book value, $146,132. Valued at $25,106.

Accounts receivable, as per list, $114,388. Valued at $25,000.

Cash on hand and in bank, $1,268.

Furniture and chattels, $3,229.

Total estimated value of all assets, $2,172,889.

LIABILITIES

Standard Reliance Mortgage Corporation—Advances, secured by mortgage and assignments, $3,765,024. Advances, direct, $799,984. Advances, by way of overdrawn account, $33,652. Total, $4,598,662.

Accounts payable, $8,354.

Reserves to cover contingent losses, $84,640.

Contingent liabilities re taxes of British Land Company, Limited, $4,000. A grand total of $4,691,657.

The nominal deficiency is $2,518,768.

Upon the basis of the valuations included in the above statement, the claims of the Standard Reliance Mortgage Corporation against, and its investments in, the Dovercourt Land, Building and Savings Co., Ltd., amounting in all to $5,008,000, would appear to have a value of about $2,150,000.

On July 2nd circulars were issued announcing the plan of reorganization. A new company is to be formed with a provincial charter. Cumulative preference shares are to be issued which will go to the creditors and common shares will be issued to the stockholders. The creditors comprise depositors, debenture holders and others. If this plan is ratified the company will pay interest and make payments on capital account of the shares from time to time as the assets are realized. The proxy form to be sent to each creditor will be accompanied by a statement of the financial standing of the company. The whole of the preferred stock must be paid off, including interest, before the common stock can receive anything.

ROYAL COMMISSION ON INDUSTRIAL RELATIONS

(Continued from page 12)

Whitley works (or shop) committees is to establish and maintain co-operation in all workshop matters.

What is known as the "Colorado Plan" has been adopted, with modifications, in many American plants, and in Canada by the Imperial Oil Co., International Harvester Co., Massey-Harris Co., Vancouver Dairy Co., and several others. Joint committees, composed of equal numbers of representatives of workers and of the company are formed. The workers' representatives are elected by secret ballot in proportion to their numbers, no distinction being made between union and non-union men.

The "Leitch Plan," called "Industrial Democracy," is based on the constitution of the United States. The executive officers of their industry form the "cabinet,' which is primarily an active body with veto powers. The "senate" is elected, and made up of foremen, departmental heads and under-executives. The "house of representatives" is elected by secret ballot by the whole body of workers. The business policy set before the workers is justice, economy, co-operation and service, and they benefit financially by receiving 50 per cent. of the savings on the cost of production.

The commissioners make this comment of the various plans for joint councils: "The essential feature of all the proposals is that the human factor in industry is to be regarded as of first importance. They aim at improving the standard of comfort of the worker by securing a greater measure of close co-operation between him and his employer; of eliminating distrust and suspicion by full discussion of all the facts and circumstances pertaining to the industry. They tend to bring the employee and the employer closer together, and give each a better understanding of the difficulties which beset the other; give the worker a greater sense of responsibility by giving him a greater voice in the government of the industry and thus bring about a permanent improvement in their relations."

The commission believes that in Canada a beginning should be made with joint plant councils and more extensive organizations of district and national councils evolved therefrom as necessity arises. They suggest the following as suitable subjects to be dealt with by the council: 1, wage rates; 2, hours of labor; 3, plant conditions, such as safety, ventilation, light, sanitation, provision for meals, dressing rooms, shelter, etc.; 4, child and women labor; 5, questions of discipline and conduct as between management and workpeople; 6, conditions surrounding the worker outside the plant, such as education, amusement, recreation, health, housing, apprenticeship or special training, libraries, etc.; 7, improvement in the plant or process to improve quality, increased production, decrease waste, etc., and rewards to those who suggest such improvements.

Every council, or by whatever name it may be known, must be the result of the unfettered choice of both the employees and the employer concerned. Any attempt to force a definite plan upon either would be foredoomed to failure. Some machinery should, however, be established to take the initiative and bring the parties together.

The commission, therefore, recommends that the Dominion government should interest itself in the development of these councils, and that a bureau should be established under the minister of labor, which would compile available information and statistics, undertake publication of developments in this and other countries, and maintain officers who would act as between employer and workers, where desire is expressed to create such councils, and render such other assistance as may be required. The usefulness of councils would depend on the spirit in which they are adopted, but the commission believe that nothing but good can result from their establishment in all industries where a considerable number of workpeople are employed.

Minority Report

The minority report of the commission is signed by Senator Smeaton White and Frank Pauze. It finds that, speaking broadly, there does not appear to be any serious unemployment in Canada, although there is a considerable number of unemployed—a condition largely due to an unequal distribution of labor. In regard to industrial councils, the minority report says:—

"Considering the several classes of labor organizations in Canada and the unsettled condition this brings about at present, the Whitley Plan as established in Great Britain would not, in our opinion, be suited to our conditions. In Great Britain both employers and employees have had organizations for a number of years, and their industries in groups of comparatively small geographical area. The British workmen are usually of one nationality, whereas in some plants in Canada employees who appeared before this commission gave evidence that 21 different nationalities were employed in the same plant. It would appear, therefore, without any adverse criticism to the Whitley Plan as proposed in Great Britain, that conditions in Canada, both with regard to the organizations of employers and employees, the varied nationalities and condition to be dealt with make its practicability doubtful in Canada. Although in certain districts, and possibly with certain plants, this scheme might be successfully applied.

"The Colorado plan, or a plan similar to that under experiment by the Imperial Oil Co. and others, would, in our opinion, be more workable."

The minority commissioners did not find any real poverty throughout Canada that was not properly taken care of by local institutions, and the minority report adds: "If a system of old-age pensions, of unemployment insurance, were established, it might seriously affect the ambition of the worker when he had the full enjoyment of his physical and mental capacity. The opportunities afforded to the industrial worker in Canada who has sufficient education to take advantage of them are abundant. In some of the most prosperous manufacturing towns visited it was found that 96 per cent. of the employers had at one time been workmen, rising by industry and thrift to the ownership of an industry."

The minority report concludes: "We would suggest, as a means of permanent improvement in relations between employers and employees that the petition of the mine operators of Alberta, for the establishment of a local court where disputes might be referred without loss of time, be considered, and for the purposes of enforcing the judgments that might be rendered by such court, that the miners' union be urged to adopt some form of incorporation.

"We would also suggest the encouragement of industrial joint councils as established in some large manufacturing concerns in Canada; also that where industrial councils are established that employers and employees be urged to institute forms of co-operative insurance or other provision for pensions to long-term employees, sick or invalided."

MONEY MARKETS

Messrs. Glazebrook and Cronyn, exchange and bond brokers, Toronto, report the following exchange rates to *The Monetary Times*:—

Taxation in Western Cities

An Address Before the Fourteenth Annual Convention of the Union of Saskatchewan Municipalities, Held in Saskatoon on June 25, 26 and 27

By GEO. D. MACKIE, M.E.I.C.
City Commissioner, Moose Jaw

THE subject of taxation is one which is developing from the class of a hardy annual to that of a perennial, and while it would almost seem that everything that can possibly be said on the subject, so far as it affects our own province, has already been said, the interest which the question invariably arouses at our annual gatherings belies this opinion, and it appears, and, in my opinion, appears rightly, that the solution of the question of the "more equitable distribution of taxation according to ability to pay," as the secretary very correctly sets forth in the last of the four points for discussion, is not much nearer solution than it was in 1913 when the tide of real estate speculation had reached its height, and indeed was already rapidly receding.

That the question is of paramount importance to such a gathering as this cannot be gainsaid, as upon the successful outcome of our deliberations depends the contentment, happiness and prosperity of fully a third of the population of our province.

The problems which our legislature has to face are many and varied, but it appears to the speaker that the problems which this, our municipal parliament is called upon to tackle, are greater still. The Hon. Mr. Dunning in his last budget speech told the legislative assembly that the debt of the province had reached a sum of $29,635,906, or $39.83 per capita, but when I tell you that, according to the last annual report of the Department of Municipal Affairs, the debt of the whole of the urban municipalities—i.e., villages, towns and cities in the province, is $37,130,011, or $184 per capita, or nearly 7½ million dollars in excess of the whole debt of the province, you will readily concede the very great importance of our deliberations, and the necessity of our using every means at our command of placing before the legislature in concrete form the result of our discussions here, so that they may be embodied in legislation which will be of lasting benefit to the large population we represent, and safeguard in every possible way their best interests.

DEBT OF URBAN MUNICIPALITIES IN 1917

	No.	Population (1916).	Debt.	Debt per capita.
Villages	304	57,356	$ 603,235	$ 10.51
Towns	75	63,870	5,839,330	91.42
Cities	7	79,921	30,687,346	384.00
Total	386	201,156	$37,129,911	$485.93
Average ..	129	67,052	$12,376,637	$184.58

It is not the intention of the speaker to go into the question along academic lines, nor to discuss pro and con the single tax theory, but rather to address the subject from the practical viewpoint of a ratepayer in any of our urban centres, coupled with the greater knowledge which must necessarily accrue to an official who, from day to day, finds himself confronted with the many inequalities, absurdities and vexations which the systems of taxation as set out in our town and city acts cause.

Addressing the question then from this, if you will, narrow and limited viewpoint, one is compelled to ask oneself what is taxation? What does it mean in and to the urban centres of population in our province?

Professor Tanssig, of Harvard University, says: "The essence of a tax, as distinguished from other charges of government, is the absence of a direct *quid pro quo* between the taxpayer and the public authority. It follows that a tax is necessarily a compulsory levy. . . ." What one pays for a supply of water is in the nature of a price for a specific service; it is very different from a tax which is exacted from all and without any regard to the "individual's use of the services supplied." For example, it is impossible to tell how much an individual is benefited by the maintenance of order through a police force. The only way to support the force is to call upon every one to contribute in some proportion deemed equitable; the service for the maintenance of sanitary conditions is in the same class. It is conceivable that the apportionment of expense for maintaining fire fighting apparatus should be made among the owners of inflammable property, but it is obvious that the whole community is interested in preventing conflagrations, and so this service, too, takes place by way of taxes which disregards any question of special benefit. The provision of adequate streets and highways, the beautifying of urban centres by parks and boulevards, the provision of suitable recreation grounds and the equipping of public libraries, all come under the same line of reasoning. No greater change has come over the civilized world than in regard to education. While it is perfectly feasible to conduct education as a private industry, or to manage it, if public, on a principle of payment in proportion to the expense incurred, nevertheless, it is deemed meet that education should be supplied to all, not on any basis of proportional payment, but in such a way as to uplift and advance the community at large.

Taxation, then, involves a compulsory levy, and the first principle of taxation deals with the mode of apportionment. In seeking a solution to this question no better principle, in my opinion, has yet been set forth, indeed it has become axiomatic, than that laid down by Adam Smith, the Scottish political economist and moral philosopher in his "Wealth of Nations," published in the latter part of the 18th century, where he says: "The subjects of every state ought to contribute to the support of the government, as nearly as possibly in proportion to their respective abilities, that is, in proportion to the revenue which they respectively enjoy under the protection of the state. In the observation or neglect of this maxim consists what is called the equality or inequality of taxation."

Has our government, speaking through the urban acts, endeavoured to follow the above axiom? I think there can only be one answer, and that is "No." Instead of asking all citizens to contribute to the maintenance of their towns, they endeavoured, with the concurrence of a majority of the people at the time, to place the whole, or major portion of the burdens, on real estate, and, as a consequence of failing to observe the axiom above quoted, the system failed to stand the strain of the six years of financial depression through which we have just passed. The error was made of assuming that the influence of social evolution upon values was confined to real estate, and of overlooking both the duty of other classes of property to pay for special service received, and the administrative inefficiency of a single tax to support separate civil divisions of government. It appears to the speaker absurd, so far as urban land is concerned, to say that land only is a community product, and alone should contribute to the community revenue, and that buildings are the product of individual production and should be exempt. There is no such thing as individual production. All wealth is made by exploiting community-made conditions, including the needs and services of labor.

The inconsistency and incongruities of the present system became so marked, that the government, in 1917, ap-

pointed Prof. Haig, of Columbia University, to report on the incidence of taxation in urban municipalities, with the view of having the burden of taxation spread more equitably. Prof. Haig's report was published at the close of 1917, and, whatever may be the criticism of that report, it appears to the speaker that he at least put his finger on the disease and prescribed a course of treatment, which, if followed, would ensure a cure.

Distribution of Taxes

Prior to 1910 the tax base in the cities was distributed almost equally between land and improvements; in 1913 it was almost wholly on land; but while land still forms the base, the burden is being gradually, if perhaps all too slowly, shifted to other shoulders not more willing, but, in the speaker's opinion, more able to bear taxation. This is borne out by the following table which shows the percentages of tax base in 1910, 1913 and 1919 in the city of Moose Jaw:—

	1910.	1913.	1919.
Land (assessed 100%)	52.0	84.6	64.0
Improvements (assessed 60% in 1910, 45% in 1913 and 1919) ..	31.0	9.5	24.7
Business tax	15.6	5.5	8.8
Income tax	1.4	0.4	2.5
	100.0	100.0	100.0

These figures are comparatively true of other cities in the province, though, perhaps, in a lesser degree, as improvements are assessed at a higher percentage in Moose Jaw than in any of the other cities.

The following table, based on Prof. Haig's report, shows the percentage of tax levies in the seven cities for the year 1917. In cases where a business license is imposed, it has been added to the business tax:—

	Land.	Improvements.	Business.	Income.	Total.
Regina	80.1	12.6	6.6	0.7	100.0
Saskatoon	86.2	9.6	3.8	0.4	100.0
Moose Jaw	73.4	20.6	5.7	0.3	100.0
Prince Albert	92.8	5.7	1.5	..	100.0
North Battleford ..	92.0	8.0	..	..	100.0
Swift Current	92.0	3.6	4.4	..	100.0
Weyburn	87.9	7.4	4.7	..	100.0

NOTE.—All land is assessed at 100%; improvements assessed at: In Regina, 30%; Saskatoon, 25%; Moose Jaw, 45%; Prince Albert, 15%; North Battleford, 50%; Swift Current, 15%; Weyburn, 30%.

From the above table it will be seen that Prince Albert looks almost exclusively to land for the raising of its revenue, as it accounts for 92.8 per cent. of its tax levy, while Moose Jaw taxes land only to the extent of 73.4 per cent.

As stated earlier in this report, the speaker does not propose to enter into a discussion as to the merits or demerits of single tax, but this fact stands forth potent to all, that during the years in which urban centres looked to land as the main source from which to derive their revenue, the revenues necessary for the carrying on of the multifarious work of these urban centres failed to produce the revenues required, and towns and cities were driven to expedients of all kinds in the hope and in the endeavor to keep down to reasonable proportions their ever increasing liabilities.

In the city of Moose Jaw, with an area of 9,760 acres, there are approximately 61,600 lots, and the owners of 13,634 of these lots have handed them over to the city rather than continue to pay taxes on them. The total land assessment of the city this year is approximately $15,000,000, and of this amount fully $3,000,000 has to be deducted, being the assessment of the land acquired through tax sale, and, as it is an impossibility to raise the necessary revenue to run the city from the balance of the land assessment, the problem has to be faced, whether to our liking or not, of looking to other sources for the raising of the necessary revenues. This is no question of theory, it is a stern hard fact. It is useless and foolish for cities to continue to assess one-fifth to one-third of the land at assessments which bear no relation to their actual value, for such land cannot produce the required revenue. In addition to the uselessness and folly of such procedure, there is a more serious charge—violation of contract between the community and the land owners, which contract requires in the present state of the law that "land shall be assessed at its fair annual value." This continual violation of contract between the city and the owner, strikes at the root of all progress and results in paralysis. Who can spend money on improvements in a community which ignores the rights of the other party of the contract? "So then, apart from any question of equity, cities must look to some other source than land for the purpose of raising its revenues. But is the raising of taxation by taxing improvements, incomes and businesses, as well as land, inequitable?

Mr. J. N. Bayne, late deputy minister of municipal affairs for the province, says in his report for 1917-18: "In too many instances, the villages which were assessing land only, found themselves exempting from taxation business men with large incomes who were not contributing their just share to the upkeep of the community. 'Ability to pay,' was not recognized in a manner that meant ready revenues for the village concerned, for the more taxes the resident has to pay the more lively should be his interest in the management which receives and spends for him the assessment which he thus contributes." In these remarks the speaker heartily concurs.

Difference Between West and East

Before dealing specifically with the four points under discussion, it might be well for a moment to consider the question: "Why is the taxation problem more acute in the west than in the east." The first point which strikes the observer is the enormous progress which has been made in our urban centres in the last generation. In the short period of twenty years the huge debt which burdens our western cities has been created, resulting in prosperous communities springing up with all the utilities and conveniences which go to build up healthy towns and cities, whereas in the east and in Europe these processes have been going on for centuries, so that the burden does not fall heavily on the present citizen, nor are the interest payments to be met nearly so large as in the west.

This point is borne out by the following table, which has been prepared from the last annual report of the department of municipal affairs, and from the Canada Year Book, 1916-17 edition:—

Name.	Population, 1916 census.	Assessment per capita, 1916.	Debt per capita, 1916.	Tax levy per capita, 1916.
Regina	26,127	$1,662	$402	$46.50
Saskatoon	21,048	1,727	389	43.70
Moose Jaw	16,934	1,554	309	47.35
Prince Albert ..	6,436	2,210	542	57.75
Swift Current ..	3,181	2,647	393	67.76
North Battleford	3,145	2,170	331	60.85
Weyburn	3,050	1,853	280	55.15
Average ...	11,417	$1,767	$384	$48.60
13 eastern towns and cities ..	20,614	805	111	17.48
6 western cities, exclusive of Saskatchewan	25,906	1,294	305	34.77

From this table it will be found that the average assessment in the seven cities of Saskatchewan is $1,767 per capita, whereas the average of 13 cities in the east is $805 per capita, and the average of 6 western cities, exclusive of Saskatchewan is $1,294 per capita. The average debt per capita for the seven Saskatchewan cities is $384, in 13 eastern cities $111, and in six western cities $305. The average tax levy per capita in seven Saskatchewan cities is $48.60, in 13 eastern cities $17,48 and in six western cities $34.77.

Another factor which militates against the continued heavy taxation of land is the enormous area within the muni-

cipal boundaries of our Saskatchewan cities compared with the other cities of Canada. In 67 Canadian towns and cities, the average area is 5,331 acres, whereas the average for the seven Saskatchewan cities is 7,250 acres, or, in other words, the average number of persons per acre in Canadian towns is 7.4, whereas in Saskatchewan it is only 1.2.

Having demonstrated that land cannot pay the taxes on the high assessment which has heretofore been demanded of it, the question naturally arises, what other sources of taxation are available? and in seeking for new sources of taxation the following requisites should be kept in view: (1) They should be capable of being levied with fairness; (2) they should, as far as possible, fit into the existing system and be convenient and economical to collect; (3) they should be conducive to the public benefit.

Tax on Improvements

A tax of 60 per cent. on improvements, in the speaker's opinion, fulfils all the above requisites. It is said that a tax on improvements would lessen buildings, and would penalize the working man in building his home. This, in my opinion, is a fallacy, and is not so in practice, for Moose Jaw, with the highest tax on improvements in the province, has been able to maintain its proportion of the new building in the province. It seems to the speaker absurd that the owner of, say, a six-story apartment block should pay the same tax as a poor man owning a cottage, when the services rendered by a city are ten to twentyfold greater in the one case than in the other. An apartment block, a department store, an hotel, have little value apart from community value, and so should pay their proportionate share of taxation.

Working men, like all occupiers of dwellings, are reached by the taxes on dwellings. They are indeed reached also by the taxes on shops and factories, which enter into the expenses of merchants and manufacturers, and tend with more or less irregularity to be shifted to consumers. But this second sort of shifting is so concealed as to be difficult to follow in any concrete way. Taxes on dwellings, however, so far as they are levied with respect to the structure, increase house rentals unmistakably, and so cause their occupiers, and the workingmen among them, to bear a share of the public burdens.

Mr. Scott, of Winnipeg, places the matter very succinctly when he states: "Take the man who owns a $500 lot in the outskirts of the city. In many cases he will be in a district where there is an absence of permanent improvements, and having to put up with a two or three-plank sidewalk, rough-graded streets and many other inconveniences. If he builds, he will probably, as is generally the case, put up a house of the value of his lot—namely, $500, or perhaps even less. Under these circumstances and under the single tax system, he gets off his assessement $500.

"Now let us look at the rich man. Supposing by way of example, he buys a $20,000 lot in a more favored part of the city, where he has permanent streets, boulevards and every convenience at hand. On this property then he erects a $100,000 residence. What does he get? Under the single-tax system he gets $100,000 off his assessment, or just five times the amount of his lot cost. Compare this with the case of the poor man and you will see how it works."

The speaker has taken some examples at random from the assessment of properties in Moose Jaw, and compared the taxes on these properties this year with what they would be were the tax on improvements increased to 60 per cent., as follows:—

	Assessment.		
	Land.	Improvements.	Taxes.
Store	$72,900	$40,500	$3,969
House	8,910	2,700	406
House	1,600	1,850	121
House	1,100	1,200	80.50
Vacant lot	1,600	....	56.00
Vacant lot	1,100	....	38.50

	Assessment.			
	Land.	Improvements.	Taxes.	% inc. or dec.
Store	$72,900	$56,000	$4,709	+2.7
House . .	8,910	3,600	402	—1.07
House	1,600	2,470	131	+8.2
House	1,100	1,600	86.75	+7.7
Vacant lot	1,600	....	51.45	—8.1
Vacant lot	1,100	....	35.35	—8.1

From these figures it will be seen that the increase on improved property would be from nothing to eight per cent., while in unimproved property the decrease would be eight per cent.

Again, the question may be asked, why decrease the tax on real estate? The answer is that unimproved real estate in cities cannot pay the taxes that are now imposed on it, and if it is to continue to bear part of the burden of taxation some measure of relief must be given to it, and that immediately.

The legislature, at its 1917 session, gave effect to Prof. Haig's recommendations in this connection, and imposed a tax of 60 per cent. on improvements in villages, but when it came to deal with cities it abandoned the idea through pressure of interested parties, mainly in Regina and Saskatoon. The speaker suggests that the legislature reintroduce this provision at the next session, but instead of making the increase 60 per cent. at one jump, insist that each city and town increase the assessment on improvement 15 per cent. each year until 60 per cent. is reached.

Tax on Unearned Increment

Having given real estate the relief which it certainly requires, the urban centres should see to it that a reasonable percentage of the unearned increment on real estate due to the increase and thickening of population and ascribable in a very slight degree, if at all, to the labor or care of the owner, is appropriated to the community. There can be no doubt that the profits accruing from the sale of real estate ought to be the subject of taxation just as much as the profits from the sale of any other commodities.

In the report of the committee on taxation, New York, they say that "land values in a growing city tend to increase notwithstanding periods of temporary regression, and that an increment tax should be imposed on all future increases of land values for the reason that the increment tax, levies a tax where taxation ought to rest, namely, on those best able to pay, and that when a land owner secures an appreciable increase in value of his land through the general growth of the community, a part of it should in equity go to the community." The speaker is, therefore, of opinion that were a tax imposed on the unearned increment it would have a tendency to curb excessive speculation in real estate and prevent a recurrence of the blight which cursed our western country during the last boom, and it would also materially assist in relieving the burden of taxation in the future.

Tax on Income

Turning now to the fourth source of a city's revenue, and one which affords at the present time an infinitesimal amount of a city's income, viz., income tax, one is at once confronted with the fact that while provision has been made in the city Act for the imposing of an income tax, yet the legislature up to the present has given urban centres no adequate machinery to carry out the work of assessing and collecting such a tax. All progressive countries are working toward an income tax, for the very simple reason that it affords a basis of ability to pay. A great many people enjoy from year to year all the benefits, privileges and services of community life without contributing a single cent, unless it may be indirectly, in the form of rent, towards the maintenance of these services, while others contribute much less than their proportionate share towards the maintenance of the cities in which they live, and accordingly the

idea has gained favor of imposing on such individuals an income tax which would assure that every member of the community contributed his share to the running of his city in accordance with ability to pay and benefits received. This question is more or less bound up with the question of business tax, and on the principle that no man should be taxed twice, must be considered along with this subject. The city Act at present assures that where a man is assessed on land and on income, he shall only pay in addition to the amount by which his taxes on such income exceed his taxes on land, and the speaker is of opinion that a similar amendment should be made to the Act dealing with the business tax, so that a man would only pay the amount by which his taxes on his income exceeded his business tax. The assessor has now power to call for a return from all persons in regard to their income, so that in future there should be no great difficulty in locating the taxable persons under this heading in cities and towns. Apart from this addition, however, very great additions will require to be made to the city Act if the income tax is to yield a fair percentage of the city's revenue.

The state of Wisconsin has very successfully operated and enforced an income tax, and a very excellent synopsis of the system appeared in a report by commissioner Yorath, published in 1917. The city of Edmonton has also very successfully enforced and collected an income tax in that city, and to those interested in this subject a copy of their charter amendments dealing with income tax will repay study.

The speaker is of opinion that the committee should draft very full amendments to the city Act dealing with this matter for presentation to the cabinet before the next sitting of the legislature.

Provision should be made for income tax returns being entered in a separate roll; ensuring secrecy of the returns made, defining clearly the meaning of income, and securing payment of the tax where possible at its source as is now the case in the poll tax. As the assessment has now to be completed by the 31st December, returns for income tax should be made sometime in the following year so that the previous year's salary or wage may be ascertained. Were these and other changes made in the Act the speaker is of opinion that a very considerable source of revenue would be derived from this source.

Tax on Business

Dealing lastly with the business tax; the speaker is thoroughly in accord with Prof. Haig, in regard to his recommendation on this question, i.e., that a low business tax on floor space should be imposed, supplemented by an Income tax. The business tax should be uniform for cities and towns of approximately the same population, so that no rivalry might be engendered between different cities. No one can say that the business tax or license as at present imposed is fair as between businesses of the same class or between different businesses. Numerous instances could be given to prove this; for instance, in two confectionery, stores of approximately the same floor space, both stores paying the same business tax, though one is on property assessed at $1,650 per front foot, and the other $100 per front foot, and as a consequence should do and does fifteen times the business of the other.

Much more could be said on this subject, and I have no doubt that many points on which I have not touched will be brought out in our discussion. The question is of outstanding importance in our civic life, as upon the correct and satisfactory solution of the incidence of taxation depends the happiness and prosperity of all our fellow citizens. Our urban centres have gone through a severe time of trial during these years of financial stress and struggle, and there is no doubt that critical and trying years are yet before us, but if we steadfastly set out to solve these problems in the best interest of every citizen, and in the best interest of all our citizens, a solution to these problems will be found, and the villiages, towns and cities of this province, and this great province itself, will embark on an era of prosperity such as the most sanguine of us have never dreamed of.

BORDER CITIES MAINTAIN GOOD BUSINESS

Industries Have Grown During War Period—Situation Attracts Employees as Well as Employers

The municipalities of Ford, Walkerville, Windsor, Sandwich and Ojibway, which comprise what are commonly called the border cities in Ontario, obtained several new industries during the past few years owing to their excellent position just opposite the city of Detroit. Mr. F. Maclure Sclanders, commissioner of the Border Chamber of Commerce, writing some time ago to *The Monetary Times*, said:—

"Briefly, there is ample cause for thorough gratification. Our development has been remarkable. Even the war has not restricted it materially. In August, 1917, we had 152 industries; now we have over 180! Does such development happen by chance?

"Strange that there are still quite a number of otherwise intelligent people farther east who, even yet, cannot divorce us from our recent rural past. To them we still are as we were six years ago—a string of picturesque yet stagnant hamlets fringing the Detroit river on the Canadian side. Probably our wonderful expansion has escaped their attention because it is due almost entirely to American and not Canadian capital and enterprise. Nevertheless, it is here to be seen—but we are only just commencing. Next year promises to do wonderful things for us. Coming events have already cast their glowing shadows before. By the end of 1919 even the most doubting Thomas of the farthest east will no longer deny us a truly metropolitan classification.

"There are several very definite reasons for our rapid growth. One of these is that American manufacturers are becoming more and more convinced that we have here the logical location for Canadian branch factories. Another reason is, that to be attractive to industry, any point must now-a-days, be attractive to labor. To-day, we purchase our pleasures; yesterday we created them. Interesting inexpensive, purchasable pleasures have now become an essential portion of the worker's life. He is no longer content to live and labor amid uninteresting and unjoyous environment when he can earn probably more elsewhere at some bright, happy centre where recreational opportunities abound in infinite variety, and to such a point he naturally gravitates with the enthusiastic endorsation of his wife and family. Labor conditions are always likely to be unsatisfactory now at towns or cities lacking an adequate assortment of interesting amusements for labor's leisure. This new and very important aspect of the situation is swiftly dawning upon our manufacturing world. It is an aspect which has been accentuated and precipitated by the closing of the bars. Yesterday, the cheerful tavern covered a multitude of local lacks. To-day it is no longer.

"Can any other place in all Canada offer the worker anything like the variety and attractiveness of purchasable leisure time joys that are so freely and inexpensively available at these border points? We are nearer to the amusement centres of Detroit than are most of her own dwellers.

"Last season our excursion steamers carried over twelve million people without the loss of a single life.

"However, we have quite a number of other outstanding recommendations which assure us a great future. And we are not daring to say quite as much as to this future as lots of others are. For instance, in a recent report, the extension experts of the Bell Telephone Company, after a long and careful, scientific survey of these municipalities, recommend that all future plant extensions be based upon a city here which, within ten years, shall be second to Toronto only!

"Of course, you are not forgetting that the Canadian Steel Corporation has a two thousand acre site at Ojibway. On this all work preliminary to actual plant construction has now been completed, including miles of paved street, sewer and water systems and great docks. Since the outbreak of war, this corporation's progress was very considerably restricted for purely patriotic reasons. However, the war is no longer. Therefore, it seems reasonable to conclude that in the comparatively near future this will be the great iron and steel centre of Canada. And then the door to unlimited industrial potentialities will be thrown wide open to us.

"Apart from all other factors that make for the upbuilding of any community, it is certain that the human element is ever the most potent; and in this respect we are profoundly blessed. A population increase of over 96 per cent. within six years has given us lots of new blood and bright brains. Our cohesive citizenship is unique and our standard of public spirit singularly high. I do not believe that the quality of our human element was ever surpassed. It is our supreme asset."

"Your Vacation is Planned"

fishing

THEY are biting at Rainy Lakes, Nipigon, Ogakai River, Lake of the Woods, Nagogami River, Kenogami River, Minaki and the Shekak River. With the thrill of new catches lurking at every bend, nook and pool—with the "ever-on" call of the fisherman's sport at its best—each moment knows keen satisfaction. Fish, this year, at the right place! Don't take pot-luck.

"9 Ideal Vacations"

With scenic splendor and sportsman's playground, Canada calls the vacationist! Health and strength renew themselves in the invigorating atmosphere of Cape Breton, Prince Edward Island, St. John River Valley and Muskoka. For the hunter of moose, deer or bear, there is abundant sport in Nova Scotia, New Brunswick, Quebec, New Ontario, and Eastern Manitoba. Great grizzlies and nimble mountain goats draw the sure shot of the hunter in British Columbia.

A Vacation Planned to Meet Your Needs—Choose!

A wonder panorama unrolls before the traveler through the Canadian Rockies, Matapedia Valley, La Baie de Chaleur, Gaspe, Cape Breton, and along the ocean shore of Nova Scotia. History is animate in the ancient streets and dwellings, and in the quaint environs of Quebec, Montreal and Halifax. If you have only a few days, spend them joyously at Muskoka, Sparrow Lake or the Maritime Provinces. If you wish to combine business with pleasure, visit Western Canada, and such thriving cities as Winnipeg, where you "hear" opportunity grow.

SALE OF TIMBER BERTHS

Tenders will be received by the undersigned up to and including Wednesday the sixteenth day of July next, for the right to cut the Red and White Pine Timber on the following Townships, viz.:—

District of Algoma.	District of Sudbury.
Mississaga Forest	Township of Teffer
" Reserve	" " McConnell
Township "C"	" " McNish
	" " McNamara

District of Nipissing.

Township of Kenny	Township of McLaren
" " Sisk	" " Charlton
" " McCallum	

Also, tenders will be received by the undersigned up to and including Wednesday the Sixteenth day of July next, for the right to cut various classes of timber on Township "U," in the Mississaga Forest Reserve, in the District of Algoma.

The terms and conditions of the sale, containing full particlars, and also maps showing the berths offered for sale, may be obtained upon application to the undersigned, or from Mr. Charles Henderson, Crown Timber Agent, Sudbury, or from Mr. J. T. McDougall, Crown Timber Agent, North Bay.

G. H. FERGUSON,
Minister of Lands, Forests & Mines.

Toronto, May 14th, 1919.

BOND INTEREST OF INSOLVENT CORPORATIONS

Interest Does Not Cease When a Company Goes Into a Receiver's Hands According to United States Decisions

If a corporation issues bonds, and later on a receiver is appointed, does the appointment of the receiver stop the running of interest on the bonds?

This point came up in the case of Spring Coal Company vs. Keech, decided by the United States Circuit Court which turned upon the question of the liability to pay interest on the corporation's mortgage bonds held by unsecured creditors after the appointment of a receiver for the corporation.

In this case a Virginia corporation had issued and sold bonds exceeding $200,000 and later on the United States District Court appointed a receiver for the corporation in the usual way. The property was operated by the receiver for about four years, and operated very successfully, the profits of one department alone amounting to more than the outstanding bonds.

The question for the decision of the Court then was whether the appointment of the receiver stopped the running of interest on the bonds, and the decision of the Circuit Court of Appeals was that it did not.

Bondholders Should Not be Deprived of Rights

"In the case now under consideration," said the Court, "the deed of trust not only secured the payment of the principal of the bonds, but it specifically provided that in case of receivership, the profits arising from the operation of the mine should be applicable to the interest due or to become due during the receivership, indicating clearly as language can, the intention of the parties that the bonds should bear interest in case of a receivership. Under the terms of the contract, it was not only in the contemplation of the parties that the bonds should bear interest during the receivership, but such interest was made a lien, not only on the property included in the deed of trust, but upon proceeds from the operation of the property. This application was not made. The $282,000 of net profits which accrued from the operation of the mines was applied to preferred claims upon the real estate, but not to the preferred claims upon the profits arising from the real estate. That inured greatly to the benefit of non-lien creditors. As the property embraced in the deed of trust sold for a sum exceeding the principal and interest, the holders of the bonds and the coupons thereto attached are entitled to be paid in full, not only according to the terms of the contract, but, as we believe, under the general principles of equity. It would be highly inequitable to deprive lien creditors of interest for more than four years, while the mines were profitably operated for the benefit of the non-lien creditors."

Supreme Court Decision to Same effect

The same rule has been laid down by the United States Supreme Court in the case of American Iron and Steel Company vs. Seaboard Air Line Railway, where Mr. Justice Lamar says:—

"In the discussion as to the answer which should be given that question, the railway company insists that, whether treated as part of the debt or allowed as damages, interest can only be charged against the railway because of delay due to its own fault, while here the failure to pay was due to the act of the law in taking its property into custody and operating the same by receivers in order to prevent the disruption of a great public utility. And it is true, as held in Tredegar Company vs. Seaboard Air Line Railway Company, 105 C.C. A 501, 183 Fed. 290, that as a general rule, after property of an insolvent is in custodia legis interest thereafter accruing is not allowed on debts payable out of the fund realized by a sale of the property. But that is not because the claims had lost their interest-bearing quality during that period, but is a necessary and enforced rule of distribution, due to the fact that in case of receiverships the assets are generally insufficient to pay debts in full. If all claims were of equal dignity and all bore the same rate of interest, from the date of the receivership to the date of final distribution, it would be immaterial whether the dividend was calculated on the basis of the principal alone or of principal and interest combined. But some of the debts might carry a high rate and some a low rate, and hence inequality would result in the payment of interest which accrued during the delay incident to collecting and distributing the funds. As this delay was the act of the law, no one should thereby gain an advantage or suffer a loss. For that and like reasons, in case funds are not sufficient to pay claims of equal dignity, the distribution is made only on the basis of the principal of the debt. But that rule did not prevent the running of interest during the receivership; and if, as a result of good fortune or good management, the estate proved sufficient to discharge the claims in full, interest as well as principal should be paid. Even in bankruptcy, and in the face of the argument that the debtor's liability on the debt and its incidents terminated at the date of adjudication, and as a fixed liability was transferred to the fund, it has been held, in the rare instances where the assets ultimately proved sufficient for the purpose, that creditors were entitled to interest accruing after adjudication."

WORLD'S PRODUCTION OF FIELD PRODUCTS

Statistics have been compiled by the International Institute of Agriculture showing the production of various grains and vegetables in the leading producing countries of the world. The Canadian government is a member of this institute, Mr. T. K. Doherty being our representative. Statistics for the year 1918 are, of course, not altogether completed and methods of compiling are not the same in each country. Those given herewith, however, indicate, at least, that production of most grains was considerably greater than during the year 1917.

Countries.	1918. Bushels.	1917. Bushels.
United States	918,920,000	650,828,000

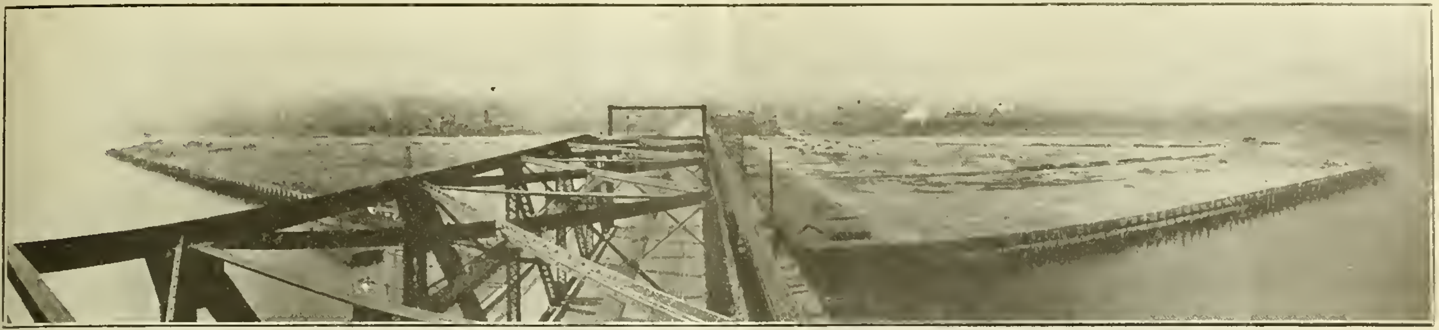
ALGOMA STEEL PLANT TO BE ENLARGED

It has been decided by the Lake Superior Corporation to begin work immediately on an extension of the rail mill of the Algoma Steel Co.'s plant at Sault Ste. Marie, Ont.

The purpose of the extension is to make possible the production of structural steel up to 23 inches. Work will be begun at once, and the extension will cost several hundred thousand dollars. It is expected to be completed by November. It has been stated that this is but the first step in a considerable development of the plant, with a view to further caring for the Canadian market for this form of steel product, and that the ultimate scheme will be on a large scale. The present extension is not made with any understanding with the Dominion government, but is said to be based on the expectations of the market for Canadian produced steel, which is expected to extend on a large scale. The rail mill of the Algoma Steel Co. is now running at about 46 per cent. capacity, and the other portions of the steel plant are going at about full capacity.



VIEW OF INDUSTRIAL ISLAND IN THE FALL OF 1917—SHORTLY AFTER COMPLETION OF RECLAMATION WORK.

INDUSTRIAL ISLAND

offers exceptional advantages for
manufacturers locating in

VANCOUVER, B.C.

Industrial Sites available at moderate rental on 21 year lease with renewal option for two additional 21 year terms.

NINE blocks from city's retail district.

Electric light and power — water — gas —sewerage.

Ample fuel supply — coal — wood — oil always assured.

Railway trackage to every site.

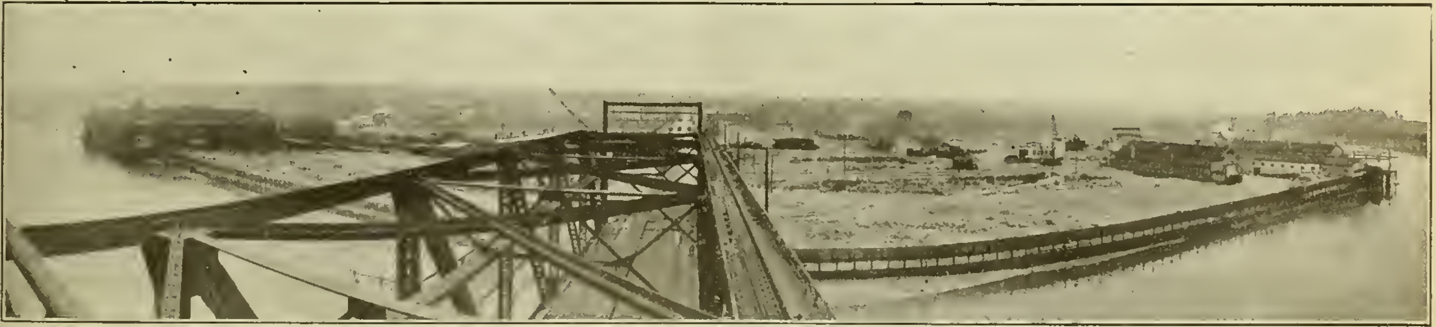
Deep sea wharfage on harbor open all year round.

ABUNDANCE of raw materials right at hand—from forest —from mine — from sea—from field.

Exceptionally favorable climate — winter and summer.

Full particulars furnished bona fide enquirers. State definite points on which information is desired. Address :

J. R. DAVISON
Civic Industrial Commissioner
402 PENDER ST. WEST, VANCOUVER, B.C.



VIEW OF INDUSTRIAL ISLAND, JUNE, 1919—SHOWING NUMEROUS INDUSTRIAL PLANTS NOW IN OPERATION.

That Boy of Yours

What's to become of the lad in case you should die suddenly? Will he, at fourteen or earlier, be forced out into the world to earn a living?

Or will you make sure that he gets a proper start in life? You can do it, whether you live or die, by means of an Imperial Endowment policy.

Write for our free booklet which tells all about it.

EMPLOYMENT REPORTS LESS FAVORABLE

The trend of the reports issued by the Employment Service of the Department of Labor from the middle of April to June 14th, was in the direction of substantial increases in the amount of employment in Canada. The report for the week ended June 21st, shows a set-back.

Final returns for the week ending June 14th, showed that 2,471 Ontario and Quebec firms with a payroll of 343,974 persons had actually increased their staffs by 3,821 persons or 1.12 per cent during the week and anticipated making a further net addition of 1,609 persons or 0.47 per cent. during the following week. Preliminary returns for the week ending June 21st, seem to show that this anticipation was not realized, though supplementary reports may alter the situation somewhat. For June 21st, the reports of 2,105 employers with a payroll of 286,913 persons have already been compiled. These employers had actually decreased their staffs during the week, though the decrease was only a slight one, amounting to 510 persons or only 0.18 per cent. of the total number of persons on their payroll. On the other hand during the week ending June 28th, the 2,105 firms expected to make a net addition of 1,819 or 1.63 per cent. of the number of persons on their payrolls.

This increase was anticipated in 16 out of the 17 industrial groups. Of these 16 groups the following had shown actual increases during the week ending June 21st:—

Clay glass and stone products; food, drink and tobacco; leather and leather goods; the metal trades; textiles; quarrying and mining; railroad construction; railway operation; and miscellaneous occupations. Of the seven remaining groups, building and construction showed on actual decrease of .55 per cent. in the week of June 21st, and an anticipated increase of 3.19 per cent. during the week of the 28th. For the chemical industries the corresponding figures are .52 per cent. and .46 per cent.; for manufacture of wood products .63 per cent. and .40 per cent.; for pulp, paper and printing .96 per cent. and .32 per cent.; lumber 1.36 per cent. and .79 per cent.; while the commercial and mercantile groups registered a slight decline.

The largest single decline during the week ending June 21st, was in the vehicle group, where two firms showed a decline of 686 persons or 1.83 per cent. A further decline, however, was not anticipated during the week ending June 28th.

These figures do not take any account of strikes.

INVERNESS RAILWAY AND COAL COMPANY

In the Supreme Court of Nova Scotia on June 24th, notice was given of the intention of the National Trust Company to foreclose its mortgage on the railway property of the Inverness Railway and Coal Company. This company has employed about 700 men in its coal mining operations at Inverness, N.S., and about 300 on the railway line which connects Inverness with Point Tupper. The reason given for the foreclosure is that for the past few months the railway has been run at a loss owing to the increase in wages and the cost of material. The manager, Mr. John MacGillivray, has resigned and the court has appointed the Eastern Trust Company as receiver in his place. The motion has been adjourned by the court until July 29th.

OTTAWA'S AGREEMENT WITH GOVERNMENT

The agreement existing between the city of Ottawa and the Dominion Government, which expired on June 30th, provided that the Ottawa Improvement Commission was to receive $100,000 and the city $15,000 for services rendered the government. Civil servants were also to be exempt from city income tax.

A new agreement has been reached which was approved by the cabinet and upon being submitted to the city council on June 30th, was ratified by the latter. A bill putting the agreement into force is to be introduced into the House. The new agreement provides that the Ottawa Improvement Commission is to receive $150,000 per annum from the government and the city is to receive $75,000 per annum. The government is also to pay for water at the rate of thirteen cents per thousand gallons for the first two hundred million gallons and ten cents per thousand gallons for any water used over this amount. Water rates at the ordinary charge will be collected from buildings leased but not owned by the government. Under the previous agreement these were exempt.

The government also makes no stipulation as to the exemption of civil servant's income from civic taxation. It is estimated that at current rates the city will derive between $50,000 and $60,000 from this source.

WORLD'S SUGAR SUPPLY

The following is a statement given out by Czarnikow Rionda Company, of New York, showing the sugar production of the whole world for the past five years. This table shows that in the five years, while the production of cane sugar has increased 2,717,770 tons, the production of beet sugar has decreased 4,794,992 tons, showing a decreased production of the world's output of sugar for the five years of over two million tons. It will also be seen by this table that Cuba now produces one-fifth of the total sugar output of the world:—

Production of cane sugar in the world during the years 1914 to 1918:—

	1918. Tons.	1917. Tons.	1916. Tons.	1915. Tons.	1914. Tons.
Cuba	3,350,000	3,023,720	3,007,915	2,592,667	2,597,132
United States, including Porto Rico, Hawaii and the Philippines	2,150,684	1,454,018	1,585,727	1,256,632	1,325,921
South America, Mexico, Central America and West Indies, excluding Cuba	1,386,076	1,251,143	1,243,338	1,437,744	1,246,663
Asia	5,420,064	4,760,200	4,237,794	4,025,618	3,840,730
Australia and Fiji Islands	440,887	292,831	249,681	348,408	355,000
Africa	539,000	522,647	511,822	523,788	474,664
Europe	6,000	4,533	4,227	7,376	13,231
Total	12,572,711	11,309,092	10,840,504	9,804,941	9,854,941

Production of beet sugar in the world during the years from 1914 to 1918:—

	1918. Tons.	1917. Tons.	1916. Tons.	1915. Tons.	1914. Tons.
Europe	2,750,000	3,448,295	4,853,083	5,189,987	7,556,686
United States	655,000	682,867	734,577	779,756	646,257
Canada	17,000	11,250	12,500	17,641	13,979
Total	3,422,000	4,142,412	5,606,160	5,987,384	8,216,922
Total cane and beet sugar	15,994,711	15,451,504	16,440,664	16,179,617	18,071,863

REPORT ON CANADA FOR BRITISH TRADE

The report for 1918, issued by British Trade Commissioners in Canada on the trade of Canada and Newfoundland, contains comprehensive information of industry here. The conditions which must be met by British exporters are specially emphasized. Included in the report is a detailed report on the trade of Ontario, prepared by Mr. F. W. Field, British trade commissioner for the province

SANDWICH, WINDSOR & AMHERSTBURG RAILWAY

Negotiations which have been carried on between the Ontario Hydro-Electric Power Commission and the Sandwich, Windsor and Amherstburg Railway with a view to the purchase of the latter by the Commission have failed, according to an announcement made on June 30th, by Sir Adam Beck, chairman of the commission. He stated that they had offered as much as they could for the light and power plant. Even at this price it would have been necessary for the commission to charge higher rates than the railway is now doing.

NEW CHARTERED ACCOUNTANTS IN ONTARIO

The following candidates have passed the final examination of the Institute of Chartered Accountants of Ontario: Leonard W. Archer, Norman B. Banks, Walter G. Berner, Richard H. Bounsall, Thomas J. Burke, Wm. Carswell, Henry H. Gawthorp, Geo. F. Glatt, William F. Houston, Rice L. Johnston, Francis C. Martin, Chas. H. Pelling, C. Percy Roberts, S. Alex. Taylor, Paul H. Wilkes. Past President's Scholarships—Final—George F. Glatt. Intermediate—David Vise. Primary—H. A. Watson. Institute Scholarships—Final—Francis C. Martin. Intermediate—David Vise. Primary—A. S. Currie.

MANITOBA CHARTERED ACCOUNTANTS MEET

The annual meeting of the Institute of Chartered Accountants of Manitoba was held on June 26th. The president, Mr. John Parton, was in the chair. One of the subjects under discussion was the coming annual meeting of the Dominion Association of Chartered Accountants which is to be held in Winnipeg on September 9th, 10th and 11th.

The following members, elected by acclamation, comprise the council for the ensuing year:—

S. G. Brown, F. C. Gilbert, W. D. Glendinning, William Gray, B. F. Griggs, W. A. Henderson, John Parton, E. S. Read, R. A. Roberts, W. H. Ronald, F. C. S. Turner, David Young. The auditor elected is T. H. Rathjen.

POSSIBILITIES IN AGRICULTURAL SETTLEMENT

On June 25th Mr. Christopher Turnor, of the Royal Colonial Institute, addressed the Montreal Board of Trade on "The Settlement of Ex-Service Men on the Land." This is an important question, he said, both in England and Canada, owing to the decrease in agricultural population. The British Empire, he said, controls one-fifth of the land of the world, and yet has only 13,400,000 agricultural workers, while the German Empire in Europe alone has 21,000,000. The remedy he proposed is community settlement, which will avoid the social disadvantages of rural life, and also ensure the greatest productivity of the land in comparison with the capital available. He suggested groups of not less than one hundred to two hundred, each of which should have as a centre an experimental farm. All supplies could be purchased co-operatively and agricultural implements centralized.

WESTERN BANKERS HOLD CONFERENCE

About eighty managers of the Canadian Bank of Commerce in Alberta and Saskatchewan held a conference in Edmonton on June 23rd to discuss matters of common interest in the way of increasing the efficiency and service of the bank. This conference was to have been held some weeks ago, but was postponed on account of the Winnipeg strike.

CHANGE IN WAR SERVICE GRATUITIES

The Dominion Government has passed an order-in-council providing that the war service gratuity will now be paid on the higher scale to all who served overseas. Under the previous regulations the higher scale was retroactive beyond November 11th, 1918, only with respect to such men as had served in an actual theatre of war. With respect to those who served only in Canada the regulation is made retroactive beyond November 11th, 1918, to those who served for a period of one year or over.

LARGE STEEL INDUSTRY FOR TORONTO

According to information given out by R. Home Smith, Toronto is to have a steel and metal plant on the site of British Forgings at Ashbridges Bay, with a capital of $3,000,000. Mr. Smith said: "After much trouble and negotiating we have persuaded Messrs. Baldwins, of Swansea, Wales, to found a plant of steel sheets and other metal products, valued at between $2,000,000 and $3,000,000, on the site of the British Forgings. At the initial stages 2,000 men will be employed, and there is no reason to doubt that ultimately employment will be given 10,000 men."

NOVA SCOTIA TRAMWAYS AND POWER COMPANY

On June 25th application was made to the Nova Scotia Public Utilities Board by the Nova Scotia Tramways and Power Co., Ltd., for authority to issue coupon notes to the amount of $1,000,000. The money is required for new construction work and other improvements in the physical properties of the company. The action of the directors in originating the application was approved at a meeting of the shareholders, held a short time ago. The decision to issue short-term notes was reached when it was found that bonds could not at the present time be sold on a satisfactory basis, and it was not considered advisable to issue preferred stock.

BRITISH INSURANCE FIRM ENTERS CANADA

Announcement has been made of the entrance into Canada of the firm of Messrs. G. U. Price and Co., Ltd., insurance brokers, London, England, and offices have been opened in the Bank of Toronto building, Montreal, Que. Messrs. C. E. Hull and W. B. Robertson have been appointed joint directors, the former to manage the liability and casualty department, and the latter the fire department.

These gentlemen until recently have been associated with Messrs. Irish and Maulson, Ltd., Montreal. Mr. Hull, who is a member of the New York bar, is well known in liability circles, and has been in Montreal for about five years. Previous to that time he acted as adjuster in various cities for the Travelers, of Hartford. Mr. Robertson has had an extensive training in fire insurance in Scotland, and was associated with the London Assurance Co. here prior to becoming assistant manager of Messrs. Irish and Maulson, Ltd. Mr. Robertson is an associate of the Chartered Insurance Institute, and is well known locally, being secretary of the Montreal Assurance Association.

SECURITY VALUES AND THE INCOME TAX

Income Required from Taxable Security to be Equivalent to Tax Free Income

THE strength of Canadian war loan bonds in the market is partly accounted for by the increases in the income tax which were announced by Sir Thomas White in his budget speech on June 5th and which were anticipated before that date. Advances of a point were made by some of the issues within two or three days. The tax exemption is, of course, of special value to the man of large income; the value of the privilege appreciates in proportion as the income tax rate increases. The investors are frequently uncertain, however, as to just what is the difference in their own case between the yield obtained by investing in a tax-free security and that from a taxable security, after paying the income tax. The table given below shows what taxable income is required to be equivalent to a tax-free income for any rate of income tax from four to thirty per cent. For instance, when the rate is five per cent., a taxable income of $105.26 will be equivalent to a tax-free income of $100, this may be easily checked by deducting the income tax at the rate of five per cent. This ratio will not, of course, apply to that part of an income which is exempt:—

Tax rate.	Ratio.
4	100 96=104.17
5	100 95=105.26
6	100 94=106.38
7	100 93=107.53
8	100 92=108.64
9	100 91=108.99
10	100 90=111.11
11	100 89=112.36

The Mutual Life Assurance Company of Canada, of Waterloo, Ontario, has been unanimously elected to membership in the Association of Life Insurance Presidents, bringing the total of members up to forty-one companies.

WESTERN CANADA RESOURCES EXCURSION

What is known as the "Annual Western Canada Resources Excursion," took place between the dates of June 19th and 24th. About 150 American bankers, financiers and prospective settlers arrived at Winnipeg on their way to inspect western Canada's attractions and resources.

Stops of various duration were made at points in Alberta, Saskatchewan and British Columbia. Some of the party went south to Vancouver, Victoria and Seattle.

$2,000,000 FOR ST. JOHN HARBOR

At a meeting of business men of St. John, N.B., in the board of trade rooms last week, the acceptance of the sum of $2,000,000 from the Federal government for the transfer of St. John harbor to the Dominion harbor, was favored. The only dissenting voice was that of Commissioner Bullock, who held out for $2,200,000.

CANADIAN REFUNDING LOAN ARRANGED

Arrangements have already been made in New York for financing there the Canadian Government two-year 5 per cent. unsecured gold notes which mature on August 1st. The total of this issue was $100,000,000, and most of it was originally sold in New York, but it is estimated that the amount held in the United States has been reduced to approximately $75,000,000. The present plan is to borrow $75,000,000 there to meet these bonds when they are presented. The finance minister is to make a formal announcement of the terms in a few days. A special conference was held at the office of J. P. Morgan and Co. on July 1st in this connection. It is expected that the bonds will be for a long term, and the cost to the Canadian Government will be about a 5½ per cent. basis.

HYDRO-RADIAL BY-LAW PASSED AT BRIDGEBURG

The Bridgeburg and Fort Erie councils, Ontario, have passed the necessary enabling by-laws, covering the construction through the frontier towns of the Welland, to Port Colborne to Bridgeburg hydro-radial line.

The Bridgeburg and Fort Erie councils took this action at meetings just held. The cost of the lines, it has been learned, will be $2,208,716, of which Bridgeburg's share will be $90,422; for Erie, $14,297. The difference of the amounts is due to the fact that Bridgeburg, like Welland, will be one of the two terminals. Welland's share will be $166,920.

The above does not mean the actual expenditure of that amount of money, but the guarantees in which the municipalities lay themselves responsible for covering the cost of the line. Sir Adam Beck has promised an early start on the line.

WHY THE "MUTUAL LIFE OF CANADA" IS SO POPULAR

The Mutual placed upon its books in the first five months of 1919 100% more business than in the corresponding months of 1918. The wonderful war-record of the Mutual Life and the prompt payment of the many unexpected claims during the recent epidemic—these have proved the value of the institution. The Mutual moreover, is in a peculiar sense a people's company, being in its control democratic, in its economy strictly co-operative. This means that the system is in line with the "spirit of the age," and so the people naturally turn to the Mutual. The record of the Company for nearly half a century has been one of increasing beneficence, and an ever-growing number of gratified policyholders help on the good work of the agents. As a result, there probably is not a more prosperous group of workers in Canada to-day than the representatives of our Company.

"Be a Mutualist."

LIFE INSURANCE

gives affection a place to stand and a lever with which to work. It transforms forethought and goodwill into practical helpfulness and well-being. It enables us to realize for loved ones the hopes we cherish for them.

And this wise forethought may, under The Great-West Plans, be accomplished at a net cost surprisingly low.

Ask for rates, giving date of birth.

The total since January 1st is 12,084,845 pounds, or 6,042.4 tons.

BANK BRANCHES OPENED AND CLOSED IN MAY

There were 84 branches of Canadian banks opened in May and two closed, according to the June number of Houston's Bank Directory, the Union Bank of Canada and Banque Nationale leading with 12 branches opened. The following is a list of banks and the number of branches opened:—

Union Bank of Canada	12
Banque Nationale	12
Canadian Bank of Commerce	11
Royal Bank of Canada	9
Merchants Bank of Canada	7
Imperial Bank of Canada	6
Provinciale Banque	6
Bank of Montreal	5
Bank of Nova Scotia	4
Molsons Bank	4
Standard Bank of Canada	3
Bank of Toronto	2
Dominion Bank	1
Sterling Bank of Canada	1
Bank of Hochelaga	1
Total opened	84

The two branches closed are as follows:—

Iroquois Falls, Ont.	Imperial Bank of Canada.
Ottawa, Ont. (Sparks Street).	Banque Nationale.

Of the 84 branches opened, 27 were sub-branches.

BANK BRANCH NOTES

The following is a list of branches of Canadian banks recently opened:—

Harvey Station, N.B.	Royal Bank of Canada.
Moncton, N.B. (St. George St.)	Royal Bank of Canada.
Georgetown, P.E.I.	Canadian Bank of Commerce.
Lomond, Alta.	Bank of Hamilton.
Creston, B.C.	Imperial Bank of Canada.
*Michel, B.C.	Imperial Bank of Canada.
Darmody, Sask.	Weyburn Security Bank.
Stoughton, Sask.	Weyburn Security Bank.
Chicoutimi, Que.	Bank of Montreal.

---

*Sub-branch.

The Royal Bank of Canada has made a formal announcement of the opening of the branch at 28 Rue du Quatre-Septembre, Paris, France. Mr. William Warren has been appointed manager and Mr. N. G. Hart assistant manager. The Royal Bank now has 510 branches throughout Canada and Newfoundland and 67 foreign branches.

The Canadian Bank of Commerce has closed a branch at Whitecourt, Alta.

The Union Bank of Canada has made the announcement that Messrs. A. E. Harris, C. W. Small, J. C. Blair and Sir Keith Price have been appointed members of the London, Eng., advisory committee. The Union Bank also has an advisory committee in New York City composed of Brig.-General Cornelius Vanderbilt, Mr. Stuyvesant Fish and Mr. Gilbert Thorne.

The Bank of Montreal has announced its advent into the French banking field in the opening of the Paris office on July 1st, 1919. The French company, with the title of the "Bank of Montreal (France)," will be under the management of a Canadian, W. F. Benson, for some years assistant manager of the bank's office in London, England. H. J. E. Pope will occupy the position of assistant manager.

PERSONAL NOTES

Mr. R. T. Couch, manager of the mortgage department of the Crown Life Insurance Company, has been appointed treasurer of the company.

Mr. B. H. M'Creath, assistant manager of the Toronto Daily Star, has resigned to become vice-president of the Lake Huron Steel Corporation.

Mr. Robert W. Reford, president of the Robert Reford Company, Limited, has been elected to the board of directors of the Cunard Steamship Company, Limited.

Mr. H. B. Witton has been elected chairman of the board of directors of the Tucketts Tobacco Company, Ltd., and **Howard S. Ambrose** has been elected president.

Mr. T. T. Smyth, who has been with the Montreal City and District Savings Bank for the last twenty-five years, has been appointed assistant general manager.

Mr. R. B. Teakle, formerly with the Franco-Canadian Steamship office in Boston, U.S.A., has been appointed manager of the Canadian Government Merchant Marine, Limited, with headquarters at 230 St. James Street, Montreal, Quebec.

Mr. R. T. Riley, managing director of the Northern Trust Company and of the Northern Mortgage Company of Winnipeg, and also a vice-president of the Union Bank, recently returned to Winnipeg after a journey through Western Canada. He reports that labor difficulties in British Columbia and Alberta, especially in the coal mining industry are having serious effects. The crop outlook at the time of his visits was generally speaking not satisfactory although in some sections a good yield was anticipated.

ADDITIONAL INFORMATION CONCERNING FIRES ALREADY REPORTED

Chinook, Alta.—June 8—The garage, owned by P. M. Brownell, was destroyed. Estimated loss, $10,000. Insurance carried by the Canada Fire, $5,900.

Ontario.—The Fire Marshal of Ontario submits the following report to the Public Service Bulletin for the first four months of 1919:—

	No. of fires.	Loss.	Insurance loss.	Loss not covered by insurance.
January	686	$736,529	$543,681	$192,848
February	708	496,753	364,109	132,644
March	832	795,791	618,555	177,236
April	808	644,935	493,255	151,680

Toronto, Ont.—The fire loss for the first six months of 1919 is $341,613. The losses for the month of June were $26,712. The following is a table for the past six months, showing the loss to buildings and contents:—

January	$ 32,968
February	54,203
March	63,169
April	153,701
May	10,860
June	26,712
Total	$341,613

Winnipeg, Man.—June 15—The premises of the Winnipeg Brick Co., Ltd., were damaged. Estimated loss, $28,000. Insurance carried, $21,000. The following companies are interested: Canadian Fire, Arcadia Fire, American Insurance, General Fire Insurance, Ætna Insurance Co., Continental, London and Lancashire, Canadian National Fire, Fidelity-Phenix, National Fire Insurance, Ocean Accident, Guarantee, Imperial Underwriters.

Miniota Farmers' Mutual Fire Ins. Co., Beulah, Man.
Royal Victoria Mutual Fire Ins. Co., Beulah, Man.
Urban Mutual Fire Insurance Company, Portage la Prairie, Man.

SASKATCHEWAN FARMERS WRITE THESE COMPANIES:

Miniota Farmers' Mutual Fire Ins. Co., Beulah, Man.
Saskatchewan Farmers' Mutual Fire Insurance Co., Saskatoon, Sask.

ALBERTA FARMERS WRITE THIS COMPANY:

Western Mutual Fire Insurance Co., Didsbury, Alta.

Western Canada Mutual Fire Insurance Association

M. G. DOYLE, Pres. Beulah, Man.
STRATTON WHITAKER, Vice-Pres. Portage la Prairie.
S. J. CAUGHT, Sec., Saskatoon, Sask.

GOVERNMENT AND MUNICIPAL BONDS

British Columbia Issue Sold on Good Terms—Western Municipalities in Market

THE largest transaction in the bond market during the past week was the sale of $3,000,000 of British Columbia bonds on June 28th, to a Toronto syndicate. Ontario has also placed an issue with Toronto firms by private arrangement. Outside of these two large transactions there have been a number of substantial municipal sales, particulars of which will be found below. Several western municipalities are also going into the market and Saskatoon alone requires almost $600,000.

The following is a list of debentures offered for sale, of which particulars appear in this or previous issues of *The Monetary Times*:—

Borrower.	Amount.	Rate %.	Maturity.	Tenders close.
Mimico, Ont.	$ 55,000	5½	30-years	July 5
East Whitby Township, Ont.	61,000	5½	25 & 30 instal.	July 7
Smith's Falls, Ont. .	11,514	5½	20-instal.	July 7
Red Deer, Alta. ...	90,000	6	10-instal.	July 10
North Sydney, N.S.	35,000	5½	20-years	July 10
New Glasgow, N.S.	55,000	5½	15-years	July 19
Saskatoon, Sask. ..	238,377	5 & 5½	Various	July 21
Lancaster Tp., Ont.	100,000	5½	25-years	Aug. 15

The following quotations of active bonds are supplied by the National City Co., Ltd., and are in New York funds:—

	Bid.	Offered.
Anglo-French 5% (Oct. 15, 1920)	97¼	97⅜
United Kingdom 5½% (Nov. 1, 1919) ..	99 11/16	99 13/16
United Kingdom 5½% (Nov. 1, 1921) ..	98¼	98½
United Kingdom 5½% (Feb. 1, 1937) ..	98⅞	99⅛
Canadian Pacific 6% (Mar. 2, 1924) ...	101	101⅜
City Paris 6% (Oct. 15, 1921)	97¾	98
Dominion Canada 5% (Aug. 1, 1919) ...	99⅞	100
Russian Govt. Ext. 5½% (Dec. 1, 1921)	50	52
Russian Govt. Ext. 6½% (July 10, 1919)	56	58
Swedish Govt. 6% (June 15, 1939)	99⅜	99⅝

Edmonton, Alta.—The city needs $200,000 for improvements to Jasper Ave.

St. Vital, Man.—An election was held on July 2nd to vote on a by-law to issue $100,000 debentures.

St. Stephen, N.B.—An issue of $50,000 5½ per cent. 20-year bonds has been sold locally at 101½.

Renfrew County, Ont.—The council will raise $150,000 by debenture issue for a good roads system in the county.

Caledonia, Ont.—A by-law has been passed authorizing the issuance of $2,000 6 per cent. 20-instalment road debentures.

Sandwich, Ont.—A by-law has been passed authorizing the issuance of $50,000 6 per cent. 30-instalment school debentures.

Edmundston, N.B.—The Municipal Debenture Corporation has been awarded an issue of $90,000 30-year serial bonds at 96.65.

North Sydney, N.S.—Tenders are being received up till July 10th, 1919, for the purchase of $35,000 5½ per cent. 20-year debentures.

Winnipeg, Man.—The city council has voted unanimously to go ahead with undertakings, which require at least $500,000 during the summer.

Embro Village, Ont.—Messrs. G. A. Stimson and Co. have been awarded an issue of $7,500 6 per cent. 20-year hydro debentures at 103.45.

Innisfil Township, Ont.—Debentures will be issued by the municipal council to the amount of $25,000 for construction of tile, stone or timber drains.

Penticton, B.C.—An election was held on July 3rd, to vote of the question of issuing $75,000 6 per cent. 20-year electric light and power-plant debentures.

Ottawa, Ont.—An expenditure of $100,000 is needed for improvements to the Queen Street pumping station, and about $200,000 for a proposed new Cummings bridge.

Regina, Sask.—The Local Government Board has given permission to the city to prepare money by-laws for the expenditure of $100,000 on paving and other local improvements.

Saskatoon, Sask.—On July 21st, 1919, ratepayers will vote on various money by-laws, involving the expenditure of $333,426. In the event of these passing, debentures will be issued for various sums, rates and maturities.

York Township, Ont.—The council has authorized the expenditure of over $100,000 for improvements. The council has also authorized the issuing of $18,000 in debentures for school improvements.

Province of Ontario.—Messrs A. Jarvis and Co., in conjunction with Messrs. Morrow and Jellett, Toronto, have purchased privately an issue of $2,987,000 4 per cent. bonds, due March 1st, 1926.

Southampton, Ont.—Messrs. W. L. McKinnon and Co. have purchased $20,000 6 per cent. 20-instalment bonds of the town, which are for the purpose of guaranteeing the Sellers Kitchen Cabinet Co. of Canada.

New Westminster, B.C.—Several by-laws have been passed, including the tax consolidation by-law, real estate tax by-law and the annual loan by-law. The last by-law authorizes the borrowing of $150,000 at 5½ per cent.

Winnipeg, Man.—On June 27th, a $500,000 5½ per cent. 30-year debenture issue was authorized by the city council, following an offer from a financial house, at a price of 100.87 and accrued interest, Winnipeg payment and delivery.

New Glasgow, N.S.—Sealed tenders will be received until July 19, 1919, for the purchase of $55,000 5½ per cent. bonds, dated August 1, 1919, due August 1, 1934, in denominations of $500. Interest payable semi-annually from date.

Grand Forks, B.C.—The city will shortly issue debentures to the amount of $75,000, bearing interest at 6 per cent.; $50,000 are to mature in 20 years, and $25,000 in 10 years. It is expected that the latter block will be sold among citizens.

Saskatoon, Sask.—Tenders are being received up till July 21st, 1919, for the purchase of $238,377 debentures, in five blocks of 10, 15, 20, 29 and 30-year maturities, and bearing interest at 5 and 5½ per cent. (See notice elsewhere in this issue.)

Berwick, N.S.—An issue of $27,000 6 per cent. 20-year bonds has been sold to the Standard Bond Co., at 101.80. Other bids were: F. B. McCurdy and Co., 101.60; W. F. Mahon and Co., 101.59; Nova Scotia Trust Co., 100.15; Eastern Securities Co., Ltd., 98.63; J. C. Mackintosh and Co., 96.83.

County of Lunenburg, N.S.—An issue of $20,000 5½ per cent. 20-year bonds has been sold to the Maritime Trust Co., at 101.99. Other bids were: J. C. Mackintosh and Co., 101.31; Brent, Noxon and Co., 101.295; Eastern Securities Co., 101.29; Standard Bond Co., 101.25; W. F. Mahon and Co., 101.229.

Toronto, Ont.—By-laws to authorize a loan of $3,489,356 for civic works will be introduced. The amounts required are as follows: Cherry Street bridge, $100,000; city registry office balance, $21,000; new civic cars, $200,000; locals city's share, $173,807; locals ratepayers' share, $105,964; Applegrove extension, $28,000; Teraulay extension, $223,000; schools, $45,000; sewers, $503,585; water works extensions, $801,000; Humber harbor improvements' $487,000.

British Columbia.—The province has sold its issue of $3,000,000 5 per cent. 20-year sinking fund gold bonds to a syndicate comprising Messrs. Wood, Gundy and Co., A. E. Ames and Co. and the Dominion Securities Corporation, Toronto, at 93.34. Another syndicate, comprising W. A.

Enter-Spacious Times

The spacious times of Good Queen Bess marked an era of mercantile expansion.

Her ships bore goods to the four corners of the earth, and made England prosperous.

Now, behold the turn of fortune's wheel—the New World selling goods to the Old!

Canada's opportunity to build up export trade is in the ascendant.

Let us see to it that we have the vision and financial courage to take full advantage of it.

"Investment Items" is published by us, and mailed free to investors. Write and ask to be placed on the Mailing List to-day.

Mackenzie and Co., Brent, Noxon and Co., United Financial Corporation, R. C. Matthews and Co. and Hanson Brothers, bid 91.83.

Swan River, Man.—Messrs. G. A. Stimson and Co., Toronto, have purchased an issue of $50,000 6 per cent. 30-instalment debentures of the rural municipality at 105.61. The debentures are guaranteed by the province of Manitoba as to principal and interest.

Halifax, N.S.—An issue of $761,000 5 per cent. 34-year debentures of the city has been purchased by the Royal Securities Corporation, of Montreal. The issue is for the redemption of consolidated fund debentures, due July 1st, 1919, $101,000, and for various other local improvements.

Montreal, Que.—The city's issue of $624,000 4½ per cent. 40-year bonds has been purchased by the city treasurer at 91.77, which is on a basis of about 5 per cent. The following is a partial list of tenders:—

City treasurer of Montreal	91.77
G. A. Stimson and Co.	86.76
A. Jarvis and Co.	86.27
National City Co., Ltd.	84.66
A. E. Ames and Co.	82.59

Beauharnois, Que.—The Royal Securities Corporation has been awarded an issue of $41,000 5½ per cent. bonds of the town at 98.492. The following is a list of tenders:—

Royal Securities Corporation	98.492
Versailles, Vidricaire and Boulais	98.01
Credit Canadien	97.22
Municipal Debenture Corporation	97.055
Beausoleil, Ltd.	96.76
Ames and Co.	94.177
Hanson Bros.	92.45

Saskatchewan.—The following is a list of debentures reported sold from May 31st to June 14th, 1919:—

Rural Telephones. Beadle, $600, Lestock, $32,500, Clyde, $14,000, Long Lake, $10,400, W. L. McKinnon & Co., Regina; Plenty, $1,300, Bladworth, $13,550, Harris, Read & Co., Regina; Fulda, $39,100, J. A. Thompson, Winnipeg; Kindred, $700, Bond & Debenture Corporation, Winnipeg.

School Districts.—Cavalier, $4,000, Bethune, $10,000, Harris, Read & Co., Regina; Mundell, $4,500, Rosthern, $35,000, Regina Public School Sinking Fund Trustees; Theodore, $19,500, H. J. Birkett & Co., Toronto; Cosmopolitan, $2,800, Canada Landed & National Investment Co., Winnipeg; Aysgarth, $1,500, Silver Cliff, $700, C. H. Burgess & Co., Toronto; Seward Hill, $3,300, Waterman-Waterbury Mfg. Co., Regina; Belvoir, $3,250, Saskatchewan Life Insurance Co., Regina; Avalon, $2,700, Wood, Gundy & Co., Saskatoon; Verwood, $4,100, Nay & James, Regina.

SAGUENAY PULP ISSUE OFFERED

The Saguenay Pulp and Power Co.'s issue of $5,500,000 6½ per cent. serial secured gold bonds, is being offered by a syndicate composed of Montreal and Quebec brokers, at par and accrued interest. The issue is made for the purpose of consolidating under a single issue the bonds and other securities of the group of Chicoutimi companies now owned by the Saguenay Co., and to provide working capital. Provision is also made for reserve and sinking funds. Principal and interest are payable at the Molsons Bank, Montreal or Quebec, Banque d'Hochelaga, Montreal or Quebec, and the National Park Bank of New York. The Molsons and Hochelaga banks are acting on behalf of the underwriting syndicates.

AMES-HOLDEN TIRE COMPANY BOND ISSUE

A new industrial issue consisting of $1,000,000 7 per cent. first mortgage 20-year sinking fund gold bonds of the Ames-Holden Tire Co., Ltd., will shortly be placed on the Canadian market by Greenshields & Co., Montreal, and Nesbitt, Thompson & Co., Montreal and Hamilton. The bonds will be offered at par and accrued interest, giving a yield of 7 per cent., and will carry with them a bonus equivalent to 25 per cent. of common stock. The issue is guaranteed by Ames-Holden-McCready, Ltd., and the control of the Tire Company will be vested in the latter.

A special meeting of Ames-Holden-McCready, Ltd., has been called for July 11th, 1919, to consider and ratify a resolution authorizing directors to apply to the Secretary of State of Canada for supplementary letters patent for powers to extend the scope of the company whereby it can promote and become a shareholder in any subsidiary or allied company, and to guarantee the payment of the bonds or debentures of any such company. The notice also includes that the company also be empowered to raise, or assist in raising money for, and to aid any company and to guarantee the performance of contracts of any company, and such other powers, etc., as the shareholders may deem advisable.

This new development is in connection with financing of the new companies which have been recently organized by Ames-Holden interests, including the new plant at Kitchener, Ont.

PEABODY'S, LIMITED, BOND ISSUE

An issue of $350,000 7 per cent. serial gold bonds of Peabody's, Ltd., of Walkerville, Ont., is being offered by a syndicate of Detroit bond houses. The bonds are to be sold at par and accrued interest, and are redeemable at option of the company on any interest date at 101 and accrued interest after sixty days' notice to trustees. Maturity dates run from June 2nd, 1922, to June 2nd, 1929.

CHANGES IN WHALEN PULP CO.

As was expected at the time of his election, the appointment of Sir George Bury as president and chief executive of the Whalen Pulp & Paper Mills, Limited, Vancouver, has been followed by other changes in the company's board. At a meeting of the board of directors recently held in Montreal there were newly elected to the board, Mr. I. W. Killam, president of Royal Securities Corporation, Ltd.; Mr. W. N. Hurlbut, of the Geo. H. Mead Co., of Dayton, Ohio, and Mr. Alexander Smith, president of Peabody, Houghteling & Co., of Chicago.

W. N. Hurlbut was associated for many years with the Backus paper interests, and more lately with the Spanish River Pulp & Paper Co. The Mead organization, of which Mr. Hurlbut is an executive head, has established an excellent reputation in Canada by its very able management of the Spanish River Pulp and Paper Company and its subsidiaries. Alexander Smith is well known in Canadian industrial circles through the handling of the financing and organization of the Abitibi Power & Paper Co., Ltd. I. W. Killam, as president of Royal Securities Corporation, is chief executive of an organization which has been active in the financing of such companies as Canada Cement Co., and Steel Company of Canada, and which has been of late prominently identified with Canadian pulp and paper financing on a large scale, and the initial financing of such companies as Price Bros. & Co., Abitibi Power & Paper Co., Brompton Pulp & Paper Co., Fraser Companies, Limited, and many others.

In connection with the changes in the Whalen Board, it is believed that negotiations are practically completed for financing to put the Whalen Company in a position to develop most extensively the export business which the company has carried on for many years to the Orient, and will further place the company in a position of having over a million dollars of net liquid assets (working capital) establishing it in a strong position with regard to the handling of its already established business and the development of other fields.

Last week an advertisement was carried in these columns in which the town of Owen Sound asked for offers to purchase blocks of Victory bonds, up to July 7th. The town treasurer states that these bonds are all registered.

NEWS OF MUNICIPAL FINANCE

Regina's Sinking Fund Kept in Good Condition—Province May Assist South Vancouver—Analysis of Toronto's Budget

Hastings County, Ont.—The county tax rate for 1919 has been fixed at 12½ mills.

Victoria, B.C.—During the city's recent tax sale, approximately $43,000 was obtained. About 15 per cent. of the property offered was sold to outside bidders.

Edmonton, Alta.—The Public Utilities Commission has given permission to the city to submit a by-law to the citizens to expend $260,000 on a telephone extension.

Vancouver, B.C.—The city has decided to exercise its option for the acquisition of the Kitsilano Beach property, under which it has a ten-year option from the Canadian Pacific Railway. The price is $240,000.

St. Boniface, Man.—The city has given notice that treasury notes of the municipality due July 2nd, 1920, will be redeemed at the rate of 99.80, if presented for payment at Toronto, Montreal, Winnipeg, or St. Boniface, on or after July 1, 1919.

Prince Edward County, Ont.—The county rate has been fixed by the council as follows: 7 mills for county purposes and public schools, 1-10 mill for high school debentures, 1-10 mill for house of refuge debentures, and 1⅓ for good roads debentures, making a total of 8 8-15 mills.

South Vancouver, B.C.—The province of British Columbia intends aiding the municipality to the amount of $200,000, in connection with the consolidation of arrears of taxes, a large proportion of which has been hypothecated as security. It is probable that the assistance from the province will take the form of a guarantee and will not involve the use of actual provincial funds.

County of Ontario, Ont.—The county council has passed a by-law giving the assessment of all municipalities for county purposes for five years. The figures in part are as follows: Oshawa, $3,793,907; Whitby, $1,270,965; Pickering Township, $4,189,053; E. Whitby Township, $1,660,212; Whitby Township, $1,809,976; Uxbridge, $516,212; Port Perry, $515,672; Cannington, $288,012; Beaverton, $331,559.

Northumberland County, Ont.—The tax rate for Northumberland and Durham counties this year will be three mills less than last year. During the year the counties paid $120,000 a year to the patriotic fund, equal to four mills on the assessment and one mill of a provincial war tax. Both of these are now done away with, but the counties have placed $60,000 in their estimates for good roads, equal to two mills on the assessment.

York County, Ont.—The county tax rate has been fixed at 8.8288 mills, a reduction of nearly three mills on last year's rate. The total expenditure for the year amounted to $402,425. The expenditure estimates presented by the finance committee, are as follows: General purposes, $88,395; industrial home, $12,500; court house debentures, $4,857; highway improvement debentures, $20,812; highway improvement construction, $70,000; highway improvement maintenance, $16,000; Toronto-Hamilton highway, road and bridge construction, $117,860; reduction in highway improvement indebtedness, $60,000; highway improvement interest charges, $12,000.

Regina, Sask.—The annual report of the Sinking Fund Trustees for the year ended December 31st, 1918, shows that the total amount of money available for investment during the year was $614,490. This was made up of cash on hand and in the bank on January 1st, 1918, payments received on account of sinking fund levy, reductions on account of investments and $75,000 held in trust for the city of Regina (capital account). This latter amount is a portion of the insurance money collected on the winter fair building and handed over to the trustees for investment in Victory bonds. New investments to the amount of $487,661 were acquired, and at the close of the year there was a balance on hand of $125,007. The excess earnings for the year were $26,774, which amount, added to the surplus at the beginning of the year, $18,708, makes a total surplus of $45,482. A reserve of $5,708 was set up to provide for any possible losses or depreciation in the securities. The sum of $30,000 was transferred in the city's general account to be used for current or other expenditure, as authorized by the local government board under an order dated December 31, 1918, leaving a balance in surplus account of $3,774.

The average yielding rates on the investments were as follows:—

City of Regina stock and debentures	5.51%
Saskatchewan rural telephone debentures	6.70%
Saskatchewan rural municipal debentures	6. %
Saskatchewan school district debentures	6.75%
Government bonds	5.71%
First mortgages on farm lands	7. %
Total average yielding rate	6.10%

The financial statement for the year ended December 31, 1918, shows a deficit of $97,351, compared with the estimate of a surplus of $2,433. The two principal items causing this deficit are interest and exchange, and deficit on utilities. The former account shows an over-expenditure of $21,714, which is accounted for by payments during the year of $14,600 in connection with the exchange of funds to retire coupon bonds held in New York at a time when the exchange rate was at a high premium against Canada. The net deficit shown on the operation of the utilities is $76,081, after crediting the sum of $20,574 for payment of street railway sinking fund from property sales. The health department also showed an over-expenditure of $10,212.

Edmonton, Alta.—The public utility operations of the city of Edmonton show a net surplus for the month of May of $2,345, as compared with a net deficit for the same month last year of $3,549. The net surplus for the five months (inclusive of the street railway deficit) amounts to $62,233, against $33,809 for the corresponding period of 1918. Net surpluses for the five months of the respective departments are as follows:—

	1919.	1918.
Electric light	$ 66,056	$54,131
Telephone	21,356	13,845
Waterworks	14,246	10,746
Total	$101,659	$78,724

The street railway deficit is $39,425, as compared with $44,914 last year, leaving, as already stated, a net surplus of $62,233 on the combined utilities, as compared with $33,809 in 1918.

Toronto, Ont.—The Toronto Bureau of Municipal Research has issued its annual analysis of the city's finances, entitled "City Budget Facts." These are based on the estimates for 1919. Among other figures it shows that the city's taxes and income are expended as follows:—

	Taxes %.	Income %.
General government	8.0	20.0
Protection of persons and property	16.5	12.6
Health and sanitation	13.0	9.4
Highways	14.5	10.6
Education	27.4	20.3
Recreation	3.8	2.8
Charities and correction	5.7	4.2
War and special grants	11.0	8.0
Public service enterprises	.1	12.1

A comparison for the past five years shows that the expenditures in the form of personal services have increased considerably as have also debt charges with the exception of the past year. Grants reached their minimum in 1918. Of the total expenditure of $25,562,357, personal services absorb 35.5 per cent. The next largest item is the debt charges of 35.2 per cent., which is divided into sinking fund 18.2 per cent. and interest 17 per cent.

INVESTMENTS AND THE MARKET

Toronto Street Railway, Dominion Steel and Other Stocks Make Advances—Twin City Earnings Higher

TRANSACTIONS on the Montreal and Toronto Stock Exchanges at the close of the week ended June 28th were numerous, Saturday being a particularly active day. The favorite stocks were Black Lake Asbestos, Atlantic Sugar, Spanish River, Canadian Car and Ames-Holden. Dominion Bank stock, which had declined to below 200, rose again to 203 bid. Toronto Street Railway rose seven points, and on Saturday 25 shares were traded in at 48.

During the early part of this week trading was quieter. Dominion Steel advanced considerably, as did also Ames-Holden and Twin City. National Breweries was also an active stock during the week and registered an advance. Among stocks which receded were Nova Scotia Steel common, Monarch preferred, Mackay common and Maple Leaf preferred.

Twin City Rapid Transit Co.—Gross revenues of the company for May, 1919, amounted to $917,102, compared with $804,783 for the same month last year. The net income amounted to $136,454, compared with $107,586 last year. Net income for the first five months of the year amounted to $412,485.

Tooke Brothers, Ltd.—At a meeting of the directors of the company it was decided to pay off the balance of preferred dividend arrears; these have gradually been paid up for some time past. To this end they declared a special dividend of 3½ per cent., the extent of the arrears remaining. The distribution is payable on July 19th to shareholders of record July 10th.

Porto Rico Railway Co., Ltd.—The following is a statement of the company's earnings for May, 1919:—

	1918.	1919.	Change.
Gross	$ 86,829	$103,225	+ $16,396
Net	38,776	47,068	+ 8,291
For five months:			
Gross	421,954	478,777	+ 56,823
Net	190,201	177,008	— 13,192

Shawinigan Lake Lumber Co.—The company's mill on the Esquimalt and Nanaimo Railway, B.C., which was destroyed by fire last December, is rapidly nearing completion. Although the plant is not yet complete, operations have surpassed those before the fire. The new mill's daily output is 75,000 feet. The capacity of the plant that was burnt down December 12th was only 50,000 feet, so that production may be increased 50 per cent. by the installation of the new cutting equipment.

Temiskaming and Hudson Bay Mining Co.—The company has authorized the surrender of its charter. The assets of the company, excepting the shares of the Hudson Bay Mines, Ltd., have been transferred to the Hudson Bay Mines, Ltd. The company has deposited with the Trusts and Guarantee Co. sufficient certificates of shares of the Hudson Bay Mines, Ltd., to give to each shareholder of the Temiskaming and Hudson Bay Co. 75 shares of the Hudson Bay Mines, Ltd., for each share of the former company.

Canadian Woolens, Ltd.—This company has been formed for the purpose of combining three prominent Canadian companies engaged in the manufacture of worsteds. It is planned to provide the mills with working capital, improved machinery, and ensure an increased output. These are the Auburn mill at Peterboro', the Standard and the Bonner-Worth mills at Toronto. It is claimed that the imports of woolens from other countries can be much reduced by the further development of the industry here. Mr. Worth, of the last-named firm, will be general manager.

Nova Scotia Steel and Coal Co.—The closing down of the company's plant at Sydney Mines, N.S., for an indefinite period has been announced. The tie-up is believed to be due primarily to general stagnation in the steel market. Superintendent T. J. Brown, of Scotia, had a conference with the men, in which the impending tie-up, which will affect about three or four hundred men, was announced. During the time the furnaces are closed the blast furnace will be repaired and thoroughly relined. This furnace is said to have a remarkable history, having been going continuously during the entire period of the war.

Standard Chemical Company, Limited.—According to the company's eighth annual report for the year ended December 31st, 1918, profits for the year totalled $846,702, compared with $563,123 for the preceding year. From this was deducted depreciation $150,000, interest, patriotic donations, etc., leaving a balance of $599,206. There was a surplus of $154,402 brought forward from last year, making a total of $753,608. After placing $297,011 in reserve against wood inventory and for amortization of acetone plant, etc., providing for income tax and dividend on preferred stock, a balance of $311,577 is carried forward. The dividend was a payment of 3½ per cent on account of back dividends on the preferred stock, which is now paid to June 30th, 1914. According to the balance sheet the assets now total $7,743,136, a slight increase over last year. Stock is outstanding to the amount of $4,852,700, and funded debt to the amount of $1,066,945.

In his address to shareholders, the president, L. M. Wood, says: "This great improvement in the company's position must obviously find expression in the future of the company, and in no other condition could the company re-enter normal competitive conditions with any prospect of success, and the experience of the company during the four years prior to the outbreak of the war will emphasize this point. While it is difficult to forecast how long the present readjustment period will last, it is generally supposed that within a few months after the declaration of peace normal trade conditions will have been resumed to a considerable extent. Our selling connections in England and France, where a substantial proportion of our products are marketed, are now being re-established. Having regard to the great improvement in the company's position above outlined and to the fact that our domestic trade should soon resume its normal development, we feel that the company will return to normal conditions with good prospects of success."

A vacancy occurred on the board during the year through the death of E. F. B. Johnston, K.C. The shortening of the name of the company to Standard Chemical Company, Limited, has been consented to by the Secretary of State, which name has been adopted to replace the cumbersome name of the Standard Chemical Iron and Lumber Company of Canada, Limited.

Dominion Steel Corporation.—The annual meeting of the company was held in Montreal on June 17th, 1919. Directors of the corporation were re-elected for the ensuing year, while at the meetings of the Dominion Iron and Steel Company and the Dominion Coal Company, held immediately after the corporation meeting, retiring directors were re-elected. The only change was in the board of the latter company, George Caverhill replacing the late W. D. Matthews. The vacancy now existing on the corporation board was not filled.

In his address to the shareholders, Mark Workman, the president, referred to the coal areas dispute between the corporation and the Nova Scotia Steel and Coal Company, and the discussion and legislation that had been brought about, concluding as follows:—

"It will be appreciated that, as a business enterprise, we are at all times open to discuss matters affecting our operations, such incidents being a matter of ordinary business routine. No action will be taken by our directors inconsistent with the rights of the investors interested in our enterprise, and I cannot believe that it is the intention of the legislature of Nova Scotia to imperil the future of investment in that province by invoking the powers created

DIVIDENDS AND NOTICES

NOVA SCOTIA STEEL AND COAL COMPANY, LIMITED

DIVIDEND NOTICE

A dividend of two per cent. (2%) on the Preferred Stock and one and one-quarter per cent. (1¼%) on the Ordinary Stock of the Company for quarter ending June 30th, 1919, has been declared, payable on the 15th of July, 1919, to Shareholders of record at the close of business on June 30th, 1919.

By Order of the Board.
THOMAS GREEN, Cashier.

New Glasgow, Nova Scotia, June 20th, 1919.

DOMINION TEXTILE COMPANY, LIMITED

NOTICE OF DIVIDEND

A dividend of one and three-quarter per cent. (1¾%) on the Preferred Stock of the Dominion Textile Company, Limited, has been declared for the quarter ending 30th June, 1919, payable July 15th to shareholders of record, June 30th, 1919.

By order of the Board.
JAS. H. WEBB,
Secretary-Treasurer.

Montreal, 4th June, 1919.

THE MERCHANTS BANK OF CANADA

QUARTERLY DIVIDEND

Notice is hereby given that a dividend of Three per cent. for the current quarter, being at the rate of Twelve per cent. per annum, upon the Paid-up Capital Stock of this Institution, has been declared, and will be payable at its Banking House in this city and its Branches on and after the 1st day of August next to Shareholders of record at the close of business on the 15th day of July.

As regards new stock paid up subsequent to 15th May, in full or in part, the rate of Three per cent. for the current quarter (or twelve per cent. per annum) will apply proportionally from the dates upon which payments were made.

By order of the Board.
D. C. MACAROW,
General Manager.

Montreal, 26th June, 1919.

SALE OF TIMBER BERTHS

Tenders will be received by the undersigned up to and including Wednesday, the 16th day of July next, for the right to cut the timber of various descriptions on the Townships of Groves and St. Louis in the District of Sudbury.

Terms and conditions of the sale containing full particulars, and maps showing the position of the Berths offered for sale, may be obtained upon application to the undersigned, or from Mr. Charles Henderson, Crown Timber Agent, Sudbury.

G. H. FERGUSON,
Minister of Lands, Forests and Mines.

Toronto, June 11th, 1919.

MARCUS LOEW'S THEATRES, LIMITED

Notice is hereby given that a dividend at the rate of 1¾ per cent. for the quarter ending 30th June, 1919, being at the rate of 7 per cent. per annum on the Preference and Common Stock of the Company, has been declared payable on the 15th day of July, 1919, to shareholders of record on the 30th June, 1919.

By Order of the Board.
SAMUEL D. FOWLER,
Secretary.

Toronto, 30th June, 1919.

DEBENTURES FOR SALE

RED DEER, ALTA.

Tenders, addressed to the undersigned, are invited until noon, July 10th, for $90,000 of an issue of $100,000 City of Red Deer treasury bills, issued against arrears of taxes and lands taken over by city of $120,000, term 10 years, rate 6 per cent., dated July 1st, 1919, repayable in ten equal annual instalments, interest semi-annually, at Imperial Bank, Toronto, Montreal and Red Deer. Issue approved by Public Utility Commissioners of Alberta. No tender necessarily accepted.

A. T. STEPHENSON,
Red Deer.

CITY OF SASKATOON, SASKATCHEWAN

30-year 5	"	"	"	......	33,692.05
29-year 5	"	"	"	......	37,802.60
					$238,377.91

The lowest or any tender not necessarily accepted, and the Council reserves the right to accept a tender on the whole or portion of the above debentures.

Full particulars of the issue and statistical information as to the City's finances can be obtained upon application to the City Commissioner.

C. J. YORATH,
City Commissioner.

Saskatoon, Sask., June 26th, 1919.

BOND AND FINANCIAL COMPANIES

Advertiser, Scotsman, age 35, four years Army, seeks appointment now with substantial Bond or Financial House which could utilize his services and connection in London, Eng., when restrictions are removed. Write

**"Finance," care of Sullivan and Morrison, Barristers,
201 Curry Building, Winnipeg.**

by the act in question, in the event of the suggestions of the Scotia Company being found impracticable."

Mr. Workman referred to the financial position of the corporation, touching upon the increased cost of properties, the total of which appears on this year's balance sheet as $19,007,601, as against $82,915,514 on March 31st, 1918. The increase over the previous year's figures includes a large number of items, chief among which are the new coke ovens, a portion of the cost of the Wabana expenditures, a new power station and disbursements incurred in connection with the construction of the ship plate mill.

Regarding the outlook for the marketing of the products, he said, it is evident that at the present time the attitude of purchasers of steel products is one of conservatism, but has every hope that the near future will bring a revival in the industry. Undoubtedly a tremendous purchasing power exists in the absolute depletion of stocks throughout the world. It is not to be expected, however, that the margin of profit will be as great as in the past year, as competition is becoming keener, and production costs remain abnormally high.

Nova Scotia Steel Co.—The meetings of directors of the company, which were held recently in Montreal, were regarded as the most satisfactory held during the past two years. The board declared a dividend of 2 per cent. on the preferred shares and 1¼ per cent. on the common shares of the company for the quarter ending June 30th, payable July 15th. The board also authorized the directors of the Eastern Car Co., a subsidiary, to pay on July 15th next a year's dividend at the rate of 6 per cent. for the year ended December 31st, 1918, thus wiping out all arrears of dividend on the Car company's preferred stock up to the first of the present year.

Col. Cantley, the chairman of the board, presided at the meetings, and among those present were D. H. McDougall, president; Galone T. Stone, of Boston; W. H. Chase, J. Walter Allison, T. S. Rogers, K.C., R. E. Chambers, Frank Stanfield, James C. McGregor, all of Nova Scotia; Frank W. Ross, Quebec; and Lorne C. Webster, Montreal.

A full report of the operations of the company and its subsidiary, the Eastern Car Co., for the first five months of the present year was submitted by the management. The situation as disclosed was considered by the board as most satisfactory, as were also reports of the physical condition of the plant. The management reported as to the success attending the work of the new Wabana submarine slopes and the new bank head installed in connection therewith. Due to these improved facilities and the mechanical loading devices installed and now operating most successfully in the submarine areas, a large increase in output of iron ore from these areas is now assured.

In the shipbuilding department reports indicated that progress was being made in completing the two vessels now under construction for the Canadian mercantile marine. It was intimated that the first of the boats would be launched in August and delivered to the new owners in September. Substantial progress has been made on the second of the two boats, and it is fully expected that this boat will also be delivered before the close of navigation, in both cases delivery being made some months earlier than anticipated. Improvement was also reported in regard to the coal mining situation.

For the company's subsidiary, the Eastern Car Co., it was reported that the recent order for 550 general service cars had been completed, and that another order for 500 all-steel flat cars was under way and good progress made thereon. It was also reported that the indebtedness to the parent company was not only all liquidated, but that the Car company's liquid assets had been largely added to during the current year.

Harris, Forbes and Co. are opening an office at 202 Canadian Pacific Railway building, Toronto, under the management of Mr. H. P. Briggs, who was formerly of their Montreal office, but has lately been overseas.

RECENT FIRES

Many Heavy Losses Throughout Canada—Result of Continued Dry Weather—Forest Fires in Many Parts

OWING to the warm and dry weather during the last two weeks of June, forest fires broke out in several parts of Canada. Mr. E. H. Finlayson, Forestry Supervisor in Alberta, stated on June 27th that those in the vicinity of Calgary had destroyed about 30,000,000 feet of valuable timber. While no definite report has since been received, it is thought that the rains which took place in Alberta about the end of the month checked the spread of the fires there. In Ontario the district around Englehart and Cochrane, which was devastated three years ago, has again suffered severe damage, and, according to latest reports, the fires are still spreading. Certain sections of New Brunswick have also been damaged.

Beaverton, Ont.—June 30—Barn and contents on the farm of Fred Suter was destroyed. Estimated loss, $2,500. Insurance, $1,400.

Digby, N.S.—June 27—Wharf property and store of J. E. Snow, at the Racquette, was destroyed. Estimated loss, $12,000, partially covered by insurance.

Doaktown, N.B.—June 24—Saw-mill, owned by L. B. Amos, was destroyed. Estimated loss, $4,000. Insurance, $1,500.

Grand Coulee, Sask.—June 24—General store, owned by T. E. Maxwell, was destroyed. Estimated loss, $25,000. Insurance, $17,000.

Hamilton, Ont.—July 1—Premises of the Hamilton Metal Smelting Works, 94 Cannon Street West, were damaged. Estimated loss, $400.

Hintonburg, Ont.—June 25—Lumber owned by the Sheppard and Morse Lumber Co. was damaged. Cause, spark from a passing train. Estimated loss, $15,000.

London, Ont.—June 26—Milling department of the I.X.L. Spice Mills was destroyed. Estimated loss, $9,000.

St. Catharines, Ont.—June 28—Building of the Canadian Flax Mill was damaged. Cause, defective electric wire. Estimated loss, $45,000.

Salt Springs, N.S.—June 28—Station house, freight shed and home of the station agent, Mr. Baird, were destroyed.

Saskatoon, Sask.—June 27—Building of the John East Foundry Co., 121 Avenue C North, was damaged. Cause, bolt of lightning. Estimated loss, $15,000, covered by insurance.

Sydney, N.S.—June 24—Three icehouses of the Sydney Ice Co. on Cottage Rord, with contents. 3,000 tons of ice, were destroyed.

Toronto, Ont.—June 29—Motor car, corner of Yonge and Yorkville Streets, owned by Wm. Baird, was damaged. Cause, engine back-firing. Estimated loss, $500.

July 1—Window frames stored in the basement of Manning Chambers were damaged. Estimated loss, $500.

Victoria, B.C.—June 20—Store, owned by Mr. Chas. Dowling, was damaged. Cause, short-circuiting of the electric light wires. Estimated loss, $3,000, covered by insurance.

Wapske, N.B.—June 27—About three hundred acres of Crown lands have been burned by a forest fire. The lands were under lease to the Wapske Lumber Co. Estimated loss, $25,000.

Woodstock, N.B.—June 27—The carding mill, owned by Henry Flewelling, and the power-house, owned by the Woodstock Power Co., were destroyed. The Meduxnakik flour mill, owned by Mr. J. M. Fripp, was partially destroyed. Estimated loss, $10,000.

The Toronto Bureau of Municipal Research has issued a pamphlet giving a list of cities which have considered the merits of the service at cost plan of public utility operation and the decisions reached.

Federation with the West Indian Islands

Raw Materials of West Indian Islands Supplement those of Canada—Transportation an Essential Part of Commercial Union—Problems of Government Not Insurmountable—Feeling in West Indies is for Connection with some Strong Commercial Nation

By E. C. KEEFER, A.M.C.I.E.

"WESTWARD the course of empire takes its way." So said Bishop Berkeley two hundred years ago. Civilization and all it entails, born in China, has crept westward across Asia and Europe to complete the circle in North America. Somebody has said the twentieth century belongs to Canada. To every one interested in Canadian development and the future of the British Empire the subject is worthy of the deepest and most painstaking consideration.

It is not my purpose here to dilate on the natural resources of Canada. Abler pens than mine have already done so where all may read, but I would like to quote a paragraph from Lloyds' Calendar, indcating Canada's favorable position in relation to the world's markets.

"It requires from 36 to 42 days for mail to pass from the principal ports of New Zealand to London, the hub of the European markets; from 26 to 33 days for mail to pass from the principal ports of Australia to London; from 17 to 22 days from the principal ports of South America; from 17 to 21 days from the ports of South Africa, and 14 to 16 days from the ports of India, but only 7 to 8 days from the principal ports of Canada. . . . These figures also indicate the relative time required (for freight cargoes) and the cost of cable despatches, a consideration of great and growing importance to trade and commerce. The market second in importance is that of the United States, and as regards this market none of the newer countries is so favorably situated as is Canada. Japan and China form the market third in importance, and with regard to this market also, Canada is as favorably situated as any of the above-mentioned new countries, and much more so than most of them. Canada thus lies midway between two of the world's greatest markets and is separated from the third only by an imaginary boundary line."

Canada's potential wealth and political possibilities are unlimited, indescribably so; and I wish I could ordain that every Canadian should carry, for preference inscribed on the face of his watch, where he could read it hourly, the words:—

"Canada can become the keystone of the British Empire IF we go the right way about it."

Looking back on the changes "the course of empire" has made in Canada since the good Bishop uttered the pronouncement at the head of this article, who would dare to prophesy as to what the position of Canada in the British Empire and the world will be in the next two hundred years? Not I, for one! But of this I feel assured that, be it soon or long in coming, the day will surely arrive, if the British Empire hold together, when Canada will have a population commensurate with her size and resources. When that day arrives, when we count our population in tens where we now count in units, then Canada, by virtue of her agricultural and mineral wealth and manufacturing resources, will be the most important portion of the British Empire. If this is allowed, and to my mind it is self-evident, and admits of no argument, then it is necessary to prepare, while it is in our power to do so, to enter the heritage awaiting us.

The war has shown us that a great nation depends enormously on the favorable position of its source of supply of raw materials. To a purely manufacturing nation the question is vital, and to any nation it is of extreme importance. Canada's supply of raw material is unfortunately limited by her climate. All that appertains to temperate zones she has in abundance, but in the products of semi-tropical and tropical countries she is lacking. The day is past when nations can go, sword in hand, or by peaceful penetration, seeking new lands for exploitation, or supply of produce, foreign to their own countries. Yet trade and commerce in these days of competition, depend for supremacy on little things, on paring of costs of material or production, on efficiency, with all it means in manufacture and transport, and economy of management through consolidation and cooperation.

To Canada, however, may come the opportunity to secure by federation sources of supply of practically all the raw material she lacks. These sources are situated in the West Indies and British possessions in the Caribbean Seas which comprise the following:—

Colony.	Population.	Area Sq. Mile.
Bermudas, group of islands (only 20 inhabited)	21,000	19
Bahamas, group of islands (about 12 inhabited)	54,000	4,404
Jamaica, one island	837,000	4,373
Turks, Caicos and Cayman Islands, three islands (dependencies of Jamaica)	....	166
Leeward Islands, nine islands	137,000	715
Windward Islands, three islands	175,000	506
Trinidad and Tobago, two islands.	372,000	1,368
Barbadoes, one island	184,000	166
British Honduras, colony in Central America	41,000	8,598
British Guiana, colony in South America	314,000	90,500
Totals	2,125,000	111,315

These colonies, with the exception of the Windward Islands, are divided as shown above, each colony having its own governor, officials, legislature, law, revenue and tariff. The Windward Islands Colony is again subdivided into its three component islands, each with its deputy governor, law, legislature, revenue and tariff distinct; but with one governor for the group.

In considering the colonies as a grand group, a division into three parts might be made on account of geographical position, origin of lines of travel and lack of inter-colonial traffic. The Bermudas and Bahamas lie to the north in temperate and semi-tropical waters, Jamaica and dependencies, Leeward and Windward Islands, Trinidad and Tobago, and Barbadoes lie to the south of Cuba, and British Honduras and British Guiana are of the mainland of Central and South America. These three divisions, one might say four, as I do not know that the Bermudas and the Bahamas have much in common, differ, to a certain extent, in feeling and thought. That each colony has a distinct government has not made for community feeling in the past, but to-day it is realized by all that, in the development of the future, there is no room for petty jealousies. In this article where the term West Indies is used generally, it is intended to include in its meaning British Guiana, British Honduras, the Bahamas and Bermuda. I believe that the material prosperity and the political welfare of Canada will be incalculably benefited by the federation of the British West Indies with Canada. I will go farther and say that I believe it would be an error of the gravest magnitude on the part of Canadian statesmen should they fail to grasp this opportunity—now, when the time is propitious, as it may never be again—of obtaining so much at a cost of so little. By the inclusion of these colonies in the Canadian confederation Canada will enlarge her sphere of immediate influence to the north-east shore of South America.

Leaving out the Bermudas, which lie to the north, these islands from off the southern coast of Florida extend in a regular and almost equally spaced chain across the Caribbean Sea, blockading the mouth of the Gulf of Mexico and the entrance to the Panama Canal. Their enormous strategic value is visible at a glance. Their commercial value is calculable when one considers the fact that they lie right across the trade routes to the great American ports on the Gulf coast, the only important sea ports of entry to the Mexican republic, and the Panama Canal, three arteries of trade still in their infancy, but even now by no means negligible. To the people of these shores and along the Spanish Main, Canada's commercial possibilities and industries are unknown. The very name signifies nothing to them. On one occasion I wished to send a cable from an important city in Central America to Canada. The local manager to this day, I am sure, believes "there is no such country." It was not in his books, and it was only with much head-shaking and fears expressed that he permitted me to pay for a cable to British North America.

Would Mean More Steamship Subsidies

The Act of Federation, however, must be accompanied by the provision of transportation. Canada must supply transportation, and abundant transportation, or the whole scheme of federation falls through. One steamship company, as in the past, would have to be subventioned. I feel confident that Canada would receive a return in business and from new fields open for industry that would well outweigh the money spent in subvention. It is understood, however, that a line of regular sailings would have to be established of fast vessels, properly equipped by refrigerator or cold-air process, to deliver tropical produce at Canadian ports in perfect condition. In fact, the government might be well advised to operate some of the ships, now building to its order, on this route, where they would act as valuable feeders to the government railways.

A great deal of trade between Canada and the West Indies could be carried on by sailing vessels. Of these, the colonies now have a considerable number plying in inter-insular trade and to the mainland. The demolition of customs barriers and the establishment of a regular channel of trade between Canada and the West Indies would mean that these vessels would follow that channel. It would mean the establishment of a healthy merchant marine for Canada without the need of subsidies, save one, bonuses, or complicated shipping laws. It would mean increasing the angle of every Canadian's point of view, and Canadians, while broadening their minds in the pursuit of new business, would bring to the knowledge of millions of other minds what Canada is capable of and is doing. I am not emphasizing in this article the collateral benefits that will accrue to Canadian commerce, once established in the West Indies, through nearness to markets not under the British flag. That they will be many no one can gainsay, and they are well worth considering.

I would not wish to damage whatever force there may be in these arguments by enthusiastically proclaiming that it is a finished empire that is proposed by federation to add to the Dominion of Canada. It is not. Some of the colonies are prosperous and others not. But the "stuff" is there. The British West Indies and possessions have every natural resource that Canada has not. Some may say that Canada has sufficient to do to develop her own resources. That is true for the present, perhaps, but it will not be true always.

It is generally admitted in the West Indies that there is a very strong feeling among them in favor of federation with Canada. Many small things would have to be discussed and agreed on, but, in the main, the cry is, "Give us transportation." Let this want be supplied. Both contracting parties will immediately benefit by the expansion of trade, and the development of the natural resources of these colonies will come, inexorably, in the fullness of time.

The West Indies are by no means wild and uncivilized countries, nor are they inhabited, even in part, by savage or turbulent people. In fact, speaking generally, their civilization antedates that of Canada. The people are kindly, law-abiding and religious. They are intensely loyal, as their behavior during the great war well displayed, but the feeling has existed for a long time, and is growing day by day, that the British West Indies, for their soul's sake as well as the welfare of their industries, must associate themselves with some strong and progressive nation. England, to whom they naturally would look for encouragement of their industries and provision of capital, is a long way off. The British West Indies believe, and with reason indisputably, that their interests would be better protected by having their "high command" in closer touch with the country. . . . It is said on all sides that some steps must be taken, federation with Canada if possible; if not, annexation to the United States. The United States have already taken over the Danish West Indies and the island of Porto Rico. I would ask every Canadian, in whose memory the, to Canada, calamitous decisions of the Ashburton Treaty, dealing with what is now the State of Maine, and the Alaskan Boundary Commission, still rankle—is Canada to lose this opportunity also?

It needs no imagination to see the advantage that would accrue to Canada in having as an integral part of her Dominion a department ranging in climate from semi-tropical to tropical, with immense potentialities of resource, as well as actual industries, producing those commodities for which now Canada has to go afield. In the post-war period, when taxation will be the dominant problem in everybody's mind, it is well to calculate the advantage of retaining within the Dominion every mill of every dollar spent for the acquisition of some commodity against the disadvantage of permitting a large portion of that dollar to go out of the Dominion to enrich some foreign producer, middleman and carrier.

Canada needs these colonies. I have said that before, and I repeat it, not to start a sentence, but for the sake of emphasis. It is not to be inferred, however, that Canada's commercial activity will be greatly affected by the acquisition of the same now, or even in the next ten years. But Canada may be able to join with these colonies now, and on easy terms, too, and she will not be able to do so in ten years' time. The day will surely come when Canada, to maintain her commercial supremacy in some line of manufacture or another, will be forced to look for the advantage of drawing her raw material from her own boundaries. Whether she will find this advantage depends on us. On whether we have foresight enough to look over the pile of business on our front doorstep, which I grant, is big enough to blind the shortsighted, toward the time when Canadian industry will be working at "capacity load."

What the West Indies Produce

The reports issued at the Colonial Office give, in great detail, statistics of exports, imports, etc., of these different possessions, but a resumé of the principal products may be of interest to the reader:—

Bermudas.—Hides, skins, etc.

Bahamas.—Sponge, sisal (hemp), shell, fine woods for furniture, fish, salt, fruit.

Jamaica and Dependencies.—Cocoa, coffee, fruit, ginger, cattle, hides, logwood, rum, sugar, tobacco, fustic, salt, cocoanut, etc.

Leeward Islands.—Cattle, cocoa, sugar, limes, cotton.

Windward Islands.—Cocoa, cotton, spices, fine woods, etc.

Barbadoes.—Cotton, sugar.

Trinidad and Tobago.—Sugar, cocoa, cocoanuts, fine woods, asphalt, crude oil. This colony is one of the most prosperous in the group. The establishment of the fact that oil exists in large quantities, coupled with its geographical position on the trade routes between North and South America and the Panama Canal and Europe, would indicate a brilliant future, if only as a fuel station.

British Honduras.—Sugar, rubber, cocoa, mahogany.

British Guiana.—Sugar, fine woods, rice and minerals.

The advantages to the West Indies of federation are equally clear, and, indeed, much more immediate. It will be understood by them that they enter the federation in no sense as colonies or dependencies of Canada, but as partners, and Canada's advancement will be theirs. Instead of a separation of the ties that bind them to England, this step will allow them to show their loyalty in the highest sense of the word. Federation, by placing them in a better position commercially, will enable them to develop their strength and resources, and to become a greater economic asset to the Empire in time of peace and a real bulwark in time of stress. The action of federation will have no effect on the commerce of the West Indies save one, beneficial to supplier and consumer. The foreign companies that have heretofore traded with these colonies have not been impelled to do so because the colonies were governed from England, but because they have been able to dispose of at a profit the commodities furnished. That this condition will be altered prejudicially by federation I cannot see. The introduction of tropical products into Canada free of duty will not prevent their consumption in other countries and must be of advantage to the producer.

That Canada will in time furnish a more proportionate share of manufactured articles and imported foodstuffs to these colonies is certain, but the change will come gradually. The foreign importer will continue to supply the demand until ousted by cheaper goods from domestic sources, that is to say, the manufacturing portion of the Dominion. The percentages of distribution of the imports and exports of the West Indies are approximately as follows:—

	Imports. Per cent.	Exports. Per cent.
United Kingdom	20	45
United States	71	31
Canada	5	12
Other countries	4	12

Considering the imports, federation should not affect greatly the percentage supplied by the United Kingdom, as this, I take it, is largely special machinery and articles that she is in a predominate position to supply. The percentage supplied by "other countries," also probably of a special nature, we can assume will not change to any extent. The remaining percentages, however, cover imports consisting chiefly of articles which Canada is in almost, if not quite, as good a position to supply as the United States. Although the present condition, the disparity of imports, is due largely to the fact that communication between Canada and the West Indies practically ceased after the outbreak of war, this is not the only reason, and the Canadian exporter must pull himself together and realize that if he thinks the West Indian market of small importance, the United States exporter does not. I have good cause for saying this, as I know of cases where West Indian merchants who have had orders booked by representatives of Canadian firms, later refused, for reasons entirely inadequate or delayed beyond all reason, have been forced to turn to American sources. It is needless to point out how one or two cases of this kind will tend to create a lack of confidence in the whole structure of Canadian business, and our cousins across the line are not slow to take advantage of it.

We all must realize that it is economic law that governs the progress of people. The extra miles of sea that separate the West Indies from the mother country must always act as a deterrent in the establishment of intimate commercial relations. One might argue from this, patriotism apart, that the natural protector of these colonies is the United States. Without enlarging on this side of the question, which, in the West Indies has some support, I beg to differ. The West Indies would have in Canada a market without competition, while the United States have already large tropical possessions from whence keen rivalry would arise. The main interests of these colonies will always be as producers of raw material which has to be transported to the industrial centre. There is not a great deal of difference in the distances from the West Indies to the industrial centre of the United States and the industrial centre of Canada. It is worthy of note that when the deep waterway system of the St. Lawrence is completed both centres possibly may be supplied by the same route. It would be of great advantage to the Dominion to develop the harbor, dock and shipyard facilities of the West Indies, while the United States would have to consider the effect on already existing similar establishments in their own country.

Question of Government

It is suggested that commercial and not political union is what Canada and the West Indies need. I feel sure this is not so. Commercial union means simply reciprocity treaties. To the West Indians these would invite retaliation on the part of other countries, and to Canada would afford no guarantee to justify a settled policy that will be necessary for the full advantage of the union. Trade and commerce must go hand-in-hand with government. To attempt to establish the "head office" of West Indian trade in Canada while the "head office" of West Indian government is in London would surely lead to an infinite number of complications. Manufacturers, importers and exporters should have easy and immediate access to government. Conditions change daily, and what is good to-day may have to be altered to-morrow. Few things are more sensitive than trade and commerce, and, as with a complicated engine, continual adjustments may have to be made. It would appear to be poor policy to have the chief mechanic living thousands of miles away.

With the inclusion of the West Indies in the Dominion of Canada, the forms of government of the former will have to be altered. I do not think that any two of the nine colonies have an exactly similar form of government. While some of the colonies have now a restricted form of representative government, the majority are governed through the Colonial Office by a system of benevolent autocracy. To all of them the form of government they would acquire by federation with Canada would be partly new, to some entirely so. While it would be the policy of the federal government to allow the West Indian province or provinces absolute freedom in their selection of a system of provincial government, it is permitted to us to speculate on what form that would take and its relation to the Dominion parliament and representation.

There are, broadly speaking, two methods of government from which to select. The first, a form of paternal government, either along the lines as now administered by the Colonial Office, or some system such as was accorded to our northwest territories. The second, government by representation through suffrage. The first method has its advantage when we consider the material with which we have to deal. Its disadvantages are many. It is entirely foreign to our democratic form of government. It is repressive. Progress and expansion will not move as rapidly or as freely as with representative government. Its application would merely mean exchange of personnel and the tried official of the Colonial Office, men of long experience in this form of government, would be replaced by Canadians, in the main, of no experience. It is possible that some of the colonies are at present overstaffed, but I doubt if a change to Canadian administration would mean a reduction of economy along these lines. Government by representation has its disadvantages, the greatest of which is the preponderance of unskilled labor, illiterate and irrational. Of the 2,125,000 inhabitants of the West Indies, fully 70 per cent. are in this class. In view of the origin and history of these people and the retarded mental development of the mass of the population, I believe consideration should be given to the fact that the minority, the intelligent class, have by far the greater stake in the country. The trade and commerce is entirely in the hands of this minority, and to them is due all the progress in industry that has taken place.

It is evident, therefore, that a combination of the two methods of government is the only practical solution suitable to things as they are. That is to say, a legislature composed partly of members elected by the people and partly of members appointed by the Crown. In the course of time fuller powers of representation could be given by the establishment of a "literacy test" as a pre-requisite to franchise. This test already exists in some of the colonies, and, I think, if properly enforced, would equitably maintain the electoral balance of power. Applied regardless of race, it would protect the educated and progressive, while it will stimulate the illiterate by holding out a reward for better education.

To decide the number of representatives to be sent by the West Indies to the Dominion parliament is not within the province of this article, and will, of course, be settled by the delegates of the high contracting parties. The Lieutenant-Governor or Governors of the new province or provinces should be appointed by the Governor-General of Canada in council. A keen business man, preferably not a resident of the West Indies, according to expressed opinion, would be most acceptable. The proportionate composition by members of the legislative assembly or provincial parliament should be in the ratio of eight to seven, eight to be appointed by the Lieutenant-Governor-in-Council, with the Prime Minister and Cabinet of Canada, for every seven to be elected by the people, the franchise to remain unchanged where such exists and a similar franchise to be given where non-existent. The legislature would meet, and the fifteen members, or multiple thereof, would elect the representatives, though not necessarily of their body, for Ottawa. I cannot see that the exigencies of government demand more than one chamber, but if it were thought necessary to have an upper house, it could be elected by the legislature for a term of years only, in the same way as the representatives to the federal parliament.

This is simply an outline, and only intended as a suggestion to cover the points that seem, in the writer's opinion, to have given rise to the most apprehension and contention. Government by representation, as indicated above, is fuller, more responsible and freer than at present enjoyed by any of the colonies, although the Bermudas, Bahamas and Barbadoes elect a majority of the members of the Legislative Assemblies, and, I think, should not be unacceptable to them. There are, of course, a great many other matters of importance connected with government that would have to be dealt with, but they are easily susceptible to agreement and will be attended to at the appointed time. There are few subjects that have given rise to more controversy than that of framing or changing the form of government of a country. I humbly realize that the question requires deep study on the part of trained and experienced minds—study that I have not been able nor am I in a position to undertake, but I venture to hope that this brief survey will indicate a fact, of which I am confident, that it is by no means impossible to evolve a form of representative government applicable to the present state of development of these colonies, equitable and satisfactory to all.

CHANGE IN AUTOMOBILE INSURANCE RATES

When the association of companies writing insurances connected with automobiles was organized, it was with the expectation of considering from time to time the experience derived from writing the business, and opportunity was taken at a meeting held on July 7th, to revise some of the rates which have been in force so far this year. The losses by theft have been very heavy, and some drastic action will have to be taken by the public and the authorities to stop this great and growing evil, or the companies will be forced to increase present rates. The experience of the companies on collision insurance has also been bad.

It was therefore decided to make no change in the rates now charged either on theft or collision, but upon the rates charged for public liability, property damage and fire insurance, the present rates were reduced by 25 per cent. The companies hope that they will be able to maintain the rates at this figure.

MONEY MARKETS

Messrs. Glazebrook and Cronyn, exchange and bond brokers, Toronto, report the following exchange rates to *The Monetary Times*:—

	Buyers.	Sellers.	Counter.
N.Y. bonds	2 13-64 pm	3 1-32 pm	....
Mont. funds	par	par	⅛ to ¼
Sterling—			
Demand	$4.61	$4.62	Nominal
Cable transfers	4.62	4.63	Nominal

Rates in New York, sterling, demand, $4.48¼, nominal.
Bank of England rate, 5 per cent.

REPORT ON TORONTO'S FINANCES

The annual report of the Toronto Commissioner of Finance on the funded debt and sinking fund for the year 1918 has just been made public. The gross funded debt on December 31st, was $104,116,152 and the net general debt, after deducting the sinking fund of $13,540,464 and the specially rated and revenue producing debts, was $44,289,618. The assessed value is $621,434,201, capital assets $100,378,063, the area 25,722 acres and the population 489,681. During the year debentures to the amount of $6,893,102 were sold and debentures matured and redeemed to the amount of $3,100,383, making an addition of $3,792,719. Of the matured debentures $1,935,778 were met out of sinking fund moneys, while the balance of $1,164,606, which were instalment debentures, were met in the usual way out of current tax levies. During the past six years the debentures sold by the city have been as follows:—

1913	$16,764,715
1914	14,945,057
1915	11,574,748
1916	12,385,915
1917	4,134,972
1918	6,893,103
	$66,698,510

Regarding the future policy of the city, the finance commissioner comments as follows:—

"It requires but little consideration to convince anyone who will examine into the city's resources and conditions, that most serious consequences would result from continuing such a course as that followed in recent years. On the contrary, a definite policy of capital expenditure, covering the next five or six years, and in keeping with the city's financial ability, should be adopted, and so planned, that the most urgent and necessary works would be undertaken at once, leaving others less pressing and essential to follow later."

A branch of the Bank of Montreal will be opened for business on or about July 12th at Temiskaming, Que., under the management of Mr. J. W. Wallace.

RECIPROCITY WITH THE UNITED STATES

A VALUABLE contribution to the history of commercial relations between Canada and the United States is contained in the report of the United States Tariff Commission on Reciprocity and Commercial Treaties. Dealing generally with the trade arrangements of the United States, the report emphasizes that no continuous policy has been pursued in the past, and that the new position of the United States in world politics entirly alters its outlook as regards commercial affairs.

Before 1890, only two agreements were made; one of these was the Canadian Reciprocity Treaty of 1854, which is the only successful attempt at reciprocity between these two countries. It remained in force for eleven years, and the report deals at length with the effects on the United States. Reviewing its abrogation and subsequent developments, the report states:—

"The termination of the treaty involved the termination of the arrangements which had relieved the political tension in Canadian-American relations. It offered the possibility of serious political consequences. The action of the United States and the hostile attitude of the American people, of which it was an evidence, were prominent among the factors which brought about, in 1867, the uniting of the Canadian provinces into the Dominion of Canada.

"The commercial effects of the abrogation were less than had been expected. In so far as trade was affected at all, it was the United States rather than Canada that suffered. The chief direct effects on the United States seem to have been to lay the burden of certain duties on the American consumer and to divert from American railways and merchants a part of the business of transporting, handling, and re-exporting Canadian produce. The chief indirect result was to establish among the Canadian people a sense of grievance which affected trade to some extent and which undoubtedly contributed in no small measure later to Canada's rejection of reciprocity when the United States finally proposed it.

"For thirty years after the termination of the treaty, Canadians continued to express a desire for reciprocity, and they made overtures several times to that end.

"The treaty of Washington of 1871, disposing, among other things, of the fisheries and the waterways controversies, was a bitter disappointment to the people of Canada. They felt that the British Government had thrown away the most effective lever for opening the American market. When the liberals entered office in 1874, they sent Mr. George Brown to the United States to negotiate for reciprocity. Mr. Brown offered reciprocity, not only in reference to natural products, but also on a long list of manufactures. A treaty was drafted, but with the provision that everything made free by Canada to the United States should also be made free to Great Britain, and the Senate rejected the draft. The conservative party in Canada thereafter urged a policy of consistent retaliation against the United States, and they secured an overwhelming victory at the polls in 1878. In the ensuing tariff Act of 1879 the Canadian free list was materially abbreviated. In 1887, Canadian commissioners offered to negotiate a treaty combining a settlement of the fisheries question with reciprocity, but this proposal was rejected by Secretary of State Bayard. The hostility which had characterized the relations of the two countries for twenty years was by this time rapidly decreasing and official attitudes became more conciliatory. In the spring of 1888, the House Committee on Foreign Affairs recommended that a commission be appointed to meet with Canadian commissioners and prepare a plan for commercial union, and at the next session a bill to that end was passed in the House, but was not acted upon in the Senate.

"In 1890 a reciprocity treaty with Newfoundland was drafted at Washington, but this was withheld by the British foreign office at the instance of Canada.

"Between 1890 and 1892, the conservative government in Canada made another effort to secure reciprocity, but the terms which it proposed were not acceptable to Mr. Blaine, nor were his proposals acceptable to the British and Canadian representatives. This was the last effort of the conservatives on behalf of reciprocity. Thereafter Canadian public sentiment, even among the liberals, swung strongly toward the 'National,' self-sufficiency policy, and from 1891 to 1910, the reciprocity question ceased to be a live issue."

THE BOARD OF COMMERCE ACT

THE closing days of the parliamentary session, which has just ended, were crowded by a rush of government business. Among the important bills put through were the amendment to the Insurance Act, 1917; the Business Profits War Tax Amendment Bill; the Income War Tax Act, 1917, Amendment Bill; the Customs Tariff Act Amendment; the Pension Act Amendment; and the Board of Commerce Act.

The last mentioned took the form of two bills. The one was the bill providing for the establishment of the board itself, and the other was the Combines and Fair Prices Act, which it was to administer. This legislation followed upon the recommendations presented by the Cost of Living Committee, which had already been accepted by the House. In introducing the bill for its second reading, Hon. Arthur Meighen outlined its purpose as follows:—

"The constitution of the board will be almost wholly along the lines of the constitution of the Board of Railway Commissioners for Canada. The tenure of office, the security of tenure, and the powers of the various members will be parallel to those that have so long ruled in the Board of Railway Commissioners. The number of members of the board, however, is much more restricted, being three instead of six. The exceptional powers given to the chairman, the exceptional qualifications demanded of him are akin, indeed, in every respect, alike to those of the chairman of the Board of Railway Commissioners. The purpose of the board will be to administer the Combines and Fair Prices Act, the terms of which are already before the House, the bill having been distributed yesterday morning, and as I stated, the board will have other and more general powers in relation to control, within the limits of the bill, of prices in Canada. The salaries to be paid to the board are not specified in the bill as presented. Proposals will be made in committee after the views of honorable members have been obtained as to recommendations in that regard. The head office of the board is fixed for the city of Ottawa, but the jurisdiction of the board, of course, is equal throughout Canada.

"The main question that will be in the minds of honorable members will be as to the basis upon which the government seeks to exercise control in matters relating wholly to civil rights and the executive powers of the board in that regard. The only method by which the federal authorities can either act or legislate with regard to questions that are fundamentally questions of civil rights is by the establishment of offences and by providing prohibition of the commission of such offences. That is the method adopted here. While civil rights appertain to the provinces alone in so far as civil remedies are concerned, indeed, appertain so exclusively to them that no legislation on our part, however well intended, would be effectual at law; nevertheless, for the reason that the powers of one province to act effectually are, in a large degree, hampered by the decision of another province not to act in the same direction, there is, as a result, a very marked reluctance on the part of individual provinces to place on their statute books legislation dealing with the subject, and the call is very general—however just it may be is another question—and very persistent that the federal authorities, having jurisdiction throughout the Dominion, should, within the limits of such jurisdiction that they have, do something to control what is commonly known as profiteering. Consequently, by the Combines and Fair Prices Bill, certain rules and principles are laid down, or to speak more definitely, the Board of Commerce is empowered to establish rules and principles and prohibitions, the violation of which, once they are made the order of the board, will constitute an offence and be punishable as such. The federal authorities have power to constitute offences and to provide for their prohibition and punishment, and exercising that power, the Combines and Fair Prices Act is submitted to parliament as the best and most reasonable and effectual means of putting into effect, in the only way in which it can be put into effect, the power vested in the federal parliament."

A SUCCESSFUL FINANCIAL LEADER

THE announcement that the resignation of Sir Thomas White, Canadian Minister of Finance, is now in the hands of the Premier is being received with considerable regret in financial circles. Not only has he been one of the most successful ministers in the experience of Canadian government, but during the period since he took office in 1911 until the present, the Department of Finance has developed into one of outstanding importance. Sir Thomas White's regime has included the floating of five huge domestic war loans, exceeding in amount by many times the whole national debt in 1914. In addition, there has been the inauguration of an income tax, a business profits tax and other measures dealing with currency.

THE BRITISH WAR LOAN

THE simultaneous offering of two distinct varieties of government war bonds by the British government, is somewhat of an innovation in war finance. The one is the four per cent. funding loan which is issued at 80 and is redeemable not later than 1990 with an option to the government of redeeming it on or after 1960. The four per cent. Victory bonds offered at 85 are redeemable by drawings on and after September 1st, 1920.

The object is, of course, that those who desire a long term investment can purchase the funding loan while those who prefer to pay £5 extra can have one of the Victory bonds with the chance that it will be redeemed at par any time on or after September 1st, 1920. In both cases a sinking fund is provided.

INTER-IMPERIAL TRADE

THE feeling that direct trade between different parts of the British Empire should be encouraged, has been growing for over twenty-five years, and received practical recognition by the adoption in Canada, in 1896, of an imperial preference. Such a preference has since been put into force by other British colonies and there has been an agitation that the United Kingdom should erect a moderate custom's tariff in order that a corresponding preference should be granted to the colonies.

The British government is striving to take full advantage of these opportunities, as the appointment of overseas trade commissioners in the different parts of the British Empire would indicate. The report on the trade of Canada and Newfoundland for 1918, presented to the British government by commissioners in Canada will be a convenient basis for considering the possibilities in the Canadian market. Among the interesting and valuable features of the report is the section giving suggestions for United Kingdom manufacturers and exporters to Ontario; this is part of the special report on trade in Ontario presented by Mr. F. W. Field.

Regarding the practical results so far achieved the report says: "It is a matter of some difficulty to trace actual results, so far as orders received by United Kingdom firms are concerned, from the work of this office. Several important orders which would have been secured in this way were lost entirely on account of war conditions. Orders for spinning machinery were obtained, and at a board of trade meeting in Ontario town, addressed by the Trade Commissioner, the representative of a British firm stated during the discussion which followed, that as a result of information gathered from this office, he had been able to obtain an order for his principals valued at £7,000. It has also been possible in some cases to divert trade-channels so that the business has been transacted between this market and another point in the British Empire, rather than between Ontario and a foreign point; or between Ontario and a British export house abroad rather than between this province and a foreign export house."

IMPERIAL BANK

OF CANADA

DIVIDEND No. 116

NOTICE IS HEREBY GIVEN that a dividend at the rate of twelve per cent. (12%) per annum upon the paid-up Capital Stock of this Institution has been declared for the three months ending 31st July, 1919, and that the same will be payable at the Head Office and Branches on and after Friday, the First day of August next.

The Transfer Books will be closed from the 17th to the 31st July, 1919, both days inclusive.

By Order of the Board,
W. MOFFAT,
General Manager

Toronto, 18th June, 1919.

PERSONAL NOTES

Mr. A. E. Duncanson has been elected a member of the Toronto Stock Exchange.

Mr. W. M. German, ex-M.P., of Welland, has been appointed Industrial Commissioner for that city.

Mr. Sydney Smith has been appointed manager of the Toronto branch of Messrs. McDougall and Cowans, Montreal stock brokers, which is now open for business.

Mr. J. E. MacDermid, formerly of the legal firm of Ferguson and MacDermid, has joined the National Trust Company, as trust officer of the Saskatoon branch.

Sir Augustus M. Nanton, of Osler, Hammond and Nanton, Winnipeg, and Mr. Albert W. Austin, president of the Consumers' Gas Co., Toronto, have been made vice-presidents of the Dominion Bank.

Mr. R. M. Wolvin, president and managing director of the Montreal Transportation Company, and vice-president and managing director of Halifax Shipyards, Limited, has been elected a director of the Dominion Steel Corporation, filling the existing vacancy on the board.

Mr. A. A. Wilson, formerly of the Canadian Bank of Commerce, has joined the Park-Union Foreign Banking Corporation to handle its foreign business from San Francisco. Mr. Wilson has been assistant manager in San Francisco of the Canadian Bank of Commerce since 1915.

Mr. A. B. Barker now has charge of the work formerly handled by the late H. M. P. Eckardt, in connection with the banking courses of Queen's University and the Shaw Correspondence Schools. The examinations this year were held on June 9th, but the response was small owing to the absence during the year of large numbers of students on active service.

Mr. H. W. Manning, formerly manager of the advertising and supplies department of the North American Life Assurance Company and editor of their monthly publication, has been appointed district manager for Toronto and York County. Mr. Manning graduated from Toronto University in 1912, and after a year in the advertising department of the Canada Life, joined the North American Life.

Mr. John W. Woodthorpe, F.C.A., senior partner in the firm of Woodthorpe, Bevan and Company, of Vancouver and London, has been elected president of the Institute of Chartered Accountants in England and Wales, for the current year. Mr. Woodthorpe was elected an Associate of the Institute in June, 1880, a month after its incorporation, and became a Fellow in February, 1891.

Major George S. Laing, chartered accountant, of Winnipeg, former senior member of the firm of Laing and Turner, has opened an office of his own at 325 Grain Exchange Building, Winnipeg. Major Laing was for three and one half years at the front, was seriously wounded, and invalided home. Since his return to Canada Major Laing has held the position of assistant director of the Department of Soldiers' Civil Re-establishment. He has recently resigned from this position and is again taking up his old profession. Major Laing is well-known in Winnipeg, having been closely connected with the grain trade for many years.

Mr. S. E. Elkin, M.P., of St. John, N.B., and F. E. Kenaston of Minneapolis, Minn., both of whom are directors of the Union Bank of Canada, have been elected directors of the Park-Union Foreign Banking Corporation. The other directors representing the Union Bank are: Sir William Price, Quebec; H. B. Shaw, Winnipeg; R. O. McCullough, Galt; Stephen Haas, Toronto; W. J. Dawson and F. L. Appleby, New York City. The directors who represent the interests of the National Park Bank of New York are: Richard Delafield, Stuyvesant Fish, Gilbert G. Thorne, Cornelius Vanderbilt, R. H. Williams, E. C. Hoyt, A. P. Villa, of A. P. Villa and Brother, of New York, and C. A. Holder, president of the corporation.

OBITUARIES

Mr. James A. Macfadden, a prominent Toronto business man, passed away this week in that city after a lengthy illness.

Mr. Martin Leverty, manager of the stationery department of the Canadian Bank of Commerce, Toronto, died last week after six weeks illness.

F. E. Kenaston,
Minneapolis, Minn.
Director, Union Bank of Canada; Director, Park-Union Foreign Banking Corporation.

S. E. Elkin, M.P.,
St. John, N.B.
Director, Union Bank of Canada; Director, Park-Union Foreign Banking Corporation.

F. Williams,
Toronto.
Manager for Canada, Motor Union Insurance Company of London, England.

KEEPING A BANK'S LOANS LIQUID

Application for Loan for Equipment Must be Carefully Examined—Conservative Requirements Should be Met

BANK managers in all our cities are often asked for loans to increase business capital. At the present time, when costs are high, and markets are contracting, it is essential that much discrimination be used in these cases. Discussing this subject, the June issue of the "Teller," issued by the Sterling Bank, says:—

"The manufacturer who seeks a loan for the purpose of obtaining new equipment, demands special study. His is a problem that calls for shrewd judgment and business-like tact on the part of the banker. Men may come to you for a loan to help them make an advantageous purchase of materials; or to cover the wage-bill between selling seasons; or to help them carry accounts to maturity. All these are ordinary, everyday legitimate banking transactions—accommodations that help a business along. Loans of this type are profitable, safe business for the bank to handle, because they are quickly realized or easily negotiable. In making a recommendation for such a loan, facts and figures are the only guide. Head office will treat the recommendation as it treats all loans sought for operating expenses—from a purely business standpoint—fairly and without bias.

"But when a manufacturer wants a loan to enable him to increase his manufacturing facilities, either by enlarging his plant or by installing more modern, more efficient machinery, an entirely new aspect of the question is raised. Instead of seeking an accommodation for operating expenses, your customer is asking for new capital. Such a loan, if made, may not be easily realizable. It will not be a good asset for the bank, because it may not be a liquid asset. But this is not to say that the bank makes no loans for new equipment. It does. But it makes them only when they are liquid assets—quickly realizable. Every bank manager should explain this fact to his customers—explain it thoroughly, yet tactfully. The bank is always glad to aid in business expansion—within the strict limits of a bank's legitimate activities.

"That is one phase of this question you must always be prepared to face. Another is this: When a man comes to you for a loan to help him increase his manufacturing facilities, he comes to put a business proposition up to your business knowledge and judgment. If he talks machinery, you should be prepared to talk intelligently on that subject. He will be enthusiastic. You should be able to appreciate his enthusiasm. He will talk production and profits. You should be able to analyse production and profits.

"There is no doubt that many harebrained schemes and ideas are presented to bank managers. Use your native intelligence and the tact your training has given you to turn down these business freaks as courteously and gently as you can. But when a real business proposition comes on to your desk, examine it in a real business-like manner. New equipment may increase a factory's production many-fold. But will it increase it beyond the selling facilities of the concern? Production should follow demand hand and foot—but it should never outstrip it. Equipment costly enough to require a loan is too costly to be allowed to lie idle. The deeper you go into a manufacturer's problems, the more you learn about business—the more you learn about banking. The customer who is enterprising enough to want new machinery and larger manufacturing facilities is a good customer to have. Straighten out his loan problem on the best basis you can—before sending in your recommendation. But always remember that loans must be liquid assets."

The following is a statement of the shipments of ore, in pounds, for the week ended July 4th, 1919:—

Timiskaming Mining Co., 87,416; O'Brien Mine, 64,075; Mining Corporation of Canada, 219,069; Buffalo Mine, 241,615; total, 612,175.

The total since January 1st, is 12,938,635 pounds, or 6,464.4 tons.

NEW BANK OF NOVA SCOTIA DIRECTORS

At a special general meeting of the Bank of Nova Scotia held in Halifax on July 8th, the directors of the former Bank of Ottawa were added to the Nova Scotia board. These are: Hon. George Bryson, Fort Coulonge, Que.; John B. Fraser, Ottawa, Ont.; Russell Blackburn, Ottawa; Sir George Burn, Ottawa; Sir Henry K. Egan, Ottawa; Alexander Maclaren, Buckingham; Hon. Sir George H. Perley, London.

CANADIAN TRADE COMMISSIONERS HERE

The Weekly Bulletin of July 7th, published by the Department of Trade and Commerce, gives the following list of Canadian trade commissioners now here, or coming to Canada shortly:—

Dr. J. W. Ross, Shanghai, now in Western Canada, leaves for Shanghai sailing from Vancouver July 24; B. S. Webb, Buenos Aires, now in Canada; G. B. Johnson, Rio de Janeira, now in Canada; D. H. Ross, Melbourne, now in Canada; J. E. Ray, Manchester, now in Canada; W. J. Egan, Cape Town, now in Canada, W. A. Beddoe, Auckland, will arrive in Ottawa about July 16; Harrison Watson, London, will arrive in Ottawa about September 15; H. R. Pousette, address, Sarnia, Ont., has returned from overseas but has not yet been assigned to any post abroad.

Canadian manufacturers wishing to communicate with any of these Trade Commissioners may address them, care Commercial Intelligence Branch, Department of Trade and Commerce, Ottawa.

BANK BRANCH NOTES

The local branch of the Bank of Toronto, at Preston, Ont., is to erect a building at the corner of King and Wellington Streets, at a cost of about $50,000.

Mr. F. T. Short has been appointed manager of the Union Bank of Canada at the new branch at Truro, N.S. Mr. I. D. Eastman has been appointed manager of the Kentville, N.S. branch.

A branch building of the Royal Bank of Canada is to be erected at Shawinigan Falls, Que.

The year 1919 will probably be a record one for the opening of branches, and the construction of new buildings. The Canadian Bank of Commerce still has an extensive program to carry out, one of its most important schemes being the erection of a building on the site of the old Kennedy Building, Portage Ave., Winnipeg. This property was purchased by the bank several years ago. The investment of the Bank of Commerce at this point will be about $250,000. It is estimated that this year the bank will erect about a score of brick buildings, and a number of smaller frame buildings. The Union Bank of Canada has in course of construction a building at the corner of Mountain and Main Streets, Winnipeg, to cost about $25,000, and intends opening other branches in the course of the next six months in the city of Winnipeg and other points. In fact, nearly every bank has a long list of branches to open in Manitoba, Saskatchewan and Alberta.

The announcement has been made by the Bank of Hamilton of several important changes in the executive and managerial branch. The changes involve the promotion of M. C. Hart, manager at Toronto, to be an assistant to the general manager at the head office, Hamilton. M. W. Morton, manager of the Regina office, has been appointed to the staff of the general manager in Hamilton, as pro-assistant general manager. G. H. Hodgetts has been appointed acting manager in Toronto, and F. H. McVittie, assistant manager in Toronto. Lt.-Col. D. O. Hooper, D.S.O., M.C., recently returned from active service overseas, has been appointed assistant manager in the main office of the bank in Hamilton.

The 24th annual meeting of the National Fire Protection Association will be held in Chicago on May 4th, 5th and 6th, 1920.

DOMINION CROP REPORTS

General Conditions in Canada are Below Average—Saskatchewan Has Suffered Most

A SUMMARY of telegraphic crop reports received on the condition of field crops throughout Canada was issued on July 3rd by the Dominion Bureau of Statistics as follows:—

Atlantic Provinces.—Prince Edward Island—Weather for June ideal. Temperature normal. Crops all in at close of month. No frosts. Rain well distributed, followed by bright, warm weather resulting in maximum growth of all vegetation; fruit prospects good; hay heavy; grain above average; potatoes, corn and roots fair; no outbreak of insects. Nova Scotia (Kentville)—Rainfall during June sufficient to meet need of all crops; weather warm and bright, favoring rapid vegetation; all crops up to the average; average acreage of grains and roots planted with lessened areas in potatoes. Apples good. New Brunswick (Fredericton)—June very favorable for all crops excepting on very dry soils; grass and grain better than average; pastures excellent; early potatoes suffering from flea beetles, necessitating early spraying; large apple crop promised a full average crop. Acreage has been well seeded and planted, and showing is good. Haying will be early; clover luxuriant. .

Quebec.—(Ste. Anne de la Pocitière)—Last three weeks of June excessively dry and intermittent very warm days; all crops need more rain; hay crop below average, prospect for other crops only fair; European plums very poor; apples promising to date; potatoes better than last year. Rain would greatly help. (Lennoxville)—Weather throughout month has been favorable for all crops, especially clover, which looks very promising. The temperature dropped the evening of the 29th to 30th, causing considerable damage in many sections to beans, corn and garden vegetables. (Quebec)—Hay only medium crop; pastures fair. Potatoes, grain, corn look fine; roots were delayed by drought, but are promising; condition of vegetables, apples, currants, gooseberries is very good; of strawberries, raspberries, good; of plums, medium; of cherries poor; of animals medium.

Ontario.—From the Ontario Department of Agriculture—Fall wheat nearly ready to cut, well-headed, straw long. Late sown spring grains short. Straw, owing to June drought, but all crops helped by recent showers. Early potatoes promising; late poor; hot, dry season gave roots a poor start; corn growing rapidly; clover and alfalfa cutting good yields.

Manitoba.—From the Manitoba Department of Agriculture—June weather warm and showery; wheat 20 in. high; 60 per cent. in head two weeks ahead of normal; oats fair; barley promising; flax fair; rye good; slight cutworm damage; grasshoppers ate some crops south-west corner of Manitoba; damage not general or serious; hay promising; general outlook good. (Morden)—Crops well advanced for season; harvest promises to be very early; rainfall over 3 in. in two hours; no grasshoppers in Morden district; but wireworms and cutworms plentiful.

Saskatchewan.—From the Stskatchewan Department of Agriculture—Heavy rains have fallen in many districts throughout Saskatchewan during the past three days, although too late materially to affect the wheat crop, especially the southwest, where it is feared it is beyond recovery. It will greatly improve later sown grains. Reports show wheat heading out in consequence of drought from 6 to 8 in. high. (Indian Head)—Crop conditions about average. Straw will be short; 50 per cent. of wheat headed; hay crop 75 per cent. of average; slight damage from hail on the 29th. (Rosthern)—Nearly 1 in. of rain on 10th, stopped soil drifting for few days. Wind and dust continued doing damage till 27th. An inch of rain 27th to 29th.

Alberta.—From the Alberta Department of Agriculture—Peace River, excellent rains and warmth. Central Alberta fair; scant moisture in June looked like 15 per cent. reduction of normal; coming back now. Southern Alberta, Red Deer south to Carstairs fair; Carstairs south to boundary most of crops partially burned; fair on Main C.P.R. Some crops on Aldersby Crows Nest country practically failure. Pincher to Medicine Hat very hot and windy; 19th to 28th no rain and no reserve of moisture. East side of province dry. Medicine Hat to Vermilion, hay crop light. Stock men anxious. (Lacombe)—First ten days June cool and showery. Total precipitation one-half inch less than year ago. Latter part of month hot and dry; local showers in this district responsible for crops looking good; early cereals heading out at this station; hay crop light; northern and eastern sections province need rain.

British Columbia.—(Invermere)—The fore part of the month was cool, frost being recorded three times and doing considerable damage to garden and field crops. Irrigation has been carried on to the limit. Only 0.5 inch of rain fell during the month. Haying has commenced, but is only a fair crop. (Summerland)—Weather turned warmer; very dry; sweet cherry crop light; sour cherry crop good; apricots fair; peaches, apples and pears good; a very heavy June drop cut apples heavily, but good crop remains. (Sidney)—Orchard and small fruit crops in excellent prospects and condition; forage crops and cereals in good condition and haying is general; crop much above average. Pastures good; all livestock in good condition and in good demand.

Latest Reports No Better

A report from Swift Current, dated July 3rd, states that hail damage has made the crop situation in that section still worse. Between five and eight thousand acres are reported to have been affected. An official report issued by the Saskatchewan Department of Agriculture on July 1st, states that while considerable improvement resulted from the rains at the end of June, as much as 50 per cent. of the crops in some districts are beyond recovery. Other sections, which have not received any rain recently, are also in bad condition.

On the other hand, the situation in Manitoba is said to be very good. Mr. V. C. Brown, superintendent of western branches of the Bank of Commerce, estimates the condition of wheat in that province at from 111 to 130 per cent., excepting in the north-west part, where it is about 80 per cent. Opinion in Saskatchewan is that wheat cannot average over ten bushels to the acre, and in Southern Alberta the situation is just as bad.

There seems to be little doubt but that the crops this year will fall short of those of last year by probably 20 per cent. The estimate of the Dominion Bureau of Statistics for last year was 164,000,000 bushels, against 360,000,000 in the record year of 1915.

Mr. George W. Argue, president of the International Loan Co., Winnipeg, states that many farmers in Manitoba are in an excellent financial position and that there are some large areas where the yield will be between thirty and forty bushels. He states that there is a good demand for stock in the International Loan Co., and that he has sold more in the first five months of 1919 than during the entire year 1918.

A report issued by the Ontario Department of Agriculture, under date of July 7th, stated that fall wheat harvesting had already commenced. The average yield per acre is expected to be large, although some fears are expressed that the grain is ripening too rapidly. Some of the crop has been knocked down owing to the length of the straw. Other crops of vegetables and grains are in good condition in the province.

Loan companies do not regard the present situation as extraordinary, as two or three successive failures have already been experienced in some districts by companies whose operations in the west have been extensive. Borrowers, whose loans are in good condition and who have always made their payments when able to do so, will receive generous assistance. There will, of course, be many cases of hardship, where borrowers, who have not made any effort to improve their financial arrangements when crops have been good, will be in difficulty this year. It is understood that an effort is being made, and the assistance of the Saskatchewan government will be enlisted, to have the Dominion government extend railway lines into some of the seriously affected districts in order that the farmers may have an opportunity to obtain funds to meet in some degree their payments.

Union of Saskatchewan Municipalities Convention

Taxation Is Leading Subject of Discussion—Municipalities Not Satisfied With Single Tax on Lands—Canadian Union May Be Broken Up

THE problem of finding additional sources of revenue, or of shifting the basis of taxation in the urban centres of Saskatchewan to meet the changed conditions largely brought about by the collapse of the real estate boom and the war was the most important question tackled at the annual convention of the Union of Saskatchewan (urban) Municipalities held in Saskatoon, June 25th to 27th inclusive.

Land is the principle base of municipal taxation in Saskatchewan, about 86 per cent. of the revenue of the cities being derived from this source. Inflated assessment during the period of rapid growth before the war is resulting at the present time in the wholesale confiscation of city and town lots from owners who prefer to throw up their property rather than continue to pay a high proportion of taxes. In Moose Jaw, for instance, nearly one-fourth of the townsite is under tax sale proceedings.

The general situation was outlined by City Commissioner L. A. Thornton, of Regina, in opening a discussion on taxation in the following words:—

"Some years ago an annual increase of 30 per cent. in population was a common thing in many of our larger towns and cities, and we were limited in making provision for public works by our borrowing powers and the short construction period. Our energies were taxed to keep pace with the many demands for improvements, and many indications pointed to a continuance of this condition for some years. Land assessments were inflated to increase the borrowing powers, and just before the war the building of public improvements caught up to and exceeded the immediate demands. There is now good reason to hold that in most of our cities and towns the arrested growth will reassert itself in a comparatively short time, so that there will be population sufficient to share the burden now resting on the present population, very comfortably.

"In the meantime, however, it is necessary to devise means for raising revenues more adequate than those at present adopted. While the inflation in land values referred to has of recent years undergone correction, there is still room for further reduction. The taxes imposed upon land have been unduly heavy and large amounts are in arrears, making it most difficult to provide for carrying charges on the debt and for the many services required."

In 1917 the Saskatchewan government secured the services of Prof. Murray Haig, of Columbia University, to conduct an investigation into the incidence of taxation in urban municipalities. The resultant report was a valuable compendium of information and statistics. While no radical changes were suggested, the recommendations principally consisted of suggestions that further advantage might be taken of some of the other sources of revenue, at present only partially tapped, such as the taxation of improvements, and the possibility of the further development of the income tax was considered.

Since that time, at the request of the Union, the government endeavored to adopt a measure making it compulsory upon the cities to assess improvements at 60 per cent. of their valuation. Existing legislation, entirely optional, permitted the cities to make annual increments of 15 per cent. in the assessment of improvements until a maximum of 60 per cent. had been reached, but none of the cities up to date have taken full advantage of this clause. The rate of assessment on improvements in the various cities ranges from 15 per cent. in Prince Albert to 45 per cent. in Moose Jaw, the average rate in the seven cities of the province being 30 per cent. At the time the compulsory measure was proposed to be introduced much local pressure adverse to the measure was brought to bear, principally from Regina and Saskatoon, and the government withdrew the clause.

The question was discussed by the convention under four sub-heads:—(a) Should there be an unearned increment tax? (b) Taxation of improvements; (c) Income tax; (d) Suggestions for a more equitable distribution of taxation according to ability to pay.

Special Committee on Taxation

The discussion demonstrated that on the subject generally, and on the specific points referred to, there was a diversity of opinion. It was felt that the subject was too big and important to be dealt with by a gathering of that nature in the brief time available, and it was decided to appoint a special committee for the purpose. The Hon. Geo. Langley, Minister of Municipal Affairs, announced that he would use his influence to induce the government to pay the committee's expenses. The personnel of the committee includes the city commissioners of Regina, Saskatoon, and Moose Jaw, and four other representatives of cities, towns and villages.

"With respect to the tax on improvements," said Commissioner Thornton, of Regina, "there can be no question that our system did induce building, and has produced over-development, especially as to business blocks in the downtown section. It may be argued, however, that if our growth were normal, that the demand would reasonably regulate over-production. The writer believes that for the present the tax on improvements should be used to a greater extent, and would point out that our present acts permits of this. This real estate is now productive and should be called upon for a greater contribution to the tax revenue."

Commissioner G. D. Mackie, of Moose Jaw, also expressed himself in favor of a tax on improvements, pointing for support to Adam Smith's axioms of taxation. Mr. Mackie's views were given in full in these columns last week.

Commissioner Yorath, of Saskatoon, was strongly in favor of a compulsory measure requiring the urban municipalities to increase the assessment on improvements to 60 per cent. of their value, but not in one jump. He thought that the transition should be gradual.

The Hon. Geo. Langley, Minister of Municipal Affairs for Saskatchewan, referred to he present system of placing a heavy proportion of taxation on land as legalized stealing of property by the municipalities. He declared that sooner or later the cities and towns would have to tax improvements much higher than they were doing at the present time, and he was not at all sure that 60 per cent. would represent the maximum. He pointed out that under the existing system the basis of taxation was narrowed with every piece of property confiscated for arrears of taxes.

Unearned Increment Tax

As a matter of fact there was practically no opposition voiced to a substantial increase in the taxation of improvements with the exception of Mayor Black, of Regina, and he thought a small increase might be permitted. On the other hand there was a sharp divergence of opinion on the subject of the imposition of an unearned increment tax, and also with respect to a municipal income tax.

Commissioner Thornton, of Regina, said that in his view the taxes required from land had been such as to materially reduce the selling value of the land, and that under all the circumstances the suggestion for the recovery of the unearned increment would, if adopted, further reduce the value and hasten the time when more of it would cease to produce a tax revenue.

On the other hand, Commissioner Mackie, of Moose Jaw, thought the unearned increment tax feasible. "Having given real estate the relief which it certainly requires (by increasing the tax on improvements)," he said: "The urban centres should see to it that a reasonable percentage of the unearned increment on real estate due to the increase and

thickening of population, and ascribable in a very slight degree, if at all, to the labor or care of the owner, is appropriated to the community. There can be no doubt that the profits accruing from the sale of real estate ought to be the subject of taxation just as much as the profits from the sale of any other commodities."

Commissioner Yorath, of Saskatoon, thought the time was ripe for the imposition of an unearned increment tax. Property purchased recently, especially at tax sales, would be re-sold at considerably advanced figures in the course of the next few years, and the municipality should take a proportion of the profit.

There were others who while expressing approval of the principle of an unearned increment tax considered it impracticable. City treasurer H. W. Dixon, of North Battleford, for instance, said he liked the idea, but they would have to look to the provincial government for the necessary machinery for its imposition and collection, and O. J. Godfrey, town clerk of Indian Head, was afraid the machinery would prove too costly to make it worth while, and he expressed some doubt whether realty values would ascend as had been predicted by Mr. Yorath.

Income Taxation

Dealing with the possibility of the greater use of income as a source of taxation for the urban municipalities, Commissioner Thornton pointed out that in the United States this source of revenue had been developed in such a way as to produce a large proportion of taxation. "The writer feels," he said, "that much greater advantage of this source should be taken. There are many interests well able to contribute which now escape with comparative ease under our system. The income tax with us applies almost exclusively to the salaried man who is not fortunate enough to own property. The property exemption now in force should be repealed and municipalities should be required to institute definite practices as to collection of income taxes. The income tax will not amount to much with us so long as a municipality can exercise wide option as to its enforcement.

"May it not be argued," the Regina commissioner continued, "that the whole question of Dominion and provincial revenues as affecting municipalities should be considered in connection with municipal income tax, which under the circumstances would become an instrument of great importance and should be administered under central control? Our business tax, which at present admits of many objections, would properly be included in income. The public revenues tax (provincial), would be superseded, and many of the licenses now claimed by the province, could be left to the local authorities to which they properly belong. It is felt that some such evolution is reasonably imminent, and that the whole question requires careful examination which the provincial government might well undertake."

"The city Act at present assures that where a man is assessed on land and on income," said Commissioner Mackie, "he shall only pay in addition to the amount by which his taxes on such income exceed his taxes on land, and the speaker is of opinion that a similar amendment should be made to the Act dealing with the business tax, so that a man would only pay the amount by which his taxes on his income exceeded his business tax. The assessor has now power to call for a return from all persons in regard to their income, so that in future there should be no great difficulty in locating the taxable persons under this heading in cities and towns. Apart from this addition, however, very great alterations will require to be made to the city Act, if the income tax is to yield a fair percentage of the city's revenue."

Mayor Thomas, of North Battleford, expressed the opinion that a municipal income tax should be imposed and collected by the federal government. Others, while expressing the belief that the present municipal income tax was an unpleasant joke, suggested that it might be developed into a useful and profitable source of revenue. Mr. Godfrey, on the other hand, was pronounced in his opinion that the cost of income tax machinery would make it prohibitive. The Hon. Geo. Langley did not give the convention much encouragement on the subject, likening the income tax to the pea under the thimble which has a habit of being somewhere else.

Suggests Taxing Public Utilities

A source of municipal taxation hitherto undeveloped was suggested by Commissioner Thornton in the proposal that public utilities should be taxed. "Our experience with public ownership has been stated to be peculiar in general to the cities and towns of western Canada. Our faith in the principle has not been misplaced as results have shown. Services are rendered the public of standard quality, and at an expense less than under private ownership, and with an absence of interference and of special privilege which is not sufficiently appreciated. It is not at all difficult to differentiate between the user of the utility as such, and the taxpayer as such. They are not necessarily one and the same. In fact, many users contribute little in taxes, while every taxpayer, whether a user or not, is pledged to pay in his taxes for all losses sustained in operation of the utility. It is sometimes argued that when a surplus is earned it may be appropriated to reduce taxation. Our experience is that the earning of a surplus is the occasion for a demand for reduction of rates, and that this demand is often loath to take into consideration that proper provision should be made for other essentials, such as depreciation. A tax on utilities such as would be paid by private ownership, would be raised in the rates and not as a tax. It would reach everyone using the service, and would contribute at a rough estimate from 5 to 10 per cent. of the total revenues required by many of our larger cities."

While the special committee appointed by the convention is working out an amended scheme of municipal taxation, the gathering decided that in the meantime some relief to a minor extent might be secured by legislation empowering the municipalities to collect licenses from institutions not at present subject to municipal license and also transferring to the municipalities certain licenses, the revenue from which is at present enjoyed solely by the province government. In the latter class comes the automobile tax, and a resolution was passed asking the government to empower the urban municipalities to collect auto license fees within their boundaries. A resolution introduced by the city of Regina requesting for power to enable the cities to supplement their revenues by the imposition of an amusement tax at rates to be fixed by the council was also adopted.

A resolution was carried asking the provincial government to contribute grants to the city, town and village municipalities for the unkeep of main roads within such municipalities, similar to the grants now being paid to the rural municipalities, and another resolution, which was approved asks for authority for cities and towns to remove manure and to collect the cost from the property owner as a municipal tax.

Arrears of Taxes Act

Next to the distribution of municipal taxation in importance was the discussion on the arrears of taxes Act, the legislation which provides for the confiscation and sale of property against which there are arrears of taxes. This subject not only proved to be complicated but the discussion revealed considerable differences of opinion among the delegates. Resolutions, however, were passed covering some of the more important issues arising out of the operation of the Act.

As to the value of the underlying principles of the Act itself there was a divergence of views. F. J. Pilkington, town clerk of Yorkton, who opened the discussion attacked two important phases of the Act. He objected to the cost and the length of time to which the tax sale purchaser, including the municipality, is subjected in acquiring title to property purchased at the tax sales under the Act He also strongly objected to the provision in the Act which requires the municipality as purchaser to pay over all arrears of school and provincial taxes against the property before title can be issued.

Since the Act was first placed on the statute books amendments have been added to meet the first objection.

OUR POLICY

Our policy—except in cases where we are otherwise directed by the Will or trust instrument under which we act—is to practically confine our investments to first mortgages on improved real estate.

The necessity for personal service of notice of intention to apply to the courts for title has been superseded by provision for a published notice and notice by registered mail to all parties interested in the property. Even with these amendments, however, Mr. Pilkington contended that the cost was still too high and the time required for securing title too lengthy, especially in the case of cheap properties. In this contention he was supported by Commissioner Yorath.

During the discussion it was suggested that the Ontario system providing for automatic passage of title to the purchaser should be adopted, but this was opposed by H. G. Wilson, K.C., town solicitor of Indian Head who characterized this procedure as un-British. Such a system he contended was likely to shake credits. Any proposal which would take the matter out of the hands of the Land Titles office might result in the validity of titles being questioned where the Torrens system is in force.

In view of the fact that the municipality is merely a collection agency for school and provincial taxes Mr. Pilkington maintained that it was unfair to ask the municipality to pay arrears of school and provincial taxes before being able to acquire title to property bought in at a tax sale. A recent amendment makes provision for the municipality capitalizing such arrears, and issuing debentures against them, but Mr. Pilkington was of the opinion that this was unsound, and it was the general concensus of opinion that few, if any, of the municipalities are likely to take advantage of this provision. Mr. Pilkington suggested that an amendment should be secured, which would enable the municipalities and the school boards, to effect a mutual agreement with respect to school arrears.

The latter proposal was attacked by Mr. Wilson, on the ground that it did not take into account the possibility of the two bodies being unable to come to an agreement. Commissioner Yorath was of the opinion that school arrears should be allowed to stand against the property as a first charge and the discussion was eventually settled by the passage of a resolution providing that, "taxes due the school board or the provincial government on any property for which the municipality might secure title, shall be a first lien on the property, and in the event of municipality selling the property the school board and provincial taxes shall be immediately paid out of the proceeds of such sale, and where the municipality leases or rents the property the rental shall be paid over to the school board and provincial government until the taxes are fully paid."

The government, it was decided, is to be asked to grant amendments: "to provide that the municipalities shall be supplied with a list of tax sale purchasers who fail to make application for title within the one year period allowed by the Arrears of Taxes Act; to provide that where application is not made for title to any property sold at a tax sale within the one year period, the registrar be required to eliminate all reference to the tax sale from the title; that the registrar be required to notify the municipalities when title has been issued to a tax sale purchaser; to provide that in case application for title to any property sold at a tax sale to the municipality be not made through inadvertence or otherwise within the prescribed period of two years (the redemption period) the municipality may place the taxes for which the property was sold plus penalties and costs back on the tax roll.

Under present legislation provision is made that where redemption is made through the city treasurer he may demand the payment of subsequent taxes accrued since the tax sale and on the other hand provision is made for redemption through the registrar of titles without payment of subsequent taxes. The convention was of the opinion that under such circumstances the interests of the municipality were liable to suffer and an amendment is to be asked requiring that the registrar require all taxes to be paid to date upon any redemption being made through him.

During the course of the convention the municipal housing scheme of the federal government was up for consideration. At the last session of the Saskatchewan legislature, the assembly passed the necessary legislation to enable the municipalities to take advantage of the measure, contingent, however, upon the loans being used for the construction of houses for returned soldiers only.

In March of this year Premier Martin called a conference of representatives of the urban municipalities to Regina to discuss the housing problem with a view to ascertaining to what extent the municipalities proposed to avail themselves of the federal offer. The result of the conference was the passage of resolution representing to the Dominion government that the municipalities should not be called upon to stand all the risks of losses which might be incurred and that the administration of the scheme should be undertaken by the federal authorities. Since that time nothing has been heard from Ottawa, it was reported.

While admitting that the "buck" had been passed back and forth between the federal, provincial and municipal authorities, the Hon. Geo. Langley told the convention that if the housing scheme were to apply to the workers generally, it was purely a business matter. If the construction of houses was a profitable venture private moneys would be forthcoming, if not, the municipalities should not be expected to assume the inevitable losses. On the other hand, if the scheme were to apply to the housing of returned soldiers, it was a matter entirely within the jurisdiction of the federal government. Mr. Langley suggested that the solution of the problem was largely in the hands of employers of labor and cited as an instance of what might be done the action of the Saskatchewan Co-Operative Elevator Company which has just purchased a block of land in Regina for the erection of 21 houses to be leased to the employees of the company.

W. Bryce, president of the Saskatoon branch of the Great War Veterans' Association deprecated the action of the provinces of Alberta and Saskatchewan in failing to accept the federal government's offer. The money, he declared, was being offered at a less rate than the province was able to borrow and stated that the inaction of the two provincial governments was being closely watched by the returned soldiers.

The upshot of the discussion was the passage of the following resolution:—

"Owing to the economic conditions it is impossible at the present time to build houses profitably, and owing to the great scarcity of houses in urban centres, a large number of the population in urban centres find it impossible to secure housing accommodation;

"Be it resolved that the provincial government be asked to assist urban authorities by grants, to build model houses for the working classes; that the loan for housing recently made available by the Dominion government be so arranged by the provincial government, that it will be available for the building of houses, not only for returned soldiers, but for any citizen in moderate circumstances; and that where urban centres borrow money for the purpose of building houses that such loans be not made part of the debenture debt of such urban centre."

Want Union of Western Municipalities

Another important decision of the convention involves the formation of a union of municipalities in the four provinces west of the great lakes. The decision, which was unanimous, was the outcome of a report of the two delegates, Commissioners Yorath and Mackie, sent to the annual convention of the Union of Canadian Municipalities at Victoria last July. The delegates reported that the parent body had little regard for western problems or western conditions and the secretary, W. E. Lighthall was subjected to some criticism for his attitude to the demands of the western representatives for a reorganization of the Canadian union.

A delegate from the Alberta Union assured the convention of the support of the municipalities of that province in any venture to create a western union and to the executive was assigned the task of taking up the question with the Manitoba, Alberta and British Columbia unions with a view to forming a new alliance to include both urban and rural municipalities. Once the western union is formed, it was stated, it is the intention to circularize all councils to withdraw financial support from the Canadian union.

JUNE FIRE LOSSES

Losses are a Record for the Month—Numerous Large Fires Cause Heavy Damage

The Monetary Times' estimate of Canada's fire losses during June, 1919, is $3,337,530, compared with $1,785.030 in May, and $3,080,982 in June, 1918. The following is the estimate of the June fire losses—

Fires exceeding $10,000	$2,821,000
Small fires reported	81,200
Estimate of unreported fires	435,330
	$3,337,530

The Monetary Times' record of the past three years and this year to date shows the following monthly losses:—

Month.	1916.	1917.	1918.	1919.
January	$ 1,649,217	$ 1,918,660	$ 2,688,556	$ 3,915,290
February ..	3,275,600	2,009,953	2,243,762	1,091,834
March	1,406,501	2,050,650	1,682,286	2,154,095
April	1,460,437	1,317,714	3,240,187	1,080,070
May	1,850,205	1,163.110	3,570,014	1,785,030
June	494,557	1.184,627	3,080,982	3,337,530
July	3,039,634	1,101,734	3,369,684	....
August	1,057,109	1,230,183	3,110,445	....
September ..	981,703	1,301,700	917,286	....
October	1,077,815	704,605	5,119,145	....
November ..	923,235	959,049	1,059,580	....
December ..	3,271,496	5,144,100	1,733,917	....
Totals ..	$20,487.509	$20,086,085	$31,815,844	$13,363,849

The following is a list of fires in June at which the loss amounted to $10,000 and over:—

Campbellton, N.B., June 7, lumber owned by British government, $250,000.

Chipman, N.B., June 2, plant of the Sayre and Holly Lumber Co., $140,000.

Halifax, N.S., June 8, Globe Steam Laundry, $20,000.

Kingston, Ont., June 8, large sheep barn, $10,000.

Loggieville, N.B., June 4, store and warehouse of Messrs. A. and R. Loggie, $150,000.

Moose Jaw, Sask., large barn, owned by Mr. V. McCarthy, $20,000.

Newcastle, N.B., lumber stored near Edward Sinclair Co. mill, $150,000.

Quebec, Que., June 8, Harris Abattoir plant, $30,000.

Restigouche, Que., lumber owned by Chaleur Bay Mills, $500,000.

St. Catharines, Ont., June 5, property of the St. Catharine Cold Storage and Forwarding Co., $30,000.

Saskatoon, Sask., June 5, crib elevator and distributing plant of the Quaker Oats Co., $200,000.

Welland, Ont., June 8, home of Mr. I. V. Mansell, $20,000.

Blairmore, Alta., June 9, five buildings, $40,000.

Chinook, Alta., June 8, garage, owned by P. M. Brownell, $30,000.

Fort Steel, B.C, June 13, Bridges Lumber Co.'s mill, $150,000.

Kedgewich, N.B., June 13, Richards Lumber Co.'s mill, $150,000.

Newmarket, Ont., June 12, Wm. Cane factory, $20,000.

Braeside, Ont., June 23, lumber mill of Gillies Brothers, Ltd., $150,000.

Galt, Ont, June 21, plant of R. McDougall Co., Ltd.. $50,000.

Hamilton, Ont., June 21, garage owned by A. Ross, $10.000.

Orillia, Ont., June 21, Orillia House stables, $10,000.

Quebec, Que., June 22, Terres and Racine block, $500,000.

Unity, Sask., June 18, Norton's garage, $40,000.

Wiarton, Ont., June 20, warehouse of McIver Brothers, $12,000.

Digby, N.S., June 27, property and store of J. E. Snow, $12,000.

Grand Coulee, Sask., June 24, store owned by T. E. Maxwell, $17,000.

Hintonburg, Ont., June 25, lumber owned by Sheppard and Morse Lumber Co., $15,000.

St. Catharines, Ont., June 28, building of Canadian Flax Mill, $45,000.

Saskatoon, Sask., June 27, building of John East Foundry Co., $15,000.

Wapske, N.B., June 27, three hundred acres of Crown lands, $25,000.

Woodstock, N.B., June 2, carding mill, owned by Henry Flewelling and power-house, owned by Woodstock Power Co., $10,000.

Destroyed or Damaged

Among the structures damaged or destroyed last month were: Mills 7, garages 4, power-houses 1, launch club buildings 1, crib elevators 1, sheds 2, warehouses 5, foundries 1, buildings 16, factories 1, launches 1, laundry works 1, barber shops 1, station houses 1, icehouses 3, motor cars 1, stores 6, barns 15, houses 17.

Among the causes reported last month were: Electric wiring 3, overturned lamp 1, engine backfiring 1, storm by winds 1, lighted matches 2, lightning 4, cigarettes 1, defective boilers 1, defective safety valves 1, electric switch 1, children playing with matches 1, overflowing oil vat 1, electrical storms 1.

Fatalities Heavy

The following is a list of fires at which fatalities occurred last month:—

Belleville, Ont., June 2—Coal oil poured on clothing....	1
Regina, Sask., June 4—Trapped in forest fires........	10
Shaunavon, Sask., June 3—Fire from matches.........	3
Newmarket, June 12—Trapped in burning factory......	3
New Liskeard, Ont., June 16—Trapped in burning home	2
St Francois, Que., June 14—Petrol sprinkled over hot pipes	4
Miminigash Run, P.E.I., June 17—Explosion	1
Quebec, Que., June 23—Trapped in burning home......	1
Tisdale, Sask., June 26—Gasoline	1
Regina, Sask., June 27—Coal oil stove	2
Total	28

CANADIAN FIRE UNDERWRITERS ANNUAL

At the annual meeting of the Canadian Fire Underwriters Association, held on June 24th, at Bluff Point, N.Y., the following officers were elected for the coming year: President, Mr. John B. Laidlaw (Norwich Union); first vice-president, Mr. J. E. E. Dickson (Law, Union and Rock); second vice-president, Mr. Lyman Root (Sun Insurance office).

The president for 1918-19, Mr. P. M. Wickham, of the Yorkshire Insurance Company, occupied the chair, and in his address he summarized the chief events in the fire insurance field during the year, referring especially to the Masten report in Ontario.

The annual meeting of the All Canada Insurance Federation was held at the same time and the president, Mr. T. L. Morrisey (Union of London) was re-elected. Mr. W. E. Baldwin (Continental Fire Insurance Company) was elected honorary secretary.

A convention of the Western Canada Irrigation Association is to be held in Medicine Hat, Alberta, on August 4th, 5th and 6th.

Results of the Public Ownership of Railways

1918 Statistics Show Distinct Contrast Between Publicly Owned and Privately Owned Roads—Public Operations a Drain on General Revenue, While Private Business Contributes to It

By ANDREW T. DRUMMOND, LL.D.

THE recently-issued brochure, containing the railway statistics of Canada for 1918, throws further light on the problem of government and municipal ownership of railways—a problem in regard to which the people, especially of Ontario, have allowed themselves to be misled by sections of the press and by a coterie of individuals engaged in exploiting the idea of public ownership, and who studiously suppress all facts which would militate against the idea. As the results of the operation of each railway line are given in this brochure in voluminous detail, and are compiled from sworn statements furnished by the different railway companies themselves, we have reliable sources from which to draw conclusions. These conclusions only add emphasis to a long series, extending over years, illustrating the inability of both governments and municipalities in Canada to create those conditions in construction and operation which would place their railways on a business basis and lead to the avoidance of deficits. Briefly, these 1918 statistics establish certain facts.

1. Government ownership has, just as it has year after year in the past, resulted in large deficits on every railway operated, whether under provincial or Dominion auspices. The Dominion government systems show an adverse balance for the year of nearly six million dollars in their operating cost, without considering interest on the bonds issued to pay for the capital cost of the roads. On the other hand, the Ontario government's railway fell short by towards half a million dollars of paying its full bond interest, whilst the New Brunswick government's road failed to meet any interest whatever on its cost. And it has to be remembered that all government roads are entirely exempt from government imposts and municipal taxes which privately-owned companies are compelled to pay.

2. Just as in previous years, every municipally-owned railway, if it had charged against it its proper share of taxes, as would be done with the private roads, and had it paid the interest on its cost, not to speak of sinking funds and funds for renewals and betterments, would have shown a large deficit. Even the much-heralded London and Port Stanley Railway, operated under the auspices of the Ontario Hydro-Electric Commission, which is a mere arm of the Ontario government, would have had its nominal surplus of $22,493 turned into a considerable deficit had fair taxes been charged and interest paid on its original cost, which appears to be represented in the statistics by $1,746,854 in a municipal subscription and loan from London, Ont.

3. The same government statistics indicate that, whilst the Hydro-Electric Commission of Ontario is supposed to furnish the municipalities and railways with power at cost for light, railway and manufacturing purposes, the charges made by it, while they may represent cost to the commission, appear, in actual operating experience, to be higher than those charged to consumers by privately-owned power companies. Thus, in the case of the Lake Erie and Northern, the Galt, Preston and Berlin, and the London and Port Stanley Railways, which derive their power from the commission, the cost of this power is represented by 7.2 cents, 6.72 cents and 4.44 cents, respectively, for each mile run by the cars of these companies as against the much lower cost of power per car mile of, for instance, the following interurban electric railways, which derive their power from other sources:—

	Cents.
Lake Erie and Northern	7.2
Galt, Preston and Berlin	6.72
London and Port Stanley	4.44
Toronto and York Radial	4.9
Montreal and Southern Counties	4.02
Hamilton Radial	3.98
Hamilton, Grimsby and Belleville	3.12
Schomburg and Aurora	2.9
Niagara, St. Catharines and Toronto	2.7

The Windsor, Essex and Lake Shore Railway, which is operated electrically with steam power, and in 1917 was represented in power cost by 4.6 cents per car mile, indicated in 1918 a power cost of 6.2 cents.

Wrong Conceptions of Public Ownership

We may well ask ourselves, Why do these results happen? The work of a government, as well as that of a municipality, is a business, and why cannot both be run on business principles? The Hydro-Electric Commission of Ontario has always, in matters of expenditure, been given a free hand by the Ontario government, of which it is an executive arm. The principle it has adopted of supplying power to the municipalities and railways at cost is fair, provided that cost is reasonable compared with the charges of other organizations. No details of its expenditure have been furnished, at least to the public, and no judgment can thus be formed as to the wisdom or economy exercised. The special report of the auditor presented to the legislature deals only in generalities, and expresses no opinion as to the propriety or large amount of any individual expenditure, whilst the public appears to be content with the mechanical outcome of the undertaking without troubling itself as to the largeness of the outlay in construction, or as to whether the rates charged are, in consequence, higher than they could have been. The huge estimates of cost—towards $100,000 per mile—furnished by the commission to Toronto and other municipalities three and a half years ago, when seeking the passage by the people of the Toronto-to-London Railway by-laws—estimates enormously in excess of what a private corporation, in deference to its shareholders, bondholders and the public, could have entered on—suggest that the expenditure already incurred by the commission in the purchase of power and in construction, as well as for maintenance, operating and renewals, have been so large that the present charges to the municipalities and railways have necessarily had to be correspondingly large, even if they exceeded what dividend-paying private companies are able to afford.

The recent reduction made by the commission in its rates for power to a considerable number of municipalities was, suggestively, not so much an act of grace as from a desire to help the municipalities to avoid their deficits, which were becoming noticeable, and to prevent the otherwise raising by the municipalities of their rates to consumers and driving them into the hands of private companies which could afford to give cheaper rates.

The private company, when engaging in construction, has to limit its expenditure to the capital it can raise under the share and bond issues authorized by its charter. The Hydro-Electric Commission has no such check on its expenditure, and if its works should cost a few million dollars more than anticipated it can always fall back on its relationship to the Ontario government and that government's guarantee of its securities. This is the invariable trouble in all government construction, and the experience is the same in the annual operating of government undertakings. The

ambition of the managing officials of private enterprises to make them a success is wanting, and there is no fear of a receiver if they are not. Instead, there is the fallacious opinion, held by so many politicians, that government works should be run, not on business principles or with a view to bare profit, but for the convenience of the people, and that the ever-consequent deficits should be met out of the general revenues of the country, forgetful of the facts that deficits anywhere are, on general principles, very objectionable, and that in meeting them out of general revenue the people pay them all the same. Our Canadian statistics are not alone in the disclosures they make. The disastrous results of the operating of the railways under the auspices of the governments of both the United States and Great Britain have opened the eyes of especially the people of the former country to the fallacy of public ownership.

The results are largely similar in the case of municipal railway undertakings. The municipal councils have no capacity for railway management, nor can they attract the best railway experts, and in planning, in construction and in subsequently operating a system of railways they do not follow the strict business principles which would actuate a private company, but seek rather to satisfy the whims of the people whose votes have elected the individual members of the councils to office.

SASKATCHEWAN BORROWING WILL BE SMALL

Local Government Board Cuts Municipalities to Minimum Requirements—Takes Stand that Burden is Already High Enough

(Staff Correspondence.)

CAPITAL expenditure programs for the cities of Saskatchewan, totalling $733,784, have been authorized by the Local Government Board for this year's construction, or considerably less than the annual expenditure of any one of the three larger cities of the province in pre-war days. In view of the high tax-rate in the urban centres, the high cost of labor and materials entering into constructional undertakings, the Local Government Board is exercising very close scrutiny over all applications for permission to expend borrowed moneys, much to the indignation of the civic authorities of Saskatoon, whose applications were pared by $150,335.

The city of Regina made application for the very modest authorization of $105,000, and while no official announcement has yet been made, the Regina officials have received private assurance that their requests will be granted *in toto*. The city of Moose Jaw made application for capital expenditures totalling $354,000, but $60,000 of this was subsequently withdrawn and authorization for an expenditure of $294,000 was given. Of this amount $210,000 represents expenditure for extensions to the municipal light and power plant and equipment, a utility which is revenue bearing and which is expected to provide returns for the additional expenditure.

The city of Saskatoon requested power to issue debentures for a total capital expenditure of $485,119. Of this amount $150,335 was refused, leaving a balance of $334,784 for the city to spend this year, or nearly as much as the combined authorizations of the other two large cities. No applications have been made by the other four cities of the province.

Considerable criticism of the delay occasioned while the Local Government Board was making inquiries into the details of the Saskatoon program, was voiced in the local press by some of the municipal authorities of that centre, and the Local Govenment Board was constrained to deal very fully with the reasons in rendering its final decision with respect to the Saskatoon program.

One of the items deleted by the Local Government Board in dealing with the Saskatoon applications, was $50,000 for a convention hall. Other items entirely eliminated from the authorizations were $5,000 for a paddling pool and $15,500 for a tar macadam roadway. Nearly $26,000 was lopped off the proposed expenditure for sewer and water, $16,000 from the street railway program and similar amounts from other proposed expenditures.

The considerations which influenced the board in its decisions are set forth as follows:—

"The Local Government Board in conducting an inquiry and in arriving at a decision is required under the provisions of the Local Government Board Act to consider the nature of the work, undertaking, or other object of a proposed loan, the necessity or expediency of the same, the financial position of the local authority and all such other matters as in the opinion of the board shall call for consideration.

"In arriving at its decision the board has kept before it the statutory duties imposed upon it and has exercised the discretionary powers reposed in it by the legislature of deciding what may or may not be considered as necessary or expedient, taking into consideration the financial position of the city and all other matters relative to the application.

Protects the Taxpayers

"In arriving at the financial position of a municipality investigation is made with respect to the existing burdens of the taxpayer and to the additional burdens which may be placed upon him by additional expenditure which must be met in many instances by increased taxation. In protecting the taxpayer from a tax rate which would become more than he could bear and which might compel him to forfeit property which he would otherwise hold, the board in this act of deciding upon the ability of the taxpayer to repay the indebtedness incurred at the same time decides upon the security of the investment which is to be offered to the public.

"According to information submitted, the tax rate for public school supporters in the city of Saskatoon for the present year is 35 mills; for separate school supporters, it is 43.40 mills on the dollar. This rate would be considerably higher for all ratepayers of the city, were it not for the fact that the city of Saskatoon has taken advantage of the provisions of Chapter 20 of the Statutes of 1915 and has rearranged the period for repayment of a considerable amount of its debenture indebtedness by extending the time for such repayment beyond that originally provided for. The city of Saskatoon is the only municipality in the province that has taken advantage of this act. The ratepayers of St. Paul's Roman Catholic Separate School District, which district lies partially within the same taxing area as the city of Saskatoon, were unfortunately compelled to make a readjustment with the creditors of the School District by extending the period of its debenture and other outstanding indebtedness over a longer period, and for the present are paying interest only on the outstanding indebtedness. If this were not the case the rate for separate school supporters would greatly exceed 43.40 mills as imposed for the present year.

"When Commissioner Yorath submitted his annual report to the council in 1917 he expressed his opinion as to the citys' debt in unequivocal language as follows: 'It is fortunate that the debt is not larger than it is, although it is very much larger than it should be' (page 9); and, again, 'the city's debt is far in excess of what it should be' (page 15). This statement was made at a time when the city's capital indebtedness was less than it now is and when its assessment was higher than at present.

"Taking into consideration the fact that in order that the city may continue to meet unavoidable expenditure upon its public utilities and other municipal undertakings, that it will be compelled from time to time to incur additional capital indebtedness, and that within the same taxing area capital expenditure to a large amount will be required for educational purposes (which will all add to the tax burden upon the ratepayer), the board is compelled at the present time to refuse authorization of such proposed expenditure as has been requested by the city for a paddling pool, boulevards, an auditorium, and similar undertakings which, under different circumstances, could receive more favorable consideration."

BUILDING INDUSTRIES IN CANADIAN CITIES

Carefully Directed Publicity Campaigns are Opportune—Manufacturers Must be Shown Advantages Here

"IN these days when cities as well as the country as a whole are giving so much thought to creating employment and establishing better conditions, they should not overlook one of the most potent agents for building up and operating a community—namely, carefully planned, intelligently directed civic publicity," said Mr. J. R. Davison, publicity commissioner of Vancouver, in speaking to *The Monetary Times*, recently. "This can be of very positive value in three ways: First, in the establishment of factories and other businesses; second, in increasing the number of tourists; and third, in the management of the city itself.

"The cities of Canada have opportunities to offer to manufacturers and business men—both in Canada and abroad. Canada has never been as well known and thought of in the United States and Great Britain. Manufacturers in the United States, particularly, have a growing appreciation of the value of the market in Canada. What they do not know is that they can obtain conditions for building and operating factories, which make it well worth their while to handle Canadian trade from this side of the border, and where, in addition, they would be in a better position to get export trade with other parts of the empire and with foreign countries. Lack of knowledge is what stands in the way of many an American executive, deciding to build a Canadian branch or factory, and what will dispel that but aggressive work on the part of the Canadian cities. For example, Vancouver offers some unique advantages for the location of a factory, in the way of industrial sites and the availability of raw materials, but with the men in the east, as with the men of the Scripture, 'how shall they know unless they be told?'

"In regard to the tourist industry, many Canadian cities are so placed that they may reap a splendid harvest each year. Next door we have a big and prosperous nation, whose people are great travellers and looking constantly for new and unfamiliar scenes, and the life and conditions in this, to them, a foreign country, appeal to them. Moreover, the Canadian cities have very definite advantages in the way of climate and surroundings which are an effective lure to such people. Publicity in the particular fields across the border will draw many visitors from the United States. Vancouver has gone after such tourists, with the result that tens of thousands of people visited this city last year and left with the hotels, merchants and other business men, many hundreds of dollars for every dollar spent in attracting them.

"But a new phase of civic publicity remains yet to be used to any great extent, which in my judgment, holds possibilities of great benefit in the government of a city, as yet dimly realized. I refer to intensive publicity; advertising carried on to acquaint the people of any city with the work of the civic government and with the operations of the various departments which carry on the necessary work on behalf of the citizens. Private business concerns have long realized the need and advantages of carrying the public along with them and during the war the British and Canadian governments were driven to use this means of getting the effective co-operation of the people. Why, then, should civic governments overlook this powerful instrument for civic welfare?

"Health departments of several cities have, in a limited degree, used publicity, but it seems to me that if these offices are to function as they should, publicity should be counted as one of the most important parts instead of incident to their work for any year. The welfare department, the mayor's office, works, water and parks each would have some message to give to the citizens frequently, and a bulletin appearing regularly in the press should get the attention and interest of the citizens.

"Leaflets, booklets and other methods can be used to advantage to acquaint the public with what is going on, for the day is now past when efficient government can be obtained without the knowledge and co-operation of the governed.

"Publicity, however, must be well directed; for the case for civic publicity suffers in Canada to-day because of misdirected attempts. But now, with the opportunities so numerous, I sincerely hope that communities all over Canada will give serious consideration to this feature of civic development."

"SOLID AS THE CONTINENT"

HEAD OFFICE - TORONTO

WHY THE "MUTUAL LIFE OF CANADA" IS SO POPULAR

The Mutual placed upon its books in the first five months of 1919 100% more business than in the corresponding months of 1918. The wonderful war-record of the Mutual Life and the prompt payment of the many unexpected claims during the recent epidemic—these have proved the value of the institution. The Mutual, moreover, is in a peculiar sense a people's company, being in its control democratic, in its economy strictly co-operative. This means that the system is in line with the "spirit of the age," and so the people naturally turn to the Mutual. The record of the Company for nearly half a century has been one of increasing beneficence, and an ever-growing number of gratified policyholders help on the good work of the agents. As a result, there probably is not a more prosperous group of workers in Canada to-day than the representatives of our Company.

"Be a Mutualist."

The Mutual Life Assurance Co. of Canada

NEWS OF MUNICIPAL FINANCE

Winnipeg Plans to Have Income Tax Next Year—Proposal that Direct Provincial Taxation be Given Up

Port Arthur, Ont.—About $200,000 has been collected on the first instalment of the 1919 taxes.

York County, Ont.—The county tax rate has been fixed at 6.8288 mills, not 8.8288 mills, as printed in these columns last week.

Brantford, Ont.—A tax rate of 15 mills has been struck by the township council on an assessment of $5,762,777. This is an increase of two mills over last year.

Regina, Sask.—Tax collections of the city for the first six months of the year amounted to $705,000, of which about $695,000 represents the current year's taxes, as compared with $525,000 of the current year's taxes collected for the same period last year.

Hamilton, Ont.—According to a report of the city's finances for the first half of the year, the miscellaneous account has an overdraft of $3,731, and a number of bills will have to be met that will considerably increase the sum. The regular accounts will not likely show any balances on hand.

Lethbridge, Alta.—The tax rate of the city has been struck at 38.87 for public school and 41.19 for separate school taxpayers. The following is the itemized rate: General, 17.42 mills; debenture, 8.33 mills; library, .23 mills; hospital, 1.68 mills; public schools, 10.21 mills; separate schools, 13.52 mills; government tax, 1.00 mill.

London, Ont.—The semi-annual reports issued by the utilities commission, show a surplus of $36,000 for the water works department. It is anticipated that the surplus for the year will be $72,000. Five months' operation of the electrical department shows a surplus of $37,000. While the decrease in power rates to consumers will all come within the last seven months of the year, it is expected that the surplus at the end of the year will be about $90,000.

Winnipeg, Man.—For the fiscal year just ended the city has saved $40,000 on its revenue and expenditure account. The estimated expenditure was $5,994,202, while reductions through miscellaneous revenue, business tax, etc., made the actual figure $5,050,576.

It was in the miscellaneous revenue that the surplus exceeded all expectations. The estimate proper was overspent by $14,000, but miscellaneous revenue made a profit of $57,000. Thus the city is $40,000 better off than it expected to be. Under the miscellaneous revenue heading comes license fees, police court fines and share of street railway earnings. Estimates for this year will be taken up at a special meeting of the finance committee Monday afternoon. Six and a half millions will be required for this year, it is estimated. The police department estimate is nearly double. Last year it was $400,000; this year, with $225,000 for special police during the strike, it will mean $800,000. The fire department figure is $580,000 as against $400,000 last year. With the assessment reduced from $252,528,800 to $236,023,520, a higher tax rate is certain. Last year the rate was 20 mills; this year it will be nearer 22.

The municipal income tax for the city will become law January 1st next if plans being formulated at the city hall materialize. Some members of the council advocate the fashioning of the law after the English method, making the tax applicable to incomes earned one year before it goes into operation.

It is expected that the city's tax rate this year will be around the 24 mill mark. Last year the rate was 21 mills. This year, however, the city has to face a reduction in its assessment of $16,500,000, which in itself is good for a mill and a half income. The police department alone will require one mill more to be added to last year's rate. This year's estimate of city money required for provincial government totalled $563,500. Last year it was $676,000. The reduction is due to the lower patriotic fund tax.

British Columbia.—Mr. F. A. McDiarmid, counsel for the Union of British Columbia Municipalities, has submitted a memorandum to Hon. John Hart, minister of finance, with reference to the financial problems of municipalities in the province. He says:—

"After an experience of a quarter of a century, after constant and careful study, after much poring over statistics of every municipal government on this continent and no two systems are alike, the undersigned again ventures to submit as his conclusion the conclusion which he gave you in the thirty-second paragraph of the statement of July, 1918. Let the province give up the immediate and direct taxation of inhabitants residing in the municipalities of British Columbia, let the municipalities' staff of assessors, collectors, etc., raise all the money which is raised from their own inhabitants, and the loss which British Columbia sustains by reason of giving up this income, let them collect by direct taxation upon the municipalities in the same manner as the county councils do from the municipalities in Ontario, and as some of the States do upon their cities. This means, if provincial revenue will lose, say, $4,000,000 by reason of the giving up of those taxable sources, then assuming that there are 400,000 persons in the municipalities of this province, a direct tax on the municipalities of $10 per head of population will give you the revenue that you now receive, and this taxation, once imposed, may, as to the amount thereof, vary from year to year according to the needs of various governments. It is the opinion of the undersigned that more efficient collection conducted by men upon the spot, and more willing contributions from the citizen because he is so close to the municipal government, knows its needs and sees where the money goes, will combine to give the municipalities a substantial surplus over and above what the province is now able to realize out of the same sources of revenue."

NEW INCORPORATIONS

Rubber Company is New $20,000,000 Concern — Several Million Dollar Corporations Formed with Head Offices in Montreal

THE following is a list of companies incorporated during the past week, with authorized capital and names of provisional directors:—

Hamilton, Ont.—Citizens Estates, Ltd., $50,000; C. P. Bowerman, I. Rice, M. Reid.

Levis, Que.—Levis File Co., Ltd., $100,000; H. A. Paquette, A. Bernier, P. Robitaille.

Woodstock, Ont.—Bean and Westlake, Ltd., $150,000; W. S. Bean, H. Westlake, C. E. Bean.

Guelph, Ont.—Sterling Rubber Co., Ltd., $150,000; F. L. Freudeman, J. B. Abler A. Stewart.

Owen Sound, Ont.—Louis Bloch's Music Co., Ltd., $50,000; L. Bloch, M. Forhan, E. Coleman Spereman.

Sherbrooke, Que.—Riverside Realty Co., Ltd., $49,000; W. R. Webster, L. A. Bayley, J. A. McKechnie.

Sorel, Que.—Legare Automobiles of Sorel, Ltd., $100,000; P. C. Falardeau, J. A. Juneau, J. A. Bourret.

Edson, Alta.—Alberta Pioneer Canning Co., Ltd., $40,000; H. Vosburgh, M. A. Vosburgh, O. A. Vosburgh.

Sault Ste. Marie, Ont.—The Canadian Soo Lumber Co., Ltd., $500,000; W. H. Rath, P. P. DuKet, J. McEwen.

Riviere Blanche, Que.—La Compagnie Manufacturiere de Riviere Blanche, Ltd., $49,000; J. A. Lapointe, H. Roy, J. S. Laurent.

Toronto, Ont.—Allied Packers of Canada, Ltd., $10,000,000; W. S. Morlock, S. E. Wedd, R. B. Whitehead. Dresses Co., Ltd., $250,000; J. A. Macintosh, F. W. Scott, D. A. Macintosh. Stainton, Downey and Evis, Ltd., $100,000; W. H. Stainton, C. H. Downey, S. A. Evis.

Montreal, Que.—Phillips Square Theatre Co., Ltd., $1,500,000; L. A. Dubrule, P. L. Dubrule, J. Laporte. United States Rubber Co. of Canada, Ltd., $20,000,000; A. C. Casgrain, E. M. McDougall, J. G. Bell. Doheny, Quinlan and Robertson, Ltd., $2,000,000; H. Doheny, H. Quinlan, A. W. Robertson. Hodgsons, Ltd., $299,000; G. A. Campbell, A. Angers, J. Kerry. Luna Park, Ltd., $1,000,000; D. E. LeCavalier, P. Burdotti, J. Parsons. Lawand Amusement Co., Ltd., $49,000; N. Lawand, N. S. Aboud, A. Lawand.

Ames, Holden, McCready, Limited

Report of the Directors

To the Shareholders,

Your Directors have pleasure in presenting herewith the annual statements of your Company for the year ended April 30th, 1919.

The net profit for the year amounted to $323,321.26 after deductions for interest, and reserves for bad debts and depreciation. The surplus account now amounts to $830,729.93.

Your sales for the year amounted to $6,229,274.38 compared with $4,879,259.36 for the previous year, or an increase of 27.67%. Selling prices of leather footwear were increased gradually throughout the year, accounting for approximately fifteen per cent. of the increased value of sales. Included in these sales for the year is $658,702.74 to the Canadian Government.

Inventories of both manufactured goods and materials have had special attention and are at a lower figure than for some years. They are priced at actual cost, while the market prices on April 30th and now are much higher.

Your total current assets are $2,908,868.29, while the total current liabilities are $568,527.09, making a net working capital of $2,340,341.20.

Ample provision has been made for customers' bad debts.

Except for interruptions during the influenza period your plants were operated continuously during the year, therefore the amount set aside for depreciation has been increased to $95,669.41.

Your company commenced a vigorous advertising campaign, the results of which will be felt in future years. It is the intention of your directors to continue its policy of advertising.

The year's earnings were charged with the sum of $13,096.25 distributed to your employees under a Profit Sharing plan. The distribution was made in Preferred Shares of the Company purchased for that purpose.

Since the close of your last fiscal year your directors have elected Mr. D. Lorne McGibbon, Chairman of the Board, and Mr. T. H. Rieder, President and General Manager of the Company.

At the present time there is a considerable demand for boots and shoes for export. Your Company has already had a share in this business and has further contracts on hand which will serve to utilize the surplus productive capacity of the factories over and above the demands of the Company's domestic business.

It will be noted that despite the increase of over 27% in the volume of business done, as compared with the previous year, the net profits are approximately the same. The manufactured product of the Company is distributed by means of a sales organization covering the whole Dominion and having branches in the large cities from St. John to Vancouver. Owing to the increased cost of selling, due to increased salaries and wages, freight, taxes and other expenses, it has become evident that the minimum cost of distributing the Company's product cannot be attained unless the volume of sales is considerably increased. The leather shoe business in itself does not easily furnish this required volume and your directors have, therefore, arranged to add a rubber section to your business.

During the past thirty years your Company and its predecessor in business have purchased the entire output of a rubber footwear mill, which your sales organization has distributed to customers throughout Canada in conjunction with leather footwear of your own manufacture. Your rubber business, however, cannot be developed to its fullest extent without manufacturing your own rubber goods. The addition of a rubber section to the business to manufacture and distribute your own rubber footwear and rubber tires will serve the double purpose of giving the Company control over the manufacture and sale of the rubber goods handled by it and of furnishing the desired increase of goods for distribution by the sales organization.

The first of the rubber units is now being constructed through a subsidiary company under the name of Ames-Holden Tire Company, Limited, which has been promoted and financed by your Company for that purpose and a majority of whose issued capital stock is owned by the Company.

Your directors have declared a dividend of 1¾% on the Preferred Shares, payable July 2nd to shareholders of record of June 12th, 1919.

Your directors wish to record that your entire staff has served the Company loyally and that there exists the finest spirit of co-operation throughout the organization.

Respectfully submitted,

June 26th, 1919. T. H. RIEDER, President.

BALANCE SHEET AS AT 30th APRIL, 1919.

GOVERNMENT AND MUNICIPAL BONDS

Government Issue in New York on 5.90 Basis Depresses War Bond Market—Kingston Gets Good Price

ONE of the most important financial events of the year took place during the past week when the finance minister arranged to secure $75,000,000 in the United States to redeem bonds to approximately that amount maturing there on August 1st. Two issues are being made; the one consists of two-year 5½ per cent. notes and the other of ten-year 5½ per cent. bonds. The issue price is 99¼ for the two-year notes and 97 for the ten-year bonds. The yield in each case will be about 5.90 per cent. The syndicate includes J. P. Morgan and Co., Brown Brothers and Co., Harris, Forbes and Co., and others. Subscription books for both issues opened on July 9th, and closed at one o'clock on the same day, as the loan had been heavily oversubscribed.

Canadian investors who wished to participate in this loan were greatly handicapped by reason of the 3 per cent. premium on New York funds which would reduce the yield on the notes to about 4 per cent., and on the ten-year bonds to about 5½ per cent. On the other hand, had the money been raised in Canada the government would have had to pay this premium in transferring these funds to New York.

In view of the fact that the ten-year bonds could be purchased by Canadians on approximately a 5½ per cent. basis, the war issues here, which have been traded in at about a 5 per cent. basis, have fallen off. More than this, the present issue will have an important effect upon the terms on which the next domestic war loan, which will probably be floated in September, can be arranged.

The following quotations of active bonds are supplied by the National City Co., Ltd., and are in New York funds:—

	Bid.	Offered.
Anglo-French 5% (Oct. 15, 1920)	97	97⅛
United Kingdom 5½% (Nov. 1, 1919) ..	99¾	99⅞
United Kingdom 5½% (Nov. 1, 1921) ..	98¼	98½
United Kingdom 5½% (Feb. 1, 1937) ..	98	98¼
Canadian Pacific 6% (Mar. 2, 1924) ...	101	101⅜
City Paris 6% (Oct. 15, 1921)	97⅞	98⅛
Dominion Canada 5% (Aug. 1, 1919) ...	99¹⁵⁄₁₆	100
Russian Govt. Ext. 5½% (Dec. 1, 1921)	49	51
Russian Govt. Ext. 6½% (July 10, 1919)	57	59
Swedish Govt. 6% (June 15, 1939)	99⅜	99⅝

The following is a list of debentures offered for sale, of which particulars appear in this or previous issues of *The Monetary Times*:—

Borrower.	Amount.	Rate %.	Maturity.	Tenders close.
Ottawa, Ont.	$865,694	5	Various	July 18
New Glasgow, N.S.	55,000	5½	15-years	July 19
Listowel, Ont. ...	18,000	5	20-instal.	July 19
Saskatoon, Sask. ..	238,377	5 & 5½	Various	July 21
Alberta School Districts	24,900	6½	Various	July 24
Charlottenburgh Tp., Ont.	30,000	5½	20-instal.	Aug. 4
Medicine Hat, Alta.	132,253	5 & 6	Various	Aug. 9
Lancaster Tp., Ont.	100,000	5½	25-years	Aug. 15

Hamilton, Ont.—Debentures will be issued to the amount of $33,000 for repairs to the central school.

Ingersoll, Ont.—The council will be asked to provide the sum of $120,000 for the erection of a new school.

Hastings County, Ont.—The county council has authorized the expenditure of $55,000 on county highways.

Edmonton, Alta.—Voting on the expenditure of $260,000 for the extension of the telephone system will take place on July 18, 1919.

St. John, N.B.—Bonds are to be issued to the amount of $161,500 to meet the expenditure for renewal of sewer and water mains.

Listowel, Ont.—Tenders will be received up till July 19, 1919, for the purchase of $18,000 5 per cent. 20-instalment good roads debentures.

Belleville, Ont.—The council has passed a by-law authorizing the issuance of $16,635 sidewalk debentures, $32,871 sewer debentures, and $17,756 paving debentures.

Sherbrooke, Que.—Messrs. Hanson Bros., Montreal, Que., have been awarded an issue of $142,500 5 per cent. 20-year bonds at 93.71, which is on a basis of about 5.55 per cent.

Charlottenburgh Township, Ont.—Sealed tenders will be received up till August 4, 1919, for the purchase of $30,000 5½ per cent. 20-instalment bonds. Mr. Geo. E. Watson, township clerk, Williamstown, Ont.

Ottawa, Ont.—Sealed tenders will be received up till July 18, 1919, for the purchase of $845,694.66 instalment gold bonds, and $20,000 sinking fund gold bonds. The interest rate is 5 per cent., and the bonds mature in 10, 16, 20 and 30-years. Harold Fisher, mayor. (See announcement elsewhere in this issue.)

Medicine Hat, Alta.—Tenders will be received up till August 9, 1919, for the purchase of $132,253 5 and 6 per cent. debentures, with various maturity dates. The debentures are issued for various local improvement purposes, and for rebonding to the amount of $53,000. (See announcement elsewhere in this issue.)

Regina, Sask.—The Canada Bond Corporation and the Canada Trust Co., have jointly purchased an issue of $139,000 5½ per cent. 30-year public school board debentures at 96.66. The following is a list of tenders:—

Canada Bond Corp., and Canada Trust Co.	96.66
A. E. Ames & Co.	97.84*
Housser, Wood & Co.	96.03
MacNeill, Graham & Co.	96.07
Wood, Gundy & Co.	95.34
G. A. Stimson & Co.	93.125†
C. H. Burgess & Co.	92.59

---

*Less $2,000 †Plus $2,780.

Kingston, Ont.—The United Financial Corporation has purchased an issue of $77,000 5½ per cent. 30-year bonds of the city at 104.04. At this price the city borrows its money at about 5.23 per cent. The following is a list of tenders:—

United Financial Corporation	104.04
Home Bank	104.03
G. A. Stimson & Co.	103.78
Royal Securities Corp.	103.46
National City Co.	103.28
A. Jarvis & Co.	103.21
R. C. Matthews & Co.	103.04
Harris, Forbes & Co.	103.02
Wood, Gundy & Co.	102.77
MacNeill, Graham & Co.	102.52
Bank of Nova Scotia	102.30
Housser, Wood & Co.	102.26
R. A. Daly & Co.	102.26
A. E. Ames & Co.	101.12
W. L. McKinnon & Co.	100.70
C. H. Burgess & Co.	99.83

Saskatchewan.—The following is a list of authorizations granted by the Local Government Board, from June 14 to June 28, 1919:—

School Districts.—Coal Dale, $700 8-years not ex. 8 per cent. instalment. Melfort, $25,000 20-years not ex. 8 per cent. annuity. *Fosti, $1,200 6-years not ex. 8 per cent. instalment. *Cambrai, $2,500 10-years not ex. 8 per cent. annuity. *Alexandria, $1,800 10-years not ex. 8 per cent. instalment. *Dunleath, $1,500 10-years not ex. 8 per cent. annuity. Buffalo Hill, $300 10-years not ex. 8 per cent. instalment.

S.D., $1,500; awarded to Western Trust Co., at 103.266. Block No. 10, Rural, 10-years.—Ferry Hill S.D., $500; awarded to Western Trust Co., at 103.20.

JUNE BOND SALES

According to *The Monetary Times'* record of municipal bond sales for June, 1919, the total is $4,455,335, compared with $1,268,101 in May, and $10,108,696 in June, 1918. Last month was a record month for the number of municipalities on the market for loans, and according to the number of money by-laws passed and to be passed, the financial programs of Canadian municipalities are not by any means complete, and many debentures issues are to be placed. The following is a summary of municipal bond sales by provinces for June:—

Ontario	$1,054,285
Quebec	289,500
New Brunswick	263,000
Nova Scotia	190,650
Manitoba	634,000
Alberta	1,707,000
Saskatchewan	202,000
British Columbia	114,500
Total municipal	$4,455,335

The total of provincial bond sales for June was $7,187,000, made up of British Columbia, $3,000,000; Ontario, $2,987,000, and Nova Scotia, $1,200,000.

The most important event in the industrial market last month was the Saguenay Power and Pulp issue of $5,500,000, which is now being offered. There have been many like issues during the past six months, all of which have met with success.

Total bond sales for June, 1919, amounted to $18,292,335, the second highest total on record this year, January being first with $23,960,587. The following is the summary:—

Provincial	$7,187,000
Municipal	4,455,335
Corporation	6,650,000
Total	$18,292,335

Although the usual seasonal increase is visible in the bank loans to municipalities, it can be seen from the following table that there is a decline of over $7,000,000, compared with the May figures of 1918. This is a result of the new financial conditions now existing, which enable municipalities to issue debentures on comparatively favorable terms.

	1916.	1917.	1918.	1919.
January	$32,015,371	$24,487,272	$40,015,466	$32,640,198
February	35,149,915	26,121,324	43,535,628	36,830,183
March	38,649,462	29,877,911	50,652,061	41,993,305
April	44,371,050	35,931,996	55,685,350	47,911,199
May	43,924,036	39,700,191	57,728,226	50,356,227
June	46,773,032	42,757,673	58,060,424	....
July	42,385,096	43,989,207	56,589,173	....

INVESTMENTS AND THE MARKET

Activity in Stock Market is Accompanied by Several Advances—Considerable Trading in Speculative Stocks

THE past week has been one of the most active in the history of the Toronto and Montreal Stock Exchanges. On Thursday, July 3rd, the leader on the Toronto exchange was Dominion Steel, followed by Atlantic Sugar and Spanish River. Steel of Canada also made a new high record. On the Montreal exchange the stocks featured were Spanish River, Atlantic Sugar, National Breweries and the steel issues. The upward movement was continued on Friday, when 31,928 shares exchanged hands on the Montreal exchange, a record for the current year. Interest centred chiefly in the steel and paper stocks. Advances were also made in Toronto. On Monday seven thousand listed shares changed hands on the Toronto exchange, making the highest record since May 14th. The number of listed shares involved in transactions on the Montreal exchange on Monday was 32,000. Maple Leaf Commission made a substantial advance both on Monday and Tuesday.

These advances in stocks, chiefly industrial stocks, were accompanied by a decline in trading in bonds. The prices of the war bonds have fallen off, which is largely attributed to the high rate of interest being paid for the new Canadian loan floated in New York.

Dominion Steel Corporation.—President Mark Workman, William McMaster, vice-president of the corporation, J. H. Plummer, E. R. Wood and Hector McInnes, K.C., represented the steel company at a conference this week with the Hon. C. C. Ballantyne, Minister of Marine, regarding the contract which the Sydney enterprise has from the Dominion government for ship-plates. Early last spring the Minister of Marine intimated that, following changed conditions in the steel industry, it would be necessary to consider some alterations in price, and requested that work on the mill be suspended, pending an adjustment of the matter. It was regarded in local steel and financial circles that this action on the part of the government presaged the cancellation of the contract, but subsequent negotiations were entered into, with the result that a modification of the original price of $4.15 per hundred pounds is likely to be agreed upon and the contract proceeded with. Although nothing definite resulted from the conference, there is every prospect of an immediate settlement.

Ames-Holden-McCready, Ltd.—As previously noted in these columns the net profits for the year ended April 30th, 1919, were approximately the same as those for the preceding year. In view of the fact that the volume of business increased over 27 per cent., this indicates that the increased expenses absorbed the additional profits. The company is in a good financial position, however, as the following comparisons taken from the balance sheets for this and the preceding years would indicate:—

Assets.

	1918.	1919.
Cash	$ 52,922	$ 57,126
Accounts receivable	481,223	445,206
Notes and drafts receivable less bank loans	51,430	65,124
Inventory, investments, etc.	2,733,670	2,331,411
Fixed and other assets	6,165,332	6,064,055

Liabilities.

	1918.	1919.
Current	$1,576,310	$ 568,527
Bonds outstanding	1,136,926	1,083,606
Debentures outstanding	500,000	390,000
Capital	6,000,000	6,000,000
Reserve	65,000	100,000
Surplus	206,342	830,729

Following upon the previous announcement of this report the preferred shares advanced from around 87 to 95 and the common from below 45 to about 50.

Canadian Pacific Railway.—The May earnings statement, compared with last year, is as follows:—

	1919.	1918.	Increase.
Gross	$13,569,411	$13,314,116	$255,294
Expenses	10,535,650	9,626,341	909,309
Net	$ 3,033,760	$ 3,687,775	*$654,014

*Decrease.

May gross and net earnings over a series of years follow:—

May.	Gross.	Net.
1919	$13,569,411	$3,033,760
1918	13,314,116	3,687,775
1917	14,355,149	4,551,719
1916	12,472,167	4,372,282
1915	7,261,496	2,443,002
1914	9,795,892	2,963,011
1913	11,904,379	3,504,030
1912	11,360,421	3,680,515

Five months earnings show net earning of $9,196,056, against $11,894,837, a decrease of $2,698,780. Gross return was the largest in history.

The 45th annual convention of the American Bankers' Asociation will be held at St. Louis, during the week commencing September 29th.

DIVIDENDS AND NOTICES

THE MERCHANTS BANK OF CANADA

QUARTERLY DIVIDEND

Notice is hereby given that a dividend of Three per cent. for the current quarter, being at the rate of Twelve per cent. per annum, upon the Paid-up Capital Stock of this Institution, has been declared, and will be payable at its Banking House in this city and its Branches on and after the 1st day of August next to Shareholders of record at the close of business on the 15th day of July.

As regards new stock paid up subsequent to 15th May, in full or in part, the rate of Three per cent. for the current quarter (or twelve per cent. per annum) will apply proportionally from the dates upon which payments were made.

By order of the Board.
D. C. MACAROW,
General Manager.

Montreal, 26th June, 1919.

THE CANADIAN FAIRBANKS-MORSE COMPANY, LIMITED

Preferred Dividend No. 28

Notice is hereby given that a semi-annual dividend of 3 per cent. (3%) on the preferred stock of this Company has been declared due and payable on the fifteenth day of July, 1919, to stockholders of record at the close of business, Saturday, July 5th, 1919.

By order of the Board.
T. M. CULLEN,
Assistant Secretary.

Montreal, June 28th, 1919.

RECENT FIRES

Smaller Losses this Week—Danger from Bush Fires is Probably Over

WHILE weather conditions and the efforts of fire-fighters have prevented to a large extent the spreading of the fires last week in the west, in Ontario, Quebec and New Brunswick there is still considerable danger from this source. A report from Calgary, dated July 7th, indicated that that city was in danger during the outbreak of a fire on the Elbow River. Another report, dated July 8th, stated that this fire was still spreading, and that there were others in Alberta. It is estimated that between fifteen and eighteen million feet of timber were destroyed in the Porcupine Hills district alone.

In the eastern provinces the conditions are normal and no serious loss is anticipated at present.

Armstrong, B.C.—July 3—A business block was destroyed. The blaze started in Soges' real estate office, and destroyed the Armstrong Hotel, Blackburn's livery stable, the Olympia restaurant, Reed's office building, the city powerhouse and the electric light station.

Boston Creek, Ont.—July 2—The mill at the Patricia Syndicate was destroyed. Estimated loss, $70,000. Insurance, $30,000.

Kingston, Ont.—July 4—The bicycle shop of George Muller, King Street, was damaged. Cause, coal oil stove. Estimated loss, $5,000.

Mount Forest, Ont.—July 3—The barn owned by Peter McEachern, of the 12th concession of Egremont township, was destroyed. A large portion of the contents were also destroyed. Cause, spark from a match. The loss is partially covered by insurance.

Newcastle North, N.B.—July 1—The house owned by Mr. Alex. Fitzgerald, Pleasant Street, was destroyed. Insurance, $1,000. The garage owned by Dr. Moore, next door, was damaged. Insurance, $1,300.

New Liskeard, Ont.—July 3—The sawmill of James McBrayne, in Firstbrook township, with 7,000 feet of lumber, and the barn and machinery shed on the farm of Prof. John Sharp were destroyed.

Port Rowan, Ont.—July 4—The Central Hotel and the Ashford grocery store on Main Street were destroyed. Estimated loss, $10,000.

Unionville, Ont.—July 5—The farmhouse and contents, owned by Mr. R. Ash, were destroyed.

ADDITIONAL INFORMATION CONCERNING FIRES

Saskatoon, Sask.—June 6—The premises of the Quaker Oats Co. were destroyed. Estimated loss, $140,000. The following companies are interested: Liverpool and London and Globe, $17,500; British America, $30,000; Springfield, $15,000; London Guarantee and Accident, $15,000; Caledonian, $10,000; Minneapolis Underwriters, $10,000; American Central, $20,000; Lloyds, $12,500; Pacific Coast, $10,000; Britannia, $10,000; Niagara, $22,500; Hartford, $50,000; New York Underwriters, $10,000; Northern Empire, $15,000; Ocean, $20,000; Continental, $5,000; Ætna, $7,500; Globe and Rutgers, $15,000; Alliance, $10,000; Royal Exchange, $50,000; London, $5,000; L'Union, $17,500; British Northwestern, $5,000; London Assurance, $7,500; Queen, $15,000; Northern, $20,000; Royal, $30,000; British and Canadian Underwriters, $15,000; Century, $15,000; Rochester Underwriters, $15,000; Delaware, $5,000; Great Northern, $5,500; Queensland, $15,000; Mount Royal, $15,000; British Colonial, $5,000; Union of Canton, $25,000; British Traders, $7,500; Firemen's, $7,500; Guardian, $55,000; Employers' Liability, $20,000; Saint Paul, $50,000; Car. and General, $15,000; Phœnix of Paris, $5,000; Norwich Union, $10,000; Phœnix Fire, $5,000; Hudson Bay, $15,000; Great Northern, $5,500; British Canadian, $15,000; General of Paris, $5,000; Union Assurance, $15,000. Total, $801,000.

Newcastle, N.B.—June 9—The premises of the Edward Sinclair Lumber Co. were destroyed. Estimated loss, $60,000. The insurance is as follows: New York Underwriters, $5,000; Nova Scotia, $32,500; Palatine, $1,000; Yorkshire, $2,000; London Assurance, $25,000; Western, $5,000; General of Perth, $2,000; Atlas, $5,000; Commercial Union, $5,000; Hartford, $2,000; London and Lancashire, $10,000; Ætna, $2,000; Occidental, $8,000; National of Hartford, $7,000; Scottish Union, $2,000; Royal, $2,000; Sun, $3,000; Phenix of Paris, $3,000; Home, $7,000; North America, $3,000; North British, $4,000; Caledonian, $2,500; General of Paris, $3,000; London Guarantee, $3,500; Quebec, $1,000; North West, $2,000; Liverpool and London and Globe, $3,000; Royal Exchange, $5,000; Mercantile, $6,000; Globe and Rutgers, $6,500; British Colonial, $3,500; Dominion, $2,500; Allied Underwriters, $4,000; Royal Underwriters, $5,000; Alliance, $2,500; Allied Underwriters, $1,000; Imperial Underwriters, $2,500; Mount Royal, $7,500; Union of Canton, $10,000; British Traders, $7,500; Fidelity-Phenix, $6,500; Fidelity Underwriters, $6,000; Continental, $4,000; Montreal Underwriters, $6,500; Employers, $4,500; Providence-Washington, $5,000; St. Lawrence Underwriters, $5,000; Union of England, $5,000. Total, $239,500.

Restigouche, Que.—June 9—Lumber, which was on the premises of the Chaleurs Bay Mills Co., was destroyed. Estimated loss, $425,000. The following companies are interested: Chaleurs Bay Mills Co., Union of London, $49,700; Northern, $19,700; New York Underwriters, $5,000; Home, $4,600; Atlas, $13,500; Liverpool and London and Globe, $3,800; British America, $7,600; Sun, $14,200; Lumbermen's Underwriters, $12,500; Manufacturing Lumbermen's Underwriters, $25,000. Total, $155,600. Loss, total. On Export Lumber Co.'s stock: Manufacturing Lumbermen's Underwriters, $30,800; Main and Field Yard Blanket, $17,000. Total, $48,000. Loss, total. On Harrison, Robinson and Co.'s stock: Phœnix of London, $91,500; Queen, $58,500; Western, $7,500; Alliance of London, $7,500; Royal, $14,800. Total, $179,800. Loss, total. On Montreal Lumber Co.'s stock: Imperial Underwriters, $15,000; North British and Mercantile, $10,000; Westchester, $5,000; Norwich Union, $5,000; Hartford, $5,000. Total, $40,000.

NEW VANCOUVER INSURANCE AGENCY

A new insurance agency under the name of the Stewart-McIntosh Company, Limited, with offices in the London Building, Vancouver, B.C., has been formed by Mr. J. A. Stewart, formerly of A. S. Matthews and Company, and Mr. Harry McIntosh. The new company has acquired the general agency of the Maryland Assurance Corporation of Baltimore, Maryland and the Glens Falls Insurance Company of Glens Falls, New York. The Maryland Company had as its general agents the London and British North America Company and the Glens Falls the General Administration Society.

WHALEN COMPANY FINANCES EXPORT BUSINESS

Following the election of Sir George Bury as president and chief executive of Whalen Pulp and Paper Mills, Ltd., and the subsequent additions to the board of directors, concerning which announcement was made a few days ago, it is now understood that the new interests in the company have successfully negotiated the underwriting by Royal Securities Corporation and Peabody, Houghteling and Co., of Chicago, of $1,500,000 6 per cent. first and refunding mortgage bonds of the Whalen Co. Total bonds outstanding, including the new issue, are $3,500,000, secured by specific mortgage on assets exceeding in value $15,400,000.

The new financing will not only refund large expenditures made by the Whalen Co. during the past few years on its three mills now producing 54,000 tons per annum, but will provide it with over $1,000,000 of net working capital—ample, not only to take care of its growing lumber, pulp and paper business on the Pacific coast and in the American Middle West, but for the aggressive development of its export business to Oriental markets and Australia.

Movement of Canadian Grain Crop

Fifty-Seven Per Cent. Went to Canadian Head of Great Lakes — Buffalo Receives Eighteen Per Cent.—Small Quantities Imported from United States —Western and Eastern Pools — Distribution of Flour Manufacturing

A REPORT on the grain trade of Canada for the crop year ended August 31st, and to the close of navigation, 1918, has been issued by the Internal Trade Division of the Dominion Bureau of Statistics in collaboration with the Board of Grain Commissioners for Canada. The object is to show the movement of grain in Canada from the producer to the final markets. The report represents an enlargement on previous statistics and is the first attempt to deal with the subject comprehensively. The following general statement by R. H. Coats, Dominion Statistician, is given in the preface:—

"To simplify the marketing of Canadian grain, the country is divided into two main areas, the eastern and the western, the dividing line being at Port Arthur and Fort William, which localities are included in the western field. As representing the grain which is subject to movement during any year (the year covered by the report is the crop year ending August 31), the following items are taken: Current production and the quantity in store at the beginning of the crop year in country elevators and in terminal elevators at the head of the lakes. The statistics then illustrate the movements of this grain through the several channels until it is finally disposed of, either by shipment from the heads of the lakes, by rail from Fort William and Port Arthur, over the international border into the United States, or by water from Vancouver. Similarly in the eastern division, the current crop and the amount on hand in eastern elevators, together with the receipts from the west, are traced from stage to stage, either to local consumption or to export to the United States, the United Kingdom and other countries.

"The attempt has not been made to retain trace of the identity of the grain as it moves towards export. The plan has been adopted of looking upon the commerce of the western and eastern divisions as pools into and from which streams of grain flow. The size of these streams is shown, and the volume of grain at the chief market points, month by month.

"Starting with the western division, there is a certain amount of grain on hand at the beginning of the year, left over from the last season; to this is added the year's crop. Of this total stock of the year in the western pool a large part goes into commerce, although a portion is left for seed and feed. The portion used for seed can be estimated; the amount used for feed, etc., can be ascertained only by subtracting all other known quantities from the total year's pool. The portion that goes into commerce passes through country elevators or over railway loading-platforms. The former quantity is known pretty accurately; the latter, as yet, can only be estimated. It is possible to ascertain the amount of grain milled in the west and the amount shipped out of the division. This really constitutes the commercial grain of the west. It is known what part of that is inspected, what part goes through the interior terminal elevators at lake head, what part is exported into the United States and other countries from west of the Great Lakes, what part goes to United States lake ports from the terminals by water and what part to the Canadian ports, and what part goes into the eastern division by rail.

"For the eastern division approximately the same facts are known; only here, in addition to the hold-over from the previous year and the crop of the current year, there are the large streams flowing in from the west already noted. This is treated as another pool of grain in the same manner as the western, the streams leading both in and out being traced, and the amount in the pool at the beginning and end of the period being measured.

"There are certain radical differences between the west and the east. In the east no record as to the amount of the commercial grain is available from inspections, nor from movement through country elevators. The only evidence as to the amount of strictly eastern commercial grain is found by subtracting the movements into the pool from the amount milled therein and the amount shipped out. In the case of rough grains, milling figures are lacking for the crop year as yet, although it is hoped to have them for next year. Another striking difference between the commerce of the two divisions is that whereas the bulk of the grain of the west moves through terminals, at lake head, the movement in the east is distributed through a number of centres. It has been possible to show the movement through these ports in considerable detail.

"One fact which it has been attempted to bring out clearly is the monthly utilization of the capacity of the various classes of elevators as shown in the data already currently published in the visible supplies in store. These data show the absence of that regular flow of traffic which will give the lowest costs for transportation and storage and at the same time ensure the highest price in the foreign grain markets.

"Many details have been included which it is thought will be of value to students of the trade; in succeeding annual reports it is hoped to improve upon these beginnings."

The movement of the 1918 crop is illustrated by the diagram reproduced on pages 28 and 29 of this issue. In explanation of this diagram the following statement is given:—

"It has been impossible to portray all the details of movement within the country and the expedient has been adopted of showing a pool for the western inspection division and another pool for the eastern inspection division, and showing the principal streams into and out of each of these pools for the year, also the movements through the chief grain centres of the country.

"The western pool, of course, is fed chiefly by the crop in the western division. This was computed for the crop year under discussion to be 212,612,000 bushels. There also was on hand at the beginning of the year, in accordance with the closest calculations available, some 5,267,000 bushels. The only other stream entering this pool is the small amount of 52,000 bushels entering from the United States. This makes a total flow into this pool during the year of 217,932,000 bushels. Of this, 169,104,000 bushels was used commercially, that is, shipped out of the division or milled within the division. Of this, 43,800,000 bushels are estimated to have been ground in the west. The balance sheet of wheat in Statement No. 37, shows the destination of the quantity shipped out of this pool and the map shows the movements east distinguishing between what went to the terminals at Fort William and Port Arthur and what was shipped all rail to the east. In addition to this amount disposed of commercially, it is estimated that 28,289,000 bushels were used for seed and that 689,000 bushels were held over in store to the next crop year.

"7,798,000 bushels are shown as going straight through to the east by rail, either destined to the eastern division or to the east of the United States. It has been impossible, at this stage of the flow, to distinguish between what was reshipped from the eastern pool and what was shipped through eastern Canada to United States, consequently, this has all been shown as going into the eastern pool, and the shipments by rail through the eastern division into the United States have all been shown as shipments out of the eastern pool. The largest shipment out of the west went by way of the terminals, Fort William and Port Arthur. 115,227,000 bushels are reported to have passed into the public and private terminal elevators at Fort William and Port Arthur during the crop year. No attempt has been made to show the quantities on hand at these terminals beginning with the end of the crop year as distinguished from the quantity on hand in the division as a whole, on the map. Consequently, the streams shown as shipments from the terminals do not exactly agree in amount to the quantity shown as received at these terminals. 14,703,000 bushels were shipped eastward from these cities by rail and, being joined to the rail shipments from the far west, make the total rail shipments east of 22,501,000 bushels. This figure is the most exact that it has been found possible to ascertain for this crop year and, judging from all collateral evidence at hand, is very close to he exact facts of the situation. It is hoped that for the succeeding crop years, we may have an indisputable record of such rail shipments. The water shipments from the terminals are known to a high degree of exactness, and amounted for this year to 99,730,000 bushels. In addition to this 489,626 bushels were shipped eastward by water from Duluth of Canadian wheat. Of these total lake shipments, 35,943,000 bushels entered the Bay Port elevators and, owing to the bay port elevators being more thoroughly cleared of their supplies at the end of the year than at the beginning, 36,423,000 bushels were forwarded thence by rail. 7,208,000 bushels from the lake stream were received at Goderich and forwarded thence by rail. 16,686,000 bushels were taken from this lake stream at Port Colborne, of which 9,565,000 bushels were shown as forwarded by rail into the eastern pool. However, to be exact, a large part of this was milled in the city of Port Colborne. It being impossible to show the amount milled at each centre, this has been shown as going into the eastern pool, and the figures are shown in one total. Of this wheat received at Port Colborne, 7,129,000 bushels were forwarded down through Lake Ontario, part of which was received at the Kingston elevator, being forwarded thence again to Montreal.

"A large part of the movement down the lakes went to United States ports, by far the largest portion of this being 39,088,000 bushels received at Buffalo. Detroit received 511,000 bushels, Erie 305,000, Fairport 678,000, Ogdensburg 57,000, Port Huron 441,000 and Toledo 114,000 bushels. These smaller streams have not been shown on the map. Of this total movement into the United States ports from Fort William and Port Arthur 3,200,000 were shown by the Canadian customs records to have been cleared for consumption in the United States.

"The eastern pool received during the year not only the crop that was estimated at 21,130,000 bushels, but also the shipments from the west, amounting in all to 82,185,000 bushels. The route by which the various parts of this stream entered have already been sketched, excepting that in addition it is necessary to explain the off-shoot from the main railway stream of 20,752,000 bushels into Montreal. This amount, plus the 7,929,000 bushels shipped down the St. Lawrence by water, was received in the public elevators situated in the city of Montreal. This, being such a large stream, has been shown separately before it enters the main eastern pool. In addition to the crops and the receipts from the west, the map shows 3,536,000 bushels as received into the pool for the year from the quantity on hand at the end of the previous year. There also was a small importation from the United States into this division,.amounting to 129,000 bushels.

"The movements out of this year's eastern pool included 2,855,000 bushels carried over in store into the following year, 2,000,000 bushels used for seed in the divison, 42,200,000 milled, 14,652,000 bushels shipped out for export from the St. Lawrence ports, 3,498,000 shipped out by way of Halifax, and 12,918,000 shipped out by way of St. John. The deductions from the customs reports show that 26,798,000 bushels were shipped out via the United States to other countries. In addition there was a small amount of 280,000 bushels cleared for United States consumption, making the total shipments by rail from the east into the United States, 27,078,000 bushels.

"Two main streams are shown as going into the United States mainly for reshipment to other foreign countries. Of this 39,088,000 bushels went by way of Buffalo and 27,078,000 bushels by rail from the eastern pool. In addition 2,105,000 bushels went out via other United States lake ports. 3,200,000 bushels of the lake shipments were cleared for consumption in the United States, and 280,000 bushels from the shipments from the east. The remaining 65,306,000 bushels were cleared for export to other countries via the United States by rail from the eastern pool. No attempt has been made to show by what ports this wheat moved out of the United States, the map indicating merely that it went via United States Atlantic ports. So far as our export is concerned, it is correct to conclude that this was exported into other countries by way of United States ports. It so happens that a considerable portion of this, while billed to other countries than the United States when leaving our boundaries, was taken by the United States Grain Corporation under specific agreement with the Canadian government and ground into flour in the United States. In part this flour was exported and in part American wheat was substituted for Canadian wheat bushel for bushel. The Canadian official records do not show the amount of such grinding and substitution, and, consequently, we have shown the movements as though it were all exported direct. In fact, to all intents and purposes, in so far as Canadian commerce is concerned, this wheat was sold for consumption in other countries than the United States.

"This heavy movement of 65,306,000 bushels through United States ports as compared with 31,068,000 bushels by way of Canadian ports is a very significant matter for Canadian commerce."

BONUS FOR DOMINION EMPLOYEES

The Civil Service Commission has announced the signing of an order-in-council- determining the methods by which the Civil Service bonus of $10,000,000 is to be applied. Regulations based on recommendations made by Arthur Young and Company provide that heads of households receiving less than $1,200 per year will receive a bonus of $420. This amount decreases in steps of $24 for each $120 increase in salary up to $3,000.

Single employees over twenty-one with a salary less than $960 per year receive $252, the amount decreasing as the salary increases up to $1,800. Single persons between eighteen and twenty-one years of age, with salaries less than $1,200 per year, receive $150. Bonus will be paid in monthly instalments, and is retroactive to April 1st, 1919.

No distinction is made as to date of entry into the service or between inside and outside services. Sessional employees participate pro rato. Employees now receiving a higher bonus are protected for the duration of the order. Persons receiving union rates or carrying on private occupations while in the service do not participate. The administration of the bonus is placed in the hands of the Civil Service Commission, and first payments will be made on completion and approval of bonus lists.

PHŒNIX ASSURANCE COMPANY, LIMITED

The loss ratio in the fire department of the Phœnix Assurance Company, Limited, for 1918, was 44.7 per cent. and the expenses and commissions required 37.4 per cent. The fire funds were increased by $570,000. In the life department 2,002 policies were issued bringing a new premium income of $407,265. As a result of the year's operations there was carried to profit and loss account a gross profit of $3,279,995 and after providing for income tax, excess profits duty and other taxes, this was reduced to $872,795.

SHIPPING SHORTAGE STILL FELT

A deputation of pulp and paper manufacturers which waited on the Canadian Minister of Marine at the end of last week did not receive any encouragement. The Hon. Mr. Ballantyne stated that the control of ships by the British government prevented any better shipping accommodation on the Atlantic. The solution of the difficulty, he said, will have to be in the Canadian merchant marine; at the end of this year the government will own and operate twenty ships and by the end of next year, fifty ships. The companies, he said, are not able to get their tonnage released from British charter.

WINNIPEG LIFE UNDERWRITERS' ASSOCIATION

At the annual meeting of the Winnipeg Life Underwriters' Association, held on July 11th, 1919, the following officers were elected for the ensuing year: Hon. pres., J. G. Stephenson, London Life; past pres., W. T. Hart Policy Holders Mutual; pres., J. H. Baird, Aetna Life; vice-pres., J. E. S. Buchanan, Monarch Life; treasurer, John O'Grady, Great-West Life; secretary, A. Franklin, Sun Life. Board of management, Percy Winterborne, Metropolitan Life; J. T. Hanna, New York Life; W. A. Mackie, London and Lancashire Life; F. J. Davis, Mutual Life of Canada; J. A. Wilson, Manufacturers Life. Members elected to executive of Dominion Association, J. H. Baird, W. T. Hart, D. J. Scott.

MANITOBA TAXATION COMMISSION

The program for additional meetings now being held throughout the province is as follows: Brandon, July 15th and 16th; Souris, July 17th; Portage la Prairie, July 21st; Morden, July 24th; Dauphin, July 30th and 31st; Neepawa, August 5th, Minnedosa, August 6th. The commission asks for an expression of views on the following subjects:—

1. The operation of the laws now in force relating to the assessment of property for the purposes of municipal taxation in the province.
2. The present method in force in the province respecting the preparation of municipal assessments with the view of improving the same, and to secure, if possible, greater uniformity in this respect.
3. The most equitable manner of equalizing assessments throughout the province to meet the annual statutory levies required to be made by the municipal commissioner.
4. The advantage or disadvantage of rating land values only instead of the value of lands and buildings.
5. The advisability and justness of taxing incomes in addition to or substitution for other methods of taxation now in force in the province.
6. The most equitable method of assessing stocks and other property of mercantile firms or corporations.
7. The most equitable mode of assessing companies operating public utilities.
8. The statutory exemptions from taxation now in force and as to what, and any changes it is desirable should be made, therein.
9. Generally all other matter connected with the assessment and taxation of property within the province.

DOMINION PERMANENT LOAN CORPORATION

The Kettle Valley, Spokane and British Columbia Railway, and investments connected with it, was largely responsible for the failure of the Dominion Parmanent Loan Corporation, according to a statement made in Toronto a few days ago. The company's losses in this way amounted to about $1,000,000, and it is stated that taxes now exceed the value of the property.

INDUSTRIAL ACCIDENTS IN ONTARIO

Reports of accidents to the Ontario Workmen's Compensation Board do not indicate much falling off in the general industrial activity of the province, although the wartime industries have ceased. The total number of accidents reported during the first half of 1919 was 19,811, the corresponding figure for 1918 being 22,702. The amount of compensation awarded was $1,676,049 during the first half of 1919, as compared with $1,672,362 during the first half of 1918, the amounts being almost the same although the number of accidents was a little less. This indicates a higher rate of wages.

The accidents reported during each month of the half-year are as follows: January, 3,471; February, 3,164; March, 3,343; April, 3,112; May, 3,201; and June, 3,520. The number of fatal accidents reported during the half-year was 215, as against 212 for the corresponding half of 1918.

BRITISH OVERSEAS BANK

The prospectus of a British Overseas Bank, Ltd., has now made its appearance. Eight leading banking institutions have subscribed at par for $5,000,000 of "B" ordinary shares of capital, and applications are now invited for $200,000 "A" ordinary shares of $25 each at par, forming a part of the total authorized share capital of $25,000,000.

One of the objects of the new bank is to facilitate the foreign trade of the British Isles and Empire by specializing in all matters of exchange payments and receipts abroad. Commercial credits will be issued, and the bank will give its acceptance to bills in connection with home, colonial and international trade agencies, and branches if and where necessary will be established in order to maintain efficient representation in all parts of the globe.

DIRECTORY OF CHEMICAL INDUSTRIES

The Dominion Bureau of Statistics has just issued a Directory of the Chemical Industries in Canada, listing the names, addresses and products of nearly 500 Canadian firms manufacturing chemicals, or other products in which the processes used are essentially dependent upon the agency of chemical change.

The Directory is in two divisions: (1) an alphabetical list of the various concerns, the head office address of each, together with a detailed list of their products, including in the latter chemicals and products resulting from chemical processes; (2) a list alphabetically arranged of the chemical products manufactured in Canada showing the names of the various firms engaged in their manufacture. The Directory has been published in a limited edition, and as a great number of requests for copies have already been received, it is probable that the available supply will soon be taken up. Requests from those interested should be addressed to the Dominion Bureau of Statistics, Ottawa.

The agents and representatives of the Sun Life Assurance Company held a convention in Montreal last week. The underwriters in the service of the Confederation Life are holding their convention in Toronto this week.

PERSONAL NOTES

Mr. Edward Fitzgerald, deputy chairman of the Canadian Committee of the Hudson Bay Company, is in Canada on a business trip.

Mr. F. J. James, of Nay and James, Regina, was in Toronto this week, on his return from overseas, where he has been for nearly four years.

Sir Edward Dawson, of London, England, president of the Associated Chambers of Commerce of the West Indies, was in Ottawa recently discussing the question of trade relations between Canada and the West Indies.

Mr. John Ley Retallack, as previously mentioned in these columns, is the first public utilities commissioner for British Columbia. He has had a wide experience in industry and finance. After serving for five years with the Royal Northwest Mounted Police until 1889, Mr. Retallack lived in the Kootenay district of British Columbia. He served from the outbreak of the war in the Canadian army with the rank of major. The duties of the new office created by the provincial government will be large, involving the control of street railway, telephone, gas and electric and other public service properties in the province of British Columbia. The Act which was passed at the last session of the legislature has been considerably criticized and the office will be a somewhat difficult one to fill.

Mr. J. W. Macmillan, chairman of the Manitoba Minimum Wage Board, has resigned. The board has completed its recommendations to the provincial government and its duties in the future will be of an administrative character.

Mr. A. F. Wanner, of the Wanner Land Company, Regina, has been in the leading cities of the central states in connection with the sale of western Canadian lands. He reports a considerable interest in investments of this kind and numbers of prospective investors are visiting the west.

Mr. Thomas Fisher, has been appointed general manager of the Atlantic Lines of the Canadian Pacific Ocean Service, Limited, with headquarters in London, England. Other European appointments are: Mr. J. A. Martin, manager; Mr. J. V. Forster, assistant manager; Mr. E. T. Stebbing, passenger manager; Mr. A. H. Allan, freight manager and Mr. P. W. Brookes, European accountant.

Mr. James J. Warren has been elected president of the Consolidated Mining and Smelting Company in succession to the late W. B. Matthews. Mr. Warren, who is a lawyer by profession, has been managing-director of the company since 1915, and for one year previous to that was a member of the board. He is also president of the Trusts and Guarantee Company. He will combine the positions of president and managing-director.

Mr. J. G. Stephenson, superintendent of the London Life Assurance Company for Manitoba and Saskatchewan, has been made general manager for Western Canada with offices in Winnipeg. He commenced with the London Life in Winnipeg ten years ago. Mr. A. R. Graham has also been promoted to the position of city manager for Winnipeg, in the ordinary department.

Mr. H. J. McCann has been appointed assistant to the president of the Dominion Steel Corporation. He will be the president's personal representative with direct supervision over all the operations of the company when the president is not in Cape Breton. Mr. McCann entered the employ of the company as a telegraph operator and before receiving his present appointment was purchasing agent.

Major Donald M. Martyn is the first industrial commissioner of British Columbia. He will head an advisory board whose duty it will be to examine into schemes for industrial development within the scope of the Industrial Development Act which allows for loans not to exceed $2,000,000. The Major belongs to Port Haney, B.C., and for a time was second in command in France of the 47th Battalion. On July 11th the provincial cabinet passed an order-in-council appointing five members to constitute an advisory council for the Department of Industries. The members, who will serve without salary, are: Messrs. A. C. Flumerfelt, capitalist; Victoria; Mr. Nicol Thompson, mine operator, Vancouver; Mr. J. W. W. Thompson, M.P.P. for Grand Forks; Major R. J. Burde, M.P.P. for Alberni; and Mr. F. G. Dawson, wholesale grocer, Prince Rupert. It was decided to call a meeting of the new board within a few days to consider a large number of schemes which had already been submitted to the secretary, Major Martyn.

OBITUARY

Mr. T. A. Anderson, president and general manager of the Merrick-Anderson Company, Winnipeg, Man., died on July 14th, at Kenora, Ont.

OPEN ORDINARY INSURANCE DEPARTMENT

Mr. H. Vaughan, F.I.A., has been appointed manager of the new Ordinary branch which is being opened in Canada by the Mutual Life and Citizens Assurance Co., of Australia.

The federal government will expend $500,000 this year for construction of a drydock at Esquimalt, B.C. The total cost is estimated at $4,000,000.

In order to take care of their rapidly-growing business Messrs. J. G. Beatty and Co., Toronto, have installed a second private wire to New York and Chicago.

TAXATION AND WAR COSTS

CANADA'S much vaunted patriotism may have been apparent during the actual war effort but it is difficult to trace any of its effects in the industrial disputes which are continually taking place, or in the political controversies which are raging on the subject of taxation. It seems to have waned as the bill is being presented, and the sterner test would seem to be that which affects the individuals own pocket.

The aim of every class seems to be to shift the burden elsewhere. The cost of living has risen so much, says labor, and we must have a proportional increase in wages. Very well, say the employers, the price of the goods must rise accordingly, and as we have now to pay additional taxes, and larger dividends are necessary to correspond with the increase in the cost of living, something extra must be included on account of these items. Thus the vicious cycle is set up, and when one revolution is completed all parties find themselves still out of pocket. The man with wages or salary finds that he is really no better off than he was before, and the manager of an industry finds that the additional costs have wiped out his margin of profit once more.

The conclusion to be derived from this phenomenon is that there are economic laws the action of which cannot be prevented by human effort. It is inconceivable that such an expensive war should be carried on and each individual at the same time be able to maintain his previous standard of living. The forces controlling the distribution of wealth may be modified but they cannot be fundamentally changed.

The source of the difficulty is found in the unusual demand for goods and the shortage of labor arising out of the war. This at once brought about a rise in prices, particularly of those essential commodities which are used by everyone. At the same time additional public revenue was found necessary to meet public expenditures, and as it was recognized that the high cost of living was already more severely felt by the wage earners, progressive taxes on incomes and on business profits were resorted to. Thus a fairly equitable distribution of war costs was obtained. But unfortunately the shifting process was then attempted, and it is just in these unpatriotic actions that we have failed to carry out the high standards set in the early years of the war. Labor must recognize that changes in the cost of living do not constitute a conclusive basis for wage adjustments, but represent in part a portion of the war burden, and while higher costs of services and of material are legitimate factors in production costs, the income and business profits taxes are items which are not intended to be shifted by industry.

THE COMING DOMESTIC WAR LOAN

WHILE it is still too early for definite arrangements regarding our next domestic war loan, there are some points which are practically agreed on in financial circles. Although most of the funds will be required in connection with war expenditures, our finances are now on a peace basis, and this alters the situation considerably. So long as the end of the war was not yet in sight and Canada's requirements uncertain, it was essential that the terms of issue should be sufficiently favorable to maintain the bonds at a good price in the subsequent market. Now, however, the supply of high grade bonds is not equal to the demand, and the strictest economy should be observed in making the last issue.

As regards maturity, a ten year bond is favored generally. Although these may not be so attractive from an investment standpoint, yet the chances are that they will be more suitable for our national finances. Any shorter term would not be advisable, as the bonds maturing before 1925 will be more than equal to any funds which may be available to meet them. Early maturities comprise the war savings stamps and war savings certificates, debenture stock, and Victory loan due in 1922 and 1923. In 1925, the outstanding bonds of the issue made in December, 1915, will mature. If substantial balance remain each year to apply on capital account, as should be the case, there should then be something available to meet an issue due in 1929. The next maturity is 1931.

The question of price cannot be separated from that of tax exemption. The present tax exempt bonds are selling in the market at approximately a five per cent. basis, and a further issue of five per cent. tax exempt bonds could undoubtedly be made without difficulty. It is now recognized, however, that this principle is unsound, and while its application may have been admissible in the stress of the earlier war years, it should not be any further pursued. The view that nothing is gained by paying out additional interest and receiving it back in the form of an income tax overlooks the fact that the income tax is progressive, and tax exemption is of greater value to the individual as his income increases. The outstanding bonds are gradually being transferred into the hands of those of large income, to whom an assured five per cent. is attractive, while others prefer higher yielding securities. A wide distribution of government securities also increases political stability, which is a factor worthy of serious consideration at the present time.

It has been urged that it would be unwise to have outstanding two classes of war bonds at the same time. The accumulation of those already outstanding into the hands of persons desiring to secure exemption from income tax cannot be prevented, however, and a further similar issue would only increase the possibilities in this direction.

BUSINESS AND POLITICAL PARTIES

THE future of Canadian industry is so closely dependent upon political developments that business men are watching carefully the new alignments that are gradually being worked out in the federal arena. Present tendencies would indicate that the clear cut division into two parties will shortly cease to be a dominant factor. The farmers, especially in Ontario and the west, are holding aloof from both parties, and in many parts they intend to support candidates of their own. Labor also will endeavor to secure more control over politics, municipal, provincial and Dominion, through labor members. These two withdrawals, if complete, would account for a majority of the voters of Canada, and would undermine the present bi-party system.

While the uncertainty of this prospect necessitates care in the formation of business plans, it does not warrant any alarm. Our economic organization is well balanced, and even were all voters to divide on strictly economic lines it would scarcely seem possible that any one class could maintain control. The defection of the two classes mentioned above would still leave a large body which might be said to represent capital. Then we have in Canada a very large middle class, including hundreds of thousands of professional people, whose interests, while not identical with those of capital, would nevertheless lie in the direction of stability. All property owners, and a majority of the Canadian people are such, oppose any platform of a destructive nature.

The experience of European countries which have a number of parties, reveals the fact that at very few times have the divisions been thoroughly economic. Religion and race have continued to be important factors, as have also purely political questions. The predominant consideration of economic questions, which is characteristic of the present period, cannot be permanent, and these other influences will return. An examination of the leading questions in the Canadian federal arena, moreover, shows that a permanent alliance of any two groups would scarcely be possible unless modifications were made in their respective demands. Labor in the cities might agree with the farmers that a reduction in the tariff would lower the cost of living, but the fact would have to be considered that many of our manufacturing industries are dependent upon it, and such a reduction would mean much unemployment and great hardship in the cities.

Canada's new finance minister should be a man trained in business and finance, not in politics. Unfortunately there are few members with these qualifications, but the duties of the office have grown too great to be in other hands.

* * * * * *

The new Consolidated Railway Act empowers the Railway Commission to continue increased freight rates, as now authorized under the War Measure Act. If these rates were discontinued it would be disastrous to all the roads. Adequate revenue, not an annual deficit, is necessary to restore financial strength.

* * * * * *

The city of Winnipeg is going to ask the Dominion government to meet the special expenses incident to the recent general strike, amounting to around $200,000. While our debt to Winnipeg is great, yet the menace of revolution is one which all parts of Canada must face and combat. All Canadian cities especially suffer from loss of this kind, though in a less spectacular manner.

* * * * * *

Mr. Frank A. Vanderlip is again in the limelight because of a statement made before the United States Senate Foreign Relation Committee that there is a feeling in England and France that as the United States was late in coming into the war, it should cancel debts owing to it by these two countries. Such action would be unwarranted and inequitable; there is certainly no such feeling in Canada as regards our relations with our neighbor.

WINNIPEG GRAIN EXCHANGE

All restrictions on the Winnipeg Grain Exchange are to be removed shortly; after two year's suspension further trading in options will be resumed. Dealers, however, are expressing hesitation in respect to transactions of this kind owing to the shortage in tonnage. This decision of the exchange council is to go into effect upon notice being given by the president.

PARK UNION FOREIGN BANKING CORPORATION

It is announced that branches of this banking institution will be opened immediately in Paris (France), Kobe (Japan) and Hankow (China).

A meeting of the board of directors was held in Toronto on July 15th. Among those here was Mr. F. E. Kenaston, who was recently elected a director. Mr. Kenaston has been in the Far East for five months, and expressed the opinion that Canadian opportunities there are good, particularly in China.

MINIMUM WAGE OPPOSED AT COAST

British Columbia manufacturers and other employers are opposing the immediate application of the Minimum Wage Act which was recently passed by the legislature. It is urged that as Manitoba is the only other Canadian province which has similar legislation the effect will be to handicap British Columbia manufacturers in competing with those of other Canadian provinces. When a deputation waited upon the premier on July 7th, however, he stated that the measure had been passed by the legislature and that the executive had not power to modify the provisions.

The city of Chatham, Ont., may motorize its fire department, if the present movement in that direction is successful.

An extensive trip in northern British Columbia is being made by business men of the city of Vancouver. The journey will be commenced by way of Grand Trunk Pacific boat to Prince Rupert.

DIVIDEND No. 116

NOTICE IS HEREBY GIVEN that a dividend at the rate of twelve per cent. (12%) per annum upon the paid-up Capital Stock of this Institution has been declared for the three months ending 31st July, 1919, and that the same will be payable at the Head Office and Branches on and after Friday, the First day of August next.

The Transfer Books will be closed from the 17th to the 31st July, 1919, both days inclusive.

By Order of the Board,

W. MOFFAT,
General Manager

Toronto, 18th June, 1919.

NEW WINNIPEG FINANCIAL FIRM

The Manitoba Finance Corporation, which was incorporated recently, has commenced business with offices in Winnipeg. J. M. Baird, formerly with Davidson and Macrae, is the president and managing-director of the company. Mr. Baird was the organizer for Manitoba of the campaign for the sale of war savings stamps. J. D .Perrin, who was also at one time with Davidson and Macrae, is secretary. The chief business of the company will be in farm lands. It is the intention, however, to develop a department which will deal in western municipal and industrial securities.

UNION INSURANCE SOCIETY OF CANTON

One of the leading insurance companies in the world, and one whose business is spread over an extensive area, is the Union Insurance Society of Canton, the annual statement of which, translated into Canadian currency, is given elsewhere in this issue. It shows several favorable changes, compared with the statement for 1917. An addition of $750,000 is being made to the re-insurance fund, compared with a similar addition of $500,000 made last year; an addition of $150,000 to the building reserve fund is also being made, compared with $50,000 last year. There is a new appropriation this year for the equalization of the dividend fund to the amount of $250,000. The balance carried forward to underwriting suspense account is $1,310.576, compared with $1,156.192 last year.

The company's balance sheet shows assets totalling $24,175,425, of which $13,442,090 consists of gold or securities payable in gold, and the balance is silver or securities payable in silver. The reserve funds now total over $3,500,000, not including the building reserve fund.

WORLD'S PRODUCTION OF RUBBER INCREASES

The cost of crude rubber has been steadily declining ever since 1912. In the year 1918 the average cost per pound was 44 cents as compared with 84 cents in 1912. The explanation of this extraordinary decrease in prices and, incidentally, of the great increase in rubber company earnings is to be found in the following record of the world's rubber production.

Year.	East.	Brazil.	Other.	Total.
1906	531	36,000	29,500	56,031
1907	1,133	38,000	30,000	69,133
1908	2,010	39,000	24,500	65,510
1909	3,997	42,000	24,000	69,997
1910	7,521	40,800	21,500	69,821
1911	13,973	37,730	23,000	74,703
1912	28,518	42,410	28,000	98,928
1913	47,302	39,370	21,500	108,172
1914	71,959	37,000	12,000	120,959
1915	105,205	36,350	12,000	153,555
1916	150,000	35,000	13,000	198,000
1917	190,000	34,500	10,000	242,000
1918	213,600	34,400	10,500	258,500

Thanks to the plantation rubber boom, which began in London around 1900, and lasted for more than ten years, the world's rubber output has more than kept pace with demands. The left-hand column shows the growth of plantation rubber, and this is where all the growth lies.

The New Jersey Fire Insurance Co., already operating in Western Canada, is about to commence operations in Ontario and Quebec through the firm of Dale and Co., Montreal.

DOMINION TEXTILE ISSUE CONSIDERED

The Dominion Textile Company announces the calling of a special meeting for August 26th, when the shareholders will be asked to sanction a by-law enacted by the directors authorizing the creation of a bond issue.

AMES-HOLDEN TIRE BONDS SOLD

The issue of $1,000,000 of bonds of the Ames-Holden Tire Co., which is a subsidiary of the Ames-Holden Co., has already been over-subscribed. The underwriters were Greenshields and Co., Nesbitt, Thompson and Co., and Thornton, Davidson and Co. The issue was announced on July 15th, and subscription lists closed on July 16th.

DOMINION BANK HALF YEARLY STATEMENT

A statement of the Dominion Bank for the half-year ended June 30th, shows the net profits for the half-year were $553,698, an increase of $31,000 over the corresponding period of last year. Net profits for the whole of last year were $1,086,498. Total deposits at June 30th were $96,140,000, or practically unchanged from the figures at the end of last year, though showing an increase of $17,100,000 in the twelve months. Cash assets now stand at $27,697,000, compared with $28,498,000 six months ago, but showing an increase of $3,200,000 compared with a year ago. Total assets of the bank stand at $123,872,000, while current loans and discount are $55,500,000. The balance at profit and loss now carried forward is $640,201, compared with $446,503 at December 31st last.

GUARANTY TRUST GROWTH

The financial statement of the Guaranty Trust Company of New York as at June 30th, 1919, indicates a further expansion in the company's business. The principal changes in the resources as compared with the statement published in *The Monetary Times* of March 14th, as at February 21st, 1919, are the increase in the amount of loans and bills purchased, the increased cash on hand, and the decrease in the amount of foreign exchange on hand. Real estate holdings have increased from $5,000,000 to $6,000,000. United States government bonds and certificates, on the other hand, have been reduced by over fifty per cent., a reduction also being shown in other public securities.

On the liability side undivided profits have increased from $3,525,660 to $4,479,876. Deposits have increased during this interval by the remarkable amount of almost $80,000,000. Total assets are now $821,084,399 compared with $754,422,617 on February 21st.

A general decline in prices may be postponed, but cannot be avoided. Narrow markets, business stagnation, and unemployment, the antecedents of reduced prices, are already apparent.

Mr. F. C. Stevenson, manager of the Canadian Bank of Commerce in Kingston, Ont., is being transferred to Ottawa. He will be succeeded by S. M. Gibson, assistant manager in Montreal.

Lord Cowdray and other British investors have obtained control of the Coldstream Estate of 13,000 acres and the White Valley Irrigation System, near Vernon, B.C., with the intention of selling or developing the estate.

Where now are those optimists who used to talk about the enormous demands which would be made on industry for the rebuilding of France and Belgium? These demands have not become effective because they are limited by the financial resources of the countries concerned.

SECURITY OF WAREHOUSE RECEIPTS

Supreme Court of Canada Upholds Bank Loan—Construction of Section 90 as Regards Blanket Arrangement

THERE has been some doubt as to the exact meaning of Section 90 of the Bank Act dealing with loans secured by warehouse receipts. The case of Clarkson v. Dominion Bank, which reached the Supreme Court on appeal from the Appellate Division of the Supreme Court of Ontario, referred to this point. The decision handed out on March 3rd reversed the decision of the Ontario Court in part, but was mainly in favor of the bank.

The appellants, who are liquidators and creditors of Thomas Brothers, Ltd., an insolvent manufacturing company in liquidation, brought this action to set aside two mortgages on real estate and pledges of certain goods held by the bank for an indebtedness of the company, which amounted to about $213,500 on May 12th, 1914, twelve days after the winding-up order was made. The bank had received payments and made advances up to that date. The advances made between March 25th, the date of presentation of the petition for winding up, and May 1st, the date of the winding-up order, amounted to $15,400. After May 1st $2,200 more was advanced. The company's indebtedness to the bank, however, which, on March 24th, amounted to $228,827, had been reduced on May 12th, when the last advance of $200 was made, to $213,400. The earliest outstanding note on March 25th, 1914, was dated August 16th, 1913. If these outstanding notes represented actual contemporaneous advances, as the bank maintained, they would all fall within Sub-section four of Section 888 of the Bank Act, which came into force in July, 1913. The bank had put its representative in possession on Mrach 24th, 1914. By subsequently realizing on its securities it had reduced the company's debt to $135,000 at the date of trial.

The relevant sections of the Canadian Bank Act are the following:—

"88. The bank may lend money to any wholesale purchaser or shipper of, or dealer in, products of agriculture, the forest, quarry and mine, or the sea, lakes and rivers, or to any wholesale purchaser or shipper of, or dealer in live stock or dead stock, or the products thereof, upon the security of such products, or of such live stock or dead stock, or the products thereof.

(3) The bank may lend money to any person engaged in business as a wholesale manufacturer of any goods ,wares and merchandize upon the security of the goods, wares and merchandize manufactured by him, or procured for such manufacture.

"90. The bank shall not acquire or hold any warehouse receipt or bill of lading, or any such security as aforesaid, to secure the payment of any bill, note, debt or liability unless such bill, note, debt or liability is negotiated or contracted:—

(a) At the time of the acquisition thereof by the bank; or

(b) Upon the written promise or agreement that such warehouse receipt or bill of lading or security would be given to the bank:

Provided that such bill, note, debt or liability may be renewed, or the time for the payment thereof extended, without affecting any such security."

Decision of Supreme Court of Canada

In his judgment, as given in Dominion Law Reports, Sir Louis Davies, C.J., says:—

"The bank's contention, which was adopted and followed in the judgment appealed from, was that the written promise referred to in sub-section (b) was not one required to be given contemporaneously with a proposed loan or advance, or having reference to any specific goods or property to be secured, but was a blanket promise sufficient to cover any future loans or advances which the bank might make the promisor up to the time when it was acted upon and security taken. That time might be, as counsel boldly put it in argument, five or ten years after the promise given, and would enure to cover as well loans subsequently made from time to time to the promisor as property which was not even in existence when the promise was made.

"The appellant, on the other hand, submitted that such a written promise as the Act referred to was one having reference to a specific loan then being negotiated for, and to specific goods proposed to be given in security for the loan, stated in the Act as an alternative to the acquisition by the bank of the security itself in those numerous cases in which the loan had necessarily to be advanced to enable the borrower to obtain possession of the goods so that he might give the bank the security.

"I have had no hesitation whatever in adopting the appellant's contention on that point. In construing such a very important section as the one in question which validates a secret and unregistered security on personal property not in possession of the grantee bank and in direct opposition to all provincial laws on the subject requiring registration of such a security, one must exercise one's common sense and common knowledge. I cannot believe it ever was the intention of parliament to pass a law having the object and purpose contended for by the bank.

"The section is a prohibiting one. It declares the bank shall not acquire any warehouse receipt or bill of lading or such security (Form C) as aforesaid to secure payment of any debt or liability unless such debt or liability is contracted at the time of the acquisition of the security, or upon a written promise that such security would be given.

Promise May be Substituted

"To my mind, the object, intent and purpose of the section was plain, and is sufficiently well expressed, though, perhaps, not so clearly as to remove all doubt. Primarily, the section required that the taking of the security should be contemporaneous with the negotiation or contracting of the debt or loan. If, however, for any reason that could not be done, and scores of reasons arise to one's mind of conditions in which it could not, then the alternative of a written promise is substituted for the execution of the security. But the written promise to give security had reference, and reference only, not to a future debt or loan to be subsequently made, but to the then debt or loan being negotiated and to the goods and personal property then existing which it was proposed to give security upon, and with reference to which negotiations were taking place. It was only intended, in my opinion, to cover cases where the actual security could not be given because of the non-possession of the goods or property at the time by the borrower. But it had no reference to future or other loans than the one for a specific amount then being negotiated, or to other goods than those specific goods which were to be secured by such loan.

"Take an everyday occurrence, and it can be multiplied by scores and hundreds. A merchant purchases a load of produce, and it arrives at its destination. The bill of lading and draft for purchase price attached are sent to a bank. The purchaser, to get possession, must pay the draft, and, possibly, the freight, carriage and other charges before he can get possession. He applies to a bank for an advance or loan to enable him to get possession of the goods. The bank makes the loan on his written promise to give warehouse receipt or Form C of the Act, as the case may be, as security when he gets full possession, and not till then can he give the warehouse receipt or the statutory security C. So he gives the bank the alternative written promise in the words of the statute, 'that such warehouse receipt or bill of lading or security would be given to the bank.'

"This is only one illustration of the many hundreds of cases in which the 'written promise' is made by statute sufficient to take the case out of the express prohibition in the section of the Bank Act acquiring any of the securities, including Form C, mentioned. But the 'written promise,' so made by the section an alternative to the execution of the security itself where the borrower is not in a position to give the security, does not extend nor relate to any other

loan than the specific one being negotiated, or to any other goods than those to which specifically the negotiations for a loan relate. It is obvious, of course, that some time must elapse before, in the illustration I have given, the borrower is in a position to give the security, and the alterantive of the written promise to give it in sub-section (b) of the section is given so that the bank may not be without scurity for the money which it had to advance to enable the borrower to get the goods.

"I am quite unable to find anything in the case of the Imperial Paper Mills Co. v. Quebec Bank (1913) 13 D.L.R. 702, 110 L.T. 91, which touches the construction of Section 90, or the true meaning to be given to the words, 'written promise,' in Sub-section (b).

"Assuming that I am right in my construction of Section 90, I am not sure that it can make a material difference in the ultimate result in this appeal, for the plain reason that the bank in every case where they made a loan to Thomas Brothers, Ltd., and took from that firm security in Form C, as provided in Section 90, included the contemporaneous advance or loan made by them in the amount for which the security was taken. To that extent, therefore, the security would stand. It is true they also included, along with the contemporaneous loan, other loans which they had made to Thomas Brothers, making the security cover as well the amount they had a right to take it for, viz., the contemporaneous loan, as also a very large number of other loans which they had no right to include. This inclusion not being within the statute, in my judgment, could not, of course, have the effect of making the security effective *quoad* these outside loans, nor could it invalidate the security, so far as the contemporaneous loan was concerned.

Mortgages

"Then, as regards the mortgages, I am of the opinion that the findings of fact of the trial judge as to the insolvency of the Thomas Brothers, Ltd., and as to the absence of knowledge on the part of the bank and its manager of the insolvency, and as to the previous promise made to give such mortgage, confirmed as those findings were by the court of appeal, should not be interfered with, so far as the Ontario real estate is concerned. The trial judge, in making his finding, evidently did so by accepting the evidence of the bank manager, Anderson, as to the insolvency of the manufacturing company, and as to the promise to give the mortgage. It was to some material extent a question of credibility. I, therefore, think his finding, with regard to the mortgage of the Ontario real estate, confirmed by the appeal court, should not be interfered with. But with respect to the Quebec real estate, different considerations arise. A mortgage of such lands cannot be upheld, as I understand the law, based upon conditions existing when the promise to give the mortgage was made, but upon the conditions existing at the time of the giving of the mortgage. No evidence was given before the trial judge or the court of appeal as to the law of Quebec on the question of the validity of mortgages taken at a time when the mortgagor was insolvent. It is clear that such a mortgage in that province cannot be sustained by virtue of a previous promise. As a federal court, it is our right and duty to take judicial notice of Quebec law, and I have reached the conclusion that, so far as the mortgage of Quebec real estate is concerned, it was invalid, and should be so declared, because at the time of the giving of the mortgage the Thomas Brothers were insolvent.

"I would, therefore, allow the appeal as to the mortgage on the Quebec lands with one-quarter of the costs of the appeal, as the point was a minor one. As to the $17,600 advanced by the bank after the filing or presentation of the petition for liquidation, no point or question was raised by the liquidator on the argument of this appeal. We, however, referred the questions arising out of these advances back to the parties for what they might have to say regarding the rights of the bank respecting them. After reading these supplementary factums or statements we are of the opinion that if the parties cannot agree as to the rights of the bank with respect to these advances, and the proceeds of the goods and chattels which these moneys were advanced to improve so as to enable them to be sold more profitably than in their unfinished state they could be, it should be referred to the proper officer of the court below to determine whether any of these advances were made under Section 20 of the Winding-up Act, in which case the bank should be entitled to the benefit of the securities taken, and if not so made, to determine whether the advances were made by the bank in the interest of the estate generally and for the completion of the partially manufactured goods and chattels to make them marketable and salable, in which case the advances so made should be repaid to the bank out of the proceeds of such sales, and any balance left paid over to the liquidator as part of the assets of the insolvent estate."

WESTERN FARMERS OPPOSE OPEN WHEAT MARKET

Meeting of Canadian Council of Agriculture Also Criticizes Tax Exemption of War Bonds and Report of Cost of Living Committee

A FINAL meeting of the Canadian Council of Agriculture held a few days ago in Winnipeg went on record against the opening of the Canadian market to unrestricted trading in wheat and also emphasized their opinion that the appeal board which is to act under the Grain Act should be located in Winnipeg. Referring also to the crop situation in Southern Alberta, the council urged that the Dominion government complete the surveys in connection with the irrigation project in order that development work might be commenced as soon as possible.

The resolution dealing with the wheat market is as follows:—

"Understanding that the government of Canada has taken no action to control the marketing of the Canadian wheat crop of 1919, and in view of the following facts: (1) That the entire importation of wheat into European countries is under government control. (2) That the United States, Canada's principal competitor in the sale of wheat, has created a highly organized and well financed corporation under government direction, to dispose of its exportable surplus of wheat. (3) That it is imperative in the national interest that Canada should secure the maximum return for its wheat crop, and further (1) That the opening of the markets for unrestricted trading in wheat on the Canadian grain exchanges, as is in immediate prospect, would promote speculative rather than legitimate trading. (2) That because the true function of grain exchanges can be performed only when international operations are completely possible in an unrestricted way, they would entirely fail to provide means for disposing successfully of the wheat crop. (3) That trading under such conditions with their attendant risks would provide a market at country points for the farmers wheat only at prices much below its real value, and at times would be bound to result in their being no country market at all.

"Therefore, the Canadian Council of Agriculture is strongly opposed to the opening of the Canadian markets for unrestricted trading in wheat and would reiterate its recommendation of August, 1918, that the government of Canada create, without delay, a body similar to the United States Grain corporation, with like powers and functions and with the financial accommodation adequate to its operations."

Want no Exemptions

Regarding the exemption of war bonds and the report of the cost of living committee of the House of Commons, the council expressed itself in the following terms:—

"Whereas, it is estimated, the war debt of Canada at the end of the present year will be approximately $2,000,000,000, or nearly $250 per capita, and the annual interest charge on this debt will be about $11,500,000 or $14 per capita, which enormous indebtedness will tax the resources of the nation to the utmost.

"And whereas, the war bonds issued by the government of Canada, exempt from taxation, are steadily becoming concentrated in the possession of a few individuals and corporations, who are thus escaping the payment of their fair share of taxation.

"Therefore be it resolved that the Council of Agriculture recommends to the federal government, that the income from war bonds shall be made subject to the regular taxes imposed upon ordinary incomes."

Wheat Price and Living Costs

"Resolved that the Canadian Council of Agriculture is unable to discover either in the evidence given by the witnesses before the cost of living committee at Ottawa, or anywhere in the report made by that committee to the House of Commons, anything which justifiably can be made to serve as a foundation for the outstanding importance given in that report to the present price of wheat as a factor in the cost of living. The committee is careful to point out that it makes no attempt to say whether the price of wheat fixed by the government was fair and just; it is also careful to say nothing at all about the fact that the fixing was done not to keep the price of wheat up, but to hold it down. Competent authorities have stated that if there had been no such action taken by the government, the price would have risen to nearly double the figure at which it was fixed. In that event there would have been a high rate of profit to the wheat growers, indeed, but not nearly as high as the rate of profit actually realized by some of the tariff protected manufacturers on necessaries of life. The manner in which the committee's report touches upon those exorbitant profits and also upon the excessive elaboration and costliness of distribution methods can only be characterized as lenient in contrast with the vigor of the endeavor made to give the fixed price to which wheat has been held down a disproportionate magnitude among the factors in the cost of living in Canada at the present time."

BUILDING PERMITS MORE THAN DOUBLE

April building permits in 35 large cities of Canada were more than double those for March, or for April, 1918. In view of the continued high prices of building materials and of labor, this increase can be considered large. Details are as follows:—

DEPARTMENT OF LABOUR FIGURES	March 1919	April 1919	April 1918	April, 1919, compared with April, 1916. Increase+ Decrease−

"Your Vacation is Planned"

the short rest

IF your holidays are limited, enjoy them to the utmost! A trip to Muskoka, Sparrow Lake, Port Arthur or the Maritime Provinces will bring you the rest that lies alone in delightful scenery, and the refreshment of the best out-door sports, golf, tennis, bathing, boating—fishing, if you like. You will enjoy a complete change, and wide variety of recreation, meet interesting people and find attractive hotel accommodations—*list on application.*

"9 Ideal Vacations"

The wide lands of Canada offer endless surprises to the vacationist. Health and strength renew themselves in the invigorating atmosphere of Prince Edward Island; St. John River Valley; Muskoka. For the hunter of moose, deer or bear, there is abundant sport in Nova Scotia, New Brunswick, Quebec, New Ontario and Eastern Manitoba. Great grizzlies and nimble mountain goats draw the sure shot of the hunter in British Columbia. The fish are biting at Rainy Lakes, Nipigon, Lake of the Woods and other ideal spots.

A Vacation Planned to Meet Your Needs—Choose!

Go back to Nature or camp close to the conveniences of civilization at the Laurentides, Algonquin Park, Nagogami River, Jasper Park. A wonder panorama unrolls before the traveler through the Canadian Rockies, Matapedia Valley, La Baie de Chaleur, Gaspe, Cape Breton, and along the ocean shore of Nova Scotia. Historic facts find old-world setting in Quebec, Montreal, Halifax and their environs. If you wish to combine business with pleasure, visit Western Canada, and such thriving cities as Winnipeg, where you can "hear" opportunity grow.

SASKATCHEWAN SURTAX IS HELD VALID

Privy Council Upheld Provincial Legislation in Case Decided Against Hudson Bay Company

A CASE in which the Hudson Bay Co. disputed the validity of the surtax provisions of the Saskatchewan Rural Municipalities Act, reached the Privy Council in London recently, and on July 8th, was decided against the company. The latter will now have to pay the surtax for the years 1914-1917 to municipalities in which its lands are situated, together with penalties approximating 50 per cent. It will involve a sum well over $500,000, according to some estimates made by municipal authorities. In addition, the provincial government will benefit by the decision, as the wild land taxes for the years 1918 and 1919, which replaced the old surtax, must now be paid. The wild lands tax is calculated at a rate of ten mills on the dollar, as compared with the old surtax of 6¼ cents an acre. The provincial government, therefore, may receive practically as large a sum as the rural municipalities. For example, on an assessment of $20 an acre on a quarter section, the wild land tax is $32, compared with the old surtax of $10. Some estimates place the sum which the Hudson Bay Co. will be called on to pay to the rural municipalities and the province as high as $1,500,000, but in the absence of up-to-date figures of the exact acreage of the Hudson Bay Co. in this province, a positive statement as to the amount involved cannot be made at present.

The history of the case is briefly as follows: In 1916 six rural municipalities brought six separate actions against the Hudson Bay Co., each for taxes levied in 1914 under the surtax provisions of the Rural Municipalities Act, being R.S.S. 1909, ch. 87, as amended by chapters 30 and 31 of the statutes of 1911-12, and chapter 46 of the statutes of 1913. On February 15, 1916, the Hudson Bay Co. obtained an order to consolidate the six actions and the case of Bratts Lake Rural Municipality *et al* was heard in the Supreme Court of Saskatchewan, and judgment given for the plaintiffs (the municipalities), on July 17, 1918. In the court of appeal of Saskatchewan the appeal of the Hudson Bay Co. was dismissed on December 21, 1918, before Chief Justice Sir F. W. G. Haultain and their honors Judges Newlands and Elwood, and the judgment of the lower court affirmed.

The Hudson Bay Co., the appellants, based their defence on three points. That the surtax was *ultra vires*, beyond the power of the province; that it was not validly imposed, and that even if it were validly imposed, it was not valid against the company because it contravened clause 11 of the deed of surrender of Rupert's Land from the company to the crown. Clause 11 provided that the company would not be liable to an exceptional tax, and the argument was advanced that the surtax was an exceptional tax.

The decision of the Saskatchewan courts was against the company on all three points and in affirming this decision and dismissing the appeal of the Hudson Bay Co., the Privy Council has finally settled the question of the power of the province to impose the surtax and affirmed the right of the municipalities and the province to collect the tax.

The six municipalities which brought the original action, with the acreage and amounts involved, are as follows:—

Name.	Acres.	Amount.
Bratts Lake	480	$ 30
Redburn	796	49.75
Abernethy	1,395	97.18
Craik	6,444	402.75
Chaplain	8,839	552.93
Nipawin	10,820	676.26

The St. John Valley Railway will be completed by the contractors so as to be handed over to the Dominion government for operation as part of the Canadian National Railways before August 1, the date which was set some time ago according to a statement made by Hon. W. F. Jones, president of the St. John and Quebec Railway Co. and representative of the New Brunswick government in the construction.

HOPEFUL OF SUCCESSFUL GATHERING

Alberta Congress Will Consider Opportunities Peculiar to Canadian West, and How Industry and Trade Should be Promoted

THAT the forthcoming Alberta-Canadian Industrial Congress, August 11-16, is assuming a phase of international importance, seems certain from the fact that already a large number of the chambers of commerce of the United States are planning on having delegations in attendance, as well as the city councils and municipalities themselves of many of the more important western cities. From as far east as Erie, Pa., and as far south as Florida, assurances are given that representation will be made at the congress, while from Minneapolis and other northern United States cities large delegations will come. From Minneapolis it is possible that a special train will be arranged, as very many of the industrial leaders of Minnesota are planning to be present.

A special representation is coming to the congress from Japan and this delegation will be accompanied by delegates from the Japanese Club of Seattle and a corresponding organization from San Francisco. It is possible that a Japanese speaker will be on the program for at least a brief address bearing on the relations between Japan on the one hand and the United States and Canada on the other.

A foreign trade commission to represent the western provinces of Canada, exclusively, is being urged by the Alberta, Canada, Industrial Development Association. The proposal was originated by Mayor M. A. Brown, of Medicine Hat, its president. It is based on the belief that only by a proper investigation of the foreign markets for western Canadian products can the west build up industry to its maximum. Such an investigation, it is explained by Mayor Brown, would deal specifically with those possible markets for Canadian products lying on and adjacent to Pacific Ocean routes of traffic and the undeveloped oriental marts. Mayor Brown holds to the belief that eventually western Canada will some day be manufacturing on a larger scale than eastern Canada because of the great potentialities in this connection in China and Japan as well as along the western coast of South America and in Australia.

"The world does not realize," Mr. Brown points out, "that one-seventh of the population of the globe is living and striving and working along the banks of one river alone in China. The possibility of the development of this wonderful market is just one aspect of the great trade which western Canada and the western portion of the United States will have the great opportunity to deal with. Great economists of the day, men with vision, see the development of the Pacific regions as the most striking aspect of the future of our continent. I may add that by Pacific regions, I include those inland empires such as our own, Alberta, Canada."

Support is being given the project for a western foreign trade commission, especially in Vancouver, B.C., Victoria, B.C., Seattle, Portland and other western cities more easterly, such as Winnipeg, Regina and Saskatoon. All these cities will be represented by good delegations at the forthcoming Industrial Congress. The principal or "educational" sessions of this congress will be held at Calgary, Canada, August 13 and 14. The industrial men of the continent are being asked to participate.

NEW WINNIPEG POWER PLANT

A new power project in Manitoba, known as the Winnipeg River Power Co., has been organized, and the $7,000,000 plant proposed will require three years for completion. The site of the development will be Bonnet Falls, 75 miles northeast of Winnipeg. This plant will have an ultimate capacity of 168,000 h.p., in six units of 28,000 h.p. each. This will exceed the combined output at present of the municipal plant at Point du Bois and that of the railway company at Pinawa Channel.

OUR POLICY

Our policy—except in cases where we are otherwise directed by the Will or trust instrument under which we act—is to practically confine our investments to first mortgages on improved real estate.

THE NEW BANKRUPTCY ACT

Provisions are Liberal to Honest Debtors—Amount Must be at Least $500—Not Retroactive

AFTER discussion in the Canadian parliament during two sessions and preliminary preparations extending over several years, a national bankruptcy act has now been passed in Canada. The organization chiefly responsible for urging this legislation is the Canadian Credit Men's Association. Several years ago the legislation committee of this association began an investigation and examined similar laws which have been in force in other commercial nations. As a consequence a bankruptcy bill was introduced in the House as a private measure during the 1918 session. It was found impossible, however, to get it through until the 1919 session. The more important features of the Act are as follows:—

General Provisions

First, it introduces uniformity in the legislation of Canada, something which has been needed for many years. The old assignment acts of the various provinces will become non-effective as soon as the Governor-General has proclaimed the new Act. This will be done when the general rules, which are now being drafted, are completed, which will be sometime about November.

Second, it provides that a creditor or several creditors together, knowing a debtor to be insolvent and unable to collect his account, and having a claim of $500, may apply to the courts to have the debtor adjudged a bankrupt. The whole circumstances of the case will be passed upon by a judge of such as have been constituted by the Act, courts of bankruptcy to carry out the provisions of the act. The court may dismiss the petition of the creditor, may stay the proceedings, or may grant an order, as the circumstances warrant. In the past, when a recalcitrant debtor has refused to make an assignment under the assignments acts, the only course the creditor had was to issue a writ, obtain judgment and issue execution; the result was that every creditor had to follow suit in order to protect his interest and the poor unfortunate debtor was loaded down with costs, the estate being distributed by the sheriff pro rata to those creditors only who had taken action.

Third, the Act provides for the discharge of an honest debtor who has turned over his assets for the benefit of his creditors, relieving him from a load of debt that he has been unable to pay. The Act provides that a debtor may make application to the court for a discharge from his liabilities; all persons interested in the case may appear before such court, and after hearing all of the evidence, the judge will decide whether the debtor shall receive his discharge, power being vested in the court to refuse the discharge absolutely, or it may suspend for a time the discharge, or it may grant a conditional discharge, say, until the debtor has paid 50 cents on the dollar, or by requiring the debtor to consent to judgment being entered against him for any balance owing at the date of the discharge, such balance to be paid out of future earnings or after acquired property. Some of the things that will militate against a debtor obtaining his discharge, are that his assets at the date of the assignment were not of a value equalling 50 cents on the dollar of the unsecured liabilities; that the debtor has omitted to keep proper books of account; that the debtor continued to trade after knowing he was insolvent; that the debtor has failed to account satisfactorily for loss of assets or deficiency of assets to meet his liabilities, or has brought on his bankruptcy by speculation or by unjustifiable extravagance in living or by gambling or by culpable neglect of business; that the bankrupt within three months of the assignment has given an undue preference to any of the creditors, or that he has been bankrupt before, or has been guilty of fraud, or fraudulent breach of trust. There will be no difficulty for an honest debtor who has turned over all of his assets to his creditors, to obtain his discharge; the Act is framed to protect such a debtor and to penalize the fraudulent one.

New Features

In addition to the three outstanding features enumerated above, there are a number of provisions that will be new to some of the provinces, such as:—

(a) Provision for ratifying compositions and compelling minority creditors to accept the ruling of the majority, the clause providing that a composition shall be binding when accepted at a meeting whether the majority in number of creditors who hold two-thirds of the amount of the proved debts resolve to accept the proposition, providing the same is approved by the court.

(b) Trustees in future shall be known as "authorized trustees," and shall be appointed by the Governor-General-in-Council. All authorized trustees must provide general bonds before acting as such and in addition shall provide special bonds in each estate unless relieved by vote of the creditors. The creditors may remove a trustee and substitute another.

(c) A debtor who has made an assignment shall be known as "an assignor"; a debtor who has been forced into bankruptcy by his creditors shall be known as "a bankrupt."

(d) Trustees shall have power to sell patented articles without being bound by any restrictions such as may apply to ordinary traders.

(e) A trustee may carry on the business of a debtor so far as may be necessary for the beneficial winding-up of the estate and may incur obligations and make advances for such purposes.

(f) No trustee shall deposit any sums received by him as trustee into his private banking account.

(g) All settlements made by debtors within one year previous to an assignment, except in good faith and for valuable consideration, shall be void as against the trustee, and shall be void within five years previous to such assignment, unless it can be shown that debtor was able to pay his debts in full without aid of the property assigned.

(h) All marriage contracts for the future payment of money to the wife, or husband, or children of the debtor where the debtor had not at the date of the marriage any estate or interest in the property assigned shall be postponed until all claims of other creditors have been satisfied unless the contract has been executed previous to the assignment and even if executed shall be void, if the payment or transfer were made within six months of the assignment.

(i) Assignments of book debts unless registered in accordance with provincial statute shall be void as against trustee.

(j) Fraudulent preferences given within three months preceding an assignment may be set aside.

(k) Banks must notify the trustee of the existence of any balances standing to the credit of the debtor.

(l) The Bankruptcy Act shall apply to insolvent corporations; these have hitherto been wound up under the Winding-Up Act.

(m) Trustees must pay dividends promptly, not later than six months and earlier if required by the inspectors and must declare a dividend when sufficient money is on hand to pay 10 per cent.

(n) Unclaimed dividends shall be deposited with the minister of finance.

(o) The remuneration of trustees is limited to 5 per cent. of the cash receipts.

(p) Inspectors' fees are done away with, only their out-of-pocket expenses being allowed.

(q) Unliquidated damages arising otherwise than by reason of a contract, promise or breach of trust shall not be provable.

(r) Secured creditors, in cases where the trustee elects to take over the security at the valuation placed upon it by the creditors, shall not be entitled, as heretofore, to an extra 10 per cent.

(s) Claims by husband or wife for wages, money or other property lent to the debtor, shall not be entitled to claim upon the estate until all of the creditors have been paid in full.

(t) Claims for wages, exceeding three months, by father, son, daughter, mother, brother, sister, uncle or aunt shall not be allowed until all other claims have been paid.

— Ask your dealer for samples and prices. —

(u) No officer, director, or shareholder of an insolvent corporation shall be entitled to claim for wages exceeding three months until all other claims have been paid.

(v) Rent is now preferred all over Canada only in an amount not exceeding the value of the distrainable assets and not exceeding three months accrued due prior to the assignment plus the cost of distress—if any.

(w) Accelerated rent under leases shall rank upon the estate as an ordinary creditor, but not more than for three months.

(x) Trustees may retain the lease or may disclaim same and may assign the lease or sublet the premises for the unexpired term.

(y) The debtor must attend the first meeting of his creditors for the purposes of examination and giving information.

(z) The debtor must give an inventory of his property, a list of his creditors and his debtors and do everything to assist the trustee in winding up the estate. If the debtor fails to perform the duties thus imposed upon him he shall be guilty of contempt of court and may be punished accordingly.

(aa) Barristers, solicitors or advocates of any court in any province may practice in the bankruptcy courts in any or all of the provinces.

(bb) An undischarged bankrupt may not obtain credit to the extent of $50 or upwards from any person without informing that person that he is an undischarged bankrupt, under penalty of a fine not exceeding $500, or one year's imprisonment or both, or if he enters into any business under a name other than that of which he was adjudicated a bankrupt without making such disclosure.

(cc) If a person having been adjudged a bankrupt and re-entering business fails to keep proper books of account, he shall be liable to a fine of $1,000 and to one year's imprisonment.

(dd) Proper books of account are defined for the first time as such books of account as are necessary to exhibit or explain the transactions and financial position of a trade or business, including a book containing entries from day to day in sufficient detail of all cash received and paid, as well as an account of all goods sold and purchased and statements of annual and other stocktaking.

(ee) A creditor who maliciously endeavors to force a debtor into bankruptcy shall be liable to a fine of $1,000, or two year's imprisonment, or both.

FINANCING EXPORT TRADE

The inadvisability of government credits for foreign orders was again emphasized by Mr. Lloyd Harris, chairman of the Canadian Mission in London, before returning to England a few days ago. He thinks that banking and financial interests can, with government co-operation, do the work more efficiently. "I believe," said Mr. Harris, "a central organization should be formed which would make the necessary advances. They would take, in return, the securities from foreign governments, and in this way the public could participate. Such a method of procedure would have the direct effect of stimulating exports through the natural interest which would be aroused there, and, secondly, through interesting our producers in markets to which our banks had extended credits. Such a union of banking and financial interests is being formed on a huge scale in the United States. I consider," Mr. Harris said, "that a capital of $300,000,000, if raised in this manner in Canada, would enable us to do trade up to perhaps five times this amount, if it was used as a kind of circulating credit. It is for the bankers, producers and manufacturers to get together. There are other things which Canada must do, especially the keeping up of the war-time standard, if possible, in exports of raw material and foodstuffs, but I want to impress on the Canadian people the importance of non-government credit. It is, I believe, the most urgent thing to be taken in hand if we are to retain and extend our facilities for international trade on which the future prosperity must largely depend."

INSURANCE IN MANITOBA IN 1917

Loss Ratio is 42.6 Per Cent.—Companies and Agents Licensed in 1918

THE superintendent of insurance for the province of Manitoba has issued his report on insurance business during the year 1917. The figures for 1918 are not yet completed. The statement of premiums and losses for all branches of the business is as follows:—

	Premiums.	Losses.
Fire and marine	$3,038,932	$1,692,257
Hail	290,189	76,967
Life	4,517,312	1,373,714
Life-matured endowments	....	227,397
Sickness and accident	248,974	108,981
Livestock	7,886	2,819
Automobile	137,118	30,879
Employers' liability	341,609	155,848
Guarantee	202,422	75,082
Plate glass	28,242	13,632
Burglary	7,074	2,447
Tornado	802	419
Other classes	48,216	18,478
Totals	$8,868,781	$3,779,326

At November 30th, 1918, there were forty-two licensed insurance companies doing business under the Manitoba Insurance Act, classified as follows:—

Fire insurance companies	3
Life insurance companies	4
Hail insurance companies	2
Plate glass insurance companies	1
Mutual fire insurance companies	6
Fraternal societies	25
Marine and automobile insurance companies	1
Total	42

During the year 1918, two companies, the Western Canada Accident and Guarantee Insurance Company, which went into liquidation, and the Industrial Fire Insurance Company, ceased doing business. Deposit withdrawals were also made by five companies. Two companies transferred from a provincial to a Dominion license.

At November 30th, 1918, there were one hundred and sixty-seven registered companies doing business under the Manitoba Insurance Act, classified as follows:—

Fire insurance companies	44
Fire and hail insurance companies	11
Fire and miscellaneous insurance companies	34
Fire and life insurance companies	6
Life insurance companies	33
Guarantee, accident, sickness and plate glass insurance companies	19
Registered mail insurance companies	1
Livestock insurance companies	1
Fraternal societies	9

Inland marine insurance companies	3
Plate glass insurance companies	4
Hail insurance companies	1
Total	167

During the year 1918 there were five insurance companies, two fire (automobile) inland transportation and hail insurance companies, and one accident and sickness insurance company admitted by Dominion license. On November 30th, there were 17 underwriters agencies doing business under the provincial act. Up to November 30th, agents' licenses were issued to the number of 4,439. The amounts of insurance fees collected totalled $45,228.

The Quebec Chamber of Commerce is now publishing a monthly bulletin similar in character to those issued by other leading trade organizations.

This Company, through its various departments, offers the facilities and services of a commercial bank, a trustee, a foreign exchange bank, and an investment institution.

Union Insurance Society of Canton

(A British Company) LIMITED

ESTABLISHED 1835

Report of the Annual General Meeting of Shareholders Held May 22nd, 1919.

The Annual General Meeting of Shareholders of this Society was held May 22nd, 1919. HON. S. H. DODWELL occupied the chair. After the reading of the notice convening the meeting, the Chairman addressed the Shareholders. From which address the following extracts are taken:—

Turning to 1918, you will notice that the premium income is greater than that of the previous year, which is satisfactory, especially if you take into consideration the effect of the increased restrictions on exports and imports and the falling of the rates for war risk to a nominal figure upon the cessation of hostilities. A congestion of values in individual steamers continued, and the increased employment of inferior vessels brought new complications, frequently calling for material reductions in our retained lines. The percentage of losses on the first year's working shows a gratifying decrease, and we have no reason to believe that the final outturn will compare unfavorably with the preceding year.

The increase in our premium income during recent years has been due largely to war risk business, the hazardous nature of which has been emphasized to an exceptional degree. You will be able to gain some idea of the magnitude and anxiety of our operations when I tell you that we have paid out in actual cash over twenty million dollars on war risk claims alone.

The figures for fire and other classes of insurance now transacted by the Society are, of course, included, but this branch of our business is in its childhood. Its development is proceeding upon satisfactory lines and your management feel justified in awaiting with confidence its gradual growth to robust maturity.

There are very few places of importance where you will not find a representative of the Society or of its affiliated companies, and the organization we have built up should enable us to take full advantage of the opportunities which will be offering. It does not necessarily follow, however, that a prosperous condition of trade generally will react beneficially on the business of marine insurance. The past few years have seen the formation of many new companies, and we have to be prepared not only for a reduced premium income due to what is practically a cessation of war risk business but for keen competition from new comers and other insurance companies who, although long-established, have lately increased their activities to the marine side of the business. The demand for marine insurance facilities should, nevertheless, be large enough for all to trade in friendly rivalry without having recourse to a wild and senseless scramble for premium at unremunerative rates. Whatever the future may bring, the widespread nature of our business forms a safeguard against isolated disasters, and a continued consolidation of our position enables us to face their possibility with increased equanimity.

You are aware, gentlemen, that the Society compares not unfavorably with the largest institutions of its kind in the world, and it must be a source of pride and satisfaction to you, as it is to us, to feel that this enormous machine has been built up from this small, though all-important, outpost of the British Empire and has been controlled from here ever since the Island became a British possession. The success of that control is, I think, well illustrated by the figures which have periodically come before you.

Principal may be registered. Denominations: $100, $500 and $1,000. Redeemable as a whole or in part on July 1st, 1921, or on any interest date thereafter on three months notice, at 105 and accrued interest. Trustee: The Eastern Trust Company. Subject to Legal Opinion of Davidson, Wainwright and Alexander; Brown, Montgomery and McMichael.

CAPITALIZATION

	Authorized	Issued
Common Stock	**$3,000,000**	**$2,000,000**
1st Mortgage 7% Bonds	**2,000,000**	**1,000,000**

The following information is summarised from a letter to the undersigned from Mr. T. H. Rieder, the President of the Company:—

1. Ames Holden McCready, Limited, which guarantees payment of the principal and interest of these bonds, has, after provision for all of its own bonds and debentures, net assets (exclusive of good-will) applicable to the guarantee of over.. $3,000,000
(or three times the amount of this issue)

2. Average net earnings of Ames Holden McCready Limited, after maintenance, renewals, depreciation and interest on the present outstanding bonds, for the seven years ending April 30th, 1919, amount to $172,000
(or about 2½ times the bond interest on this issue)
For three years ending April 30th, 1919 .... $283,239
(or four times the bond interest on this issue)
For the current year ending April 30th, 1919 .... $323,321
(or over 4½ times the bond interest on this issue)

3. Estimated net earnings of the Ames Holden Tire Company:—
for the year ending December 31st, 1920 .... $170,000
for the year ending December 31st, 1921 .... $300,000
for the year ending December 31st, 1922 .... $500,000

4. Mr. T. H. Rieder, President of the Company, who has until lately been President of the Canadian Consolidated Rubber Company, Limited, has had over twenty years actual experience in the rubber business, and is regarded as the highest authority in that business in Canada. This insures the most capable and experienced management obtainable.

5. The marketing of the product will be handled by the Ames Holden McCready, Limited, sales organizations, which extends from coast to coast, and is organized to give the new product distribution throughout the Dominion.

6. Sinking Fund commencing July, 1921, provides sufficient funds to retire the whole issue by maturity.

Having sold the greater part of this issue the undersigned offer the unsold balance at the

Price 100 and accrued Interest, yielding 7%

also carrying a 20% bonus of Common Stock.

PRELIMINARY FIGURES OF BANQUE PROVINCIALE

Preliminary figures of the Banque Provinciale du Canada for the eighteen months which came to an end on June 30th, last, indicate that the period which will be covered by the forthcoming annual statement will be a record one for this French-Canadian organization. Net profits for the period amounted to $434,594 as compared with $207,000 in the previous twelve months, which would be equal to approximately $310,500 for eighteen months, or showing an increase in favor of the period just concluded of, roughly, $124,000, or equivalent to the sum that was paid out by the bank in dividends to shareholders in the period. The sum of $250,000 was transferred to reserve fund which has now reached $1,000,000, or equivalent to 50 per cent. of the paid-up capital of $2,000,000. Assets have reached $31,693,000, an increase of $10,000,000 over the previous statement. Total obligations to the public, savings and commercial deposits, etc., amount to $28,594,000, and quick assets to $22,535,000, which amount about equals the bank's deposits due to the public. Quick assets are composed of Dominion government, British and foreign securities of an amount of over $8,200,000, and call and short loans in Canada of over $4,240,000, while cash resources exceed $8,200,000. The annual meeting has been called for August 13th.

Internal Trade Division, Dominion Bureau of Statistics

EMPLOYMENT FOR LAST WEEK OF JUNE

The Employment Service of the Department of Labor announces that during the week ending June 28th, the 88 officers reported that 6,555 persons were referred to positions and that 5,714 had received regular employment. This is the highest placement figure yet recorded, and represents an increase of 209 over the preceding week, when the regular placements totalled 5,505. In addition, 539 casual jobs were supplied as compared with 473 the previous week.

During the week 7,297 applicants were registered, of whom 531 were women and 6,766 were men. The number of vacancies notified by employers totalled 7,421, of which 1,280 were for women, and 6,141 for men. Of the placements in regular employment 533, or 9.32 per cent. were women, and 5,181, or 90.5 per cent. were men. The number of soldiers reported placed was 2,341, or 42.5 per cent. of the total.

Of the regular placements 31 were reported by Prince Edward Island, or a decrease of 6 as compared with the preceding week; 218 by Nova Scotia, an increase of 13; 244 by New Brunswick, a decrease of 30; 401 by Quebec, a decrease of 76; 2,062 by Ontario, a decrease of 231; 791 by Manitoba, an increase of 366; 740 by Saskatchewan, an increase of 102; 565 by Alberta, an increase of 19; and 662 by British Columbia, an increase of 52.

$1,000,000

Three Year 7 Per Cent.

Coupon Gold Notes

DATED 1st JUNE, 1919. DUE 1st JUNE, 1922

DENOMINATIONS: $500, $1,000

WHERE PAYABLE:—Principal and interest payable in Gold Coin at the option of the Bearer (or Registered Holder) at the Canadian Bank of Commerce, Halifax or Montreal, or at the agency of the Canadian Bank of Commerce, New York City. Interest Coupons payable 1st June and 1st December.

PRICE: Par and Accrued Interest to Yield 7%

GENERAL INFORMATION

(Furnished by the President of the Company)

OPERATIONS:—The Company owns and operates all the Street Railway, Electric Light, Power, and Gas properties in Halifax, and also operates the Commercial Lighting and Power business in Dartmouth. It acquired on its incorporation all the business assets and franchises of the Halifax Electric Tramway Company, and the enterprise has been in continuous and successful operation for over 24 years.

PURPOSE OF ISSUE:—To provide additional rolling stock, extensions and improvements in the present track layout, and an improved car service, together with gas plant and gas main extensions and additional boiler capacity. All of these items of capital expenditure are rendered necessary by the rapid and continuous growth of Halifax.

SECURITY:—The present issue of Coupon Gold Notes is a direct obligation upon the Company, and ranks senior to the $2,078,800 6% Preferred Stock and $2,510,000 Common Stock. No Mortgage Bonds or Debentures (except the First Mortgage Bonds) may be issued unless the Coupon Gold Notes are secured in the same manner as such new issue.

EARNINGS:—The growth of the Company's business for the past five years has been consistent, as will be seen from the following figures:—

Gross	Earnings	1914	$ 645,241.00
"	"	1915	718,840.00
"	"	1916	759,726.00
"	"	1917	859,667.00
"	"	1918	998,702.00
"	"	*1919	1,325,500.00

*On basis of earnings ascertained to date.

MANAGEMENT:—Has recently been entrusted to Messrs. Stone & Webster, of Boston, Mass. This firm is well and favorably known throughout the United States, where they manage and operate over forty companies doing a similar business. The Company is, therefore, assured of efficient management by men who have made a special study of similar organizations. Too much importance cannot be given to this feature of the Company's affairs.

We make this offering subject in all cases to previous sale and change in price. Orders may be wired at our expense and Coupon Gold Notes or Registered Interim Receipts will be delivered free of charge at any Bank or Trust Company.

The foregoing statements and figures are based upon information obtained from reliable sources, and which, while in no way guaranteed, are correct, to the best of our knowledge, and furnish the basis upon which we have purchased the above issue.

RECENT SASKATCHEWAN MUNICIPAL LEGISLATION

Relief to Men on Military Service—Hospital Financing—Town Planning and Rural Development Act

IN addressing the Union of Saskatchewan Municipalities convention, Mr. J. J. Smith, Deputy Minister of Municipal Affairs, reviewed recent legislation of interest to the delegates. He said in part:—

"One of the matters in which an organization such as this must naturally have a deep interest, is the matter of new legislation. Perhaps a few words of reference to some of the more recent changes in the Acts which directly concern the members of the union would not be out of place at this time. Since the outbreak of the war in 1914, considerable legislation, designed to protect the men who were fighting the nation's battles, has been enacted. In the year 1917, you will remember the village, town and city Acts were amended to provide that the home of the soldier should be wholly exempt from taxation in villages, and to the extent of fifty dollars per annum in towns and cities. This exemption covered the period between the first day of the year in which the soldier enlisted and the year following the conclusion of the war, or the discharge of the soldier, whichever should first take place. At the last session of the legislature these Acts were further amended to provide that the said exemption should extend until the year following the discharge of the soldier without regard to when the war might end, provided that the said exemption shall not extend beyond the year 1920. No argument in support of legislation such as this need be advanced before the members of an association that has taken the deep interest in the welfare of the soldier shown by the Union of Saskatchewan Municipalities. Somewhat wider in its application is the provision in the Volunteers and Reservists Relief Act relating to the sale for taxes of land belonging to a soldier, As you are aware, this Act was amended at the second session of the legislature in 1917, to provide that property belonging to a soldier and not exempt from taxation in whole or in part as being his home, should not be sold for taxes. At the last session this provision was made retroactive and the protection of the land of a soldier from sale for taxes was extended to cover the period between the first day of the year in which the solider enlisted and the expiration of two years from the date of his discharge, provided that such protection shall not extend beyond December, 31st, 1920. Under this amendment, where any property belonging to a soldier has been sold by a municipality and is now subject to redemption, the council is required to redeem the land and restore it to its former position. This provision may impose some slight burden upon some of the larger urban municipalities, but it is a burden which, I am sure, the taxpayers as a whole will cheerfully bear.

Municipal Council's Power Increased

"A change in the law of considerable interest to all the members of the union, but which directly affects villages and rural municipalities only, is that providing for the making of quarterly payments by the village and the rural municipality to any village school district situated wholly or in part within their boundaries. This arrangement is the same as that already provided for in the case of rural municipalities and rural school districts. The new provision does not apply to arrears of taxes levied prior to the year 1919. These will be paid over to the school district as collected. To enable the municipality to make these quarterly payments, the power to borrow on the credit of the school taxes has been taken from the board of trustees of the village school district and given to the council of the village and the council of the rural municipality. I have no doubt these changes in the law will operate to the advantage of both the municipalities and the school districts and I trust the time is not far distant when the law affecting towns and cities will be similarly amended.

"One of the problems that has for some time been the cause of much concern on the part of the people of the province, particularly those residing in outlying districts, has

GUARDIAN

Assurance Company

Limited

Head Office, 11 Lombard St., London, E.C.

Established by Deed of Settlement in 1821, and Registered under the Joint Stock Companies Acts in 1893.

The Annual Meeting of this Company was held Wednesday, May 28th, 1919, when the Directors' Report for the year ending December 31, 1918, was presented.

Fire Department

The Fire Premiums, after deducting re-insurances, amounted to **$3,962,349,** as against $3,818,905 in 1917, showing an increase of $143,444, and the Net Losses to **$1,701,390** (42.94 per cent. of the premiums), as against $1,658,040 in 1917.

The Expenses of Management, including Fire Brigade Charges and Commission together amounted to $1,357,112, being 34.25 per cent. of the premiums.

Life Department

The total **Number of Policies** in force on 31st December last was 16,561, assuring, with Bonuses, **$57,804,996.** Of this sum $7,211,771 was re-assured with other Offices, thus reducing the ultimate liability of the Company to $50,593,225.

BERTRAM E. HARDS - Assistant Manager

been that of adequate hospital accommodation. With a view to providing a solution of this serious problem, the legislature in 1916, passed The Hospital Act. This Act provided that any two or more contiguous municipalities might co-operate in establishing a union hospital. Owing to local obstacles, advantage to the extent desired was not taken of the provisions of the Act. With a view to overcoming these obstacles the Act was amended from time to time and at the last session of the legislature provision was made for an optional scheme under which hospital districts may be formed without regard to municipal boundaries. Under these new provisions the Lieutenant-Governor-in-Council may define and establish a hospital district upon receipt of a petition from the council of each municipality concerned, or from twenty-five ratepayers in each municipality or area to be included in the proposed district, or from the councils of some of the municipalities and twenty-five ratepayers of each of the other municipalities. The point at which the hospital is to be located, and the number of representatives who shall form the hospital board from each municipality or part of a municipality, shall also be determined by the Lieutenant-Governor-in-Council; but the particular representatives themselves will be named by the councils of the municipalities concerned. The hospital board shall then prepare a statement showing in detail the estimated cost of the hospital and submit same to the local government board for approval. Upon receipt of a report showing that this approval has been granted, the Minister of Municipal Affairs shall fix a date for taking a vote upon the suggested scheme and shall also appoint a returning officer who in turn will fix the polling subdivisions, determine the locations of the polling places and name the deputy returning officers. Before the hospital scheme can be proceeded with it must be approved by two-thirds of those voting upon the question. Already steps have been taken by the councils and ratepayers of a number of municipalities looking to the establishment of hospital districts, and there is every prospect that a number of new hospital districts will come into existence in the near future.

Referring to the town planning movement, Mr. Smith said:—

"During the past few years an increasing interest in the subject has been taken in Canada and several of the provinces have passed advanced town planning legislation. In December, 1917, the legislature of Saskatchewan passed the Town Planning and Rural Development Act. During the past few months active work under the provisions of this Act has been undertaken. Regulations and rules governing the procedure under the said Act have been prepared and approved by the minister. These regulations are being printed for distribution to the local authorities, and anyone interested therein may receive copies by applying to the Director of Town Planning, Department of Municipal Affairs. Until the municipality has adopted regulations, the department will have charge of the approval of new development under regulations approved by the minister. It is the desire of the department, however, that the municipalities shall take full advantage of the powers conferred upon them by the Town Planning and Rural Development Act. Mr. M. B. Weekes, Director of Surveys, has been appointed Director of Town Planning, and Mr. W. A. Begg, formerly townsite engineer for the department of highways, has been appointed town planning engineer, and the services of both these officials will be available to local authorities to assist and advise in the preparation of schemes and development by-laws."

It is stated in Fort William, Ont., that eighteen million dollars of capital expenditure will shortly be made at the Canadian head of the Great Lakes.

Mr. J. Griffith, liquidator of the Sherbrooke Footwear Company, Limited, Sherbrooke, Que., is offering the company's factory and real estate in Sherbrooke for sale. The real estate is subject to a mortgage in favor of the city for $15,000. The materials and goods in the process of manufacture are to be sold separately, subject to the rights and claims of the Canadian Bank of Commerce.

THE STREET RAILWAY SITUATION

Many Cities in Ontario Suffer Temporary Tie-Up in Service —Toronto Road Back in Company's Hands

WHILE industrial concerns have generally been improving their financial position during the war period, street railway companies in Canada have practically all been severely hit by the increased costs of operation. They are unable to increase the price of their service. This development has culminated in a critical way in many of the important cities. Some months ago, Winnipeg was having difficulty in adjusting its fares to suit the demands upon the revenue.

On June 22nd, the employees of the Toronto Street Railway Co., to the number of about 2,000 went on strike for a wage increase, refusing to wait for the action of a board of conciliation which had been appointed. This strike lasted until Friday, July 4th. In the meantime, the Ontario Railway and Municipal Board had ordered the company to operate and when this order was not complied with, the board took over the system and appointed Mr. R. C. Harris, commissioner of works for the city of Toronto, manager. On June 30th, the Board of Conciliation made an interim report, granting practically all the demands of the employees, suggesting that a five-cent fare be collected in place of the present fares ranging from three to four cents. The Railway Board, through the new manager, made a temporary offer to the employees. This was refused, but an offer of better terms, made on July 3rd, resulted in the operation of the cars on July 4th. The company has since agreed to the terms of the Conciliation Board and the railway is again under the management of Mr. R. J. Fleming. In an official statement issued on July 9th, the chairman of the Ontario Railway Board says:—

"Mr. R. J. Fleming, representing the directors of the company, elected by the shareholders, on the evening of July 4, advised the Railway Board that the aforesaid directors were desirous of regaining control of the company's affairs and service, which the board agree to restore upon the company agreeing to observe the terms of the interim award of the Conciliation Board, as to wages and hours and days of labor, with the further stipulation that such observance is to continue for the period ending June 16, 1920, and irrespective of the gross revenues of the company. The directors, under seal of the company, authorized Mr. Fleming to act in their behalf. This morning the requisite written undertaking, as approved by the board's counsel, Mr. I. F. Hellmuth, K.C., was deposited with the board, whereupon we relinquished possession of the company, having accomplished the resumption of the street railway service, the purpose for which we took possession of the railway."

In Montreal, the tramways commission is also finding it necessary to secure a greatly increased revenue for the fiscal year ended on June 30th, and an additional $1,300,000 will be required for the coming year as a result of an increase in the wage bill which went into force on July 1st. It is possible that the service will be to some extent curtailed in order to reduce expenses.

The Waterloo-Wellington Railway, running between Kitchener and Bridgeport, is not giving satisfactory service, according to some reports from Kitchener, and the city may take it over. This question was considered at a meeting of the city council held on July 7th.

Following upon the failure of the Ontario Hydro-Electric Commission to reach an arrangement to purchase the Sandwich, Windsor and Amherstburg Railway, the citizens, on July 5th, defeated the by-law to grant a straight five-cent fare. The vote was three to one against the fare increase indicating a distinct hostility of public opinion among the citizens. The result was another tie up in the city traffic, as the company's finances do not permit the granting of the demands made by the employees.

A street railway strike also tied up the service in London, Ont., for a few days previous to July 5th. An agreement was reached, providing for a wage increase, contingent upon the company securing higher fares.

LETTER TO THE EDITOR

Sir,—In these unsettled times when so many able men are using all their endeavours to assist the course of events into smoother channels, and when all ideas which have for their object the betterment of social and economic conditions are being eagerly turned over in search of help, it is to be regretted that such misleading statements should receive the publicity which has been given them by *The Monetary Times* of June 27th, under the heading of "Single Tax in Theory and Practice," by Mr. J. Hamilton Ferns.

Mr. Ferns says: "To sum up: the single tax theory, when put into practice, has failed to abolish or in any way check land speculation; it has not lowered rents; it has not been instrumental in giving permanent employment to all willing to work; it has not increased wages; it has not lowered the cost of living; nor has it abolished poverty. Like many other plausible theories, 'it has been weighed in the balance and found wanting.'"

If Mr. Ferns had really carefully read Henry George's book entitled "Progress and Poverty," he would not have been guilty of the above misstatements, because he would have realized that in order to put into practice Henry George's theory of taxation, it would be necessary, among other things, to abolish all tariffs. Mr. Ferns condemns the single tax theory, principally because he claims it has been tried out in parts of Western Canada and has not been a success. As Canada has not been a free trade country during the periods referred to by Mr. Ferns, it is plain that the single tax theory has never been put into practice in Canada.

As a matter of actual fact, the theory of single tax has never yet been put into actual practice in any country, and neither Mr. Ferns nor any other man can claim with truth that it has proven a failure. It may yet prove that Henry George's theory of taxation can be used to advantage in the readjustment of affairs that is now taking place all the world over, and for that reason alone it is to be regretted that any premature condemnation of an untried idea should be given such publicity.

We have just gone through a long period of destruction and we face a constructive period, therefore our thinking should be along constructive and not destructive lines. Let us criticize by all means, but let us be sure that our criticism is honest and founded on facts, as only in this way shall we assist in the constructive period before us and not destroy that which might be of assistance to us.

W. W. BERRIDGE.

Edmonton, Alta., July 8th, 1919.

GUARDIAN ASSURANCE COMPANY, LIMITED

In its encouraging annual statement for the year 1918, the Guardian Assurance Co., Ltd., of London, England, reports new life business completed to the amount of over $5,000,000, an increase of about 60 per cent., compared with last year. Claims in the life department were just about the same as in 1917. The total number of policies in force on December 31st, was 16,561, for the amount of $57,805,000. The funds of the life department on the same date, including investment reserve fund of $985,000, amounted to $19,711,150.

The net premiums in the fire department amounted to $3,962,345, compared with $3,818,905 last year, and net losses were $1,701,390, an increase of about $50,000. The expenses of management were $1,357,110, or 34.25 per cent., compared with 35.42 per cent. last year. The accident, burglary and general assurance department showed substantial increases, net losses being 40.14 per cent., as compared with 37.31 per cent. in 1917. Expenses of management were 42.41 per cent., while last year they were 41.62 per cent. In the marine department the results were very profitable.

MAY INDEX NUMBER IS HIGHER

The slight recession which took place in prices during the first few months after the armistice has not continued in April or May. Price levels in Canada, as indicated by the Department of Labor index number, are higher than ever before. As will be seen from the table below, however, the May increase is largely accounted for by farm products, especially grains and leather.

(DEPARTMENT OF LABOUR FIGURES)	No. of Commodities	Index Numbers

CALGARY LIFE INSURANCE CONVENTION

A tentative program for the 1919 convention of the Life Underwriters' Association of Canada, to be held in Calgary in August, is announced in the July issue of the Life Underwriters' News. Among the topics are the following: "Our Beneficiary Laws Up to Date," Mr. Chas. Ruby, Mutual Life; "The Magnitude of Life Insurance," Mr. W. Lyle Reid, Ottawa; "Life Insurance as a Credit Factor," Mr. Frank Pike, Edmonton, Alberta; "The Place of Insurance in Modern Business and Domestic Economy," "How the Association Serves the Agent, and Ways Yet Undeveloped to Make the Same More Attractive and interesting," Mr. J. B. Warnicker, Victoria, B.C.; "Business Insurance," Mr. Wm. May, Jr., Toronto, Ontario; "Group Insurance," Mr. G. Powell Hamilton, Guelph; "Blood Pressure, and Other Points upon which an Understanding between the Local Examiner, the Agent and the Medical Referee is Desirable," Dr. T. F. McMahon, Toronto; "Insurance for Women," Mrs. Clara Glover Power, Winnipeg; "The American Life Underwriter," Mr. J. K. Voshell, President N.A.L.U.; "Indiscriminate Issue of Agents' Licenses," Mr. W. B. Burrill; "Salesmanship," Mr. George Hunt, Toronto; "Systematic Canvassing," David Lauer, Montreal; "Advertising," Hon. Sam. Latta, Minister of Highways, Saskatchewan; "Income Insurance Versus Insurance payable in Lump Sum."

Fournier, T. Robitaille, J. P. Grimard. Aquila, Ltd., $50,000; E. Duckett, G. Meroz, R. R. Elliot. Pure Cane Molasses Co. of Canada, Lt., $250,000; H. Weinfield, M. M. Sperber, L. Levine. Montreal Hippodrome Co., Ltd., $1,100,000; G. Beaulieu, R. Brodeur, Y. Ducharme. Lyster Realty Co., Ltd., $100,000; F. Breadon, F. G. Bush, H. W. Jackson.

NORTHERN ASSURANCE COMPANY, LIMITED

During the year 1918 the business of the Northern Assurance Co. and affiliated companies was considerably extended. All of the shares of the Provident Accident and Guaranty Co. were acquired, and practically all of the shares of the Indemnity Mutual Marine Assurance Co., other companies connected with the Northern Assurance are the White Cross Insurance Association, the National Guarantee and Suretyship Association and the Royal Scottish Insurance Co.

In the fire department net premiums showed an increase of about $1,000,000, compared with 1917 and a surplus of $1,500,000 was carried to profit and loss. The loss ratio for the year was 43.6 per cent. and the expense ratio was 34.8 per cent., a reduction as compared with last year. In the accident and general department, the net premium income was over $2,000,000 and over $500,009 was carried to profit and loss. The marine department was particularly successful, about 70 per cent. of the net premiums remaining as surplus after paying all losses and expenses. In the life department 1,101 new policies were issued which is the largest amount of new business transacted in the company's history.

The profit and loss account shows a total of $5,500,000, and the balance carried forward is more than double the amount brought forward from last year.

SEEK WINDING UP OF DOVERCOURT LAND CO.

A petition for the winding up of the Dovercourt Land Co., Toronto, has been lodged by the trustees of the John Arnold McKee estate, Donald M. Waters, of Belleville; W. D. Ross and Mrs. C. A. McKee, of Toronto. They allege that the company is indebted to the estate to the extent of $113,640, and that it has assigned to the Standard Reliance Mortgage Corporation the bulk of its assets without obtaining the consent of its creditors or satisfying their claims.

The accompanying material shows that the company was incorporated in 1885, and has an authorized capital stock of 500,000. The shares subscribed number 8,190, on which there is paid up $409,500. The Standard Reliance Mortgage Corporation is the holder of 6,324 shares. According to a statement prepared by G. T. Clarkson, there is a nominal deficiency of $2,518,768.07 in the latter company.

TAXATION OF PROPERTY OUTSIDE PROVINCE

On June 28th, the Quebec Court of Appeal rendered an important decision to the effect that any attempt to levy tax on property locally situate outside the province is not "taxation within the province," and is beyond the competence of a provincial legislature. The case was Barthe *et al* vs. Alleyn, on appeal from the Superior Court. Barthe is the collector of the successions tax in Quebec, and he claimed, through the court, a certain tax on property that was owned by the heirs of the late Hon. John Sharples, in the province of Ontario. This claim was contested on the ground that Quebec could not impose taxes on property owned in other provinces, but the decision of the Superior Court was in favor of the province.

The decision of the Court of Appeal, reversing that of the Superior Court, is based on the consideration "that the taxation of transmissions within the province of property locally situate outside the province is an attempt to do indirectly that which the legislature is forbidden to do directly, and is in effect taxation of property not within the province."

WEEKLY BANK CLEARINGS

The following are the bank clearings for the week ended July 10th, 1919, compared with the corresponding week last year:—

	Week ended July 10, '19.	Week ended July 12, '18.		Changes.

"SOLID AS THE CONTINENT"
HEAD OFFICE - TORONTO

WHY THE "MUTUAL LIFE OF CANADA" IS SO POPULAR

The Mutual placed upon its books in the first five months of 1919 100% more business than in the corresponding months of 1918. The wonderful war-record of the Mutual Life and the prompt payment of the many unexpected claims during the recent epidemic—these have proved the value of the institution. The Mutual, moreover, is in a peculiar sense a people's company, being in its control democratic, in its economy strictly co-operative. This means that the system is in line with the "spirit of the age," and so the people naturally turn to the Mutual. The record of the Company for nearly half a century has been one of increasing beneficence, and an ever-growing number of gratified policyholders help on the good work of the agents. As a result, there probably is not a more prosperous group of workers in Canada to-day than the representatives of our Company.

"Be a Mutualist."

The Mutual Life Assurance Co. of Canada
Waterloo Ontario

When a man insures his life he does well. When he insures his PURPOSE he does better. A man ordinarily takes insurance to protect his family. When he sees to it that the Policy is drawn to most surely effectuate that purpose, he renders his family the soundest possible service.

That implies benefit in the form of an INCOME, the most valuable type of protection.

Dominion Reduction Co., 65,000; Hudson Bay Co., 64,416; McKinley-Darragh Silver Mine, 167,132; Mining Corporation of Canada, 371,377; Buffalo Mine, 363,665; La Rose, 161,532; Coniagas, 153,394. Total, 1,346,519.

The total since January 1st is 14,285,154 pounds, or 7,142.5 tons.

Paper is the medium of Banking and Finance

Insist on Canadian-Made Paper

The Best Papers are MADE IN CANADA

You know what a vital part paper plays in your business. It is part of every transaction that is made, and it goes forth as your representative.

QUALITY, then, is imperative, and that alone should cause you to INSIST on a genuine Made-in-Canada paper for your Stationery, Certificates, Ledgers, and Booklets.

Beyond that fact, it is, of course, a prime duty to support Made-in-Canada goods, and if those with whom you do business look for the watermark on your stationery and find you are using foreign-made paper, you lay yourself open to a breach of good faith—with no possible chance to defend yourself.

Use the best paper that can be bought for each purpose. Canadian paper makers maintain the highest standards and their products should be bought in preference to all others.

Dictate a line to a stenographer to-day to send for a copy of the booklet "Some Facts About the Pulp and Paper Industry of Canada."

GOVERNMENT AND MUNICIPAL BONDS

Feature of the Week is the Rise in Price of New York Loan, which is Reflected in Strength of War Bonds Here

THE war loan bonds, which were being traded in in the Canadian market, and which sagged in price following upon the announcement that the $75,000,000 loan would be floated in New York on a 5.90 per cent. basis, revived considerably this week. The New York loan itself was substantially over-subscribed and has advanced to a premium. It is estimated that subscriptions to the amount of about $10,000,000 were received from Canada. The terms of the allotment were as follows:—

Two-year notes.—$1,000 to $5,000, inclusive, in full; $6,000 to $9,000, inclusive, 75 per cent., minimum, $5,000; $10,000 to $20,000, inclusive, 50 per cent., minimum, $7,000; $20,000 and up, 35 per cent., minimum, $10,000.

Ten-year bonds.—$100 to $10,000, inclusive, in full; $10,000 to $25,000, inclusive, 70 per cent., minimum, $10,000; $25,000 to $100,000, inclusive, 50 per cent., minimum, $18,000; $100,000 and up, 35 per cent., minimum, $50,000.

The following quotations of active bonds are supplied by the National City Co., Ltd., and are in New York funds:—

	Bid.	Offered.
Anglo-French 5% (Oct. 15, 1920)	97⅛	97⅜
United Kingdom 5½% (Nov. 1, 1919)..	99¹³⁄₁₆	99¹⁵⁄₁₆
United Kingdom 5½% (Nov. 1, 1921)..	98⅞	99⅛
United Kingdom 5½% (Feb. 1, 1937)...	97½	98
Canadian Pacific 6% (Mar. 2, 1924)....	100½	101
City Paris 6% (Oct. 15, 1921).........	97¼	97½
Dominion Canada 5% (Aug. 1, 1919)...	99¹⁵⁄₁₆	100
Russian Govt. Ext. 5½% (Dec. 1, 1921)	51	53
Russian Govt. Ext. 6½% (July 10, 1919)	58	60
Swedish Govt. 6% (June 15, 1939).....	99⅜	99⅝
Dominion Canada 5½% (Aug. 1, 1921)..	99½	99⅞
Dominion Canada 5½% (Aug. 1, 1929)..	97⅝	97⅞

The following is a list of debentures offered for sale, of which particulars appear in this or previous issues of *The Monetary Times*:—

Borrower.	Amount.	Rate %.	Maturity.	Tenders close.
New Glasgow, N.S.	$ 55,000	5½	15-years	July 19
Listowel, Ont. ...	18,000	5	20-instal.	July 19
Glace Bay, N.S. ...	6,000	5	10-instal.	July 21
Saskatoon, Sask. ..	238,377	5 & 5½	Various	July 21
Alberta School Districts	24,900	6½	Various	July 24
North Bay, Ont. ..	52,500	6	20-instal.	Aug. 2
Charlottenburgh Tp., Ont.	30,000	5½	20-instal.	Aug. 4
Medicine Hat, Alta.	132,253	5 & 6	Various	Aug. 9
Lancaster Tp., Ont.	100,000	5½	25-years	Aug. 15

Red Deer, Alta.—No tenders were received for the issue of $90,000 6 per cent. 10-instalment bonds which were offered for sale up to July 10th.

Graysville School District, Man.—J. A. Thompson and Co., Winnipeg, have purchased an issue of $30,000 6¼ per cent. 20-year debentures of the district.

Oakner Consolidated School District, Man.—J. A. Thompson and Co., Winnipeg, have purchased an issue of $25,000 6½ per cent. 20-year debentures of the district.

Calgary, Alta.—Treasury notes to the amount of $1,500,000, sold early in June to Spitzer, Rorick and Co., are to be delivered in New York by Mayor Marshal within the next few weeks.

North Bay, Ont.—The town is asking for tenders up to August 2nd for three bond issues of $25,640.75, $21,000 and $5,859.25, respectively, all bearing interest at 6 per cent., repayable in twenty annual instalments. An official notice is given elsewhere in this issue.

St. Vital Rural Municipality Man.—The by-law to authorize the borrowing of $100,000 was defeated by a large majority when it was submitted to the ratepayers on July 2nd. The municipality will, however, shortly issue $25,000 of debentures for the installation of plumbing.

Sherbrooke, Que.—The city has decided not to accept the bid of Hanson Brothers, Montreal, for the $142,500 issue of 5 per cent. 20-year bonds, tenders for which closed on July 2nd. This bid was 93.71, or about 5½ per cent. New tenders will be invited for the same bonds, it is understood.

Alberta.—The provincial government has decided to postpone until fall the loan which was authorized at the recent session of the legislature to a total of $4,000,000. The provincial treasurer, Hon. C. R. Mitchell, anticipates that conditions will then be more favorable for making the issue.

Calgary, Alta.—It is quite possible that the Provincial Public Utilities Commission will not sanction the capital expenditures proposed for this year. The commission considers that the three-quarter mill allowed in the city estimates for shrinkage in assessments and tax collections is not sufficient.

Collingwood, Ont.—On July 14th a by-law submitted to a vote of the ratepayers was passed authorizing that financial assistance to the amount of $3,500 per annum for ten years be given to the Kennedy Company. The company will employ several hundred men, and agrees to contract for a minimum of 600 horse-power of hydro-electric current.

Vermilion, Alta.—The following is a list of the tenders received for the issue of $6,000 7 per cent. 20-year bonds awarded on June 9th, to C. H. Burgess and Co., of Toronto:—

Macneill, Graham and Co.	$6,121.80
Brent, Noxon and Co.	6,136.00
W. L. McKinnon and Co.	6,159.60
Geo. A. Stimson and Co.	6,181.80
C. H. Burgess and Co.	6,206.40

Keep Canada on the Map

Canada's fighting men put her on the map as a fighting nation.

Keen as was war's struggle, still sharper will be after-war competition for world markets.

If she is to ensure her industrial and agricultural prosperity, Canada must invade those markets.

May we tell you how you can back that invasion—safely and profitably?

The Canada Standard Loan Company
520 McIntyre Block, Winnipeg

Sherbrooke, Que.—The council has decided that it will not accept any of the tenders so far received for the bond issue recently offered for sale. Tenders were invited up to July 2nd.

Prescott and Russell Counties, Ont.—Æmilius Jarvis and Co., have been awarded a bond issue of $50,000 of the united counties of Prescott and Russell. The bonds bear 6 per cent., and are for 25 years. The money is to be used for drainage purposes. The following are some of the tenders:—

Jarvis and Co.	105.25
G. A. Stimson and Co.	105.01
A. E. Ames and Co.	104.09
C. H. Burgess and Co.	103.07

LARGE CANADIAN WOOLLEN MILLS FINANCING

Arrangements have been made for the underwriting of an issue of preferred stock in the Canadian Woollen Mills Company, Limited. This company is an amalgamation of the Standard Woollen Mills, Limited, Toronto; the Auburn Mills, Peterborough; and the Bonner-Worth Mills, Peterborough. The capitalization is $3,500,000, of which one-half is common and one-half preferred stock. The entire issue of preferred stock is to be handled by a syndicate composed of Ferguson and Ormsby, the Canada Bond Corporation, both of Toronto, and Hanson Brothers, Montreal. This offering is to be next week, and it is understood the shares will be accompanied by a bonus of common stock. Settlement has already been made with the firms whose business has been taken over.

The directorate of the new company consists of: President, J. B. Ferguson, of Ferguson and Ormsby; vice-president, A. O. Dawson, general manager of Canadian Cottons, Limited, and president of the Corticelli Silk Company; second vice-president, F. B. Hayes, of the Toronto Carpet Company; F. R. Sweeney, president and general manager of the Zimmerman-Reliance Knitting Company of Toronto and Hamilton; L. Bonner, general manager of Penmans, Limited; W. K. George, president of the Canada Bond Corporation; G. T. Perry, general manager of the G.N.W. Telegraph Company. The general manager of the new company is Mr. Edgar Worth, and the secretary, Mr. Wm. Tinker.

WILDER'S BLEURY STREET BUILDING BONDS

An issue of $350,000 of first mortgage six and a half per cent. serial coupon bonds of Wilder's Bleury Street Building, Montreal, is being offered by Hew R. Wood Company, Montreal. The property is a new ten storey fireproof building valued at $627,360 and is owned by the Wilder's Bleury Street Biulding Company. The bonds are dated July 1st, 1919, and are callable at 103 and interest after 1925, in reverse of numerical order. The offering price is par and accrued interest.

SHELDON'S, LIMITED, BOND ISSUE

Messrs. Herdman and Company, members of the Montreal Stock Exchange and the firm of Foster, Barrett, Riepert and Low, Limited, bond dealers, Montreal, are offering on the Canadian market an issue of six per cent. of the First Mortgaged Gold Bonds of Sheldon's Limited, Galt, Ont. In the offering it is stated that the actual value of the assets of the company without making any allowance for goodwill, patents, etc., is more than four times the amount of bonds outstanding. For the past seven years the average yearly net earnings have been more than six times greater than the amount necessary to pay interest charges. The bonds are being offered at 93 and interest.

NOVA SCOTIA TRAMWAYS ISSUE

The Nova Scotia Public Utilities Commission has granted an order allowing the issue by the Nova Scotia Tramways Company of $1,000,000 of seven per cent. notes. The underwriters are F. B. McCurdy and Company. Messrs. Stone and Webster, operating engineers have recently taken over the management of the company. The notes run for three years and are offered at par and interest. A feature of the issue is that principal and interest are payable in gold coin at the option of the holder either at Halifax or Montreal, in Canada, or in New York. The offering price is par and accrued interest.

Mr. Stuart Pratt, president of the Nova Scotia Tramways and Power Company, makes the following statement regarding its affairs:—

"The company owns and operates all the street railway, electric light, power and gas properties in Halifax and also operates the commercial lighting and power business in Dartmouth. It acquired on its incorporation all the business assets and franchises of the Halifax Electric Tramway Company and the enterprise has been in continuous and successful operation for over 24 years.

"The purpose of the present issue is to provide additional rolling stock, extensions and improvements in the present track layout and an improved car service, together with gas plant and gas main extensions and additional boiler capacity. The new issue of cupon gold notes is a direct obligation upon the company and ranks senior to the $2,078,800 six per cent. preferred stock and $2,510,000 common stock. No mortgage bonds or debentures (except the first mortgage bonds) may be issued unless the coupon gold notes are secured in the same manner as such new issue.

"The growth of the company's business for the past five years has been consistent, as will be seen from the following figures:—

	Gross earnings.
1914	$ 645,241
1915	718,840
1916	759,726
1917	859,667
1918	998,702
1919	*1,325,500

"*On basis of earnings ascertained to date."

NEWS OF MUNICIPAL FINANCE

Vancouver Prepares Taxation By-law—Montreal Has Balance for Year 1918

Winnipeg, Man.—The tax rate for 1919-20 will be 23 mills on the dollar, compared with 20 mills last year. The police requirements for the year will be $752,000, a considerable increase.

Hamilton, Ont.—Up to July 11th, $716,511 had been received in taxes. Last year collections on the same date had totalled only $239,969, but the last date for payment is later this year.

Medicine Hat, Alta.—At a public meeting held on July 8th, considerable criticism was expressed regarding alleged needless expenditure in connection with the agricultural society, the double mayoralty salary, and the publicity agent.

New Westminster, B.C.—A 15 per cent. penalty, prescribed by the Municipal Act, is being charged for taxes unpaid after November 15th. It is to be collected on local improvement as well as ordinary taxes, as stringent measures are necessary to enforce payments.

Brandon, Man.—The estimates were taken up at a recent meeting of the city council. The tax rate has not yet been arrived at, according to latest reports, but it is expected that it will be somewhat higher than the rate of 25 mills last year. This year taxes will be received in one payment. Last year they were payable in two instalments, the first falling due on August 15th, and the second on October 1st. Very few took advantage of this plan, however.

Edmonton, Alta.—City Assessor Walker has just completed the figures for the current year's land and improvements assessments. The total valuation is $86,688,415, and the property exempt from taxation totals $6,915,885, making a net valuation of $79,772,530. The land assessment last year was $76,472,800, and buildings $15,400,920, while this year stands at $62,471,850, a considerable reduction. There is some increase in the building assessments, $16,834,470, against $15,400,920 last year.

Lethbridge, Alta.—An effort was recently made in the city to relieve the burden of uncontrollable expenditures during the next few years by rebonding. The city's controllable expenditure is just about 25 per cent. of the whole budget. About $175,000 of taxes have not been paid and the city has had to acquire property at tax sales which cannot be realized upon at present. The crop outlook in the neighborhood is not good for this year, and it is anticipated that further difficulties in tax collections will be met. The Act passed at the last session of the Alberta legislature gives authority for a city such as Lethbridge, to rebond its debt under certain circumstances. The Lethbridge council calculated that by availing themselves of this act a reduction of four mills for five years could be obtained at the expense of an equivalent extra burden for the ensuing 25 years. It was decided not to take action, however.

Victoria, B.C.—As a result of increased consumption of water, and higher rates, the amount collected by the waterworks department in June was $28,824, compared with $12,702 last year. If this proportion is maintained throughout the year the department may be self-supporting for 1919.

The city's new trade license by-law has been practically completed after a long discussion between the city council and retail merchants. In the case of retail stores, the tax will vary in proportion to the number of employees and to the number of departments. The maximum to be paid by any departmental store will probably by $100. Wholesale traders will be asked for $50 every six months. Other license fees provided for are as follows, being for six months in each case:—

Keepers of billiard tables or pool tables for hire, $6 for each table. Keepers of bowling alleys, $10 for each alley or runway. Keepers of rifle galleries, $5 for each range. Wholesale and retail merchants, combined, $50. Hawkers, peddlers or hucksters, $20. Agents for outside supply houses, $50. Laundry keepers, $10. Pawnbrokers, $125. Second-hand or junk dealers, $20. Keepers of hired vehicles, $5 for each vehicle. Drivers of hired vehicles, $1. Livery stable keepers, $10. Dealers in used motor cars, $20. Dealers in new motor cars, $50. The holders of this license will also be entitled to carry on the business of selling motor car accessories, gasoline, oil and supplies without additional license.

Any one bank having a single place of business will be taxed $200, while $50 will be levied upon each additional place of business. Rooming houses, apartment houses and hotels, 50 cents for each room available for letting. Persons having not more than two rooms available are exempt. Retail dealers in beverages consumed on the premises, $20. Manufacturers of beverages and wholesale dealers in beverages, $50. Auctioneers of all kinds, $50. Transient traders, $250, in addition to any other fee applicable under the by-law. Transient real estate agents, $200. Exhibitors of circuses, horse shows, etc., $200 for each day of such exhibition. Special provision is made for theatres on the basis of accommodation and run of performances. For theatres having a seating capacity of less than 975 persons, $75 for six months; $50 for three months; $30 for one month; $5 for one day. For theatres accommodating 975 persons or more, $150 for six months; $100 for three months; $50 for one month; $5 a day. No tax shall be levied upon patriotic or charitable entertainments.

Express companies, $50. Telephone company, electric light company, gas company, street railway or tramway company, power company or waterworks company, $100. Companies engaging in more than one of these lines must pay a separate fee for each. Trust companies, investment, loan or mortgage concern, $50. Stockbroker, $50, in addition to any other fee applicable. Miscellaneous exhibitions, such as dancing, wrestling, jugglery, freaks of nature, pictures and displays coming under the usual classification of "side shows," $20 for each day of exhibition. Patriotic and charitable shows are exempt. Stevedore contractor, $50. Professions, excluding architects, $20. Plumbers and sanitary engineers, $15. Foundry, machine shop, sawmill operators, $25. Hairdresses, barbers, boot and shoe repairers, blacksmiths, shoe blacks and chimney sweeps, $5 a month. Milk vendors, $10. Real estate agents, $15. Keepers of beauty parlors, dance halls, box factories, machine repair shops, tailors, newspaper publishers, undertakers, billposters, chiropodists, employments bureaus and masseurs, $20.

Miscellaneous businesses and occupations not specified in the foregoing groups are dealt with on the employment basis, the first fee representing houses employing three or less, the second those employing four to ten, and the third more than ten: Bakeshops, paint shops, photographic supply dealer or photographer, printer or bookbinder, restaurant, cafe or eating-house, $5, $10, $20. Every person carrying on business not specified and who is not himself a journeyman or employed for wages only will be required to pay $5 if he employs up to three persons, $10 if he employs from four to ten, and $20 if he employs more than ten.

Montreal, Que.—According to a statement issued by the city treasurer on July 14th, the city's gross receipts for 1918 were $54,387,481, and the expenditure was $54,183,512, so that on January 1 last, the city had a balance of $203,969 on hand. The details are as follows:—

Balance on hand, Jan. 1, 1918		$ 675,269.10
Receipts:		
General revenue	$16,648,601.76

A Newspaper Devoted to Municipal Bonds

THERE is published in New York City a daily and weekly newspaper which has for over twenty-five years been devoted to municipal bonds. Bankers, bond dealers, investors and public officials consider it an authority in its field. Municipalities consider it the logical medium in which to announce bond offerings.

THE BOND BUYER

INVESTMENTS AND THE MARKET

Tooke Brothers Profits Up—Brompton Profits About Same —Dominion Steel has New Contract

Canadian Consolidated Rubber Co., Ltd.—The company has decided to spend at once $1,000,000 on the tire plant at Kitchener, Ont., so that the output may be increased.

Continental Oil Co.—The company is being taken over by a new company, known as the North Star Oil and Refining Co., Ltd., with head office in Winnipeg. Plants are operated at several points in the western provinces, and there will be no break in operations.

Midland Shipbuilding Co.—The plant of the Midland Shipbuilding Co. reopened on July 14th, and the men are being absorbed in the different branches as rapidly as possible. The iron workers struck on June 6th, but operations were continued for ten days longer, when the entire plant closed down. The pay sheet represents $40,000 a month.

Gold Pan Mining Co.—A meeting of the shareholders was held in Winnipeg on July 11th, and the following directors were elected: J. H. Ashdown, E. F. Hutchings, L. H. Welvin, Frank Fowler, Gordon MacTavish, James Stewart and S. H. Green. The proposal to lease property was also discussed, but no decision reached. The meeting was finally adjourned until August 7th.

Trinidad Electric Co.—The following are the earnings for May, 1919:—

	Gross.	Net.
Railroad	$14,006.33	$3,411.62
Light and power	10,299.63	1,963.79
Ice and refrigeration	3,758.23	788.77
		$6,164.18

Sherbrooke Street Railway Co.—A new arrangement is being reached between the city and the company, and it is expected that the by-law will be passed any day. The fares from 6 a.m. to 12 p.m. are fixed at eight cents cash, or four tickets for twenty-five cents; from 12 p.m. to 6 p.m., at fifteen cents cash. Children under fourteen years of age are to be carried at four cents cash, or eight tickets for twenty-five cents.

Steel Co. of Canada.—The Privy Council has dismissed the appeal of the Steel Co. of Canada from the judgment recovered against it by the Dominion Radiator Co. The action was brought by the Dominion Radiator Co. to recover damages for failure of the Steel company to deliver pig iron according to contract. The action was tried before Mr. Justice Middleton, who found in favor of the plaintiffs, and assessed the damages at $31,832. The Steel company appealed from this judgment, but the appeal was dismissed by the Appellate Division. The Steel company then appealed to the Privy Council, and judgment has now been delivered, affirming the judgments in the lower courts. Costs throughout were also awarded the plaintiffs.

Dominion Steel Corporation.—The new contract between the company and the Dominion government, which was referred to in these columns last week, is for the delivery within a five-year period of 250,000 tons of ship plates at $3.65 per hundred pounds. This is a reduction of fifty cents per hundred pounds on the old price, and has been made possible by the greatly changed conditions in the iron and steel markets of the world.

The contract involves an expenditure on the part of the Dominion government of over $201,000,000 during the next five years. The company will now proceed to complete the erection of the plate mill, and it is expected that rolling can be commenced by January 1st. The cost of the mill will be about $5,000,000.

United States Rubber Co., Ltd.—At a meeting of the incorporators of the company in Montreal last week the following directors were elected: Sir Mortimer Davis, W. A. Eden, Sir Charles Gordon, R. E. Jameson, Lieut.-Col. Herbert Molson, Col. S. P. Colt, J. B. Waddell, C. B. Seger, E. W. Nesbitt, M.P., H. E. Sawyer, V. E. Mitchell, K.C., E. S. Williams, J. N. Gunn.

At an organization meeting of the board, held subsequently, the following officers were elected: C. B. Seger, president; W. A. Eden, vice-president; V. E. Mitchell, general counsel; W. Binmore, secretary-treasurer.

The United States Rubber Co. of Canada, Ltd., was recently incorporated with an authorized capital of $20,000,000, which, together with the wide provisions in the charter, are indicative of extensive activities in Canada. It was announced that the board will hold another meeting at an early date, at which time it is expected definite action will be taken as to the activities and policies of the company.

Tooke Brothers, Ltd.—The annual financial statement of the company for the year ended May 31st last shows profits for the year of $152,310, an increase of $16,552 over the 1917-18 period, and $40,355 over the previous year. After deductions for preferred dividends, the arrears on which have now been fully liquidated, and an allowance of $15,000 for depreciation, the balance available for common stock dividends amounts to $51,122, equal to approximately 7.86 per cent. on the outstanding issue of $650,000, against some 2 per cent. lower last year, and a deficit of $22,707 in 1917.

The showing is the best yet reported by the company, and would appear to fully warrant the action of the directors in respect to cleaning up preferred dividend arrears, the final distribution being payable on July 19th to record of to-morrow.

The position of the company as to working capital shows further improvements, this standing at $706,295, against $652,157 a year ago, the current assets in each case including investments, which the statement does not show under this heading.

Minneapolis, St. Paul and Sault Ste. Marie Railway Co.—The annual statement for the year ended December 31st, 1918, shows the following earnings:—

Gross earnings (compensation)	$10,547,428
Corporate expenses	89,252
Net earnings	$10,458,176
Income from other sources	687,386
Total income	$11,145,562
Miscellaneous income charges (lap over items charged by United States railroad administration)	1,038,574
	$10,106,987
Fixed charges, taxes, etc.	5,848,825
Surplus income	$ 4,258,162

During the year the outstanding funded debt was increased by the issue of $840,000 of first consolidated mortgage five per cent. bonds. Bonds to the amount of $1,446,937 were also retired, making a net decrease in funded debt.

Brompton Pulp and Paper Co.—The financial statement of the company for the half-year ending April 30th, 1919, shows gross profits of $517,355, against a total for the full previous fiscal year of $1,051,275, or at practically the same rate. After deductions of expenses, bond and bank interest, as well as preferred dividends, net available on the common stock is $343,118, as compared with $1,114,000 in the full previous year, or at a somewhat lower annual rate. The carry forwards for the half-year amounts to $168,118.

In the report, which is signed by F. N. McCrea, the president pointed out that the period included the signing of the armistice, and consequent dislocation of trade and industry. This was felt severely in all lines of the pulp and

DEBENTURES FOR SALE

$132,253.00

CITY OF MEDICINE HAT, ALBERTA

SALE OF DEBENTURES

Tenders endorsed "Tender for Debentures" will be received by the City Treasurer, up to noon of the Ninth Day of August, 1919, for the purchase of the following issues of Debentures of the City of Medicine Hat, individually or collectively:—

	%	Debentures maturing.	Amount.
Construction of Spur Tracks ..	5	April 1, 1945	$11,700.00
Purchase of Industrial Sites ..	5	April 1, 1945	16,000.00
Improving Parks	5	April 1, 1945	14,140.00
Deficiency on Storm Sewer ...	5	April 1, 1955	9,214.00
Deficiency on Trunk Sewer ...	5	April 1, 1955	17,199.00
Market and Right of Way Purchase	5	April 1, 1945	11,000.00
Rebonding	6	July 1, 1949	53,000.00

All Sinking Fund Debentures, Interest Payable at the Union Bank of Canada, Medicine Hat, London, England, Toronto, Montreal or Winnipeg, and the National Park Bank, New York.

Copy of Financial Statements forwarded on request.
The lowest or any Tender not necessarily accepted.

G. E. BASKIE, C.A.,
City Treasurer.

TOWNSHIP OF CHARLOTTENBURGH

Sealed tenders will be received up to August 4th, noon, for $30,000.00, Township of Charlottenburgh Debentures, payable in twenty equal annual instalments, interest at 5½ per cent.

GEORGE A. WATSON,
Clerk.

TOWN OF NORTH BAY

DEBENTURES FOR SALE

Sealed tenders will be received by the undersigned up to and including the 2nd day of August, 1919, for the purchase of the following issues of Debentures of the Town of North Bay:—

(1) $25,640.75 for Sanitary Sewers bearing interest at the rate of six per cent. per annum, repayable in twenty equal annual instalments of principal and interest.

(2) $21,000.00 for improvement and extension of Waterworks system, bearing interest at the rate of six per cent. per annum, repayable in twenty equal annual instalments of principal and interest.

(3) $5,859.28 Local Improvement Debentures for Sanitary Sewers, bearing interest at the rate of six per cent. per annum, repayable in twenty equal annual instalments of principal and interest.

Delivery to be made at the Royal Bank of Canada, North Bay, Ont.

M. W. FLANNERY,
North Bay, July 16th, 1919. Treasurer.

A second gold area in Manitoba has been discovered in the Copper Lake district, which is east of the Flin Flon Copper Mines. The discovery is reported as having been made by J. P. Gordon, formerly chief engineer of the Hudson Bay Railway.

DIVIDENDS AND NOTICES

THE MERCHANTS BANK OF CANADA

QUARTERLY DIVIDEND

Notice is hereby given that a dividend of Three per cent. for the current quarter, being at the rate of Twelve per cent. per annum, upon the Paid-up Capital Stock of this Institution, has been declared, and will be payable at its Banking House in this city and its Branches on and after the 1st day of August next to Shareholders of record at the close of business on the 15th day of July.

As regards new stock paid up subsequent to 15th May, in full or in part, the rate of Three per cent. for the current quarter (or twelve per cent. per annum) will apply proportionally from the dates upon which payments were made.

By order of the Board.
D. C. MACAROW,
General Manager.

Montreal, 26th June, 1919.

paper products, with the exception of newsprint paper, the demand for which was the first to recover from the effects of the changed world position. Readjustment to a peace basis in the market for other pulp and paper products has been slower, and it was only in the last two months of the period that trade approached a normal condition.

The statement continues: "Under the circumstances, the earnings statement, showing, as it does, the common dividend earned nearly twice over, may be considered a satisfactory indication of the company's earning power under adverse conditions. The results were due largely to the diversified nature of the company's activities and the fact that you now have a market for practically all of your partly finished products within the company itself, the greater part of your total output being finished products."

Kerr Lake Mines, Ltd.—It has been decided to reduce the capital stock from $3,000,000 to $2,400,000 by reducing the par value of each share, of which there are 600,000, from $5 to $4. A meeting of the shareholders is to be held at the company's office in New York on August 1st to confirm a by-law to this effect which has been adopted by the board of directors. This change is being made in view of the depletion of the mines. A payment of $600,000, which has been received from the Kerr Lake Mining Co., Ltd., is considered as on account of capital rather than earnings.

Porcupine Crown Mines.—At a meeting of the directors of the Thompson-Krist Company on July 16th, the proposal made by the Porcupine Crown Company for a merger of the two mines was discussed. While no action was taken regarding the offer of the Porcupine Crown, negotiations are proceeding. The Porcupine Crown proposed to form a new company to be capitalized at $3,000,000, and to allot $2,000,000 of the stock to Porcupine Crown shareholders and $500,000 to holders of Thompson-Krist, leaving $500,000 as treasury stock. Thompson-Krist directors believe that the terms should be more generous.

RECENT FIRES

Large Fires this Week at Granum, Alta.; Winnipeg, Man., and Wymark, Sask.

Calgary, Alta.—July 11——The Tuxedo Coffee and Spice Mills, owned by W. Georgeson, were burned. The loss is covered by insurance.

Craigmyle, Alta.—July 5—A barn owned by A. Moody was destroyed. Estimated loss, $1,500. Insurance, $500.

Kamloops, B.C.—July 11—The Palace Livery Stable at Lansdowne and Third Avenue, owned by P. Barnhart & Son, was destroyed.

Granum, Alta.—July 6—Fire broke out in Jeffway's butcher shop and destroyed the following: Bank of Hamilton building, Tisdale's general store, D. D. Farmer's hardware store, McKinney's office, G. A. Webb's pool-room, J. W. Burrow's barber shop, .H B. Tilden's real estate office, Granum drug store, Blair's real estate office, C. Reynold's barber shop and C. E. Moore's general store. Estimated loss, $100,000.

Leamington, Ont.—July 11—The barn owned by Elmer Gowman was destroyed. Cause, lightning. Insurance, $600.

Montreal, Que.—July 10—The Belœil Convent was damaged. Cause, defective electric wire. Estimated loss, $6,000.

Quebec, Que.—July 11—Premises of the Quebec Auto Garage, situated at the corner of St. Augustin and St. Patrick Streets, were destroyed. Estimated loss, $5,000.

Rock Island, Que.—July 15—The factory of the Telford Garment Company, was damaged. Estimated loss, $40,000.

Stratford, Ont.—July 14—The home of David Meadows, on the Embro Road, near Brooksdale, was destroyed. Cause, spontaneous combustion.

Toronto, Ont.—July 17—The guard house, Christie Street Military Hospital, was damaged. Estimated loss, $1,800.

Unionville, Ont.—July 13—The Size Hotel was destroyed. Estimated loss, $3,000.

Welland, Ont.—July 8—Storage building on Lock Street, owned by McIvor and Son, was destroyed. Estimated loss, $8,000.

Windsor, Ont.—July 8—Three residences and a feed store and stable at Mercer and Tuscarora Streets were destroyed. Estimated loss, $6,000.

Winnipeg, Man.—July 11—The building occupied by the Hudson Auction Co. was destroyed. Estimated loss, $150,000, partially covered by insurance.

Wymark, Sask.—July 7—Two elevators, 3,000 bushels of grain, a box car of shingles and a coal shed and contents were destroyed. Estimated loss, $30,000.

ADDITIONAL INFORMATION CONCERNING FIRES ALREADY REPORTED

Braeside, Ont.—June 23—The lumber mill of Gillies Brothers, Ltd., was destroyed. The following companies are interested: Employers, $2,500; Indiana Lumbermen's Mutual, $2,500; Manufacturing Woodworker Underwriters, $15,000; Manufacturing Lumbermen's, $50,000; Canadian Lumbermen's Exchange, $5,000; Lumbermen's Underwriting Alliance, $20,000; Lumber Manufacturers' International Insurance, $20,000; Pennsylvania Lumber Mutual, $2,500; Lumbermen's Mutual, $2,500; The Lumber Mutual, Boston, $2,500; National Lumber Manufacturers, $10,000; Central Manufacturers, $2,500; Millers' Mutual, $2,500; Mill Owners Mutual, $2,500; North Western Mutual, $2,500; Grain Dealers' Mutual, $1,250; Mansfield Mutual, $1,000; Ohio Mutual, $1,000; Fitchbury Mutual, $1,250; Pennsylvania Millers, $1,500; Grain Dealers' National, $2,000; Lloyds London Binder, $7,500; Ohio Millers, $10,000; North Branch Fire Insurance, $2,500; Merchants and Manufacturers, $1,000; Atlas Assurance Co., $2,500; Liverpool and London and Globe, $2,500; Royal Exchange, $2,500; North British and Mercantile, $2,500; County Fire Insurance, $2,500; Pacific Fire, $5,000; Old Colony Insurance, $5,000; Industrial Fire, $5,000; City of New York, $2,000; Home of Fordyce, $2,250; National Fire Underwriters, $2,000; Metropolitan, Chicago, $1,500; Industrial, Boston, $1,250; Ohio Millers, Canton, O., $3,500. Total, $211,500.

Saskatoon, Sask.—With reference to the list of insurance companies given in *The Monetary Times* last week as sustaining losses from the fire in the Quaker Oats plant, Saskatoon, we are advised by the Continental Insurance Co. of New York, through its manager for Canada, Mr. W. E. Baldwin, that no loss was sustained by that company.

Toronto, Ont.—June 19—The warehouse of the Great Lakes Oil Refining Co., Ltd., was damaged. Estimated loss, $22,500. Insurance was carried to the amount of $18,700 as follows: On stock and plant—New York Underwriters, $500; Springfield, $2,500; Niagara, $1,000; Great American, $500; London Guarantee, $4,000; North West Fire, $2,000; British Colonial, $1,500; Ocean, $4,000; North Empire, $1,200. On building—London Guarantee, $1,500. Total, $18,700.

Vancouver, B.C.—The following is a summary of the report as submitted by the fire chief to *The Monetary Times*: Fires where damage resulted, 32; total value of property involved, $1,766,960; total insurance carried, $184,450; total loss, $31,047.

The New Brunswick Department of Lands and Mines is taking action under the provincial law respecting forest fires against twenty settlers of Kedgewick, N.B., a lumbering village on the Intercolonial Railway in the midst of a New Brunswick forest area. The recent forest fire there did damage amounting to $150,000.

The city commissioners of Calgary decided, at a recent meeting, to suspend Fire Chief Smart for allowing one of the stations to be without fire fighting apparatus for a considerable period. It was urged in his defence that arrangements had been made for equipment to be provided by a neighboring station but the commissioners did not consider the explanation adequate.

Exchange Rates and Canada's Trade Relations

Drop in European Exchanges Means Lower Return for Our Exports—United States Policy of Vast Credits Cannot be Duplicated Here—Quotations Indicate an Unbalanced Economic Situation.

By A. B. BARKER

THE rates of exchange on the countries with which Canada has been accustomed to trade have recently reached unheard of figures, as the following table shows:—

	Par.	United States.	Canada.
Sterling	$4.86	$4.36	$4.50
Francs	19.3 cents	13½ cents	14 cents
Italian lire	19.3 cents	11½ cents	12 cents
Marks	23.82 cents	8½ cents	9 cents
New York funds.	Par	....	3 15/16 prem.

The effect of heavy adverse exchanges is to curtail exports to those countries whose funds are at a discount, as the discount operates as a reduction in the yield to the seller; conversely, it operates as an encouragement to imports from those countries. British goods costing £100, for instance, would, when exchange ruled at par, cost £486.66; but at the present rate would cost $450. Conversely, sales in Britain, if sold in that market in sterling for £100, would, under former conditions, yield the Canadian seller $486.66, but now only $450.

Those who buy American goods realize to what an extent the present premium on New York funds has increased the price of their purchases. In a recent leading article the New York Times points out that the condition reflected in the present rates indicates an economic crisis rather than a financial crisis in that, in the countries of depreciated currencies, the anxiety is about getting goods rather than about credit disturbance.

Speaking from the standpoint of the United States, where the depreciation of foreign funds is more pronounced than here, the writer says: "England welcomes the weakness of sterling, because it is an obstacle to the increase of her debt to the United States, and she is an honorable debtor among several in the same class. She prefers to buy where she owes less and the pound is more highly valued. But we (the United States) are so abundantly supplied with what the world wants that our necessity to sell is stronger than England's necessity to buy here. If we want to sell our goods, we must supply the world with both goods and dollars. We have them both, but shrink from providing both to the same buyers."

The article points out further that under the circumstances credit to enable European nations to purchase freely must be provided if the goods are not to be left to depreciate on their hands and thus precipitate an economic crisis at home.

Canada's problem is similar, in that we look to Britain as the main buyer of our surplus of foodstuffs and raw materials, which make up the greater part of our exports. We are, unfortunately, not in a position to supply credit, as is the United States; in fact, we are already heavily in debt to that country at the present time, and are looking for further assistance. This that country is disposed to provide, as Canada is its best customer. Canada is, however, a competing exporter of wheat and foodstuffs, and it is hardly to be expected that assistance will be extended to Canada to finance this part of her trade in competition with the United States.

Effect on Wheat Export

The estimated amount of wheat Canada will have for export this year is 175,000,000 bushels, worth, at present prices, say, $350,000,000, and the question of handling this, in view of the depreciation of the money of the only purchasers, is most serious. The shortage of shipping is another adverse factor, as the Montreal Gazette recently pointed out. We are in the same position as the United States, in that the necessity of selling to Britain is greater than the necessity for Britain to buy from us, and it, therefore, comes down to the question of price and terms. With sterling at its present low figure, and the prospect, according to Sir George Paish, of its going lower, the problem of financing will tax the skill of our financiers to the utmost. During the past five years, however, problems no less intricate have been met and solved, but then we were at war, and a struggle with a foreign enemy unites a country as nothing else can. This problem, however, is different and must be faced in cold blood, as economic difficulties within a nation do not rouse that patriotic enthusiasm which unites a nation when the national life is threatened from without.

MONEY MARKETS

Messrs. Glazebrook and Cronyn, exchange and bond brokers, Toronto, report the following exchange rates to *The Monetary Times*:—

	Buyers.	Sellers.	Counter.
N.Y. funds	3 13-16 pm	3⅞ pm	....
Mont. funds	par	par	⅛ to ¼
Sterling—			
Demand	$4.52	$4.54	....
Cable transfers	4.53	4.55	....

Rates in New York, sterling, demand, open, $4.35½; close, $4.37.

Bank of England rate, 5 per cent.

VANCOUVER AGENCY OF MARYLAND ASSURANCE

The item in *The Monetary Times* of July 11th, referring to the general agency in British Columbia, of the Maryland Assurance Corporation, stated that the Stewart McIntosh Company had taken over this agency. This is not quite correct, as the London and British North America Company, Ltd., are still general agents there for the Maryland Assurance Corporation, and the Maryland Casualty Co. Both of these companies now have two general agencies in the province.

PERSONAL COVENANT IN ALBERTA MORTGAGES

Effect of Important Decision of 1916—Last Session Passed Amendment Which Does Not Restore Personal Covenant

IN the proceedings of the Mortgage Loans Association of Alberta, which have just been issued in printed form and form part of the Year Book of the Dominion Mortgage and Investments Association, reference is made to the changes in the Land Titles Act of that province. Mr. Grant, an Edmonton solicitor indicates that a possible way of getting over the loss of the personal covenant was to take a promissory note and a mortgage as collateral, the note being a primary security. He thus assumes what is now commonly accepted, that the covenant has been statutorily annihilated. It was the feeling of the meeting that the personal covenant must be restored to the position it occupied prior to 1916, so as to enable the mortgagee to attach the assets of the mortgagor in default. The question has again arisen owing to the demand for capital in Alberta cities for the purpose of erecting houses.

The trouble with regard to the personal covenant in mortgages in Alberta dates back to April, 1916, when an amendment was made to the "Land Titles Act," which provided "where any action or proceeding has before the date of the passing of this subsection been taken or shall thereafter be taken in any court either under the provisions of this section or to enforce the observance of the covenant . . . . no execution shall issue thereon until sale of the land mortgaged or encumbered or agreed to be sold has been had or foreclosure ordered and levy shall then be made only for the amount of the judgment or mortgage debt remaining unsatisfied with costs."

This constituted a change in actually existing contract rights, it being retroactive in character. It meant also that mortgagors well able to pay were able to fight off mortgagees in the course of sale proceedings. At the time it gave rise to much adverse comment and caused the withdrawal from Alberta of many lenders. Those who continued to do business in that province have persistently made efforts to induce the government to restore mortgage contracts to the position they held prior to the passing of the amendment just quoted.

They were assured by the premier of the province that such a change would be made. Other ministers of the Alberta cabinet also promised that they would endeavor to restore contracts to the position they were in when made, but were non-committal as to changes that would apply to any mortgage contract entered into subsequent to the passing of the amendment in question.

Amendment Passed at Recent Session

At the session held in April of the present year, the amendment of 1916 was repealed but other changes were substituted which did not appreciably change the status of the mortgagee, who made a contract prior to April, 1916. The recent amendment provides that "proceedings for the recovery of money secured by a mortgage may be taken in any court of competent jurisdiction in accordance with the practise and procedure thereof," but two very important restrictions were created. The first one was that "no execution to enforce a judgment upon the personal covenant contained in a mortgage or an agreement, shall issue or be proceeded with until sale of the land and levy shall then be made only for the amount of the said moneys remaining unpaid." Another restriction was that so long as execution cannot issue, the mortgagee cannot protect himself by attaching any property or assets the mortgagor may have. The mortgagee may obtain relief from these restrictions by going before a judge of the Supreme Court and convincing him:—

"(a) Of the inadequacy of the land as a security for the mortgage debt;

"(b) of the possession by the mortgagor of assets sufficient to discharge the mortgage debt; and

(c) of the existence of a grave danger of disposal of the assets of the mortgagor to defeat the claim of the mortgagee."

Lending institutions regard it as being quite impracticable to convince a judge of the Supreme Court on the three points in question and if an attempt were made to do so it would involve much litigation and consequently much expense—expense that possibly would have to be added to a loss already made.

What Provincial Association Wants

The changes in question did not meet with the approval of the Mortgage Loans Association of Alberta as according to their proceedings just to hand, the following resolution was passed:—

"That, in the opinion of this association, recent statutory enactments by the legislature of this province, especially amendments to the Land Titles Act, and particularly in their retroactive aspects, constitute serious and unwarranted interference in the contract rights between borrowers and lenders, that, in particular, the restriction upon the enforcement of the personal covenant in mortgages has already had a prejudicial effect upon the attitude of loaning companies and investors towards this province in restricting outside capital available for investment in the province, and from time to time, this effect will become more pronounced. That the serious consequences of this should be clearly understood by the citizens generally. That the co-operation of farmers' organizations, boards of trade, and other representative organizations be sought, and that the Dominion Mortgage and Investments Association of Toronto be asked to place itself on record in support of the movement."

Meanwhile investment houses both in Canada and in the United Kingdom are interesting themselves in the matter. They contend that the personal covenant cannot be looked upon as being satisfactory unless upon default they can at once obtain judgment and under it attach any assets which the debtor may have. Institutions and investors on a large scale are more concerned with the contracts they had made than with new conditions which the government of Alberta may impose as to future contracts. What they desire is to be able to carry out contracts they made without their being vitiated by statute. It is contended by them that when the government takes away rights under a contract made in strict compliance with custom and law as then existing, it is acting in a confiscatory manner. This is the charge they lay at the door of the Alberta government, and so long as the legislation remains in the present unsatisfactory position, borrowers, especially in cities, will suffer. The one who values his promise to pay, finds that when additional security is offered in the form of real estate, the law holds as to his property but not as to his word. This is the practical effect as regarded by the investors and the Alberta Association intends making borrowers realise the disadvantage of the position they have been placed in by the government.

REPORT ON CANNING INDUSTRY

Mr. W. T. Jackman, of the University of Toronto, has presented to the Department of Labor a report on the canning industry in Canada. According to this report no undue profits have been made in the business over an extended term of years. The returns during the years 1913, 1914 and 1915 were low. Regarding combination he found that in the case of this industry it was protective and not injurious. While the Dominion Canners controls about 80 per cent. of the Canadian pack, the prices are kept reasonable, because if they were unduly high many competitors would be attracted to the industry. Only a small capital is required to start a canning plant.

The Calgary Board of Trade has just commenced a membership campaign with an objective of 300 new members.

A. E. Ames and Co., Toronto, have opened an office in Victoria, B.C., under the management of Mr. H. A. Ross. Some months ago an office was also opened in Chicago under the management of Mr. P. S. Mitchell.

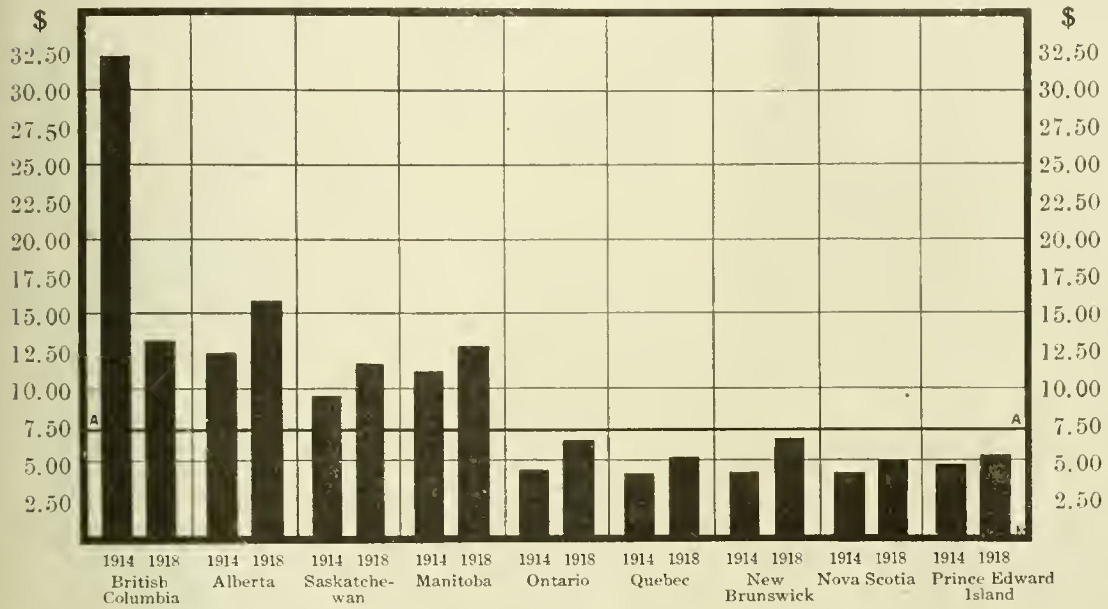
PROVINCIAL REVENUES AND EXPENDITURES

Changes During War Period Show Increase in Expenditure in all Cases—British Columbia's Expenditure More than Doubled

THE July number of the Bank of Commerce commercial letter contains an outline of provincial finances. "The budgets presented at recent sessions of the provincial legislatures in Canada," says the article, "indicate that during the fiscal periods ending in 1918 expenditures aggregated $65,000,000 as compared with $59,710,000 during those ending in 1917. During the years immediately following the outbreak of the war there was some decrease in expenditure, but since then there has been a sharp increase, as shown by the following table:—

	1913.	1914.	1915.
Revenue	$51,582,394	$51,150,919	$49,910,743
Expenditure	53,744,008	56,415,287	55,617,537
	1916.	1917.	1918.
Revenue	$49,644,541	$57,962,979	$70,569,840
Expenditure	53,241,866	59,710,666	65,809,165

Ordinary Expenditure of the Provincial Governments Per Capita 1914 and 1918



A—Average provincial expenditure for the period 1914-1918

"It will be noted that in 1918, for the first time in recent years, revenues exceeded expenditures, a result due chiefly to increased license fees for motor vehicles, additional taxation of incorporated companies engaged in financial or fiduciary business, increased receipts from succession duties and wild lands, new income and property taxes and increased royalty and stumpage charges.

"To a limited extent additional expenditure has been necessary because of the war, but a more important contributory factor has been the assumption of new functions by the governments, which has necessitated an increase in staff, and consequently in ordinary charges. These, in turn, are made still higher by the general advance in wages and salaries. The following diagram shows the per capita expenditure of each province for 1918 as compared with that for 1914:—

"According to estimates for the current year, the expenditures on ordinary and capital account will be substantially greater than in previous years. Two notable exceptions are the provinces of New Brunswick and Quebec. In Quebec the expenditure on ordinary account amounted in 1918 to $13,806,000, and the estimate for the current year is $10,400,000. The liberal expenditures of 1918 were due to an unexpected increase in revenue, which exceeded the estimates by $4,226,000, owing largely to the fact that receipts from succession duties exceeded the estimates by $3,336,000.

"In the provinces west of Quebec new capital expenditures aggregating $40,000,000 are contemplated, but the funding process may be extended beyond the year. Many of the expenditures provided for are those which were postponed until peace was declared. Manitoba, prior to the war, commenced the construction of new legislative buildings on which $5,460,000 has already been expended, and it is estimated that another $1,000,000 will be required to complete them. As a result of the steadily increasing prices of both labor and material, the estimated total cost of the buildings has already been exceeded. Since the outbreak of the war the province has borrowed $10,674,000, the annual interest on which is $644,369, or 6.03 per cent. In Alberta and Saskatchewan, both comparatively new provinces, capital expenditure on public buildings and on the extension of public utility services will be necessary for some years to come. The capital expenditure of British Columbia for the current year, as outlined by the government, will amount to $11,000,000. Nova Scotia has suffered some decline in the revenue from royalties, owing to a falling off in the production of coal.

"Except in the case of one or two provinces, current expenditure has been fully met by ordinary revenue, war conditions having no doubt contributed substantially to the apparent ease with which revenue has been obtained. Changes in conditions and the tendency towards lower prices for our chief natural products may result in the steadily increasing burden of taxation becoming less easy to bear, especially in view of the concurrent increases in the taxation imposed by the Dominion government and the municipalities. For some years the various organizations, representing farmers, business men and labor, have devoted their attention to facilitating the war efforts of the nation, and in view of the increasing burden of administration, their attention ought now to be given to questions of public finance Such problems as equitable methods of taxation and assessment, and others of a similar nature, must be satisfactorily dealt with before reconstruction and readjustment can take place on a sound and permanent basis."

ONTARIO FIRE PREVENTION LEAGUE MEETING

A special meeting of the Ontario Fire Prevention League will be held on August 8th at the Ontario fire marshal's office in Toronto. The meeting is for the purpose of confirming the articles of association and regulations for management and control. The league, which was organized at a meeting held on August 30th, 1918, has since been incorporated. The nominating committee has submitted nominations for officers and members. These are the same as for the year 1918-19, excepting that Mr. H. H. Dewart, K.C., M.P.P., replaces Mr. Wm. Proudfoot on the legislative committee, and the new members of the executive committee, class of 1922, are Mrs. A. M. Huestis, Toronto, and Mr. Tom Moore, Ottawa.

PERSONAL NOTES

MR. J. M. GRILLS has been appointed industrial commissioner for the town of Trenton, Ontario.

MR. E. A. MACNUTT, treasurer of the Sun Life Assurance Company, is spending two months in England.

SIR LOMER GOUIN, premier of Quebec Province, has been elected a director of the Mutual Life Insurance Company of Canada.

SIR DONALD MANN and SIR GEORGE BURY, will take up their residence in British Columbia, where they will engage actively in business operations.

MR. C. C. MAHONEY has been appointed secretary of the Canadian Trade Mission at Washington in succession to Mr. G. W. Bayne, who has resigned.

MR. GEORGE M. REID has been elected secretary of the New Zealand Loan and Mercantile Agency Company, in London, England. He was for some time in Winnipeg, Man.

MR. GUY TOMBS, of Montreal, will leave the Canadian Government Railways at the end of this month to become manager of transportation in connection with the pulp and paper industries of Canada.

MR. VICTOR ROSS has been elected a director and vice-president of the International Petroleum Company, Limited, in succession to the late Hon. W. J. Hanna. He has also been elected a director of the Imperial Oil Company, Limited.

OBITUARY

SIR EDWARD HOPKINSON HOLDEN, managing-director of the London City and Midland Bank, Limited, died in Scotland on July 23rd.

YIELDS ON INVESTMENTS IN STOCKS AND BONDS

The following table of investment yields of stocks and bonds has been compiled for *The Monetary Times* by Messrs. MORROW & JELLETT, Members Toronto Stock Exchange, 103 Bay Street Toronto:—

July 23rd, 1919.

	Div. Rate	Price about	Yield about

An interesting booklet has been issued by A. E. Ames and Company on the province of Quebec, and its municipalities. The material has been collected by their Montreal manager, J. B. How.

BANK DEPOSITS GO UP

The June bank statement, preliminary figures of which have been received from the Department of Finance, shows increases in deposits and a reduction in loans. The figures are as follows:—

	June, 1919.		Changes from May, 1919.
Note circulation	$ 217,608,195	+	$ 1,713,145
Reserve fund	122,124,261	+	998,195
Demand deposits	605,927,027	+	37,196,909
Notice deposits	1,139,569,570	+	31,586,498
Total deposits in Canada	1,745,496,597	+	68,783,407
Deposits elsewhere	240,201,440	+	18,595,594
Current coin	79,294,438	—	709,737
Dominion notes	175,547,837	—	3,526,381
Deposits central gold reserve	107,200,000		Unchanged
Call loans in Canada	95,982,728	+	6,795,696
Call loans outside	167,236,045	+	10,059,720
Current loans in Canada	1,043,712,932	—	27,734,754
Current loans outside	132,526,550	+	5,035,618
Total liabilities	2,429,504,074	+	99,520,874
Total assets	2,697,564,771	+	111,676,991

BANK OF MONTREAL CHANGES

The Bank of Montreal announces the opening of a sub-agency to the Bowmanville office at Hampton, Ont., and a sub-agency to the Market Square, London, Ont., office at Thorndale, Ont.

The following changes in the various branches of the Bank of Montreal are also announced:—

Alexander Man.—Mr D. F. Livingston, acting manager at Alexander, appointed manager at that branch.

Amherst, N.S.—Mr. C. H. Carter, manager at Bridgewater, appointed manager at Amherst.

Battleford, Sask.—Mr. F. C. Booth, acting manager at Battleford, appointed manager at that branch.

Bridgewater, N.S.—Mr. R. Fleming, manager at Riverport, appointed manager at Bridgewater.

Brockville, Ont.—Mr. W. H. Norton-Taylor, manager at Sarnia, appointed manager at Brockville.

Carbonear, Nfld.—Mr. J. E. Riggs, appointed acting manager at Carbonear.

Cardston, Alta.—Mr. D. C. Paterson, appointed manager at Cardston.

Ceylon, Sask.—Mr. F. W. Warren, acting manager at Ceylon, appointed manager at that branch.

Ethelbert, Man.—Mr. J. A. Watson, acting manager at Ethelbert, appointed manager at that branch.

Girvin, Sask.—Mr. C. E. Neale, acting manager at Girvin, appointed manager at that branch.

Grand Falls, N.B.—Mr. A. H. Trueman, acting manager at Grand Falls, N.B., appointed manager at that branch.

Kandahar, Sask.—Mr. R. W. Thorne, appointed acting manager at Kandahar.

King City, Ont.—Mr. K. R. Montizambert, appointed acting manager at King City.

Oshawa, Ont.—Mr. H. S. Langford, appointed manager at Oshawa.

Outlook, Sask.—Mr. A. J. Downing, acting manager at Outlook, appointed manager at that branch.

Rhein, Sask.—Mr. L. Shepherd, acting manager at Rhein, appointed manager at that branch.

Riverport, N.S.—Mr. A. G. Guest, appointed manager at Riverport.

Sarnia, Ont.—Mr. A. E. Finucane, manager at Bathurst Street, Toronto, appointed manager at Sarnia.

St. Lambert, Que.—Mr. R. Proctor, acting manager at St. Lambert, appointed manager at that branch.

Bathurst Street, Toronto—Mr. D. M. Farmer, manager at King City, appointed manager at Bathurst Street, Toronto.

Verigin, Sask.—Mr. V. T. Olsen, acting manager at Verigin, appointed manager at that branch.

THE NATIONAL INDUSTRIAL CONGRESS

FOLLOWING upon the meeting held in Ottawa last week, of the labor sub-committee of the Reconstruction and Development Committee of the Cabinet, the government has announced that a national industrial conference will be held in Ottawa, beginning on September 11th. The following is the agenda:—

(1) Consideration of the question of the desirability of unifying and co-ordinating the existing labor laws of the Dominion parliament and of the provincial legislatures, and the consideration of any new labor laws which are deemed necessary.

(2) Consideration of: (a) Employees' right to organize; (b) recognition of labor unions; (c) the right of employees to collective bargaining.

(3) Consideration of: (a) The recommendations of the Royal Commission on Industrial Relations in favor of the establishment of a bureau to promote the establishment and development of Joint Industrial Councils; (b) the further recommendations of the Royal Commission on Industrial Relations regarding the establishment of joint plant and industrial councils.

(4) Consideration of the recommendation of the Royal Commission on Industrial Relations respecting hours of labor.

(5) Consideration of minimum wage laws.

(6) Consideration of the recommendation of the Royal Commission on Industrial Relations that the findings of the commission be put into effect in all work controlled by the government where the principles of democratic management can be applied.

(7) Consideration of resolutions relating to any other features of the Royal Commission report.

(8) Consideration of the labor features of the Treaty of Peace.

(9) Consideration of any other proposals which may be introduced bearing on the relations of employers and employees.

In connection with the present industrial situation, Sir Robert Borden has issued the following statement:—

"As announced in the Governor-General's speech at prorogation, it is the intention of the government to summon, within a few weeks, a representative conference for the purpose of an intimate and friendly discussion of relations between employers and employed, and for consideration of the report of the industrial relations commission. The provincial governments will be invited to attend, and the various organizations of employers and employed will be requested to appoint representatives. It is hoped that such a conference will be productive of better understanding and a more thorough co-operation. Meantime, it is most important that actual working conditions should be fully realized by the Canadian people. For five years the world has been wasting the productive capacity of about 50,000,000 men actually engaged in warlike activities. The remainder of the producing population has been to a considerable extent occupied in producing munitions and instruments of destruction. Millions of men must now resume the normal activities of peace. The business of the world has been completely disorganized, and a long period will probably elapse before it can be completely re-established. After the present period of inflation has passed, Canada, in common with other countries, probably will face a period of depression.

"To meet the possible imminence of such conditions, the government has pledged the credit of the country to a very large extent in order to provide employment for the gallant men returning to our shores from war service, and for those engaged in war industries which now have ceased. Many employers of labor have undertaken work at little or no profit in order that their lines of industry might afford every possible opportunity for employment. Up to the present such employment has been fairly abundant, but this condition may not continue indefinitely. Efforts to provide employment will obviously be of little avail if the energy of the country is exhausted in lockouts or strikes occasioned by differences which ought to be settled by peaceful methods and without constant interruption of the nation's task. The industries of this country have a very direct and intimate relation to each other, and serious disturbance or stoppage of work through differences between employer and employed makes its effects felt in every allied or related industry. For example, hundreds of establishments in the metal trade have been shut down during the last two months, with the inevitable result that orders for iron and steel have fallen off; and already one large industry in Nova Scotia has been compelled to close down, throwing out of employment hundreds of skilled workmen. In British Columbia a large smelting establishment is unable to continue its business for lack of coke, which cannot be supplied owing to strikes in the mining districts.

"No one would claim, or even suggest, that injustice in respect of hours or wages should not be redressed by reasonable and effective means. But lockouts and strikes are almost as destructive as war itself in the waste and loss which they occasion and in their disturbing influence upon the industrial life of the country. They remove large numbers of men from productive employment through lack of orders; they embitter relations between employer and employed; they discourage efforts to continue or extend business and to afford employment, and last, but not least, they curtail production and increase the cost of the necessaries of life. This country is second to none in its opportunities to recover speedily from the effects of the war and to attain a prosperity even more marked than that of the past; but Canada cannot expect wholly to escape the trying experiences which must certainly result from the waste of the last five years, with its inevitable inflation and its widespread disturbance of industrial conditions. A constant recurrence of lockouts or strikes will make it exceedingly difficult, if not impossible, to pass successfully through the perilous period.

"The need of our country makes insistent appeal to the Canadian people in the new and untried era upon which we have now entered. Never was there greater need for steadfast self-control, wise forbearance and a just spirit of conciliation. Upon these qualities will largely depend our success in solving the problems and surmounting the dangers that lie before us."

The new Board of Commerce will be a strictly economic organization. Its head need not be a lawyer, but he should have a thorough knowledge of Canadian business and a grasp of economic principles.

BRITISH LOAN A SUCCESS

REPORTS from England state that the Victory loan, books for which closed on July 12th, was a distinct success. The final figures are not yet available, but estimates indicate a total of £1,500,000,000, including £750,000,000 of new money. Manchester heads the list of provincial towns with £30,000,000, and Liverpool is second with £25,000,000. The largest personal subscription was one for a million pounds from "Private T.," whose identity has not been disclosed. Sir Edward Sassoon subscribed £400,000.

NEW LIMITS TO MUNICIPAL OWNERSHIP

INTER-URBAN public service corporations are increasing in number, particularly in the case of street railway transportation, and this development introduces a new difficulty into the public ownership movement. Giving evidence before the Federal Electric Railway Commission of the United States a few days ago, W. J. Clark, a pioneer street railway builder, stated that jealousy between towns and rural communities would not permit of a large municipality owning an electric railway serving them all.

Abnormal prices are a device by which the economic system, a structure which is beyond the complete comprehension of the individual, seeks to overcome unusual demands upon it. This can be remedied only by the removal of the conditions which cause it.

* * * * * *

Regina Y.M.C.A. owes the city $77,500, for which the city holds as security a first mortgage on the property. The loan was made to replace loss caused by the cyclone some years ago. An effort is being made to have the city cancel the obligation but the citizens object to shouldering the burden of a private institution.

A POINT ON THE STATUTE OF FRAUDS

Liability for Action When Promise to Pay is Not in Writing

By M. L. Hayward, B.C.L.

IF A and B go to a store, A bargains for certain goods, and asks that they be charged to him, to which the merchant demurs on account of A's financial standing whereupon B says, "let him have the goods, and if he don't pay you I will," B is not liable, as the old and familiar Statute of Fraud provides that "no action shall be brought whereby they charge any person upon any special promise to answer for the debt, default or miscarriage of another person, unless the agreement upon which the action is brought or some memorandum or note thereof shall be in writing and signed by the party to be charged therewith or some other person thereunto by him lawful authorized."

On the other hand, if A and B go in a store and B says to the merchant, "give A such and such goods, and charge them up to me," in this case B is liable, as he is buying the goods on his own account, is becoming responsible for them directly, and is not merely agreeing to pay if A does not, so no note or memorandum in writing is required. In other words, the Statute of Frauds quoted above does not apply.

Cases are continually arising where the point for the decision of the court is that whether a contract is a mere promise to answer for the "debt, default, or miscarriage" of another which must be in writing, or whether he is incurring a direct and primary liability, in which case the Statute of Frauds does not apply, and it is not necessary that the contract be in writing.

For instance, in the case of Gillies vs. Brown, Brown was a director and the manager of a mining company of which Gillies was the president and the largest shareholder. In order to keep the affairs of the company going it was necessary to have money, which Brown advanced, and Gillies told Brown that if he (Brown) would advance the money necessary to keep the company going, Gillies had some money coming in and would repay the money to Brown.

The company was not able to repay the money, and Brown sued Gillies on his oral promise to repay it, while Gillies set up the defence that his promise to repay the money was merely a promise to pay if the company did not, in other words, that it was a promise to answer for the debt, default or miscarriage of another, which was not enforceable under the Statute of Frauds, as it had not been put in writing.

The Supreme Court of Canada held, however, that Gillies' promise was not a mere conditional promise, but was a promise which rendered Gillies a primary debtor for the amount of the advances, and which, therefore was not required to be in writing.

"It was a direct and personal liability on Gillies' part, and he cannot now invoke the Statutes of Fraud to prevent him from being liable under that contract," said the court.

At a recent meeting of the Calgary Life Underwriters' Association the following officers were elected for the year 1919-20:—President, R. B. Hood, Mutual Life of Canada; vice-president, W. S. Armstrong, Sun Life of Canada; treasurer, H. K. Hunt, Imperial Life of Canada; secretary, E. S. Clow, North American Life; executive committee—Percy G. Leaney, Metropolitan Life; F. B. Summers, New York Life; T. Marston, Equitable Life.

DIVIDEND No. 116

NOTICE IS HEREBY GIVEN that a dividend at the rate of twelve per cent. (12%) per annum upon the paid-up Capital Stock of this Institution has been declared for the three months ending 31st July, 1919, and that the same will be payable at the Head Office and Branches on and after Friday, the First day of August next.

The Transfer Books will be closed from the 17th to the 31st July, 1919, both days inclusive.

By Order of the Board,
W. MOFFAT,
General Manager

Toronto, 18th June, 1919.

ESTIMATE OF 1919 CROP ACREAGE

THE Dominion Bureau of Statistics has issued the revised estimate of the areas sown to spring grains, potatoes and hay, an estimate of the areas sown to late cereals, and a statement of the condition of grain, grass and potato crops. The estimates, both of area and of condition, are compiled from the returns of crop correspondents on June 30th.

For all crops, excepting rye, the areas estimated now are larger to the extent of one or two per cent. than those reported a month ago as applying to the end of May. The total area under wheat is now estimated to be 17,282,570 acres, spring wheat occupying 16,484,820 acres, and fall wheat 797,750 acres. The area sown to oats is placed at 14,754,150 acres, or 0.3 per cent. less than last year. Barley is 3.017.920 acres, 4 per cent. less; rye, 565,275 acres, 2 per cent. more; peas, 213,283,283 acres, 10 per cent. less; mixed grains, 886,650 acres, 4 per cent. less; hay and clover, 10,662,870 acres, 1 per cent. more, and alfalfa, 196,793 acres, 0.2 per cent. more. In the three prairie provinces the estimated area under wheat is 15,751,700 acres, comprising 2,929,100 acres in Manitoba, 8,972,000 acres in Saskatchewan, and 3,850,600 acres in Alberta; under oats, 9,561,000 acres, comprising 1,715,000 acres in Manitoba, 5.088,000 acres in Saskatchewan, and 432,000 acres in Alberta.

The acreages under late sown cereals and hoed crops are for Canada as follows, last year's final estimates being placed within brackets for comparison:—

Buckwheat, 535,225 (518,097): flax, 1,069,330 (1.068,120); corn for husking, 239,050 (250,000); beans, 166,066 (228,577); potatoes, 712,665 (735,192); turnips, etc., 330,935 (343,037); corn for fodder, 487,115 (502,069). By percentages the area under buckwheat and flax are practically equal to last year, corn for husking and turnips, etc., are 4 per cent. less, potatoes and fodder corn are 3 per cent. less, and beans are 27 per cent. less.

The condition of the principal grain crops at the end of June indicates that for the fourth successive year the yields for Canada will be below those of the decennial average. In Saskatchewan, where more than half the wheat crop is grown, the situation at the end of June was very serious, the grain crops suffering greatly from drought, with high and dry winds. Frost on June 1st, did considerable damage, and barley and oats had, in many instances, to be resown. Heavy rains towards the end of June proved beneficial.

A telegram received from the Saskatchewan Department of Agriculture brings the report up to July 14th as follows:—

"Crop conditions improved during past two weeks. Early sown grain badly damaged by drought, but later sown will make an average crop. In the east central and northeastern districts, and in the northern part of the southeastern district, conditions are above average. In the Regina-Weyburn district an average crop is expected. In the south central, the southwestern, the central, the west central and northwestern districts, the crops will be below average, and, in some parts, a total failure. In the south central, southwestern and west central districts both seed and feed will be needed."

In Alberta the wheat prospects at the end of June were very poor, all grains suffering from lack of moisture.

Owing to drought and intense heat the general outlook is very serious. Cut worms have also done much damage. Throughout Manitoba, on the other hand, the weather has been very favorable to all crops, the rainfall as a rule being plentiful, and on the whole wheat and oats are doing well.

Expressed numerically, the condition for all Canada, in percentage of the decennial average, is as follows, last year's condition on June 30th, being given within brackets: Fall wheat, 102 (71); spring wheat, 90 (86); all wheat, 91 (85); oats, 87 (91); barley, 91 (93); rye, 97 (89); peas, 92 (99); mixed grains, 91 (99); hay and clover, 92 (87); alfalfa, 96 (85); pastures, 100 (88); and potatoes, 95. In Manitoba the condition of wheat is 100, as against 88 last year; in Saskatchewan 91, against 85; and in Alberta 80, against 83.

INCREASE IN CORPORATION TAXES

Investment Institutions Have Been Called Upon to Pay Greatly Increased Taxes During Past Few Years

ONE of the features of the 1919 year book of the Dominion Mortgage and Investment Association which has just been issued is the comparison given in the first appendix of the taxes payable during recent years. The figures are as follows:—

Nature of Tax.	Trust Companies.	Insurance Companies.	Loan Companies.
Corporation	23.00%	41.74%	19.14%
Fees	33.00%	32.56%	3.47%
Special Municipal	71.25%	119.26%	99.33%
Miscellaneous Provincial	100.90%	54.35%	16.69%
Dominion	....	24.72%	....
Total Taxes (a)	31.03%	40.30%	20.21%
Inc. per cent. ordinary taxation of capital	40.90%	30.19%	.08%
All taxes (b) increase per cent to capital	188.88%	35.30%	200.00%

(a) Exclusive of war taxation.

(b) All taxes as given here do not include those paid by the public generally, such as income and real estate, but only those specially imposed upon certain classes of corporations, of which trust, insurance and loan companies form the largest proportion.

Premiums Received and Taxes Paid in Canada by Canadian, British and U.S.A. Life Assurance Companies (1913 to 1917 Inclusive).

From Ottawa Blue Book.

Year.	Premiums Received.	Taxes Paid.	Percentage of Taxes to Prems.
1913	$ 38,641,206	$ 605,947.90	1.57
1914	41,094,095	657,631.67	1.60
1915	45,106,678	*1,028,920.28	2.28
1916	48,093,105	964,519.78	2.05
1917	54,843,609	1,137,097.22	2.07
	$227,778,693	$4,414,116.85	1.94

*Ontario premium taxes for 1914 in dispute were paid in 1915 in addition to regular 1915 taxes.

Taxes Paid by Certain Corporations to the Province of Ontario in 1910, 1915 and 1918.

Nature of Companies.	1910.	1915.	1918.
Life insurance	$104,663	$416,342(a)	$325,332
Fire insurance	44,710	95,069	134,499
Miscellaneous insurance.	11,835	31,331	41,836
Total	$161,208	$542,742	$501,667
Loan companies	24,682	58,048	57,036
Trust companies	7,945	26,741	28,131
Total	$193,835	$627,531(a)	$586,834

(a) The higher amount paid in 1915 by the insurance companies is accounted for by the fact of several companies withholding payment of the tax pending the result of a lawsuit in which its legality was questioned.

COBALT ORE SHIPMENTS

The following is a statement of the shipments of ore, in pounds, for the week ended July 18th, 1919:—

Northern Customs Con., 85,757; Cobalt Provincial, 40,000; Penn Canadian, 62,571; Mining Corporation of Canada, 217,848; Buffalo Mines, 257,206; McKinley Darr. S.M., 165,730; total, 829,112.

The total since January 1st is 15,114,666 pounds, or 7,557.3 tons.

INVESTMENTS AND THE MARKET

Brazilian Net Earnings Up—Maritime Telegraph and Telephone Will Get Raise in Rates

Brazilian Traction, Light and Power Co., Ltd.—The following is a statement of earnings and expenses, including those of subsidiary companies, for the month of May:—

	1919. Milreis.	1918. Milreis.	Change. Milreis.
Total gross earnings .	$ 9,562,000	$ 9,030,000	+$ 532,000
Operating expenses ..	4,345,000	4,388,000	— 43,000
Net earnings	5,217,000	4,642,000	+ 575,000
Aggregate gross earnings from Jan. 1st	44,594,000	40,606,000	+ 3,988,000
Aggregate net earnings from Jan. 1st	23,473,000	19,919,000	+ 3,554,000

Dominion Telegraph Co.—The 50th annual meeting was held at the company's office in Toronto on July 9th, and the annual statement presented in the usual form. The company's lines are leased to the Western Union Telephone Co. under terms of the agreement extending to 1978 for which the Dominion Telegraph Co. receives 6 per cent. upon its capital stock of $1,000,000. The present statement of assets and liabilities shows, on the asset's side, capital expenditure of $1,281,819, Toronto Grey and Bruce Railway bonds with interest $1,595, and cash in bank and on hand $22,914. On the liability side there is paid-up capital of $1,000,000, dividend payable July 15th, $14,000, and a balance at the credit of profit and loss of $290,978.

Dunlop Tire and Rubber Goods Co.—Shares of the Tyre Investment Trust, Ltd., are being offered in England. The authorized capital of this company is £1,600,000, of which £1,000,000 is cumulative preference shares which are offered for sale at par. The rest of the stock consists of £550,000 preferred ordinary shares and £50,000 of ordinary shares. It is a holding company its assets consisting principally of holdings in the Dunlop Rubber Co. (far east) and the Dunlop Tire and Rubber Goods Co., Ltd. (Canada), of the common stock of which it holds $700,000. The Tyre Investment Trust, Ltd., was incorporated in 1917.

Porto Rico Railways Co., Ltd.—Earnings for June were as follows:—

For June:			
Gross	$ 84,792.40	$ 69,191.73	$ 4,399.33
Net	39,928.71	33,112.49	6,816.22
Six months:			
Gross	506,746.60	567,969.56	61,222.96
Net	230,129.92	210,121.34	20,000.58

Maritime Telegraph and Telephune Co.—The board of public utilities has ordered a new scale of rates amounting to about twenty per cent. increase. It will yield about $180,500 additional revenue, of which $155,000 is to be paid in increased wages and the balance is consumed in taxes that have been levied since the war began in 1914. The chief feature of the increase is the establishment of the measured service system for business telephones in the city of Halifax. The business telephone flat rate is increased $3 a year, and the maximum number of messages that may be sent for that sum is sixty per month. After that number, the charge is to be three cents per word up to 100, and two and a half cents on all words over 100. The added charge on all telephones over the province is three dollars per instrument.

NEW BRUNSWICK WILL RAISE TIMBER CHARGES

The New Brunswick government has announced an increase in the rates of stumpage to be charged on practically all soft wood logs cut on crown lands of the province. The increase will be effective from August 15th. It amounts to approximately one-third and is expected to yield an additional $150,000 of revenue.

INTEREST ACT OF CANADA

Decision Regarding Interest Allowance on Principal Repayments

SECTIONS 6 and 7 of the Interest Act of Canada contain the following provisions:—

"6. Whenever any principal money or interest secured by mortgage of real estate is, by the same, made payable on the sinking fund plan, or on any plan under which the payments of principal money and interest are blended, or on any plan which involves an allowance of interest on stipulated repayments, no interest whatever shall be chargeable, payable or recoverable, on any part of the principal money advanced, unless the mortgage contains a statement showing the amount of such principal money and the rate of interest chargeable thereon, calculated yearly or half-yearly, not in advance.

"7. Whenever the rate of interest shown in such statement is less than the rate of interest which would be chargeable by virtue of any other provision, calculation or stipulation in the mortgage, no greater rate of interest shall be chargeable, payable or recoverable, on the principal money advanced, than the rate shown in such statement."

Supreme Court Case

In the case of the Canadian Mortgage Investment Company vs. Cameron, decided by the Supreme Court of Canada, Cameron had given a mortgage to the Investment Company containing the following covenants on his part:—

"First: That he will pay to them, the said mortgagees, the above sum of one thousand four hundred dollars and interest thereon at the rate hereinafter specified in gold or its equivalent at the office of the said mortgagees at the city of Toronto, in the province of Ontario, as follows: That is to say, in instalments of one hundred and seventy-nine 90/100 dollars half-yearly on the 24th days of June and December, in each year, until the whole of said principal sum and the interest thereon is fully paid and satisfied, making in all ten half-yearly instalments. The first of said instalments to become due and be payable on the 24th of December, 1907. All arrears of both principle and interest to bear interest at ten per centum per annum as hereinafter provided.

"Secondly, that he will pay interest on the said sum or so much thereof as remains unpaid at the rate of ten per centum per annum by half-yearly payments on the twenty-fourth days of December and June in each and every year until the whole of the principal money and interest is paid and satisfied, and that after maturity interest shall accrue due at the rate aforesaid from day to day, and that interest in arrear, whether on principal or interest, and all sums of money paid by the mortgagees under any provision herein contained or implied or otherwise, shall be added to the principal money and shall bear interest at the rate aforesaid, and shall be compounded half-yearly, a rest being made on the twenty-fourth days of the months of December and June in each year until all such arrears of principal and interest are paid; and that he will pay the same and every part thereof on demand."

The question for the decision of the court was whether the covenants quoted above contain the "statement" required by section six of the Interest Act. If so, the mortgagor was liable to pay the interest called for by the mortgage, if not, the Investment Company would be unable to collect.

The Supreme Court of Canada held that the above covenants were sufficient, and that a special statement, complete in itself showing that the amount of such interest and the rate is not required.

"Now the covenants in Cameron's mortgage stated with perfect clearness that each of the stipulated half-yearly instalments contain a sum charged for interest at the rate of 10 per cent. payable half-yearly and that interest, at this rate, is chargeable under the mortgage and payable at such intervals. That, I think, is a sufficient compliance with the Statute," said the court.

EXPRESS RATES MAY BE RAISED

Railway Commissioners Authorize Increase in the General Merchandise Scale, but Not in Commodity Rates

THE judgment of the Dominion Board of Railway Commissioners on the application of express companies for increased rates was issued a few days ago. Increases in the rates for such commodities as perishable goods are refused on the ground that "it is not to the public interest, and not to the interest of the express companies themselves, to afford the excuse that a raise in the price of transportation of these essential commodities would give for still higher charges against the public." The judgment finds, however, that the railways and express companies are carrying on business at a large loss. In order to increase receipts and make good this loss, increases are allowed in the general merchandise scale, and in the special scale "N". The increases in the general merchandise scale amount to, taken over the whole country, an average increase of 45.94 per cent., in Eastern Canada; 23.75 per cent. on the Prairies; and 11.48 per cent. in British Columbia.

The higher rate of increase in eastern Canada results from the abolition of discriminatory rates and extending similar treatment to all districts. The result, having regard to the express rates in the three different sections of the country, is as follows:—

At the present, express rates an the prairies average 39.55 per cent. higher than those of eastern Canada, they become only 17.88 per cent. higher. The present rate in British Columbia averages 29.29 per cent. over the prairie rates, this percentage will be reduced to 15.01.

The increase in scale "N" is tempered by changes in the basing and graduate tables, and the reduction from the first class by absolute, instead of average, deductions. The result of the increase in this scale will be to increase the cost per pound by one-fifth of a cent for the 50-mile distance, and for a movement of 450 miles to increase the cost of transportation two-fifths of one cent per pound. In like manner, the increase per dozen eggs in shipments of two cases and upwards (the usual shipment) is approximately one-third of a cent, the actual increase being .366 of one cent, and on a movement of 450 miles the increase is not quite three-quarters of a cent, the exact figure being .73 of one cent.

The companies' wagon service is materially extended, and on the basis of population, thus relieving many populated districts of Montreal, Toronto and other cities that have not had the benefit of a wagon service. Over and above this, however, a radical change is made as to the companies' tariffs, as they will have in the future to carry goods at a lower rate when originating in or being delivered to points without wagon service, thus removing a discrimination which has been much objected to. Between points where no delivery service exists, a reduction is made, having regard to the appropriate graduate table, of 30 cents per 100 pounds, and between points where but one wagon service exists of 15 cents per hundred pounds.

Important concessions are made in case of traffic, by extending the pound unit from 10 to 15 pounds, and by recasting the graduate table under multiples of five, both as to the price and weight, as against the companies' proposal of table based on multiples of ten. Effect is being given to the special complaint of Prince Edward Island against the proposed 25-cent arbitrary charge in connection with the ferry service between Port Borden and Cape Tormentine.

TORRENS SYSTEM IN UNITED STATES AND CANADA

At the Inter-State Realty Convention, held last week in Victoria, B.C., one of the subjects discussed was the Torrens system of registering land. Mr. Worrall Wilson, president of the Washington Title Insurance Co., spoke on "Ideals in Title Service." After dwelling at some length on the relationship of the title man to the realtor, Mr. Wilson said that to British Columbians, reared in the midst of a system of Torrens registration, it might seem strange that in listing ideals of title service he had not mentioned as an ideal the introduction of a universal system of Torrens registration with the United States. The omission, he said, was intentional and not accidental, because in no instance in the United States has the use of the Torrns system, even though fostered by powerful political machinery as in Chicago, or by all the power of a great newspaper editor, aided by zealous enthusiasts in California—in no instance has the use of the Torrens system reached a degree of success that made it at all a formidable rival of other systems. "The majority of our states have Torrens registration laws, and yet in all but three or four of these states the laws have become a dead letter, despite various attempts to tinker with them and revive them, and several states, including both Oregon and Washington, have passed supplemental laws providing simple methods by which lands registered under the Torrens system may be withdrawn and re-entered under the old recording system.

"Why is it that the system which is in successful operation in a large portion of Canada and Australia has repeatedly proven a failure in the United States? Without going into the exhaustive details of legal discussion, I may briefly state this conclusion, that whereas, in Canada, under your system of jurisprudence, your registrar has in many instances the power of our judge and jury and court of appeals all assembled in himself. With us the exercise of such sweeping powers by a purely administrative officer has been held entirely unconstitutional. Therefore, our Torrens laws are long, involved and complicated affairs, which require so much court action, with opportunities for appeal, that the expense, delay and uncertainty involved have rendered them quite unworkable from a practical standpoint, and we have fallen back upon other expedients for providing title evidence."

The Victoria bank clearings for the week ended July 17th were $2,530,556, compared with $2,303,638 last year.

LESS INSURANCE LEGISLATION THIS YEAR

Report of Association of Life Insurance Presidents Shows That Increased Business Has Not Brought Increased Legislation

THIS year's output of legislative proposals of interest to the institution of life insurance in the United States shows a reduction of twenty-five per cent. Where during the last "on" legislative year, 1917, it was necessary to examine 2,300 measures, this year's total is only 1,700. The volume of laws enacted concerning life insurance also shows a substantial decrease. These and other matters are referred to in the thirteenth annual legislative report to the Association of Life Insurance Presidents recently presented by Manager George T. Wight. This report, which covers the legislative season up to June 6th, at which time only a few matters of interest were still pending, is, in part, as follows:—

"Coincident with a year that marks the greatest popular recognition of life insurance thus far recorded in its history, comes an interesting, even if temporary, change in the legislative attitude toward life insurance. The amount of insurance protection acquired thus far this year in the United States clearly indicates that 1919 will far outstrip any previous year's record of new business written. With only a few legislative bodies still in session, out of the half hundred scheduled for meeting, the year will show noteworthy reduction in the number of legislative proposals requiring consideration on behalf of policyholders and their company trustees.

"This is the thirteenth annual legislative season in which our association has sought to do its share in representing the common interests of policyholders and companies, in connection with measures pending before state legislatures and Congress. It has been the 'on' year with the legislatures, nearly all of the states having held sessions, as against the 'off' or even numbered year, when only a dozen or so legislatures meet in regular session.

"Besides Congress, legislatures have met in regular session in 43 states and two territories thus far this year. All except seven of these have adjourned and most of these seven are on the point of concluding their work. One regular session in the south, a special session in the Middle West and another in the southwest are all that remain to convene. The total number of legislative sessions that will have been held this year is an even 50 in 47 states and territories.

"The 1919, legislative season shows a 25 per cent. reduction in the number of legislative proposals of interest to the institution of life insurance. Up to this time in 1917, the last 'on' year, the number of bills received and requiring examination by this office was 2,309; this year the number up to date is 1,720—a reduction of nearly 600. The year 1915, still holds premiership in the introduction of bills requiring examination in behalf of life insurance, there having been eight more introduced that year than in 1917.

"To determine whether this year's unusual falling off in legislative proposals was peculiar to life insurance or typical of a general legislative trend, inquiry was made into the number of all measures introduced in the states this year, as compared with 1917. This disclosed that up to this time two years ago, the proposals totalled 53,414 as against 45,381 thus far this year. Therefore, the falling off in the number of legislative bills generally this year, as compared with two years ago, exceeds 8,000, or about 15 per cent., as compared with a 25 per cent. reduction in life insurance measures."

The central theme of the world convention on advertising, which will be held in New Orleans, September 23rd to 25th, under the auspices of the Associated Advertising Clubs of the World, will be the promotion of advertising as an instrument of importance in bringing about such an understanding between capital and labor as will ensure maximum production.

RETAINING A BANK'S CUSTOMERS

Time of Greatest Danger of Losing an Account is When the Customer Feels He Has a Grievance

COMPETITION is so keen among Canadian banks and the service rendered by the different banks is so similar that the switching of an account appears, at first sight at least, to be a simple matter for the customer. Any such action on the part of the customer may result from some difficulty which is merely temporary and the bank which he leaves might still through its more intimate knowledge of his business affairs have rendered better service than the bank to which he transfers his account. The June number of the "Teller," issued by the Sterling Bank of Canada, suggests means by which the bank manager may retain business. The article says:—

"Did you ever notice how easily some persons handle complaints? A customer will rush into the manager's office with fire in his eye, and come out in a short time, smiling and fully satisfied. How was he so easily appeased? There is no secret about the proper method of handling complaints. But because everyone is human, it is a mighty valuable thing to know the right way. When a customer comes to you with a complaint, remember, he thinks he has just cause for it. He may exaggerate, but there is a sound action at least for his complaint. Of course there are a few pessimists who find fault with everything, but fortunately they are not very common.

"The first thing to remember is: Listen quietly while the customer tells his story. By this alone you show him that his complaint is worth listening to, and put him in a better frame of mind. Put yourself as much as possible in the customers' place. Try to see how you would feel if the incident had happened to you. By so doing, you will be able to deal more intelligently with him.

"If there has been a mistake, admit it. Overlook the exaggerations. Show the customer he has a right to feel annoyed. Thank him for calling your attention to it. Tell him the bank wants to render the best service at all times—that it is through customers like him that the service is improved. If there is any excuse to offer, make it briefly, but don't try to justify the mistake. Express your annoyance that a good customer has been put to inconvenience and repeat some of the annoyances that your customer has mentioned, admitting how great they must be.

"By this time the customer is in a more agreeable frame of mind. He came to you expecting opposition and when he did not meet it—to use an old expression—'the wind was taken from his sails.' You have admitted the mistake, have been annoyed that it occurred, and he is generally mollified.

"The more common way—and the wrong way—is to try to belittle the offense. And as this is rather what the customer expects, he is ready for it. The more you argue the greater the offense appears until presently, the customer believes that he has a real grievance. In this way the bank sometimes loses a good customer over a trivial matter that could easily have been smoothed over.

"The main points to remember are: First: Listen quietly to the customer's story—let him tell the whole story. Second: Get his viewpoint as much as possible—admit the mistake and agree that the annoyance must be very great. Thank him for bringing the matter to your attention. Third: State briefly the reason for the mistake. Fourth: Express your annoyance that the mistake occurred and that you cannot blame your customer for feeling annoyed.

"By this method of treating complaints, the customer goes away feeling that the bank is at least trying to render the service it advertises, and that the officers of the bank have a sincere interest in his affairs."

The Winnipeg Board of Trade has issued a booklet, describing the city's advantages as an industrial site. The city's central position as regards the whole of the American continent is emphasized, and also its railway facilities.

WINNIPEG POWER PROJECT

Scheme was Originated Before War—No Financial Outlay for Winnipeg Electric Railway Co.

SIR AUGUSTUS NANTON, president of the Winnipeg Electric Railway, has issued the following statement regarding the power development scheme to which reference has already been made in these columns:—

"Various reports have appeared in the Winnipeg newspapers recently with reference to the new hydro-electric development at the Great Bonnet Falls on the Winnipeg River. In some of the articles the statement is made that the Winnipeg Electric Railway Company is financing this project, and the inference is drawn that the financial condition of this company is not as bad as it was represented to be when application was made for increased fares.

"The real facts are these: During the period of industrial expansion preceding the war it became evident that this company would require a large quantity of electrical energy to meet the increasing demands being made upon it for additional power. Believing in the future of Winnipeg, and looking forward to its becoming a great industrial centre, the Winnipeg Electric Railway Company became interested in the formation of the Winnipeg River Power Company, the object of which was to secure and develop the power site on the Winnipeg River, known as the Grand du Bonnet Falls. The Winnipeg Electric Railway Company also acquired the charter of the Winnipeg River Railway, as it was necessary to build a railway from Lac du Bonnet station on the C.P.R. into the new power site, a distance of some 14 miles.

"At that time everybody was prosperous, including the Winnipeg Electric Railway Company, and the railway was built under the charter above mentioned and financed by Winnipeg Electric Railway Company. Plans were drawn and all arrangements made to proceed with the power development by the Winnipeg River Power Company; in fact, the money had been tentatively secured for the purpose. Unfortunately, war broke out, and this money was not available, and the whole thing came to a standstill and remained so during the war. As soon as the war was over we again commenced to revive our plans for the continuation of this work (which is so necessary to the development of the city of Winnipeg), and to provide the Winnipeg Electric Railway Company with electric power. Unfortunately, the depression caused by the war played havoc with the finances of the Winnipeg Electric Railway Company, and put it in a position where it is unable to assist in the financing of this big project. It, therefore, became necessary to seek other means to get the work underway.

Northern Construction Co.

"The Northern Construction Company, who built a large part of the Greater Winnipeg Water District aqueduct, and of which A. C. Mackenzie is the president, became interested, and entered into an agreement with the Winnipeg River Power Company to build the dam on the river and finance the cost until such time as the bonds of the undertaking could be sold. The construction company did this, realizing the immense possibilities of this project, feeling quite certain that there would be no difficulty when the money markets become a little steadier to secure all the money necessary on the security of the undertaking itself, to complete the development.

"The contract of the Northern Construction Company for the building of this dam involves no cash outlay whatever by Winnipeg Electric Railway Company. The only obligation of the latter company is that it has guaranteed the payment of the 1919 operations, which guarantee, however, will in all probability never be enforced, as no money will be due the construction company until the fall of 1920, and by that time I have no doubt at all the bonds of the power company will be sold and sufficient finances provided to carry on the work.

"In view of the fact that all government bodies have been urging private enterprises to expand and provide as much work as possible during the reconstruction period, I feel sure that the citizens of Winnipeg will be delighted to learn that an immense project of this kind has been launched, particularly as it will give employment to a large number of people, will provide plenty of cheap power for many years to come, and be an important factor in the industrial development of the city of Winnipeg.

CHARTERED ACCOUNTANTS OF ONTARIO

The 36th annual meeting of the Institute of Chartered Accountants of Ontario was held at Peterborough on Saturday, 19th July. Mr. W. R. Morris, F.C.A., of Peterborough presented his address as president for the past year, this address showed general advancement. The 15 candidates who passed the final examination brought the membership up to 245. Two members were killed in the Great War—Lieut. A. G. Eddis and Private G. T. Pillow.

Mr. Morphy presented the report of the Board of Examiners, Mr. W. B. Tindall of the Library Board, Mr. Dilworth that of the representatives on the Council of the Dominion Association and Mr. Morphy that of the Students' Society. On the subject of Education of Accountant Students the following representatives created an interesting discussion with special reference to out-of-Toronto students —Mr. G. L. Blatch of Ottawa, Mr. A. K. Bunnell and Mr. C. J. Parker of Brantford, Mr. Burns of Kingston and Mr. F. G. Short and Mr. Huston of Toronto.

About 200 ballots were cast for members of the council for the ensuing year and the scrutineers announced the following elected: Mr. A. K. Bunnell of Brantford, Mr. R. E. Burns of Kingston, Messrs. G. T. Clarkson, R. J. Dilworth, J. W. Eddis, George Edwards and Edmond Gunn of Toronto, Mr. F. G. Jewell of London, Mr. Arnold Morphy of Toronto, Mr. W. R. Morris of Peterborough and Messrs. A. C. Neff, Bryan Pontifex, Mr. M. H. Robinson, T. W. Sime and Rutherford Williamson of Toronto. Messrs. Dilworth, Neff and Pontifex were re-elected representatives of Ontario on the Council of the Dominion Association. At a subsequent meeting of the Council, Mr. R. J. Dilworth, of Messrs. Clarkson, Gordon and Dilworth was elected president for the ensuing year, Mr. M. H. Robinson, of Messrs. G. A. Touche and Company, first vice-president and Mr. Rutherford Williamson, of Messrs. Williamson and Company, second vice-president, Mr. Arnold Morphy was for the twelfth time re-elected secretary-treasurer.

The annual convention of the Dominion Association of Chartered Accountants will be held this year at Winnipeg, under the auspices of the Manitoba Institute in September.

BRITISH COLUMBIA MINING PRODUCTION

Production of British Columbia mines in 1918 was worth $41,782,474, an increase of $4,772,082, compared with 1917. The following details show the respective quantity and value of the various metals and miscellaneous products represented by the 1918 figures: Gold placer, 16,000 ounces, value $320,000; gold lode, 164,674 ounces, value $3,403,812; silver, 3,498,172 ounces, value $3,000,000; lead, 43,899,661 pounds, value $2,928,107; copper, 61,483,754 pounds, value $15,143,444; zinc. 41,772,916 pounds, value $2,899,040; coal (long ton), 2,302,245 tons, value $11,511,225; coke (long tons), 188,967 tons. alue $1,322,769; miscellaneous products, value $1,038,202. Total, $41,782,474

Included in the introduction to the report of the provincial department of mines are two tables showing the gradual development of the mining industry in British Columbia. Table one includes the total production for all years up to and including 1918. The total value of the various metals produced during that period is given as follows: Gold placer, $75,436,103; gold lode, $97,121,786; silver, $46,839,631; lead, $42,294,251; copper, $145,741,069; zinc, $13,278,058; coal and coke, $187,147.652; building stone, bricks, etc., $28,843,272; miscellanous minerals, etc., $651,759. Total, $637,353,581.

THE VALUE OF THE MIDDLEMAN

Efforts Have Frequently Been Made to Eliminate Intermediaries But Their Value Has Been Demonstrated by Experience

A VERY competent defence of the distributing system in Canada was made before the Commission on Industrial Relations by Mr. E. M. Trowern, secretary of the Dominion Board of the Retail Merchants' Association of Canada. Mr. Trowern said in part:—

"It is not generally known that there are many more millions of dollars invested in distribution than there are in either manufacture or production. It could not but be otherwise; merchandise must always be manufactured ahead of the immediate demand. Goods produced or manufactured in Vancouver are of no value to people residing in Halifax unless they are transported to the latter point. To do this, it requires negotiation, purchase, transportation, warehouse facilities, retail facilities, etc., and final delivery to the ultimate purchaser in single items. A host of transactions take place before the goods are finally delivered. All these separate transactions cost money and take time and intelligence in addition to 'capital,' which cannot be regarded in any other light than 'accumulated industry.'

"We are quite aware that arguments have been put forth for centuries striving to discover some plan whereby goods produced or manufactured can be handled direct to the consumer, and to have the middleman—which means either the wholesaler or the retailer—removed. All efforts in this direction have been failures, and they always will be failures, because the present system has been a natural development that has grown out of actual necessity. Prunes or raisins grown in South America or in Egypt are of no value to consumers in Ottawa unless they are brought directly to their tables here. No consumer would think of ordering such things direct, or having them shipped in small quantities; they must come in bulk. When they arrive they must be cared for, protected against weather and other conditions, sold to the retail trade, and distributed by them to their customers.

"The value of the land and buildings upon which retail stores are situated, together with the value of the wholesale properties, exceeds in value and is more highly assessed than any other property in any municipality. Add the value of all the retail property in Canada together, couple with it the value of the stocks which are held waiting, ready and near at hand for the convenience of those who want the goods, and then add the value of all the wholesale property and merchandise to the retail property, and you have a volume of wealth that far exceeds the value of all our farming and manufacturing industries. This costly and expensive system exists because it is required and because there is no other legitimate system that can take the place of it. It has been found to be the most economic, convenient and elastic system that can be provided, and it has developed through necessity and experience. There is no practical proposal or scheme in sight that can take the place of our present system of distribution. It requires adjusting here and trimming there, but the underlying principles cannot be abolished. We are anxious to go on and develop it and make it more complete and convenient. This can only be attempted by those who practically understand the principles which guide and direct it. No improvement can come from any other source.

The Co-operative Movement

"All attempts that have been made by those who operate 'co-operative societies' in any part of the world have proved to be nothing more than the old scheme of one merchant endeavoring to outwit his competitor, by trying to tell the public that his goods and his system are far superior to those of his neighbor, whereas the so-called Co-operative Society system is clumsy in its operations, inferior in its service, and its methods of handing back so-called dividends or bribes to its customers, have all the deceptive elements of the Trading Stamp scheme.

"To those who are not acquainted with the problem of retail merchandising, and from the manner in which some of these Co-operative Societies advertize themselves, and their supposed superior methods, it is not surprising that those who are unfamiliar with the 'tricks of trade' see some virtue in their proposals, but those who are thoroughly familiar with trade, and who are anxious to have all trade transactions based upon a sound, healthy, moral basis, known full well that any system of merchandizing that is based upon the placing of a higher price on any article to a customer, and then handing the increased price back as a bonus or a dividend or a bribe to secure and hold the trade, by or through any pretext whatsoever, is wrong in principle and commercially unsound, and it is for this reason that reputable and honorable retail merchants will have nothing to do with business methods of that character.

"If the claims put forth by these so-called Co-operative Societies were true, and the principles upon which they are founded were correct, every one conducting a retail store would adopt the same system, but the co-operative system is not adopted because the principles upon which they are founded are commercially unsound, and their methods can never appeal to those retail merchants who want to see the retail trade of Canada placed upon a higher plane.

"Believing, therefore, that we, as retail distributors, are an absolute necessity, and that our services cannot be dispensed with, we feel that we have an important duty to perform in every community throughout Canada, and we further believe that owing to our financial position, our absolute necessity, and our numerical strength in every city, town, and village throughout Canada, that no question affecting what is termed the 'working classes' or the 'manufacturers' or 'producers' can be intelligently considered without taking the great problem of distribution into consideration as well.

Increased Costs Must be Shifted

"Retail Merchants stand in a very unique position in every community. They reach out and take the goods from the producer and manufacturer and hand them to the consumer. Every increase that is made to any article, whether it is through increased wages, the increased cost of raw materials, increased transportation, increased rent or the increased overhead expenses of every class through whose hands any product passes, is collected again by the retail merchant from the consumer. The higher wages go, the higher will go the prices of the articles created by the wage earners. The circle is complete, and no system of reasoning can alter this truth. The law of supply and demand is the basic law upon which everything is founded. The dearer goods are the less profit the retail merchant makes, as the demand is lessened, and his business turnover is, therefore, less.

"In order that workmen can be able to purchase all those things that are necessary for their actual comfort, they must receive a salary more than equal to the value of the actual things required so as to enable them to lay aside sufficient for old age, etc. If wages keep climbing up, merchandise will go on climbing up, and there is no scheme that can be proposed that will prevent it. If wages climb higher on one class of goods than they do on others, the workmen will be limited to fewer classes of goods and their comfort will be affected thereby. If, for instance, a working man received twenty-five dollars a week, and with that sum he could pay his rent, buy groceries, meat, fuel, light, clothing, boots, and other actual necessities, and his rent was doubled, he would be compelled to forego purchasing some of the other articles of necessity, and having to do without these necessities, he would immediately become discontented. On the other hand, whatever necessities he economized on, it would injure the retail merchant who handled those lines, and he in turn would have to undergo the same weeding-out process as that undertaken by the wage earner.

"These simple illustrations are made for the purpose of showing how closely the affairs of every community are interrelated, and whenever one class is affected all classes are affected.

"Our purpose in submitting these brief views on the problem of retail distribution, which is one of the most difficult problems for those who have had no practical experience in it to understand, is to point out that there is more capital invested, and more people employed in distribution, than there is in production and manufacture combines, and that, in our opinion, no plan, no scheme and no device that can be suggested can ever alter it unless we turn our plan of civilization backward and all begin again to be tillers of the soil and makers of things we used and require. No one would be satisfied to go back again to the simple life of making our own candles, and using flint instead of matches, and using a spinning wheel to make clothing out of sheep's wool. We have experienced life's comforts and we want them, we must pay for them. A meal provided in a million dollar hotel will always cost more than a meal provided in a tent. There is a price ticket on everything. The best things cost the most, and if we desire them we must be prepared to pay for them or go without them.

"To properly consider the subject we have before us, we must take conditions as we find them to-day, and not as they were a century or two ago. To-day we have public school systems all over the world. Boys and girls, and men and women, have been educated to try and think. In every sphere of activity we see development. We find improved machinery in all lines of manufacture and production. We have labor saving devices and we have transportation facilities that are unequalled in any age of the world. We have new devices for transportation, such as automobiles, automobile trucks, aeroplanes, bicycles, etc. In electric power and electrical devices we are in advance of anything in the history of the world. In telephones, telegraphs and cables, our advances are phenomenal, and all this with the many other new inventions such as gramophones, etc., which can produce the human voices, all these things have been brought about by those who have been educated to think, to diagnose, to investigate and to study.

"While the thousands who have been giving their attention to the above commercial improvements have succeeded, another class has been thinking along other lines, but their thinking has produced different results.

"It is said that a little learning is a dangerous thing. In many cases this has proven to be true. Not having had practical experience and an opportunity of giving any study to the great problem of distribution, the rock upon which thousands of persons engaged in other walks of life become shipwrecked is where they venture out upon its dangerous surface. These persons who have not had a proper commercial training advocate among other things the following:

"1. The abolition of the middleman.
"2. Direct purchase and sale between producers and consumers.
"3. Municipal trading in coal, wood, milk, and other articles of common use.
"4. Public retail markets to enter into competition with tax-paying retail merchants who carry vegetables all the year round, whereas consumers cannot buy vegetables in the market when the temperature is below freezing point.
"5. Without knowing the unsound, commercial basis upon which socalled 'Co-operative Societies' are established, they advocate their adoption.

"We wish, therefore, to repeat that the most difficult problem of all problems for the average student of political economy to understand is that of the distribution of merchandise at retail. It has puzzled wise men before corn was sold in Egypt, and it will puzzle wise men and economists until the crack of doom. Retail merchants have been on earth for centuries, and they will be here for all time. You can devise no plan that will abolish them because they are an important and essential part of every municipality. Their chief desire is to be allowed to do their business on a sound, business basis, and their chief enemy is municipal and legislative restrictions that are proposed to be placed upon them by those who do not understand the simplest principles of buying and selling."

WANT MORE RAILWAYS ON VANCOUVER ISLAND

The annual convention of the Associated Boards of Trade of Vancouver Island was held in Courtenay, B.C., on July 10th. The principal proposals endorsed were the extension of the Esquimalt and Nanaimo Railway to the northern end of the island, the construction of some twenty-two miles of road to open up the Sayward district to settlement, and the continuation of the Strathcona Park road.

GREAT NORTH INSURANCE COMPANY

The company's annual statement for the year 1918 shows that assets on December 31st totalled $325,484, bonds and other securities totalled $78,223, cash $33,509, and bills receivable, $19,977. There is also included in assets the capital stock subscribed but uncalled amounting to $163,854; the balance is made up of accounts receivable, premiums uncollected, etc. On the liabilities' side there are insurance reserves totalling $49,498, amounts owing to other companies for re-insurance but not yet due, $8,631, and losses in the course of adjustment estimated at $7,833. The total capital subscribed is $221,700, of which $46,731 has been paid up in cash and $11,114 in notes. Over and above liabilities, including subscribed capital, the balance sheet shows a net surplus of $27,562.

FACULTY OF ACTUARIES IN SCOTLAND

The ordinary general meeting of the Faculty of Actuaries in Scotland was held in Edinburgh on June 23rd. The president, Mr. G. M. Low, was in the chair. In moving the adoption of the report, he said that a long period of enforced inactivity and of painful trial and suspense had been brought to a close, and they were now at the beginning of a new chapter in their history. They thought not only of those who had returned to them victorious, but more especially of their honored dead. Perhaps the council would see their way to set up some simple memorial that would keep their memory ever green. To their returned warriors they extended a hearty welcome. He trusted that those of them who were resuming their studies would find some advantage from the arrangements devised for facilitating these and shortening the time that necessarily elapsed before they could attain the full qualification as members of the Faculty. It was now proposed to dispense with the first or purely mathematical examination where a student had taken a degree in mathematics at an approved university, and now the question of the admission of women to the Faculty in terms of the new rule was before them.

With regard to finance, he had come to the conclusion that he could say nothing that would be of real profit to his fellow-members. Anything that he might say would have to be in the domain of prophecy, a region where he found himself little at home. The data for forming any opinion as to the future value of money and investments were as patent to them as to him, and it depended very much on a man's temperament whether in such a chaos of conflicting tendencies an optimistic or a pessimistic view be taken. Those who were concerned in guiding the great interests of life insurance had in the past acted wisely when they provided in the premiums and valuations those safety margins which had stood in such good stead in the times they were passing through. People were insuring their lives more readily and for larger sums than before, led, no doubt, by the consideration that the altered value of money and the heavy pressure of taxation demanded greater protection for themselves and their families.

Dr. A. E. Sprague, of the Edinburgh Assurance Co., was elected president for the ensuing year, and Mr. James Fenton was appointed honorary secretary and Mr. S. F. M. Cumming honorary treasurer.

The British Canadian and General Investment Company, Limited

At the Eighth Annual General Meeting of the Company held on the 2nd July, 1919

THE CHAIRMAN said:

I do not think the accounts require any very detailed comment. The revenue received is almost identical with that of last year, the improvement in the profits being due to a reduction in the amount payable for income tax and also in the expenses of Management.

The net result is, that after providing for our dividend, we have increased our surplus funds by about £1,600.

Our Affiliated Companies in Canada have continued to suffer from the stagnation in City Properties and the effect of the Moratorium Acts, although their latest reports show distinct signs of improvement. We have recently had the pleasure of meeting three of the Directors of the Regina Companies in which we are largely interested, General Embury, Colonel Parsons and Major Macpherson, and I think I may say that they are feeling hopeful as regards the future of these Companies.

I should like to mention here that General Embury, whose name has appeared in dispatches with almost montonous regularity, and Colonel Parsons have served with great distinction throughout the war and have been awarded the C.B. and C.M.G. and the C.M.G. and D.S.O. respectively. I think you will wish me to offer them both our sincere congratulations.

We have only taken credit in our accounts for interest and dividends actually received and there is a considerable amount of arrears of interest due to us which we are holding in suspense as it is impossible to say how the sums which have accumulated under the Moratorium Acts will eventually be dealt with.

I have dealt with this question at length on previous occasions and I will say no more about it now beyond mentioning that all efforts to obtain any amendment of these Acts have been fruitless, and that in my judgment their operation has created a problem which it will not be easy to solve.

You will, I think, be interested to know that during the current year we have secured an important Trusteeship for a Debenture issue of £3,000,000.

I have always felt, that the problems of peace would, in many ways, be more difficult than those of war, mainly because whilst the war was in progress all our energies were concentrated on one object, namely to bring the struggle to a successful conclusion, while now we have a thousand and one matters of the utmost complexity and difficulty to deal with, all clamouring for instant and simultaneous attention. One of the most important of these matters is, of course, the industrial situation, and upon the successful solution of this question much, if not everything, depends. Industrial unrest is worldwide and has, as you know, affected Canada no less than other countries. The latest news on this subject is however, much more hopeful, and I feel fairly confident that these difficulties in that young and vigorous community will be surmounted much more easily than I am afraid is likely to be the case in England.

If the industrial question is satisfactorily arranged I feel sure myself that the future of Canada promises to be very bright. She has been highly tried during the war and has not been found wanting, and she emerges from it with a well-founded knowledge of her capacity and power which may mean much for her future well-being and progress.

I have spent a good deal of time in endeavouring to ascertain the feeling of representative Canadians and Americans on this point and I find them all of the same opinion. The American view is especially important in view of the great capital resources which, as a result of the war, the United States now possess.

That these resources will be freely placed at the disposal of Canada to assist legitimate enterprises seems to me certain, and this point, seems to me one of much importance for the rapid development of the great natural resources of the Country.

In an article on this subject in the *New York Financial Chronicle* the following words occur:—

> "This movement towards a more cordial commercial union would seem to offer abundant reasons for more energetic cultivation of the unmatched industrial and financial opportunities now awaiting development in many parts of the Dominion."

It is always dangerous to prophesy, and never more so than now, but I for one shall be surprised if the coming years do not witness a very considerable expansion of trade and prosperity in Canada.

We have made arrangements to take up £20,000 of Victory Bonds, bringing our total contributions to war loans of various kinds to approximately £100,000.

We meet immediately after the formal signature of the Treaty of Peace, and we must all feel thankful that at length the war has come to an end, but the fruits of peace have still to be won. We have lived on credit and on borrowed money for five years and the position we are now in is fraught with many dangers which can only be avoided by all classes uniting to increase production in every possible direction and by the exercise of the strictest economy both national and personal.

The Accounts and Balance Sheet and the Directors' Report thereon were adopted and a Dividend at the rate of 4½ per cent. per Annum for the year ended 31st December, 1918, was declared.

QUESTION LEGALITY OF FARM LOAN ACT

The constitutionality of the United States Federal Loan Act of 1916 has been attacked in a suit filed in the Federal Court at Kansas City on July 21st. The suit is filed on behalf of Charles E. Smith, a stock holder in the Kansas City Title and Trust Co., against that company to prevent it from investing its corporate or fiduciary funds in farm loan bonds, which it was just about to do.

The plaintiff alleges that the company proposes to invest its funds largely in farm loan bonds, because it believes they are exempt from every kind of tax—state, city and federal; whether income, surtax, inheritance or ad valorem. The plaintiff, as a director in the company, opposed investment, as he thinks they are taxable, and that the tax free clause of the Act is unconstitutional. When he was outvoted by the board of directors, he resorted to the courts to test the question. The company will defend the suit, and will ask the Attorney-General of the United States to assist in upholding the constitutionality of the Act. A legal fight will be waged over the tax exemption feature.

These bonds have become a very popular investment for persons receiving large incomes, as they are as free from income tax and local tax as the 3½ per cent. Liberty bonds, though they are neither an asset nor a liability of the Government of the United States. The suit is of great importance to taxpayers, because the Federal Land Banks expect within a few years to refund a large part of the four billion five hundred million dollars of taxable mortgages, issuing tax free bonds for them, thus relieving the present owners from all taxation and shifting that burden upon farmers, miners, merchants, and all other owners of taxable property.

We Own and Offer:

$1,750,000

Canadian Woollens, Limited

(Incorporated under the Ontario Joint Stock Companies Act)

7% Cumulative Redeemable Sinking Fund Preferred Shares

The Preferred Shares are redeemable in full at par July 1st, 1941, or in full or in part at any prior date, after July 1st, 1922, either by drawings at 110 or in the open market at a price not in excess of 110. The Preferred dividend accumulates from 15th July, 1919, and will be payable quarterly 1st days of January, April, July and October. A sinking fund of 2 per cent per year on the Preferred Share issue will be established commencing 1st July, 1921. Said Preference Shares are issued upon the condition that the Company covenants that no Mortgages, Bonds or Debentures will be issued by it having priority over the said Preference Shares excepting with the sanction of the holders of not less than two-thirds of the said Preference Shares for the time being issued and outstanding. It will thus be seen that the Preference Shares are practically the equivalent of First Mortgage Sinking Fund Bonds

THE "WHY" IN TRADE BALANCE

Favorable Balance of War Years Has Meant Much, and Should be Retained if Possible

"WHAT does a trade balance mean?" is the question asked in a pamphlet just issued by the Canadian Trade Commission, Ottawa. In discussing the subject reference is made to the present situation in Canada. The pamphlet says:—

"Many are to-day asking the question because their patriotism and their desire to share in national obligations were awakened and inspired through grand work in war time.

"If one country bought or imported from another exactly the same amount of goods as it sold or exported to that country there would be no so called 'balance of trade.' In common phrase they would be 'quits.' But it is hardly to be expected that this can come about; one must buy more than the other, one must sell more than the other. The difference between the two is the balance of trade. The country receiving most value, i.e., selling most goods or products, is said to have a favorable balance of trade; the country paying most for goods or products bought is said to have an unfavorable or adverse balance of trade.

Pre-War Balance

"Before the war in 1913 Canada had, with all countries, an adverse balance of 314 million dollars. We bought that amount more than we exported. But owing to the immense munition and food orders which came to Canada as the result of the war, and for which European countries had to pay us, there was in 1917, a favorable balance in our national trade of 557 million dollars, i.e., we received that sum more than we spent on imports.

"'If so, why should we worry?' someone might ask. Because all those war orders have now ceased, and we must go back perhaps in 1919-20, to our pre-war adverse balance of 1913, unless we can find something to take the place of these incoming war orders. But not only are we faced with former deficits, our war-time commitments alone run over $1,500,000,000, and the interest on loans necessitates imperatively that each year we have a favorable trade balance unthought of in 1913. And this solely and sheerly to pay our current debts.

Should Maintain Exports

"To pay this greatly-grown debt it is not enough to go back to peace time. *We must go back to peace trade, but on a war-time scale.* To do this we must place our factory and field production on a new and enlarged plane, we must adopt the most up-to-date methods, we must co-operate in a broad and enlightened policy, we must do a hundred things not conceived even a few months ago by the most far-seeing. We must not have an 'adverse balance of trade.' Our factories must run for a full day's work for fifty-two weeks in the year; our farmers must continue to produce, as they did last year, the last possible ounce from their holdings; we must exploit our mineral and other resources to the utmost capacity of stamp mills and smelters.

"Canada's prosperity depends upon a favorable balance of trade. We must either retain our war time scale of exports or restrict our imports—or both, if we are to retain in a time of peace the proud position won for Canada by the sacrifice of her men-in-arms.

"For a general understanding of our foreign trade for the last few years, the following figures (to the nearest million dollars) explain themselves:—

	Imports. (Millions.)	Exports. (Millions.)	Trade Balance. (Millions.)	
1913	$ 670	$ 356	Adv.	$ 314
1914	618	432	"	186
1916	508	741	Fav.	233
1918	963	1,540	"	577
12 months ended February, 1919	932	1,216	"	284
1919-20	—	—		?"

COAL OUTPUT IN MAY

The Dominion Bureau of Statistics has issued its survey of the output of coal in Canada for May, 1919, as compared with May, 1918. In addition, the imports of bituminous coal for May, 1919, were 736,426, whereas May, 1918, shows 1,437,377. The imports of anthracite coal for May, 1919, were 461,701, and May, 1918, 465,561. A summary of the figures is as follows:—

Districts.	May, 1918 (tons).	May, 1919 (tons).
Nova Scotia	509,577	403,833
New Brunswick	23,209	11,090
Saskatchewan	21,479	17,819
Alberta	412,205	280,999
British Columbia	251,519	192,795
Total for Canada......	1,217,989	906,536

WANT STANDARD RELIANCE INVESTIGATED

The first general meeting of depositors, debenture-holders and shareholders of the Standard Reliance Mortgage Corporation is to be held in Toronto on August 6th, by which time the liquidators will have thorough knowledge of the company's affairs. Depositors in the neighborhood of Chatham, Ont., have already passed a resolution asking for a government investigation, as follows:—

"Whereas the depositors and debenture-holders of the Standard Reliance Mortgage Company, in liquidation, have been urged by circulars to accept shares in a reorganized holding company for the purpose of holding the assets of the corporation until they can be disposed of to advantage;

"And whereas the depositors and debenture-holders are at a loss to determine whether they will be justified in accepting shares in such a company pending the result of a government investigation;

"Therefore, be it resolved that the government be requested to complete the investigation, with a view of ascertaining whether or not the directors or stockholders have rendered themselves in any way responsible to the depositors and debenture-holders, by their management of the business of the corporation."

Accompanying the reorganization plan, which is now on file at the different branches, is a financial statement. Particulars of this plan have already been given in these columns. There is also a classification of deposits in the various branches as follows:—

Chatham	$ 509,641
New Hamburg	136,022
Elmira	134,823
Ayr	109,119
Brockville	90,946
Woodstock	30,682
Toronto	21,172
Total	$1,032,409

It is understood that the losses are approximately as follows:—

Loans, Standard Reliance, made to Dovercourt Land and Savings Company—$2,850,000.

Ordinary mortgages and agreements of sale held by the Standard Reliance—$313,000.

Moneys advanced by the Standard Reliance to syndicates and private companies—$313,000.

Reduction in values of properties owned by the Standard Reliance and carried on its books—$200,000.

Losses in other assets—$30,000.

Total loss—3,708,000.

The Home Bank dividend rate has been increased from 5 per cent. to 6 per cent. per annum, commencing with the next payment, due on September 1st. Intimation of this increase was given at the annual meeting by the president.

TAX ARREARS MAY BE PROMPTLY RECOVERED

New Alberta Act Aims at Simplicity and Economy—Provision Made for Redemption Within Year

ALBERTA'S 1919 legislation included a Tax Recovery Act, which will supplant the somewhat circuitous methods by which municipalities have had to realize on property on which taxes have not been paid. The former method requires the making out of a tax enforcement return; abstracts of title are required to be secured from the land titles office for all lands on the said tax enforcement return; notices have to be sent by registered mail at least sixty days prior to date of the court at which the tax enforcement return is to be confirmed to all parties having any interest in the land, and notice of court has to be advertised in the local newspaper and in the Alberta Gazette. After the tax enforcement return has been confirmed additional abstracts have to be obtained, two more sets of notices have to be issued, and advertisements again inserted in local newspapers and Alberta Gazette, giving date of final forfeiture. If the land is finally sold, it is at least fourteen months from the date of commencement of forfeiture proceedings before the municipality realizes all its taxes, and if, as frequently happens in urban municipalities, the land cannot be sold at all, the municipality does not receive its taxes, and in addition is out a large amount spent in obtaining abstracts, printing and mailing special notices, advertising date of court, advertising date of final forfeiture, and so on.

New Provisions

Under the new Tax Recovery Act, lands on which taxes are in arrear on the first day of July of the year following that in which they are levied, are liable to be sold for taxes, and the treasurer, assessor or collector, as the case may be, of each city, town, village or municipal district shall, on or before the fourteenth day of August in each year, submit to the mayor or reeve of the municipality a list of all lands that are liable to be sold for taxes. The mayor or reeve, on satisfying himself that the list is correct, gives the proper official a warrant, authorizing him to advertise for sale all the lands included in such list. Such sale is required to be advertised once a week for two consecutive weeks in a newspaper or newspapers published in the municipality, or if there is no newspaper published therein, in a newspaper circulating in the municipality. Such advertisement must be published not less than six weeks before the date of sale, and is required to contain a list of the lands to be sold. In addition to the publication of the list as above mentioned, there shall be published once during each week after the period of two weeks above-mentioned, but prior to date of sale, a notice of such sale and a statement as to where the list of lands may be seen. Notice of the sale is also required to be published in two issues of the Alberta Gazette, the last issue to appear not less than two weeks before the date of sale. No lands, the title of which is vested in the crown, can be included in such sale.

Lands so offered for sale shall be sold to the highest bidder, and if they cannot be sold for the full amount of the arrears of taxes and costs, they may be sold for a lesser sum, subject, however, to a minimum value that may be placed upon them by the council of the municipality. This minimum value shall not be advertised, but shall be treated by the treasurer as the upset selling price. Any lands which are not sold at such a sale shall be included in the list of lands offered for sale, the following year. The purchaser at the tax sale will only be required to pay at date of sale the amount due the municipality for arrears of taxes and costs, even if the land is sold for more than the arrears of taxes and costs.

As soon as the sale is completed, a return showing the lands sold will be sent to the registrar of the land titles office for the registration district in which the land is situated, who shall register against such land a memorandum of sale, so that any prospective purchaser or money-lender may be protected.

All lands sold at a tax sale are subject to redemption within a period of one year from the date of sale. Where lands sold are not redeemed by the end of the year, all parties shown by the record of the land titles office to be interested in any way in the land, will forthwith be notified of that fact by registered mail, and after a period of sixty days has elapsed from the expiration of the redemption period, a return of the unredeemed lands will be submitted to a judge of the district court, who, on being satisfied that due notice has been given, and that all matters in connection with the proceedings are regular, shall make such order as to transfer as he deems advisable, and in accordance with this order the treasurer shall then issue transfer to any tax sale purchaser, on receiving from him payment of the balance outstanding, and such transfer shall entitle the purchaser to an indefeasible title, except as to claims of the municipality or the crown. Any moneys paid to the municipality over and above the taxes due shall be paid to the persons declared by an order of a judge of the district court to be entitled thereto.

By comparing the procedure under the Tax Recovery Act with the provisions in regard to tax enforcement that have hitherto been in force, it will be noted that under the Tax Recovery Act it is only necessary for the municipality to obtain abstracts of title and to send notice by registered mail, in connection with the lands which are sold and not redeemed, whereas under the forfeiture proceedings that have been in force under our municipal Acts, it is necessary to obtain abstracts of title of all lands in which taxes are in arrears, to send notice by registered mail to all parties shown to be interested, then during the year allowed for redemption after the land has been forfeited, it is necessary for another set of abstracts to be secured and two more notices to be sent to each person shown to be interested in the land, and after all this trouble and expense the municipality in many cases is unable to collect any taxes whatever.

The Tax Recovery Act provides for the immediate sale of land for taxes, without waiting for a year, as required by the forfeiture proceedings. If the land can be sold at all, this brings in the taxes immediately. If it cannot be sold, very little expense has been incurred. In addition to making provision whereby municipalities may obtain their taxes more quickly, the Tax Recovery Act provides a simple method whereby action may be taken at an expense that will not be more than one-third of what it was under the forfeiture proceedings set forth in different municipal Acts, and if the land is worth the taxes the municipality gets results quickly, while if the land will not sell, the municipality has not been put to any great expense.

The provisions of the Tax Recovery Act will come into force in the year 1920, and on and after the year 1920, the tax enforcement proceedings provided for in the municipal Acts will cease to be operative, except insofar as proceedings instituted prior to the end of the current year are concerned.

AMALGAMATION OF LOAN COMPANIES

J. G Coster, general manager of the Holland-Canada Mortgage Co., Winnipeg, has been advised from Holland that all formalities have been complied with in connection with the merger of this corporation and the Intercontinental Mortgage Co., of Saskatoon.

The Holland-Canada absorbed the Netherlands Mortgage Co. several years ago. The present company to be merged is a smaller one, the assets of the Intercontinental amounting to a sum between $300,000 and $400,000.

It is said to be the plan of the Holland-Canada to open an office for business in Edmonton, and, if an arrangement to this effect is consummated, W. F. Kroon, who has been the manager of the Intercontinental, will become the manager of the new branch office in Edmonton. The Holland-Canada has been doing business in Winnipeg for nine years, and its total loans are in the neighborhood of $9,000,000. The company consequently has a sum in excess of $1,000,000 a year for reinvestment. The situation in Holland is somewhat uncertain, and money there, which in former years was available at 5 per cent. in large volume, now costs 6.

A CASE ON "INSURABLE INTEREST"

Business Insurance Contract Still Holds Even When Employee Leaves Firm Insuring Him

By M. L. Hayward, B.C.L.

THE case of Wurzburg vs. New York Life Insurance Co., recently decided by the Supreme Court of Tennessee, was one where Wurzburg was the general manager of the Specialty Manufacturing Co., a corporation under the laws of the State of Tennessee. In fact, he was the active head of the company and its guiding spirit, and, in order to protect itself in case it were deprived of his services, the company insured Wurzburg's life for $10,000 in the New York Life and the policy was made payable to the company.

Right here the question arises whether the Specialty Co. could lawfully insure the life of one of its officers in its own favor, or, in other words, did the company have an "insurable interest" in the manager's life sufficient to make the policy a legal and enforceable one?

On this point the law is clear and there is no doubt that such a policy is perfectly valid. Of course, if there is no such "insurable interest," then the insurance contract is a mere "wager policy" and is void and unenforceable.

As to what is an "insurable interest," the Supreme Court of the United States says that "it is not easy to define with precision what will in all cases constitute an insurable interest so as to take the contract out of the class of wager policies. It may be stated generally, however, to be such an interest, arising from the relation of the party obtaining the insurance, either as creditor or surety of the assured, or from the ties of blood or marriage to him, as will justify a reasonable expectation of advantage or benefit from the continuance of his life. But in all cases there must be a reasonable ground, founded upon the relation of the parties to each other, either pecuniary or of blood or affinity, to expect some benefit or advantage from the continuance of the life insured, otherwise the contract is a mere wager by which the party taking the policy is directly interested in the early death of assured."

Applying these principles to the case of a company insuring its own officers, it is perfectly clear that the insurance is valid, and the Courts have so held in many cases too numerous to mention.

Now, in the Wurzburg case, when the policy was placed in 1913, it was a valid and binding one, and the Specialty Co. paid the premium from that date until Wurzburg's death in 1918, when the Specialty Co. claimed the insurance.

In the meantime, however, in 1915, three years before his death, Wurzburg severed his connection with the Specialty Co. owing to a difference of opinion on the salary question, and his heirs claimed the $10,000 insurance less the premiums and interest thereon paid by the Specialty Co., on the ground that, while the Specialty Co. had an insurable interest in the manager's life when the policy was issued, when Wurzburg ceased to be connected with the Specialty Co., the company no longer had an "insurable interest" in his life, and the policy became a mere "wagering policy," and uncollectible as far as the Specialty Co. was concerned.

The Tennessee Supreme Court held, however, that the Specialty Co. was entitled to the insurance, on the ground that the policy being valid when placed, it did not become invalid when Wurzburg's connection with the company ceased.

"Moreover," said the Court, "the Specialty Co. in this case is entitled to the full amount of the policy. This is true, because a policy of life insurance is not now held to be a mere contract of indemnity, but is a contract to pay the beneficiary a certain sum of money in the event of death. It follows that, if a policy is valid when issued, and remains valid until the death of the insured, the beneficiary is entitled to the whole of the insurance."

A convention of Imperial life agents from Manitoba and Saskatchewan was held in Brandon, Man., on July 17th and 18th. About fifty were present, including Mr. J. F. Weston, general manager of the company; D. Matheson, secretary, and G. H. Hunt, superintendent of agencies.

CITY BOUNDARIES AND CITY CONTRACTS

Do Contracts Extend to Original Area Only, or Do They Include Areas Subsequently Taken In

WHEN a contract is to be carried out within the limits of a city or municipality, and the boundaries existing at the date of the contract are altered or extended, the question at once arises whether the contract is to be construed as applying to the new boundaries or not, and, in this connection, three cases decided by the Supreme Court of Canada are of considerable interest.

In the first case, Toronto Railway Co. vs. City of Toronto, the city of Toronto entered into an agreement with the Toronto Railway Co., which agreement was confirmed by an Act of the Ontario legislature, and by which the company was entitled to the "exclusive right and privilege of using and working the street railways in and upon the streets of the said city of Toronto for the full period of thirty years."

Before the thirty year-term expired, the boundaries of the city were extended, and the question then was whether the agreement with the company applied to the extended area, or simply to the boundaries of the city at the date of the agreement.

Applied Only to Original Boundaries

The Supreme Court of Canada decided that the agreement must be construed with reference to the original boundaries alone.

"In my opinion," said the Court, "the city clearly only purported to deal with streets within its jurisdiction, and it appears to me plain that the parties did not intend to provide for territory subsequently annexed, and, as to which the city, at that time, had no right to give any franchise or make any contract."

In the Toronto case, however, it is to be noted, the agreement between the city and the company bound the latter to lay tracks within the city under certain conditions, and the city attempted to compel the company to lay tracks in portions of the city taken in after the date of the agreement, which the company successfully resisted on the ground that the agreement referred to the original area of the city alone.

The second case to which we will refer, the City of Calgary vs. the Canadian Western Natural Gas Co., was the reverse of the Toronto case in a way, as in the Calgary case, the company was granted certain rights in the city of Calgary, and then, after the boundaries were extended, the city claimed that the company was restricted to the original area of the city at the time of the agreement.

In the Calgary case, however, the decision was in favor of the company, especially in view of the fact that subsequently the city had recognized the contract as applying to the extended area.

Case of Chatham Gas Co.

Lastly, in the case of the Union Natural Gas Co. vs. the Chatham Gas Co., the Union Co. were producers of natural gas and had that commodity for sale, while the Chatham Co. had the right to sell and distribute gas to consumers in "the City of Chatham." By a contract between the two companies the Union Co. agreed to furnish and the Chatham Co. agreed to take all gas required by the latter company for such sale and distribution.

After the date of the contract the boundaries of the city of Chatham were extended; the Chatham Co. claimed that the Union Co. was bound to furnish gas for sale and distribution in the extended area, while the latter company claimed that it was bound only to furnish gas for the original boundaries as existing at the date of the contract.

In this case, the Court decided in favor of the Union Co., following the decision in the Toronto case.

"The plain literal meaning of the words used in the contract between the two companies in this case," said the Court, "surely limits the contract to that which was then existent, just as much as if the supply contracted for had been for a given factory or block of buildings. What right would any one so bound have to extend it beyond the then present limits? What right have we to extend it beyond?"

LABOR ORGANIZATION IN CANADA, 1918

Large Increase in Membership—International Unions are Far in the Lead

THE eighth annual report on Labor Organization in Canada, containing statistics, etc., for the calendar year 1918, has been issued by the Department of Labor. The report indicates that there has been much activity in almost every line of operation, and that trade union membership in the Dominion has reached the highest point recorded since the department commenced the publication of these annual reports in 1911, the total reported membership for all classes of labor bodies in Canada at the close of the year 1918 being 248,887. In all, there are 2,274 local branch unions in the Dominion, 1,897 comprising 201,432 members, being affiliated with international organizations, 332 with 37,928 are connected with what are termed non-international bodies, and 45 having 9,527 are independent units. There was an increase of 195 international local branches during the year, and a membership gain of 36,536; the non-international organizations had an increase of 88 branches and 5,585 members, and the independent units had an addition of 17 with a gain in membership of 2,136. These figures show an increase of 300 in local branches and a total gain in membership of 44,257. The membership of all classes of organized labor in Canada as reported to the department for the past eight years has been as follows:—

1911	133,132
1912	160,120
1913	175,799
1914	166,163
1915	143,343
1916	160,407
1917	204,630
1918	248,887

Trade Union Membership in Canadian Cities

Of the 2,274 local trade union branches in Canada, 1,328 are located in 31 cities, and 961 reported a membership of 142,022, representing approximately 57 per cent. of the entire trade union membership of the Dominion. Montreal leads the cities with 149 local branches, 106 of which report 32,422 members; Toronto stands in second place with 128 branches, of which 82 reported 18,834 members; Winnipeg occupies third position with 91 branches, 56 of which reported a membership of 12,050; Vancouver is fourth, with 87 branches, of which 65 reported 15,459 members. The statement for the 31 cities is as follows:—

Cities.	Number of unions in locality.	Number of unions reporting membership.	Number of members reported.
Montreal	149	106	32,422
Toronto	128	82	18,834
Winnipeg	91	56	12,050
Vancouver	87	65	15,459
Hamilton	60	49	3,596

Sydney	20	15	3,150
St. Catharines	20	16	788
Totals	1,328	961	142,022

Benefits Paid by Central Labor Bodies

The majority of the international labor organizations operating in Canada provide for the payment of benefits to members on a varying scale. A table is published showing the expenditure on this account made in Canada, the United States and elsewhere, the disbursements for 1918 being $16,802,092, an increase of $3,626,713 as compared with the payments made in 1917. The expenditure for each class of benefit was as follows:—

Death benefits	$12,679,934
Strike benefits	1,973,418
Sick and accident benefits	1,294,269
Old age pensions	763,100
Unemployed and travelling benefits	91,372

Seven of the non-international bodies reported having made payments on account of benefits, the total expenditure amounting to $16,895.

WEEKLY BANK CLEARINGS

The following are the bank clearings for the week ended July 17th, 1919, compared with the corresponding week last year:—

	Week ended July 17, '19.	Week ended July 19, '18.		Changes.
Montreal	$136,108,497	$ 93,087,198	+	$43,021,299
Toronto	91,646,337	68,499,433	+	23,146,904
Winnipeg	39,610,351	30,813,748	+	8,796,603
Vancouver	11,847,377	11,225,734	+	621,643

WHY THE "MUTUAL LIFE OF CANADA" IS SO POPULAR

The Mutual placed upon its books in the first five months of 1919 100% more business than in the corresponding months of 1918. The wonderful war-record of the Mutual Life and the prompt payment of the many unexpected claims during the recent epidemic—these have proved the value of the institution. The Mutual, moreover, is in a peculiar sense a people's company, being in its control democratic, in its economy strictly co-operative. This means that the system is in line with the "spirit of the age," and so the people naturally turn to the Mutual. The record of the Company for nearly half a century has been one of increasing beneficence, and an ever-growing number of gratified policyholders help on the good work of the agents. As a result, there probably is not a more prosperous group of workers in Canada to-day than the representatives of our Company.

"Be a Mutualist."

The Mutual Life Assurance Co. of Canada
Waterloo Ontario

WHEN a man insures his life he does well. When he insures his PURPOSE he does better. A man ordinarily takes insurance to protect his family. When he sees to it that the Policy is drawn to most surely effectuate that purpose, he renders his family the soundest possible service.

That implies benefit in the form of an INCOME, the most valuable type of protection.

Orders may be telegraphed or telephoned at our expense and delivery will be made without charge to the purchaser.

Temporary bonds will be ready for delivery on or about July 30th, 1919. Copies of the Trust Deed, Appraisal Certificate and Legal Opinion of our Attorneys will be on file and may be examined at our various offices.

The protection of heavy insurance provisions in favor of the bondholders, and the large reduction in bonded debt each year makes this issue more than ordinarily attractive to the investor.

GOVERNMENT AND MUNICIPAL BONDS

Canadian Loan Still Quoted Above Issue Price—Strong Market for Municipal Issues

THE recently floated Canadian Government loan of $75,000,000 it was announced on July 22nd, by J. P. Morgan and Company, head of the American syndicate of bankers which handled the offering, has been divided $60,000,000 in ten year bonds and $15,000,000 in two year notes. When subscriptions were asked for it was said they would be received in unlimited amounts to either class, but that the syndicate managers reserved the right to apportion the allotments.

The following quotations of active bonds are supplied by the National City Co., Ltd., and are in New York funds:—

	Bid.	Offered.
Anglo-French 5% (Oct. 15, 1920)	97	97 3/16
United Kingdom 5½% (Nov. 1, 1919) ..	99¾	100
United Kingdom 5½% (Nov. 1, 1921) ..	98⅜	98¾
United Kingdom 5½% (Feb. 1, 1937) ..	95½	96
Canadian Pacific 6% (Mar. 2, 1924) ...	100¼	100¾
City Paris 6% (Oct. 15, 1921)	97¼	97½
Dominion Canada 5% (Aug. 1, 1919) ...	99 15/16	100
Russian Govt. Ext. 5½% (Dec. 1, 1921)	49	51
Russian Govt. Ext. 6½% (July 10, 1919)	55	58
Swedish Govt. 6% (June 15, 1939)	99	99¼
Dominion Canada 5½% (Aug. 1, 1921)	99⅜	99¾
Dominion Canada 6½% (Aug. 1, 1929)	97	97½

The following is a list of debentures offered for sale, of which particulars appear in this or previous issues of *The Monetary Times*:—

Borrower.	Amount.	Rate %.	Maturity.	Tenders close.
North Bay, Ont. ..	52,500	6½	20-instal.	Aug. 2
DrumhellerM.H.D., Alta.	50,000	7	20-instal.	Aug. 2
Scarborough Tp., .. Ont.	65,000	6	25 & 30-instal.	Aug. 2
Pictou Co., N.S. ...	100,000	5½	20-years	Aug. 4
Charlottenburgh Tp., Ont.	30,000	5½	20-instal.	Aug. 4
Medicine Hat, Alta.	132,253	5 & 6	Various	Aug. 9
Lancaster Tp., Ont.	100,000	5½	25-years	Aug. 15

Trenton, Ont.—The town invited tenders up to July 25th for $30,000 of 20-year instalment debentures with interest at 5½ per cent. annually. The town treasurer is J. W. Delany.

Kenora, Ont.—The town council has passed a by-law providing for the issue of $10,000 of debentures for extending and improving the town electric light plant. The town clerk is J. E. Currie.

Fort William, Ont.—The city council has passed two by-laws providing for the issue of debentures to the amount of $87,000 and $230,000, respectively, for school purposes. The city clerk is A. McNaughton.

St. Hyacinthe, Que.—At a meeting of the council held on July 10th, it was decided to issue debentures to the amount of $140,000 shortly for paving purposes. The bonds will mature from 1920 to 1939, and will be numbered from 1 to 280.

Verdun, Que.—The city ratepayers voted on July 18th on three loan by-laws. One was for a loan of $246,775 for pumping and filtration works; the second for a loan of $150,000 for an additional steam generating plant; and the third was for a loan of $100,000 for the installation of an incinerator. All were defeated.

Scarborough Township, Ont.—Tenders are invited up to noon on August 2nd for two issues of bonds. The first is for $40,000 repayable in 25 annual instalments with interest at 6 per cent. per annum. The second is for $25,000, repayable in 30 annual instalments with interest at 6 per cent. per annum. An official notice appears elsewhere in this issue.

Pictou County, N.S.—Tenders are being asked up to 5 p.m., on August 4th for $100,000 of 20-year 5½ per cent. debentures or any part thereof. The interest is payable semi-annually and a sinking fund is provided. The money is being borrowed for the purpose of erecting a county asylum. The municipal clerk is Wm. Cameron, Drawer 667, Pictou, N.S.

Glace Bay, N.S.—The town clerk, Mr. N. F. McNeil, asked for tenders up to 5 o'clock on Monday, July 21st, for the purchase of $6,000 school debentures which were issued May 10th, 1919. They are in denominations of $300 up, have interest of 5 per cent., payable semi-annually on the 10th of May and November, and are repayable in annual instalments of $600.

Moose Jaw, Sask.—A number of money by-laws were submitted to the electors on July 23rd. These provide for expenditures as follows: $13,000 to build a public comfort station in the city, debentures to be issued with interest at 5½ per cent. for principal payable at the end of thirty years and provision for sinking fund; $16,000 for bridge repairs, debentures to bear interest at 5½ per cent. and be repayable at the end of ten years with provision for sinking fund; $40,000 for waterworks extension, debentures to bear interest at 5½ per cent. and be repayable at the end of 30 years with provision for sinking fund.

Ottawa, Ont.—The city's bonds totalling $865,694, for which tenders were received up to July 18th, were sold to Brent, Noxon and Co., of Toronto. The bids were as follows:—

Brent, Noxon and Co., and Home Bank	$833,793.75	96.315
G. A. Stimson and Co.	831,153.44	96.01
Bank of Nova Scotia	827,344.38	95.57
Æmilius Jarvis and Co.	826,738.40	95.50
National City Co.	822,392.75	94.998
C. H. Burgess and Co.	820,332.25	94.76
United Financial Corporation, Ltd. ..	819,726.25	94.69
Wood, Gundy and Co.	816,523.20	94.32

Versailles, Vidricaire and Boulaie, Ltd., bid 92.28 for 20-year debentures, 95.09 for 10-year debentures and 93.22 for 16-year debentures.

The interest basis of the price at which the bonds were sold is 5.34 per cent.

Saskatchewan.—The following is a list of authorizations granted by the Local Government Board from July 7th to July 12th, 1919:—

School Districts.—Onward, $1,000 10-years not ex. 8 per cent. annuity; M. Lambre, Bradwell. Westhrook, $900 9-years not ex. 8 per cent. instalment; Leon Sine, Theodore. *Heron, $600 6-years not ex. 8 per cent. annuity; Mrs. Winifred Kenderil, Maryfield. *Vindictive, $3,000 10-years not ex. 8 per cent. annuity; C. The Canada Standard Loan Company
520 McIntyre Block, Winnipeg

Saskatoon, Sask.—The city's issue of $223,377 of bonds has been sold to Æmilius Jarvis and Co., Toronto, at 91.50 and interest. C. H. Burgess and Co. bid 90.54 and interest.

Saskatchewan Drainage Districts.—Bonds to the amount of $73,000 issued by drainage districts Nos. 8, 9 and 13, and fully guaranteed by the province, has been purchased by A. Jarvis and Co. at 93.42 and interest. The bonds bear interest at 5 per cent. and run for a period of 30 years.

Niagara Falls, Ont.—Two issues of bonds amounting to $30,477 have been sold to A. Jarvis and Co., of Toronto. One issue was of 6 per cent. ten-instalment bonds and the other consisted of 5 per cent. 30-instalment bonds. C. H. Burgess and Co. bid 96.07 and interest, R. C. Matthews and Co. bid 96 for all or none.

Saskatoon, Sask.—Nine money by-laws were voted upon by the ratepayers on July 21st. These provided for the following expenditures: $15,000 to alter the street cars to the one man type; $34,000 for new street cars and equipment; $156,200 for the installation of a generator and intake in the water system; $1,000 for the purchase of a scale for the city market; $2,976 for improvement of city roads; $8,000 for the purchase of a site for a childrens' home; $3,000 for the extension of the police patrol and fire alarm system; $3,250 for the improvement of parks and boulevards; $10,000 for improvements at the exhibition grounds.

Listowel, Ont.—The issue of $18,000 6 per cent. instalment debentures, bids for which were opened on July 19th, was awarded to Æmilius Jarvis and Co., of Toronto. The purchase price was approximately a 5⅝ per cent. basis. Some of the tenders were as follows:—

Æmilius Jarvis and Co.	103.48
C. H. Burgess and Co.	101.57
A. E. Ames and Co.	100.48

Drumheller Municipal Hospital District No. 3, Alta.—Tenders are being asked up to August 2nd, for $50,000 7 per cent. 20-year debentures repayable in instalments. An official notice appears elsewhere in this issue.

Oxford County, Ont.—An issue of $22,000 of 15-year 5½ per cent. instalment bonds has been sold to the Home Bank of Canada. The interest basis of the sale price is slightly less than 5½ per cent. The tenders were as follows:—

Home Bank of Canada	100.86
G. A. Stimson and Co.	100.70
A. Jarvis and Co.	100.27
Nacneill, Graham and Co.	100.03
C. H. Burgess and Co.	100.02
R. C. Matthews and Co.	99.95
W. L. McKinnon and Co.	99.60
A. E. Ames and Co.	99.37
Brent, Noxon and Co.	99.33
Dyment, Anderson and Co.	99.05

CANADIAN NORTHERN RAILWAY NOTE ISSUE

An issue of $10,000,000 of notes of the Canadian Northern Railway is being made through Wm. A. Read and Company, of New York. Two kinds of notes will be issued, the amount of each depending upon the subscriptions The first will be two and a half years six per cent. collateral trust gold notes due February 1st, 1922; the second will be five years six per cent. collateral trust gold notes due August 1st, 1924. Both issues will be dated August 1st, 1919. In trest will be payable on the first of February and August, and principal and interest will be payable in gold in New York. The five year notes are to be callable in sixty days' notice after February 1st, 1922, at 101½ and interest, up to February 1st, 1923; at 101 and interest, up to February 1st, 1924; and at 100½ and interest thereafter to maturity. The notes will be secured by $14,286,000 Canadian Northern general mortgage four per cent. bonds due September 1st, 1934. The offering price is par and accrued interest.

NEWS OF MUNICIPAL FINANCE

Winnipeg Debt Shows Big Reduction—Toronto Tax Payments are Good—Edmonton May Sell Tax Certificates

Campbellford, Ont.—The municipal tax rate has been fixed at 32 mills.

Sherwood R.M., Sask.—At a special meeting of the council held on July 18th, it was decided to raise $38,558 for the coming year and the tax-rate was accordingly fixed at four mills.

Charlottetown, P.E.I.—The estimates for the current year were presented at a meeting of the city council held on July 17th. Receipts are estimated at $114,000 and expenditures at $113,800.

North Vancouver, B.C.—Tax collections from January 1st to June 30th in North Vancouver district totalled $101,000, which is an increase of more than $25,000, compared with the same period last year.

St. Boniface, Man.—An association of ratepayers has been formed for the purpose of discussing and taking action on municipal questions. The expenses of the association are to be met by an annual fee of $1 per member.

Vancouver, B.C.—The city publicity work has been transferred to the Vancouver Exhibition Association and at a meeting of the city council on July 14th, the sum of $10,000 was voted to this association. The publicity commissioner, Mr. J. R. Davison, will now be in the Exhibition Association.

Edmonton, Alta.—The finance committee of the city council has recommended that the tax certificates of property bought in by the city at the recent sale should be sold. A number of applications have already been received from persons wishing to purchase certificates. The committee recommends that sales be made on the same terms as those on which owners would have to redeem the properties.

Greater Winnipeg Water District.—Further attempts have been made during the past few days to arrange a settlement between Winnipeg and the other municipalities which comprise the Greater Winnipeg Water District. The total cost of the water system has been about $13,500,000, and, under the agreement, the city bears 80 per cent. of the cost and the rest is divided among the six outside municipalities. These municipalities have endeavoured to make the city build laterals to the municipal boundaries and to convey water that far. The city has refused to do so.

Prince Edward Island.—An educational tax act was submitted to a vote of the provincial electors on July 24th. It provides that all real property in the province excepting real property in Charlottetown and Summerside, shall be subject to a tax of not less than 20 cents and not more than 30 cents per $100 of value. It also provided for the levying on every ratepayer liable for the payment of school taxes under the Public Schools Act, 1877, as amended, except in Charlottetown and Summerside, of a poll tax of not less than $2, and not more than $4. The money was to be used for educational purposes.

Point Grey, B.C.—The municipal council, at a special meeting on July 8th, considered the preliminary estimates for 1919, which show an approximate total of $680,041, and call for a tentative tax rate of 38 mills on wild lands, 29 mills on improved lands and 31 mills for the Shaughnessy Heights district, as compared with 36, 25½ and 28 mills, respectively for last year. Estimates in detail, subject to final revision, were submitted as follows: General administration, $17,770; office salaries, $12,205; sundries, $35,900; fire department, $23,912.38; health department, $8,250; police, $18,783; engineer's department, $6,935; Shaughnessy Heights rebate, $15,900; joint sewer maintenance, $16,873; local improvements, $1,029.27; public works, $45,000; Shaughnessy Heights levy, $11,500; school board, ordinary estimates, $78,700; extraordinary estimates, $18,000; water department, $8,376; sinking fund, $52,953.50; interest on sinking fund, $323,852.39; total, $680,041.54.

Vancouver, B.C. Victoria, B.C.

Winnipeg, Man.—The city's estimated expenditure for 1919-20 is $6,449,410. This is $517,291 more than last year and a tax rate of 23 mills compared with 20 mills last year will be necessary. The following is a summary of the estimates:—

	1919-20.	1918-19.
General government	$ 312,613	$ 339,681
Protection of persons and property ..	1,646,353	1,158,937
Preservation of health and sanitation	730,516	699,638
Highways and bridges	474,309	457,399
Education	1,583,981	1,505,884
Recreation	206,473	194,899
Public charities	384,766	360,614
Fixed charges, other than distributed and financial expenses	378,504	378,299
Provincial government of Manitoba levies	563,500	676,000
Unclassified	168,395	160,764
Total	$6,449,410	$5,932,119

The total amount expended during the 1918-19 period was $5,946,169, which is $14,050 over the estimated amount to be expended and $503,241 under the estimates for 1919-20. The balance which will be applied to this year's appropriations from last year's expenditures amounts to $43,609, as against a debit of $62,083 on last year's expenditures.

The revenue which will meet the estimated expenditures is made up of miscellaneous revenue estimated at $617,260. and business tax estimated at $360,000. This stands against an estimated miscellaneous revenue of $600,470, and an actual revenue of $658,129 for last year and an estimated business tax of $343,156, and an actually received tax of $343,156 for the same period. The net amount to be raised by taxation will be $5,428,540 on a rateable assessement of $236,023,520. Last year's figures on tax estimates were $5,050,576 on property worth $252,528,800.

The total estimated revenue is $6,405,801, leaving an estimated deficit from the estimated expenditure of $43,609. This is provided for in anticipated revenues from other sources, various utilities run by the city being depended upon to provide a quota of the revenue to meet the expenditures, other than from taxation sources, amounting to a total of $617,260 anticipated revenue. The estimated expenditures and receipts of the water works system and hydroelectric plant are contained in the estimates placed before the council, but these utilities are independent organizations depending on the revenue they produce to write off their disbursements.

During the past five years, the net debt of the city has been reduced by $7,893,403. During the fiscal year ending April 30, 1919, the debt was cut down by $1,592,236.05. These are two of the outstanding features of the annual report of the board of sinking fund trustees covering the operations of the past fiscal year.

During the fiscal year under review, the report shows: (1) An issue of 20-year 5½ per cent. debentures was sold in New York at a price of 100.87; (2) the assets of the sinking fund were increased from $9,100,139 to $10,456,969; (3) the average interest rate earned on these securities was 6.1896 per cent.; (4) half a million dollars was invested in Dominion war loan bonds of the 1918 Victory loan; (5) assets of the sinking fund were shown to have appreciated more than $500,000 over book values; (6) surplus earnings over requirements as against outstanding city of Winnipeg debentures, amounted to $212,690; (7) with the previous years' surplus added and administration and general expense deducted, the net surplus at the end of the fiscal year was $287,267; (8) of this surplus, $50,000 was transferred to investment reserve account, which now stands at $300,000; $192,751 was transferred to an account for taking care of a debt created in 1884, for which no sinking fund provision was made at the time; and $44,516 was carried forward as surplus income account to the current fiscal year; (9) a third bond-conversion was accomplished, resulting in a reduction in the debenture debt to the extent of $131,333, bringing the total debenture debt reduction by reason of the three conversions, to $1,417,292.

Toronto, Ont.—In a report on the first instalment of taxes for 1919, the city finance commissioner states:—

"It is pleasing to report that, notwithstanding that the taxes collectible in 1919 were $19,462,297, as compared with $20,267,727 in 1918 (a decrease of $805,430), due to the reduction of two mills in the tax rate, and that the date fixed for the payment of the first instalment was eight days in advance of that for 1918, the amount collected this year at the first instalment, was only $101,035 less than that collected at the corresponding period in 1918—the figures for 1919 being $11,830,793, as compared with $11,931,828 last year, while the percentage is, perhaps, the greatest in the history of the city—namely, 60.79 per cent. of the whole, compared with 59 per cent. in 1918, or an increase of approximately 2 per cent.

"The distribution of the $19,462,297 of taxes collectible this year in three instalments, is as follows:—

6th June	$ 9,158,552, or	47.06 per cent.
6th August	6,174,938, or	31.73 per cent.
6th October	4,128,807, or	21.21 per cent.
	$19,462,297	100.00 per cent.

"It will be noted that although 47.06 per cent. of the 1919 taxes was required to be paid at the first instalment period, yet 60.79 per cent. was collected, or 13.73 per cent. more than was actually due at that time. This splendid response was undoubtedly the result of the prosperous conditions of our citizens, and of business generally throughout the city, and also, to the increasing tendency on the part of the taxpayers to take advantage of the discount allowed (practically at the rate of 7 per cent. per annum), for payment in full at the first instalment period.

"It is also believed that the plan adopted this year for the first time of mailing tax bills instead of delivering them by hand, has assisted in the more prompt collection, especially of the business and income tax. It is proposed to continue this system, inasmuch as it has been found that it eliminated a great many claims of non-delivery of bills, and afforded the collectors more time to devote to the collection of arrears, since formerly delivery by hand engaged their time for not merely days, but weeks, whereas the dispatch by mail is carried out within the period of three days.

"The special effort put forth to encourage citizens to remit their taxes by mail, also assisted the collectors substantially in handling more easily at the wickets the large numbers who, notwithstanding repeated warnings, left payment off until the last day, and consequently suffered unavoidable delay and inconvenience.

"Since the plan of collecting the business and income taxes in one payment, with the first instalment of taxes, was adopted, the heavy losses which have heretofore been experienced through failure to collect such taxes have been substantially diminished. Even so, important losses still ensue, through the removal or change of circumstances of those assessed, and it is, therefore, again urged that the suggestion heretofore made—namely, that such taxes be collected in the same year in which the assessment is made, and not in the year following, should be put in practice. While it is recognized that difficulties may be encountered through the putting into effect of this plan, yet it is submitted that they could be surmounted, and the heavy yearly losses thus minimized.

"The only tax rolls outstanding in the collectors' hands are those for the year 1918, representing taxes due in that year, and the change recently made in having the rolls more promptly returned, and the improved system adopted for the collection of arrears, have proved beneficial. At the close of June, the overdue taxes (exclusive of those for 1919), amounted to $2,245,439, of which amount $1,669,063 is arrears due in 1918, and the balance, $576,376, taxes due in years previous to 1918. This large sum represents revenue which should have been received in the years in which the taxes were due, in order to meet expenditures authorized and incurred in these periods, and its non-receipt necessitated temporary borrowings to an extent greater than would have been required if payments had been promptly made."

A Newspaper Devoted to Municipal Bonds

THERE is published in New York City a daily and weekly newspaper which has for over twenty-five years been devoted to municipal bonds. Bankers, bond dealers, investors and public officials consider it an authority in its field. Municipalities consider it the logical medium in which to announce bond offerings.

RECENT FIRES

Telford Garment Co. Loss at Rock Island, Que. is Large—Damage from Bush Fires Not Known

Belleville, Ont.—July 18—The saw mill owned by Mr Muselow, North Hastings, was destroyed. No insurance.

Goderich, Ont.—July 17—The stable of the Colborne Hotel, on Hamilton Street, was destroyed.

Halifax, N.S.—July 18—The warehouse and offices, owned by T. A. A. DeWolf and Son, were destroyed. Cause, plumber's blow-pipe and a can of linseed oil. Estimated loss, $15,000, largely covered by insurance.

Kingston, Ont.—July 21—The photograph gallery of C. E. Marrison, A. E. Treadgold's store and a shoe shine parlor, were damaged. Estimated loss, $10,000.

Montreal, Que.—July 22—Ten houses on Chabot Street were damaged. Estimated loss, $7,000.

Newmarket, Ont.—July 20—The home of Col. E. H. Lloyd was damaged.

Ottawa, Ont.—July 16—The residence of C. F. Whitley, 160 Cooper St., was damaged. Cause, lighted cigarette. Estimated loss, $20,000.

Rock Island, Que.—July 15—The factory of the Telford Garment Co., and a tenement house next door were destroyed. Estimated loss, $40,000.

Thistletown, Ont.—July 18—The barn and contents owned by Jas. Robinson, Smithfield, were destroyed.

Thorold, Ont.—July 19—The basket factory owned by Gardner's, Pine Street, the cooper shop owned by the Maple Leaf Milling Co. and the McMahon house on the north side, were destroyed. Estimated loss, $25,000, partly covered by insurance.

Toronto, Ont.—July 22—The store occupied by Messrs. Finn and Rubbin, 409 Queen Street W., was damaged. Estimated loss, $14,000.

The building occupied by the White and Allan Co., 57-9 Sherman Street, was damaged. Cause, defective chimney. Estimated loss, $500.

West Point Grey, B.C.—July 16—Over 500 acres of land were destroyed by bush fires which lasted over two days.

Winnipeg, Man.—July 16—Three houses on Telfer Street, owned by Thos. Jackson and Sons, were destroyed.

ADDITIONAL INFORMATION CONCERNING FIRES

Winnipeg, Man.—A statement has been issued by Alexander Finch, deputy fire commissioner for the province, regarding the fire which took place on Hilson Street on July 11th. One of the features of this report is the emphasis laid upon the value of wired glass as a preventive of fire spreading to adjoining buildings.

Ontario.—As reported in the Public Service Bulletin the fire loss for the month of May was $718,002, compared with $1,191,407 in 1918, and $1,242,486 in 1917. The following is a summary of the fire losses for the first five months of 1919:—

	Loss.	Insurance loss.	Loss not covered by insurance.
January	$736,529	$543.681	$192,848
February	496,753	364,109	132,644
March	795.791	618,555	177,236
April	644,935	493,255	151,680
May	718,002	545,197	172,805

INDUSTRIAL ISSUES FEATURE OF WEEK

Large Canadian Corporation Issues Underwritten and Several United States Issues Offered Here

THE unprecendental rush of industrial financing continues; much of this was held up by war conditions and is being hastened at the present time before the flotation of the next Canadian war loan. As intimated in these columns last week an issue of $1,750,000 of 7 per cent. cumulative redeemable preferred shares of Canadian Woollens, Ltd., has been offered. The price is par with a bonus of 25 per cent. in ordinary shares. Full particulars appear elsewhere in this issue, the underwriting firms being the Canada Bond Corporation, Ferguson and Ormsby and Hanson Brothers. The three companies, which have been taken over by this new corporation, have been established for a considerable time, the Auburn Woollen Co., of Peterborough, dating back over 100 years. The combined earnings of the three companies for the past five-and-one-half years have averaged twice the amount required to pay the dividends on the preferred shares and to meet the sinking fund payments. This provision of a sinking fund to retire preferred stock is somewhat unusual and the maintenance of the required payments will eventually mean the retiring of the preferred shares at the stipulated price of 110 and accrued dividend or at such lower prices as the stock may be secured at in the market. The textile industry has become firmly established in Canada and during the war period Canadian manufacturers have been able to handle military orders satisfactorily to the allied governments.

Bishop Navigation Co.

A second Canadian system is that of the Bishop Navigation Co., Ltd., first mortgage 6 per cent. bonds to the amount of $1,000,000. These are being offered at a price to yield 6¼ per cent. for all maturities from 1920 to 1929, by A. E. Ames and Co. The Bishop Navigation Co. owns the steamer "Iver Heath," which has been valued by the Canadian Appraisal Co., at $2,109,000, on which this issue is secured by a closed first mortgage. This vessel is being rebuilt and will shortly be completed. Insurance to the extent of not less than 150 per cent. of the outstanding bonds will be carried. The directorate of the Bishop Navigation Co., Ltd., consists of president, R. M. Wolvin, president of the Montreal Transportation Co., Ltd., managing director Halifax Shipyards, Ltd., director Dominion Steel Corporation, Ltd.; vice-president, F. H. Markey, K.C.; managing director, H. W. Brown, steamship owner and operator, N.Y.; director, J. W. Norcross, president, Canada Steamship Lines, Ltd.; treasurer, F. S. Isard, comptroller, Canada Steamship Lines, Ltd.; secretary, T. R. Enderby, secretary-treasurer, Montreal Transportation Co., Ltd.

Allied Packers, Incorporated, 6 per cent. convertible 20-year debenture bonds are being offered at 98½ and accrued interest. This company was recently formed to take over this packing company in United States and Matthews-Blackwell, Ltd., Toronto. The authorized capitalization is debenture bonds $25,000,000, preferred stock $25,000,000 and common stock (no par value) 450 shares. The amount issued is debenture bonds $16,000,000, preferred stock $5,616,000 and common stock 200,000 shares. This issue is being offered in Canada by R. C. Matthews and Co. and other dealers.

Coming Issues

A meeting of the Montreal Public Service Corporation, to be held on July 25th; will be asked to form a by-law based on a meeting of the directors on July 9th, authorizing the issue of $2,550,000 of bonds. The issue is to be secured by the real and personal property of the company.

A circular letter to shareholders of the Dominion Textile Co., calls a special meeting for August 25th for the purpose of authorizing an issue of $15,000,000 of bonds. It is expected that only a small amount of this issue will be made in the near future, but the present authorization is made sufficiently large to provide for repayment of the $7,390,000 of bonds which mature within the next few years.

Economics, Prices and the War

Popular Suspicion of Political Economy Illustrated by War Time Regulations—Theories Have not Been Suitable for Practical Application—Closer Co-operation Would Prevent Unsound Regulations

THE effect of the war upon political economy both as regards its actual precepts and its standing in the community is discussed in a pamphlet by W. A. Mackintosh of Brandon College, in a bulletin of the Department of History and Political and Economic Science, Queen's University. He describes the relation which has existed between various economic theories on the one hand and actual economic life.

"Nowhere has the whole matter of the application of, plain and simple doctrines, to highly valued and complicated situations," he says, "been so exemplified as in the vexed question of government policy in regard to rising prices.

"Current doctrine tells us that a price is a pecuniary statement of value; that value is the rate of exchange between goods. It is that rate of exchange which will equate the amount of a good offered on the market and the amount effectively demanded. High prices 'are S.O.S. calls to producers all over the world to increase production. . . . Again, high prices are the most vivid way of bringing home to the consumer the fact that a shortage exists. . . In these two ways high prices bring about their own cure.'* It is usually further accepted that price *normally tends to approximate* to the expenses of production of the least efficient producer, whose product is required to satisfy the demand. In all except the extractive industries, the expenses of production tend to be equalized, i.e., all firms in the same industry tend to have the same expenses and the same profits. These principles are currently accepted and moreover they are as near to fact as such simple doctrines could be. As guides to governmental policy they are as useless as a yardstick in measuring the cross-section of a hair.

"Many examples have been brought forward to show that the above tendency to an approximation of price and cost is retarded or even completely blocked by other forces of custom, ignorance, or actual directed control of the supply. 'Except in war-time, it costs, according to season, 2⅓ cents to 3¾ cents to produce a can of sardines, but the customary retail price remains at five cents a can year in and year out. Except in time of war, bread is five cents a loaf, irrespective of the price of wheat and beer five cents a glass irrespective of the price of barley. Thus a large class of commodities, bought for daily use by people in general, may fluctuate in cost of production even as much as 50 per cent. without effect upon the retail price. Another large and important class of articles change in retail price by jumps of 25 cents, 50 cents, $1.00 and $5.00. Thus an increase of 10 cents or even four cents in the cost of an article at the mill, has been followed by an increase of 50 cents to the consumer, and an increase of 37 cents at the mill has been followed by an increase of $1.00 to the consumer. It is true that in some instances a small per cent. of decline in the cost of production is followed by a reduction of 25 cents or 50 cents or some other 'round' sum in the price to the consumer. But this also indicates that the price charged before the reduction was excessive, and both classes of facts justify Professor Emory's statement, based on information gathered when a member of the United States Tariff Board, that 'the relation of the price which the producer receives for the commodity to the price which the consumer pays for it, seems to follow no rule of logic.'† On October 8th, the price of a pound loaf of bread in this country varied from 6 to 15 cents, the high price being in the great food market of the middle west and the low price being in the manufacturing district of the east. Perhaps no other equally expensive article is so often purchased for American homes as a piano. I am credibly informed that a $300 piano costs $65 at the factory,'‡ Mr. John A. Hobson has estimated that the consumer suffers more from the excessive prices charged for common articles of food and clothing by wholesalers and retailers than from the much talked-of power of the 'trust' and the monopoly.

Relation of Cost and Prices

"The Federal Trade Commission of the United States in its investigation into 'profiteering,' found that the simple rubric of cost of producton plus average profit, when applied by the government, resulted in enormous profits, by reason of inflated costs and of the greatly superior efficiency of certain firms. In spite of the tendency of costs of production to be equalized the equalization process is tardy enough to be productive of enormous profits, profits which are not necessarily more a lure to firms to discover new methods and economies, than both the result of, and the incentive to, a concerted endeavor to keep other firms back.

"It is commonly recognized that cost theories in relation to railway rates are of little practical importance. The rate is set at 'what the traffic will bear.' Railway transportation is par excellence an industry of joint costs, i.e., costs cannot be allocated to any particular service, because they are constant and continue as long as the railway is a going concern, regardless of the fluctuations in traffic. Goods may be carried at any rate between the limits of the added cost of transportation (i.e., the cost that is added because a certain shipment is taken, usually little more than the handling charges), on the one hand, and the value of the service on the other. All this we have recognized; but what has not been accepted, is that the element of joint cost is present in every plant where more than a single product is produced and that to that extent the price of such commodities is 'what the traffic will bear.' The prices of a large proportion of our staple manufactured goods are not 'cost of production plus' prices, they are set on similar principles to railway rates. The point is not that the prices are excessive. They may or may not be such.

---

*W. C. Clark, *Should Maximum Prices Be Fixed? Queen's Quarterly, April*, 1918.

†*American Economic Review*, V., 536.

‡E. C. Hayes, *Proceedings of the American Economic Association*, December, 1917, pp. 202-3.

It is that we are using price theories that cover only a very few cases.

"A case in point. An investigation by the Cost of Living Branch of the Department of Labor last summer showed that soda crackers in Canada were ordinarily sold at approximately their prime cost, i.e., the cost of materials and operators' labor. Ordinarily they were not expected to bear more than an insignificant share of the overhead (or joint costs). The fancy products of the industry were made to carry practically the whole burden of the factory and selling overheads. Such an arrangement is quite legitimate, but it is rather explained by the theory of railway rates than by the ordinary theories of value. This illustration throws an illuminating light on the otherwise puzzling situation in which innumerable firms were able to show that, allocating overhead costs according to the value of the product, or labor cost, or any other principle of allocation, they were losing money by selling their staple products at the market prices. The most common and indeed almost invariable rejoinder to governmental enquiry in regard to prices of any particular commodity, was proof absolute and overwhelming that the cost was greater than the price. The great bulk of our staple manufactured products are produced under conditions of joint cost, yet we have not made adequate use of the principle of joint cost in relation to general prices as has been done in regard to the particular prices of railway services. Commissions and officials innumerable have insisted on the reasonable relationship between war prices and costs when the real truth, if not accurately expressed in Professor Emory's statement, that 'the relation seems to follow no rule of logic,' was at least that it did not follow 'the rule of logic' usually applied to it.

Competitive System not Complete

"The thesis here presented is not that the competitive system is not justified by its results. (That question is quite outside the present article). The argument rather is that at present numerous facts indicate that there are large and noteworthy gaps in our ordinary assumption of competition and that even where that system is effective as a means of control, it does not necessarily or even usually work according to the accustomed formulae. Further, we have not enough data at our disposal to know just how it does work. We know that competition exists and that friction exists. We know that there is an element of joint cost in most industries and that the effect of competition is decidedly 'abnormal' in such cases. What we do not know is the extent to which these factors are involved. Once more we know the principles but the facts are lacking. Moreover, the principles without the facts are like mathematics without measurements to apply them to, very pure but very useless.

"In this situation lies the essential *casus belli* of the whole popular controversy of the war period as to prices and profits. The widespread popular demand for the fixing of prices and the general advice of economists against it, were opposed on this very basis of fact.

"The war, like every other war in history, brought with it a sudden rise in prices, a rise that was in part general and due to inflation, and in part, particular and due to the scarcity of necessary articles. Such a rise in prices with the consequent diminution of real wages, owing to the tardiness with which money wages rose, brought a shifting of standards, causing much readjustment and discomfort. 'One of the most difficult things for a people to do is to revise their standard of living—downward. A nation will without a murmur give its sons to be crippled or killed, but doubling of the price of bread, reduction of the sugar purchases and all the relatively small inconveniences which a rapidly rising price level brings home to every household, will be vigorously resisted with threats of strikes in vital industries and bitter cursings of speculator and profiteer.'* In part this is the old and ever-present difficulty of accepting an intimate, direct, and easily perceived loss, for the sake of a distant, indirect, and somewhat obscured gain. That is the most fundamental and constant psychological fact in all social control. The case in point, however, is an instance of more than that. It was not only the indirectness of the gain, it was the doubt of its existence. The response which the Canadian people gave to appeal after appeal for funds, is conclusive proof that they were willing to meet the cost of the war in money as well as in men. They were not sure that increased prices were a part of the war. There was the rub! It was the conviction of a large part of our population that most of the increased price represented increased profit in some one's purse. It was not the cost of the war but the inequitable distribution of the burden that caused disturbances. Most of the meagre facts which were brought before the public tended to corroborate rather than disprove that view. The one notable case which came up for public review ended in the publication of a few facts, which left the head of the firm concerned convinced of his righteousness, the public convinced of his guilt and the government in a quandary. The net conclusion to be drawn is that 'business profits,' 'competitive profits,' 'fair returns,' etc., are mere terms and the facts are quite unknown.

Opposition to Price Fixing

"In regard to governmental policy, sound and legitimate reasons were given against any widespread price fixing scheme. Fixed prices are difficult to enforce. Except in highly organized markets they are impossible.† Price-fixing is a useless weapon to attack inflation. 'Prices are but symptoms; to attempt to attack the prices themselves is like attempting to cure influenza by stopping the sneeze. Neither the price nor the sneeze is the disease.'‡ It is no cure to stop the sneeze, but it may well be a polite and wise measure. Price-fixing at best, however, is only an emergency measure, for the fixing of prices means the abolition of the price system, which is the mechanism for industrial and commercial control. From this fundamental cause arises the fact that fixed prices usually, if prices were rising, limited production and stimulated consumption. As Professor G. F. Warren has shown, the exports of wheat and wheat flour from the United States diminished in 1918 37% from the level of 1917. The chief reason for this he finds to have been the dumping of the entire crop on the market in the fall and the subsequent reckless consumption. That does not apply to the Canadian situation, however, for our crop was always dumped on the market in the autumn for lack of credit on the part of our farmers. (The overcoming of that annual low price period in the fall, is the justification, and the only justification for the fixing of the price of wheat in Canada. It will be permanently effected, however, not by price-fixing but by better credit organization.) In many lines the checking of production was evident though difficult to estimate in extent.

"All these reasons are sound and legitimate. They do not, however, touch the centre of the cost of living problem. They merely discredit one proposed remedy. They do not, for instance, meet statements like the following: 'If one were asked to say concisely what has made possible the present food situation in regard to prices, he could express the truth in these four words: Lack of organized resistance.'§ It is obvious that the writer does not understand the whole situation. The context shows that he has a very common but very erroneous idea as to what is meant by supply and demand. He neglects altogether the important factor of inflation. In fact he has neglected most of the fundamental principles. One thing he knows. The great majority of our people also understood it. A period of rising prices does benefit the business man more largely than any other class. Profits rise much more quickly than wages. It is also understood that prices are not completely beyond the control of the business man. Only in so far as they are competitive, are they beyond his control. While the economist is at pains to show a complete monopoly is next to impossible, 'the man on the street' is 'sound in the fundamentals' in holding that a fractional and transient control may bring very large and enviable profits. Veblen recognizes the same in arguing that the business man of the present controls his conjunctures. The reason prices doubled during the war was inflation. The reason bread was a cent a pound more in one town than in another (and that was where the shoe pinched) might very well be the existence of temporary price-fixing operations other than those of the government. A tacit agreement among the bakers, perhaps a meeting of the local retailers' association would not result in greatly influencing the Department of Labor's index number but it did pinch the consumer and increase the profits or secret reserves. There is not a town in Canada where selling agreements, formal, informal or merely customary and courteous, do not within narrow limits affect prices. In spite of an order-in-council modelled on 12th century edicts prohibiting such agreements, they exist from the smallest barbers' local to the Canadian Manufacturers' Association itself. Such agreements are not necessarily harmful. From many points of view they are useful. They are not competition, however, and while they exist we cannot assume perfect competition.

Facts and Economic Theories

"These were the facts from which the consumer drew his conclusions, and which were the 'fons et origo' of his protest. Those facts, on the other hand, are the facts that economic theory too often disregards. To put the point in terms of that theory, the economist is troubled to show that price is set between the limits set by marginal utility, i.e., what gratification would be lost by having a unit less, and cost of production. Any price between those points would 'clear the market.' What bothered the consumer was the setting of the point of price within those limits set by the 'marginal pairs.' That price, he knew as well as any economist, was not set by cost of production but by bargaining power. During a period of rapidly rising prices those limits are not narrow; they afford considerable scope, scope enough to permit of making a fair-sized fortune in some cases. Within those limits it was the 'lack of organized resistance' which permitted the rise in price. In regard to how that bargaining process is carried on, what its results are, and how the weaker bargainer can protect himself, economists have had very little to say. The consumer, like the workman in the early days of the union, because of his lack of knowledge, is the weaker bargainer. Note that, like the workman, his bargaining position is weak not necessarily because his position is uneconomical from the social point of view, but because superior knowledge gives his bargaining opponent an advantage. Just as the economist of a century ago told the trade unionist that his union was powerless to effect anything but error under all-powerful economic law, so the economist of our day was rather too apt to make obvious remarks about old and very true principles and neglect the less obvious but none the less important facts of our very complex price system. Neither facts nor principles warranted maximum prices any more than the facts and principles of a century ago warranted the Elizabethan Statute of Apprentices, but that is no reason for the economist neglecting to endeavor to discover some remedy for a situation which obviously made for discontent. Perhaps there was no remedy, but we might at least have a diagnosis.

"In summary it might be said then that the two basic reasons for the discontent during the war in Canada (and in other countries where actual suffering was exceptional) were (i.) the knowledge on the part of the consumer that through failure of competition to work, prices were not beyond the control of the dealer, and [ii.]) rising prices brought an unequal distribution of the burden of war. With these facts few economic writers dealt in a thorough and scientific way. It was left to the clergy and the press to deal with them in a very unscientific way.

"The argument of this article is not for any particular remedy to be applied *ex post facto*. It is not an argument in favor of any scheme of maintaining prices. The sooner prices sink back to a stable level again the better it will be.* The argument rather is that we are in no position to offer particular remedies or advice because knowledge of what the situation is is lacking.

"In regard to prices, few people understand how exceedingly complex a thing a price is. It is the result of a thousand and one variables which are glibly lumped together as demand and supply. Because of this complexity, in no field do we need so badly the very best statistical method, in order to reduce the complexity to some degree of simplicity. In no field, however, are mathematical formulae so utterly and dangerously useless, if the materials to which they are applied are not selected with the greatest skill and care. The problem of collecting information in regard to prices, then, is of more than ordinary difficulty but it is of more than ordinary urgency. Nowhere is that urgency greater. The price is the crux of the whole industrial and commercial relationship. It is a 'symptom.' In these days when so much attention is being given to social and industrial pathology, symptoms repay investigation.

"Most of this investigation, if it is to be wide in scope, must be undertaken by the government. The pressure and the advice, however, must come from those who are by profession most interested. What type of investigation is needed? Certainly not the transient commission which must produce results overnight and rarely has the time or the organization to get at the heart of the problem.

Prices Not a Simple Matter

"In the first place, we need to make better use of the existing machinery. Much is being done to better our census statistics. It is not too soon for those interested (and social scientists should be) to put forward constructive suggestions for the next decennial census. While the Bureau of Statistics can quite well carry out the plans, an advisory commission to advise the Bureau as to the information which is desirable, would be a most useful body. The Bureau of Statistics has worked hard to make the census something more important than a mere counting of heads but there is little intelligent demand for anything more. We may expect better unemployment figures from the Department of Labor in the future. More adequate statistics of wages will probably follow. It remains for Canadian writers and teachers to point out the meaning, and criticize the compilation and method of such statistics. Another instance: the excess profits tax must have been productive of a mass of useful information. There has as yet been no effective demand for its publication. That could easily be accomplished without injuring any of the firms concerned. It would be more useful as a guide to policy than ten treatises on the subject of profits taxes. Further, at very great expense Canada undertook last year a man-power census. Presumably the results will be published but as far as we know no use has been made of the information nor has it yet been made available.

"In addition to making more adequate use of our existing machinery we need separate, permanent commissions to do in the industrial field what the Commission of Conservation has done in a more limited field. An industrial commission which would collect information in regard to Canadian industry, its organization, extent and progress would make it possible to discuss Canadian problems with some assurance. At present our Canadian industry is not so complex but what its general organization and the essential facts in regard to it can be ascertained. Soon, however, we will find that an industrial survey becomes almost impossible because of increasing complexity. Such a commission might or might not undertake regulative functions. Its primary function would be the acquisition of facts. The most noticeable feature of the whole war period in regard to government was the extent to which government agencies were at the mercies of various individuals and interests for information. In many cases such information and aid was loyally and freely given. In other cases advice was largely colored by business interest. In peace or war the much-talked-of sinister influence of the 'Big Interests' exists because there is a lamentable lack of knowledge on the part of the government and the public as to what the 'Big Interests' are, and how they operate. Nothing could do so much to eliminate this as a well informed Industrial Commission.

---

*Vide B. Anderson, "Price Readjustment," National Bank of Commerce, New York.

"To turn to one special field. Canadians are approaching a revision of the tariff with the most meagre knowledge of what is involved. It is generally acknowledged that the tariff is a matter for experts, but in Canada we have neither experts nor information. Only the 'interests,' whether agricultural or manufacturing, know what they want. Beyond a few principles and a political creed neither government nor governed are in a position to meet the situation. The extent or the effectiveness of protection is unknown. A Tariff Commission, not of Cabinet ministers, but of scientists, would do more to effect a rapprochement between east and west than Sir John Willison bearing gifts.

"In the particular field of prices there remains much to be done. At present we have some collection of wholesale and retail prices. To these must be added producers' commodity prices. When accurate information of this sort is available we may expect intelligent discussion of the problem of the middleman. The near future will bring insistent demands for national and municipal operation of various quasi-public enterprises, such as cold storage plants, marketing agencies and so forth. Only the most accurate knowledge of what the cost of the middleman really is can form the basis for reasonable decision. Security prices and house rents should also be made available in more usable and accurate form than at present. This work is already being undertaken by the Dominion Bureau of Statistics but it needs supplementing and expansion.

"To return to the original point of departure, we have been quite at sea in dealing with our war-problems because for the most part we were without information. We supposed the situation to be normal when abnormality was the rule. The dynamic of war made the exception more important than the rule, and economists take little note of the exceptional. A great deal of vital time has been lost in dealing with our 'reconstruction' problems, but it is not yet too late to tackle them scientifically. The pressing problems are problems where the necessary and lacking element is knowledge of fact. Unemployment, industrial organization, the tariff, the possible period of depression: for the solution of these problems it is the basis of fact that is required. Until by government or private initiative these facts are acquired, economists are but stirring the dust which obscures them.

STERLING OFFICES OPEN BRANCH HERE

A Canadian branch of the Sterling Offices, Ltd., London, Eng., has been opened in the Bank of Hamilton Building, Toronto. This company occupies an outstanding position in the re-insurance field, placing large amounts re-insurance for fire, and of excess insurance for personal accident, automobile, hail and other branches. The Canadian office, of which Mr. H. Marshall Robertson is in charge, will facilitate the arrangement of business with the head office.

BRITISH EMPIRE TRUST COMPANY

This company, which was incorporated in Great Britain in 1902, has become well-known in Canada through its connection with the Canadian Northern Railway, the British Columbia Electric Railway, the Shawinigan Water and Power Company, and other Canadian concerns. Its object is to facilitate the investment of British capital in the colonies. Results for the year 1918, were entirely satisfactory, and in spite of the further depreciation in the value of securities, experienced by all investing institutions, dividends were maintained. It was also decided to make an issue of Employees Profit Participating shares; particulars of this issue and of the method of distributing dividends are contained in the chairman's address at the annual meeting, given elsewhere in this issue. The company's business also includes the handling of trust funds, of which business £64,000,000 has been secured.

PERSONAL NOTES

Mr. William McMaster, of Montreal, has been elected to the board of directors of Allied Packers, Inc., at a meet-of directors in New York last week.

Sir Walter Townley, British Minister to The Hague for the past two years and a half, reached Toronto, on July 26th, en route to British Columbia, where he will reside.

Hon Reginald McKenna, former Chancellor of the Exchequer, has been elected chairman of the London City and Midland Bank, in succession to the late Sir Edward Holden.

Major Guy M. Harris, fire insurance and general financial agent, is back at his office again in the Merchants Bank Building, Winnipeg, Manitoba, after practically five years' war service.

Sir Frederick Williams-Taylor, general manager of the Bank of Montreal, and party, left Montreal, on July 26th, for an inspection tour of the northwest, expecting to be absent for a month.

Mr. Arthur James, who for the past seven years has filled the position of superintendent for the province of Quebec, for the Ocean Accident and Guarantee Corporation, has been transferred to the United States branch of the corporation as resident manager at Boston, Mass.

Sir Edmund Walker, president of the Canadian Bank of Commerce, reached Victoria on July 28th, from the Orient on the Empress of Russia, after a survey of conditions in China and Korea. With him were Mr. Logan, head of the bank's foreign trade department, and Mr. Holt, manager of the Vancouver branch.

Mr. D. Stuart MacLeod, has been appointed by the General Accident Assurance Co. of Canada, as inspector for British Columbia, with headquarters at Vancouver. Mr. MacLeod was latterly with Messrs. Johnson and Higgins in New York, and previously inspector for the London and Lancashire Guarantee and Accident Company, in Montreal.

Mr. John W. Wetmore, of the Ocean Accident and Guarantee Corporation, has been appointed superintendent for the province of Quebec, as from the first of August. Mr. Wetmore has for many years efficiently attended to the large eastern claims business of the corporation, and has also served the corporation in a broader consulting capacity.

Mr. G. T. Milne, His Majesty's senior trade commissioner for Canada and Newfoundland, Montreal, is being transferred to the commercial diplomatic service, and expects to leave shortly for Havana, Cuba, to take up his duties as commercial secretary of the British Legation there. Mr. Milne arrived in Canada last year from Australia, where he held the office of British trade commissioner for five years. Previous to that appointment he had for many years been connected, both officially and unofficially, with the Latin-American countries.

OBITUARIES

Mr. W. H. Wetherby, Halifax broker, died in that city on July 27th. He was one of the older men in the banking and brokerage business in Halifax.

Mr. W. L. Ball, well-known in Winnipeg financial circles, died on July 25th, after a lengthy illness. Formerly manager of the Eastern Townships Bank, Mr. Ball had latterly been Income Taxation Commissioner for the Dominion Government.

Mr. Robert C. Cox, pioneer lumber merchant, of Liverpool, England, and Ottawa, died on July 27th, at his residence, 381 Stewart Street, Ottawa, in his eighty-third year. Mr. Cox has been connected with the lumbering trade in Ottawa and district for the past fifty-five years.

MARKETING CANADA'S CHIEF COMMODITY

THE question of handling our 1919 wheat crop, which has been under discussion practically since the 1918 crop was out of the way, and especially since the decision of the United States to fix the price there, has at last been settled by the government announcement to the effect that an official board will have entire control. No mention is made of any price guarantee, and the farmer will receive the price prevailing in the world market, less expenses. The price of the United States crop, on the other hand, is fixed at $2.30, the government assuming the chances of loss or gain.

The announcement, which was made on July 30th, is as follows:—"The peculiar conditions of the wheat market in Europe and the United States, where government agencies are almost exclusively employed and where government credits have to be provided for the purchase of wheat, rendered it necessary to provide a similar agency in Canada or to run the risk of being faced with an absence of adequate cash markets for Canadian wheat and a speedy and uniform movement of the same.

"The government, after very careful enquiry and consideration, has therefore decided to appoint a board of experienced men invested with adequate powers to conduct the purchase and sale of the Canadian wheat crop of 1919, both for export and domestic purposes. An initial cash payment by way of advance will be made by the board to farmers for each bushel sold, based on the price of No. 1 northern at Fort William. At the conclusion of the season's sales, after the deduction of necessary expenses the total excess realized over and above the first payment made to the farmers will be divided among the original sellers in proportion to the grades and quantities sold. The farmer will thus receive the best world price for his wheat in a cash payment at time of his sale, and a final payment when the whole crop has been disposed of.

"A complete system of record, under the provisions of the Canada Grain Act and the regulations made thereunder, will be kept, which will enable the board to determine with accuracy and pay with certainty the exact proportion of the surplus due to each original seller. The board will sell wheat to the millers and will sell the flour milled therefrom for export, while for domestic consumption the sales will be made as usual, and the price will be restricted to a fixed maximum of reasonable profit, allowing within that maximum competition among the millers themselves. The Grain exchanges will not give facilities for the buying and selling of futures in wheat during the crop season of 1919. The board will utilize, as far as available and necessary, the existing facilities, for purchase, transport and handling of wheat with a view to disturbing as little as possible the existing and usual method of trade.

"The government has been actuated in its decision by a desire to secure for the Canadian farmer the best possible world price for his product, and at the same time to ensure to the home consumer that his flour shall not cost more than is made necessary by actual world prices. Such action has also been made necessary in order to secure the early marketing and speedy movement of Canada's surplus wheat, thus making it possible for the farmer to realize at once a substantial cash price for his wheat, and ultimately the fullest possible return for the balance of price realized by the season's sales. The establishment of this board does not interfere with the work of the Board of Grain Supervisers in respect of that portion of the crop of 1918 delivered by August 15th. Their powers and functions are continued in full force so far as that crop is concerned. The new board will have sole authority to deal with the crop of 1919, and with that portion of the crop of 1918 which will be undelivered by August 15th."

The final decision of the government was reached after conferences held on July 28th and 29th, with leading millers, grain dealers and others associated with the marketing of the grain crop. Evidently the question was practically settled at the close of the former day, for in the evening Hon. Geo. E. Foster, minister of trade and commerce, despatched a telegram to President Anderson of the Winnipeg Grain Exchange asking that trading in wheat futures be prohibited. This was done on Tuesday morning; trading in futures had been resumed only nine days previously.

PROTECTION TO LOAN COMPANY INVESTORS

THE failure of the Standard Reliance Mortgage Corporation has again aroused the storm of interested criticism which almost invariably succeeds the collapse of any financial institution acting as a repository for public funds. This is in marked contrast to the apathy with which an industrial failure is regarded, even when a large number of shareholders is involved, or the prolonged inability to pay dividends, which is just as inconvenient to investors who have been relying on them for support. Business risks are not peculiar to industrial enterprise, and too much optimism or bad management alone may wreck a financial as well as an industrial concern. The future always holds in store contingencies, the ill-effects of which cannot be eliminated, and which may be disastrous to institutions which have not been guided with accurate judgment. There is no single financial leader competent or willing to lay down a policy for all institutions; and governmental authorities are quite unable to control business in such a way as to ensure safety, and at the same time provide for the expanding needs of a growing country. Actual developments alone are the only conclusive test of business policy, and the course of this experience cannot be expected to be free from wrecks of institutions which have not been guided aright. Nevertheless there are certain features which characterize conservative management, and the long list of Canadian banks, loan companies and insurance companies which have survived several decades of changing conditions proves that these sound principles are applied. The statements of the liquidator show that this was not true of the Standard Reliance, which in the pre-war days tied up large sums in realty investments of a speculative character. The responsibility for preventing practices of this kind is hard to place. The corporation's balance sheet for the year 1918 was audited by a firm of competent chartered accountants, and it is on statements of this kind that a financial journal or other interested parties rely to form an estimate of financial condition. Some additional information is furnished to the provincial government and published in the annual report of the Registrar of Loan Corporations. Upon the publication of the 1918 statement a review was given in these columns which, while not altogether favorable, did not indicate any serious condition of affairs. The government report for 1918 was not at that time available, but a reference to the information given regarding the Standard Reliance in the 1917 report did not throw any additional light on the items which have been found by the liquidator to be incorrect. Rumors were, of course, in circulation to the effect that everything was not in good shape, but these reports were not sufficiently reliable to warrant their publication.

Since this condition of the Standard Reliance was reached, an important change has taken place in the information required by the Ontario government; this is now obtained in greater detail, in accordance with legislative amendments made in the 1917 session. The information for the year 1917, furnished under the old regulations, shows as an asset "debts secured by mortgages of land, $6,616,207;" this is now to be set forth in some detail. The provincial attorney-general has also stated that the resignation of G. T. Clarkson from the position of auditor in 1914 was not, so far as he had known, because of objections to the loans which the company was making.

It is acknowledged that an auditor in the performance of his duties must accept property valuations as made by the company. The provincial government should make use of its authority to secure and publish reasonable adequate data; and the general public and those called upon to form an estimate of a company's financial position must rely upon the information published by the company and verified by these two parties. Even when all this is done risk cannot be eliminated. Governmental regulations are the most effective method of control, and these, if they are not to be too restrictive must be carefully framed after thorough consultation with loan company officials of admitted standing.

COMMUNITY BUILDING BY BANKERS

THE importance of the branch bank manager in local development was emphasized at a convention of the Union Bank, held in Winnipeg last week. This meeting was attended by managers of branches in various parts of the province and by general officers of the bank. "Affiliate yourself with everything that tends to your town's upbuilding," said Mr. H. J. Pugh, of Brandon, in addressing the meeting. "Always remember, too, that in building up the community in which you are located you are indirectly benefiting the institution with which you are associated." The special opportunities of this kind in the growing municipalites of the west was pointed out by Mr. B. B. Carter, eastern superintendent. "We in the east have no such opportunity as you have here," he said. "Our towns may be considered fully settled. There is no question but that western Canada presents the greatest opportunities anywhere on earth to-day. You men have more personal opportunity for developing yourself than men in the east have. You are thrown more upon your initiative and given the opportunity of developing your own individuality." Applying this to farming, Mr. F. W. S. Crispo, assistant general manager, expressed the opinion that every branch manager should have at least a working knowledge of farming, and should be a driving force in his locality.

These remarks are applicable in some degree to practically all local enterprise. It is, however, a peculiarity of finance that it lives, not by supplying a product which directly fills a human want, but by assisting all branches of industry in their efforts. The banker furnishes capital required in the purchase and distribution of goods in the community, and carries the farmer during the months when his crop is growing. The market of the branch bank, in which it both lends and borrows, is distinctly local. On the other hand, the farmer or the local manufacturing concern is dependent only in an insignificant degree on the local demand. It is this all-round interest of the banker in local progress which makes it specially appropriate that he should be a constructive factor in community progress.

Among the general officers of the bank attending these meetings in the west are H. B. Shaw, general manager; J. W. Hamilton and F. W. S. Crispo, assistant general managers; W. M. Chandler, superintendent of western branches; B. B. Carter, superintendent of eastern branches, Toronto; E. M. Dawson, foreign department, Montreal; A. B. Jamieson, inspector; L. G. Elliott, Winnipeg; W. Mitham, western auditor, and J. H. Hodgins, manager of the statistical department, Toronto.

FOREST FIRES DRAIN PUBLIC TREASURY

One of the most destructive forest fire seasons in recent years is taking a tremendous toll of Canadian national wealth. With the exception of a small area in northern Ontario, practically all the fires cleaned off the timber crops on lands that are useless for agriculture. Such lands can grow only one crop and that is wood. Once stripped these areas lie profitless for half a century or more. Repeated fires usually kill reproduction for all time to come and another section of barrens is thereby added to the nation's great total.

Contrary to public impression, every forest fire is a direct blow at the provincial or federal treasury, for the reason that more than ninety per cent. of the forest lands of Canada are public-owned. Licenses issued are for cutting rights and are usually for one year. The title to the lands always remains in the name of the Canadian people and this fact makes forest protection essentially a matter for public co-operation. More than seven million dollars a year are taken in taxes from forest areas by provincial and Dominion governments.

FRIENDLY SOCIETIES' BUSINESS DECLINES

Figures for 1918 Show Large Decrease, Compared with 1917 —Amount of Insurance in Force Drops by $82,000,000

THE report of the Ontario Registrar of Friendly Societies, for 1918 shows some changes which are rather remarkable when compared with the experience of life insurance companies for the year. Particulars of the life insurance business of these societies, both in Ontario and generally, and benefits in the nature of life insurance, are given in the table herewith. A comparison of the totals with those for last year is as follows:—

	Dec. 31, 1917.	Dec. 31, 1918.
Total membership in Ont. ...	243,781	230,023
Amt. ins. in force in Ont.	$ 156,788,705	$ 139,369,363
No. of cert. in force anywhere .	941,682	861,278
Amt. ins. in force anywhere.	$1,103,457,343	$1,021,501,203
No. claims matured in Ont. ..	2,449	2,748
Amt. ins. benefits paid in Ont.	$ 2,556,635	$ 2,589,567
Amt. disability benefits paid in Ontario., incl. pensions and gratuities	$ 163,270	$ 169,778
Assets in Ontario	$ 27,341,592	$ 18,481,738
Liabilities in Ontario	$ 402,797	$ 545,936
Total assets anywhere	$ 66,958,740	$ 58,270,140
Total liabilities anywhere	$ 3,581,752	$ 4,955,440

The totals of sick and funeral benefits, compared with last year, are as follows:—

	Dec. 31, 1917.	Dec. 31, 1918.
Number of members	172,020	173,625
Deaths during year	3,500	4,097
Amount paid for funeral benefits	$ 189,658	$ 204,773
Number of members sick	33,468	34,992
Number of weeks sickness	166,811	171,974
Amount paid for sick benefits..	$ 811,774	$ 705,835
Amount paid for medical attendance	$ 90,621	$ 93,540
Amount paid for special relief..	$ 61,229	$ 44,334
Assets	$3,923,377	$3,979,788
Liabilities	$ 108,754	$ 120,904

YIELDS ON INVESTMENTS IN STOCKS AND BONDS

The following table of investment yields of stocks and bonds has been compiled for *The Monetary Times* by Messrs. MORROW & JELLETT, Members Toronto Stock Exchange, 103 Bay Street Toronto:—

July 30th. 1919.

INVESTMENTS AND THE MARKET

Cape Breton Electric Gross Earnings Up, but Net Down—Canadian Pacific Railway Gross Shows Increase

New Brunswick Railway Co.—The annual meeting of the shareholders will be held at the office in Montreal on Thursday, August 7th.

Ottawa Gas Co.—Gross receipts, excluding profit from sale of merchandise, amounted to $45,917 in April, being an increase of $5,971, while for the first four months the total was $163,703, an increase of $10,225, as compared with the first four months of 1918.

Nova Scotia Steel and Coal Co.—D. H. McDougall, president, has completed the purchase from the British Ministry of Shipping, represented by Director J. B. Whyte, of New York, the coal-handling plant on the Canadian National Railway terminals at Halifax.

Dominion Steel Corporation.—Wire advices from Sydney state that the plant will shortly close down for a period of several weeks in order that contemplated repairs in most of the departments may be carried on. The despatches add that extensive repairs will be made to the blast furnaces, open hearths and billet mills, necessitating a stoppage of operations in nearly all departments.

Twin City Rapid Transit Co.—Gross revenues of the company for June amounted to $924,845 as compared with $808,432 in the same month in 1918, an increase at the rate of 14.4 per cent. After deduction of operating costs, net revenue amounted to $311,504, against $265,633, or an increase at the rate of 17.26 per cent. After deducting fixed charges and taxes, net income was $152,929, against $110,051 in June last year. For the first six months of 1919 gross earnings totalled $5,342,680 as against $4,847,547, an increase at the rate of 10.21 per cent., while, after deduction of operating charges and fixed charges and taxes, net income amounted to $565,414 as compared with $394,002, or up at the rate of 43.51 per cent.

Fraser Companies, Ltd.—Another mill is to be built in the province of New Brunswick by the company. Operations with that end in view have already been commenced. The site of the old mill of the Scott Lumber Co. at Upper Magaguadavic siding, on the Canadian Pacific Railway, in the western end of York county, will be the location, and James M. Scott, of this city, superintendent of Frasers' logging operations in this district, is in charge of their latest development project. The Fraser interests control about ten thousand acres of timber lands in the Magaguadavic district, including what were formerly the Scott Lumber Co.'s lands. It is announced that the new mill will have a capacity of between five and six million superficial feet per season.

Atlantic Sugar Refineries.—Good reports are heard of the operations of the Atlantic Sugar Refineries. Although supplies of raw sugar are light, the company is understood to be well supplied, giving assurance of continuous operation for months to come. The product is giving excellent satisfaction and has been popularized throughout the country, so that there is no difficulty in disposing of the entire output of the refinery.

The statement is heard that earnings are running at a larger rate than ever before, and that there is every prospect that the financial statement of the current year will be a good deal more satisfactory than that of the past year. In this connection it is asserted in quarters close to the company that the directors are in favor of a policy of wiping out the arrears on preferred before a great length of time. These arrears amount approximately to $30 a share.

Hudson's Bay Co.—Accounts presented at the annual meeting in London, Eng., showed a profit on fur trade of £160,382, against £44,045, and sale at shops and other trading profit of £206,543, against £234,600. The chairman, Sir R. Kindersley, said the epidemic of influenza last year resulted in considerable mortality amongst the aboriginal tribes, from which their principal fur hunters were drawn. This would doubtless have a somewhat adverse effect on collections of furs, but if prices ruling at the moment were maintained, as seemed probable, the directors looked forward to a satisfactory return from this branch of the business. Next year they will specially concentrate on organization and development of this side of the business. The stores department continued to show satisfactory progress, particularly in the larger centres, where modern stores were situated. In the prairie centres results were not so good, the effect of bad harvests being generally and severely felt.

The land department results were satisfactory. In the farm lands section, being second highest in the history of the company, 285,561 acres were sold for £1,023,071 (approximately $17.50 an acre).

Cape Breton Electric Co.—The report for May contains the following figures:—

	May, 1919.	May, 1918.	Increase.
Gross earnings	$ 46,350.66	$ 38,916.96	$ 7,433.70
Operating expenses and taxes	38,449.70	27,740.74	10,708.96
Net earnings	$ 7,900.96	$ 11,176.22	*$ 3,275.26
Interest charges	5,693.09	5,254.89	438.20
Balance (for reserves, replacements and dividends)	$ 2,207.87	$ 5,921.33	*$ 3,713.46

For the twelve months the figures are as follows:—

	May 31, '19.	May 31, '18.	Increase.
Gross earnings	$550,059.39	$483,028.50	$67,030.89
Operating expenses and taxes	419,484.97	335,899.49	83,585.48
Net earnings	$130,574.42	$147,129.01	*$16,554.59
Interest charges	64,112.52	63,073.20	1,039.32
Balance (for reserves, replacements and dividends)	$ 66,461.90	$ 84,055.81	*$17,593.91

*Decrease.

Beginning with March 1st, 1919, sinking fund requirements will not be shown as a deduction from income, as many commissions do not permit of this treatment in their system of accounts.

Canadian Pacific Railway Co.—Earnings of the Canadian Pacific Railway for the first half of the current year continue to disclose the fact that, while gross is maintained at record levels, the higher operating costs more than offset this growth, with the result that net earnings fall substantially below those for corresponding periods in former years. Net for the half of 1919 at $12,186,478 represents the lowest for any similar six months in the past ten years, despite the fact that gross of $76,722,266 is the highest in the history of the big Canadian railway enterprise, working expenses showing an increase over the 1918 period of $7,230,487.

In other words, while gross for the half-year showed an increase of $4,709,980, or approximately 6.5 per cent., over that of the first half of 1918, expenses were increased by nearly double that percentage, or by some 12.6 per cent., leaving the decrease in net $2,520,506, or equivalent to over 13 per cent. The ratio of operating expenses to gross earnings reached the record level of approximately 85.4 per cent., compared with 79.6 per cent. in the same period last year and 70.6 per cent. in 1917. In 1915, the operating ratio was less than 65 per cent. The showing for the month of June contains a moderate increase in net earnings of $178,274, the first reported since February last, when the decreased ratio of working expenses to gross earnings consequent upon the milder weather conditions prevailing early in 1919, as compared with those of the unusually severe winters of 1916-1917, made such a gain possible.

Although the June net compares favorably with that of a year ago, with that exception, and with that of 1915, when war conditions were most heavily felt in Canadian transportation circles, it is necessary to go as far back as 1910 to find lower monthly figures for the same month.

SHAWINIGAN WATER AND POWER ISSUE COMING

A circular dated July 30th, has been sent to the shareholders, with reference to the special general meeting to be held on October 8th. This meeting is called to secure ratification of a by-law passed by the directors several weeks ago providing for the issue from time to time of first and refunding mortgage sinking fund bonds to a maximum amount of $50,000,000. The circular says:—

"As reflected by the company's financial statements your company has for some years past shown remarkable development and growth. The assets of the company now show a book value in excess of thirty-two million dollars ($32,000,000). These assets have been acquired from the proceeds of an issue of first mortgage gold bonds, by various issues of debenture stock and also through the issue to the shareholders of common shares, most of which have been sold at a substantial premium. At the time of the issue of first mortgage gold bonds and of debenture stock this method of financing seemed to provide ample means for the company's future development, but the activities of the company have so broadened that it must now have available for its purposes a financial machinery which can be adapted to new conditions as they arise. It is essential that the company should be in a position to avail itself from time to time of the many opportunities which present themselves for an extension of its field of useful and profitable operation.

"The principal reasons why the present machinery of finance is inadequate are:—

"(1) That the outstanding issue of first mortgage gold bonds is a closed issue for the sum of five million dollars ($5,000,000).

"(2) That any further issues of the company's four and one-half per cent. (4½%) perpetual consolidated mortgage debenture stock are restricted by the terms of the company's charter to amounts which shall not exceed in the aggregate fifty per cent. (50%) of the par value of all common shares outstanding. This condition makes further issues of debenture stock unsuitable for the company's larger requirements, both present and future. Debenture Stock is not sufficiently well-known in the American markets, nor is it a security which is acceptable to American investors. The new conditions make it essential that the company should be able in the future to avail itself of the facilities afforded by this market.

"Another obvious reason presents itself, namely, that further issues of debenture stock necessarily involve further issues of common stock, a condition which at times may be undesirable.

"Your directors have therefore decided to ask the shareholders to sanction a by-law providing for the creation of first and refunding mortgage sinking fund gold bonds to a maximum amount of fifty million dollars ($50,000,000) at any one time outstanding. These bonds may be issued in series, bearing such date or dates and consisting of such aggregate amounts as may from time to time be decided upon. They are to have such maturity or maturities (not later than January first, nineteen hundred and seventy-four), are to bear interest at such rate or rates (not exceeding a maximum rate of six per cent. per annum), and are to be payable as to principal and interest at such place or places, in such currencies and on such terms and conditions with respect to redemption or otherwise, as shall from time to time be determined by the board and expressed in the bonds of any series respectively.

"It is intended that Bonds of the first series shall be known as series 'A' of an aggregate principal amount of six million dollars ($6,000,000). These bonds will bear interest at the rate of five and one-half per cent. (5½%) and mature on the first day of January, nineteen hundred and fifty. The bonds of this series are to be employed by the directors (when and at such times as the directors may deem advisable) to retire by purchase, exchange or otherwise, all of the presently outstanding perpetual consolidated mortgage debenture stock of the company amounting in the aggregate to five million, four hundred and seventy-six thousand, two hundred and sixty-one dollars ($5,476,261). The remaining bonds (if any) of series 'A' will be employed for the corporate purposes of the company.

"Further bonds to the extent of five million five hundred thousand dollars ($5,500,000) may be issued for the purpose of refunding (at maturity or at such time as the directors may consider advisable) by purchase, exchange or otherwise, the company's outstanding issue of first mortgage gold bonds.

"For the company's corporate purposes (but the proceeds to be used for capital expenditures only) additional bonds may be issued from time to time and in one or more series up to a total aggregate amount of eight million five hundred thousand dollars ($8,500,000). Before, at or concurrently with the issue of any of these bonds, provision must be made for the cancellation and retirement of the balance of the company's outstanding issue of four million five hundred thousand dollars ($4,500,000) two-year six per cent. convertible gold notes. Of these notes over fifty per cent. (50%) have already been converted into common shares and it is anticipated that a large proportion of the balance will be similarly converted prior to the maturity of the issue. Any notes outstanding on the fifteenth of December, nineteen hundred and nineteen will be paid out of the proceeds of part of the bonds above referred to.

"This scheme, if acceptable to the shareholders, calls for the issue of bonds to an amount not greater than twenty million dollars ($20,000,000) out of the total amount authorized. All other bonds of the issue authorized may at any time and from time to time, but so that the maximum of all bonds outstanding shall never exceed at any one time the limit of fifty million dollars ($50,000,000), be issued and delivered to the company but only to provide for:—

"(1) The construction or acquisition of additional plants or properties or for improvements or betterments.

"(2) The purchase or acquisition of bonds, notes or other obligations and/or shares of stock of any companies or corporations utilizing power and with whom the company may have contracts for the supply of power, or companies carrying on any business which this company or any of its subsidiary companies are authorized to carry on.

"All such reserved bonds are to be delivered to an amount equal to eighty per cent. (80%) of the actual cash cost of the property, securities and/or shares so acquired, and all additional properties, securities or shares so acquired are to be specifically mortgaged, pledged and charged under the trust deed. Your directors are of the opinion that the method of finance proposed will furnish a saleable security of a first-class form for the investor and will conserve and benefit the interests of the shareholders."

MUTUAL LIFE AND CITIZENS INSURANCE COMPANY

The Mutual Life and Citizens Insurance Co., of Australia, has now completed six years of business under Dominion license in Canada, and during this period has succeeded in building up a subsantial business here. The company's organization is widespread, extending throughout Australia, New Zealand, the United Kingdom and Canada. Some of its figures for 1918 business are given elsewhere in this issue. The premium income for 1918, was in excess of $8,200,000, and the surplus $1,750,000. In the ordinary branch the expense ratio was 10.90 per cent., and in the industrial branch 35.44 per cent., of the premiums. The rate of interest earned was 5.11 per cent., compared with the three per cent. required by the actuarial valuations. More than 64 per cent. of assets are in government securities, and all the company's accumulations since August, 1915, have been invested in war loans. The next largest item in the assets is the mortgage loans amounting to 15.58 per cent.; over nine per cent. are invested in municipal securities. In his address at the annual meeting the chairman stated that war claims had totalled $2,172,360, and it had been decided to return all war extras paid by soldiers.

The company's chief agent in Canada, Mr. J. P. Moore, of Montreal, is well-known in the insurance field. Just recently it was decided to open an ordinary branch here, of which Mr. H. Vaughan, F.I.A., was put in charge.

Bank Deposits Up and Loans Down

June Bank Statement Shows no Slackening in Growth of Deposits — Decline in Current Loans is apparently under way—More Money on Call Outside of Canada—Holdings of Government Securities Greatly Increased

	June, 1918.	May, 1919.	June, 1919.	Year's inc. or dec.	Month's inc. or dec.
Deposits on demand	$549,327,078	$ 568,730,118	$605,927,027	+ 10.2	+ 6.5
Deposits after notice	965,934,556	1,107,983,072	1,139,569,570	+ 18.2	+ 2.9
Current loans in Canada	897,226,012	1,071,417,686	1,043,712,932	+ 16.3	— 2.6
Current loans elsewhere	103,033,289	127,490,932	132,525,550	+ 28.2	+ 3.9
Loans to Municipalities	58,000,424	50,356,227	52,349,353	— 10.4	+ 4.0
Call Loans in Canada	76,970,920	89,187,032	95,852,728	+ 25.0	+ 6.7
Call loans elsewhere	170,034,476	157,176,325	167,236,045	— 1.8	+ 6.9
Circulation	195,135,577	219,287,788	222,712,991	+ 13.8	+ 1.4

THE above are the changes in the principal accounts shown in the summary of statements of Canadian chartered banks as at June 30th, 1919. One of the largest changes, however, is in the banks' holdings of Dominion and provincial government securities, which were $224,301,264 compared with $123,939,312 at the end of May. The decline in current loans, which is the only important change for the month, is apparently a continuation of the movement which commenced in April, the high-water mark having been reached at the end of March.

The following table gives record of deposits for the past thirteen months:—

	Deposits payable on demand.	Deposits payable after notice.
1918—June	$549,327,078	$ 965,934,556
July	549,068,651	992,015,137
August	554,906,517	1,014,711,865
September	588,940,119	1,037,498,920
October	644,220,998	1,076,514,627
November	666,366,359	939,329,271
December	711,034,060	958,473,557
1919—January	623,919,410	990,000,085
February	566,775,434	1,018,184,512
March	566,797,268	1,037,851,766
April	571,412,857	1,070,985,080
May	568,730,118	1,107,983,072
June	605,927,027	1,139,569,570

The course of the deposits account during the past six years is shown in the following table:—

June.	On demand.	After notice.	Total.
1914	$355,006,229	$ 663,650,230	$1,018,656,459
1915	349,057,351	683,761,432	1,032,818,783
1916	428,117,340	767,598,130	1,195,715,470
1917	449,689,670	900,510,552	1,350,200,222
1918	549,327,078	905,934,556	1,515,261,634
1919	605,927,027	1,139,569,570	1,745,496,597

The trend of the Canadian loans account for the past thirteen months is shown in the following table:—

Loans.	Current in Canada.	Call in Canada.
1918—June	$ 897,226,012	$76,970,920
July	905,677,233	74,382,762
August	920,775,269	73,509,571
September	942,802,018	74,137,860
October	1,003,593,603	73,685,136
November	1,082,709,655	85,675,063
December	1,075,640,003	89,120,423
1919—January	1,080,340,861	87,598,427
February	1,095,301,791	79,154,121
March	1,117,197,446	87,601,337
April	1,107,986,523	86,091,844
May	1,071,417,686	89,187,032
June	1,043,712,932	95,852,728

The following table shows the call loans abroad in June, as compared with previous returns:—

	1916. $	1917. $	1918. $	1919. $
January	134,248,552	155,747,476	132,687,066	140,819,656
February	139,138,651	162,344,556	160,239,494	155,983,681
March	141,889,989	161,616,735	167,296,701	160,116,443
April	147,146,443	159,156,054	179,818,531	155,533,666
May	163,400,659	168,692,675	172,259,879	157,176,325
June	182,757,015	159,309,133	170,034,476	167,236,045
July	177,121,733	151,875,676	167,112,836	....
August	171,380,353	176,610,625	160,544,990	......
September	173,877,586	166,480,004	159,680,810	......
October	189,346,216	151,018,747	157,040,858	....
November	183,250,389	139,832,552	171,035,732	...
December	173,878,134	134,483,482	150,248,322	....

The following table shows the course of the principal loan accounts during recent years:—

June.	Current loans in Canada.	Current loans elsewhere.	Call loans in Canada.	Call loans elsewhere.
1914	$838,276,428	$ 46,186,854	$67,401,481	$137,120,167
1915	759,934,154	39,273,120	73,628,187	124,604,875
1916	747,470,541	60,081,584	86,776,474	182,757,015
1917	839,355,782	93,150,083	76,085,220	159,309,133
1918	897,226,012	103,033,289	76,970,920	170,034,476
1919	1,043,712,932	132,525,550	95,852,728	167,236,045

Your Vacation is Planned

Business —Pleasure

SEE Canada in the making! Let your vacation take you to the land of thriving opportunity. On discovering this greater business field at your elbow, you can settle down, or invest at will, with maximum profit. A visit to such cities as Winnipeg and the Prairie towns will acquaint you with a bigger future.

"9 Ideal Vacations"

In the wide lands of Canada, thousands of happy surprises await the vacationist. Health and strength renew themselves in the invigorating atmosphere of Prince Edward Island, St. John River Valley, Muskoka. For the hunter of moose, deer or bear, there is abundant sport in Nova Scotia, Quebec, New Brunswick, New Ontario and Eastern Manitoba. Great grizzlies and nimble mountain goats draw the sure shot of the hunter in British Columbia. The fish are biting at Rainy Lakes, Nipigon, Lake of the Woods and other ideal spots.

A Vacation Planned to Meet Your Needs—Choose!

Go back to Nature or camp close to the conveniences of civilization at the Laurentides, Algonquin Park, New Ontario, Nagogami River, Jasper Park. A wonder panorama unrolls before the traveler through the Canadian Rockies. Matapedia Valley, La Baie de Chaleur, Gaspe, Cape Breton and along the ocean shore of Nova Scotia. Historic facts find old-world setting in Quebec, Montreal, Halifax and their environs. If you have only a few days, spend them joyously at Muskoka, Sparrow Lake or the Maritime Provinces.

free

Our Art Booklet "9 Ideal Vacations." In it you'll find suggestions that will help you choose YOUR vacation. Call, or write to the address below for your copy. It's free—without obligation.

Every Detail Planned!

The Canadian National Railways have collected facts about Canada that will help you plan any kind of vacation.

Canadian National Railways

Apply to nearest Canadian National Railways Agent, or write General Passenger Department, Moncton, Quebec, Montreal, Toronto, Winnipeg or Vancouver.

BANK BRANCH NOTES

(Continued from page 18)

The Bank of Toronto intends erecting a new branch at Second Ave. and Fourth St., Chaplin, Sask., immediately.

Mr. J. Gordon Robinson, attached to the western superintendent's department of the Merchants Bank of Canada as inspector for some years, has been made assistant manager at Brandon, Man.

Mr. C. C. Watson, of the Merchants Bank of Canada, Coronation, Alta., becomes manager at Killam, Alta., in place of Mr. E. A. Holbrook, who is now attached to the Alberta superintendent's department, Calgary. Mr. R. V. Campbell, of Carbon, Alta., becomes manager at Coronation, and Mr. H. A. Evans, his former accountant, is elevated to Carbon.

Mr. Mayne Daly Hamilton, who left Vancouver three and a half years ago for Ottawa to take over the management of the Ottawa branch of the Canadian Bank of Commerce, will return shortly to occupy the position of inspector for the Pacific Coast branches, with headquarters in Vancouver. Mr. William Hogg, the present incumbent of the office, will leave in the course of a few months for Toronto to take charge of the Ontario branches.

OUR BUSINESS

"Believing that trust companies created for the administration of trusts should practically last forever, the Board of this Corporation have laid down the principle and have acted on it from its inception (in 1882) that we shall exclusively confine ourselves to a trust and agency business."

General Manager at Annual Meeting of Shareholders.

THE
TORONTO GENERAL TRUSTS CORPORATION

Head Office - - TORONTO
Branches at Ottawa, Winnipeg, Saskatoon and Vancouver

The Old Way and the New

The Old Way was to appoint a friend Executor. The New Way is to appoint a Trust Company. Its financial responsibility, permanent organization and experienced officials make it a much preferable appointment. We suggest as your choice,

Chartered Trust and Executor Company
46 KING STREET WEST, TORONTO

Hon. W. A. CHARLTON, President
JOHN J. GIBSON, Managing Director

The Benefit of Experience

Because this trust company handles many estates, it is able to render special service by employing scientific accounting methods, the best legal talent and sound information about investments. This extra service is obtainable at no greater cost to the estate than that of an individual executor.

Union Trust Company
LIMITED
Head Office:
Cor. Bay and Richmond Streets, Toronto
Winnipeg London (Eng.) 151

The impartiality of the acts of a TRUST COMPANY and its freedom from improper influences are some of the advantages offered in

The Management of Estates

We will gladly discuss this matter with you.

CAPITAL, ISSUED AND SUBSCRIBED ...$1,171,700.00
PAID-UP CAPITAL AND RESERVE 860,225.00

The Imperial Canadian Trust Co.
Executor, Administrator, Assignee, Trustee, Etc.
HEAD OFFICE: WINNIPEG, CAN.
BRANCHES: SASKATOON, REGINA, EDMONTON, CALGARY, VANCOUVER AND VICTORIA

Canadian Financiers Trust Company

Head Office - Vancouver, B.C.

TRUSTEE EXECUTOR ASSIGNEE

Agents for investment in all classes of Securities.
Business Agent for the R. C. Archdiocese of Vancouver.
Fiscal Agent for B. C. Municipalities.

Inquiries Invited

General Manager: Lieut.-Col. G. H. DORRELL

5% Absolute Security

Over 200 Corporations, Societies, Trustees and Individuals have found our Debentures an attractive investment. Terms one to five years.

The Empire Loan Company
WINNIPEG, Man.

Canadian Guaranty Trust Company

HEAD OFFICE, BRANDON, Man.

Board of Directors:
ALEX. C. FRASER, President.
LT.-COL. A. L. YOUNG, Vice-President.
JOHN R. LITTLE, Managing Director.

Of the deposit in Central Gold Reserves $10,500,000 is in gold coin; the balance is in Dominion Notes.

T. C. BOVILLE *Deputy Minister of Finance.*

CHARTERED ACCOUNTANTS OF BRITISH COLUMBIA

At the fourteenth annual general meeting of the above institute held in Vancouver last week many items of interest to the profession were discussed, and an interesting report on the work of the past year was read by the president, Mr. Geo. E. Winter. The following members were elected to serve on the council during the ensuing year, viz.:—W. S. Buttar (Buttar & Chiene), A. L. C. Chalk (Helliwell, Maclachlan & Co.), H. D. Christie (Edwards, Christie & Co.), A. H. Edwards (Edwards, Morgan & Co.), A. F. Griffiths (A. F. Griffiths & Co.), G. F. Gyles (Price, Waterhouse & Co.), W. A. Tolmie (Shaw, Tolmie & Co.), G. E. Winter (Riddell, Stead, Hodges & Winter), and J. B. Woodthorpe (Woodthorpe, Bevan & Co.).

Messrs. G. E. Winter and J. H. Young were elected to represent the institute at the meeting of the Dominion Association of Chartered Accountants to be held in Winnipeg in September next and, in view of the fact that the Dominion Association will hold a convention in Vancouver in 1921, the former was nominated for the position of vice-president of that body. At a council meeting held subsequently the following officers were elected:—President, W. S. Buttar; vice-president, J. B. Woodthorpe; secretary, H. D. Christie.

THE COST

of Canada Trust Company service as Executor or Administrator is never more than the fee paid to individuals acting in the same capacity.

The Judge of the Surrogate Court fixes the fee, and in many cases it proves less than would have been given an individual.

A consultation as to the efficient and economical service we can render your Estate will be without cost to you or obligation on your part.

THE CANADA TRUST COMPANY
"The executor for your estate."
London, St. Thomas, Windsor, Winnipeg,

AN EVIDENCE OF PUBLIC CONFIDENCE

We are continually reminded of the unbounded confidence the public, as well as our customers, have in this time-tried institution.

New accounts are continually being opened by people who have been recommended to us by those who have been doing business with us for years.

Such tributes to our efforts to give our depositors the best possible service, as well as to the solidity of the Corporation, are highly gratifying, and we deeply appreciate them.

Saving was never a matter of such vital importance as during this reconstruction period. We cordially invite your account and will allow interest thereon at Three and One-half per cent. per annum, paid and compounded half-yearly. Withdrawals may be made by cheque.

EMPLOYMENT INCREASES IN JULY

Apart From Strikes, Figures for Early Weeks Show Expansion in Most Industries

EMPLOYERS' reports to the Employment Service of the Department of Labor indicate that the decline in the volume of employment in Ontario and Quebec during the first week of July was more than made up by an increase during the second week of July. Moreover, an additional increase was anticipated during the succeeding week.

Final returns for the week ending July 5th, showed that 2736 Ontario and Quebec firms with a payroll of 374,728 persons had decreased their staffs by 2,733 persons or .73 per cent. during the week ending on that date. This decline, as forecasted in the last weekly employers report, proved to be only a temporary setback. Preliminary returns for the week ending July 12th, show that the increase anticipated for the week ending July 12th, was realized. The 2,345 firms whose reports have already been compiled had a payroll on July 12th, of 320,425, an actual increase during the week of 3.180 persons or 1 per cent. These identical establishments, moreover, during the week ending July 19th, expected to make a further net addition to their staffs of 1,514 persons or .5 per cent.

During the week ending July 12th, the plus industries (those that registered a net increase in number of employees) were, building and construction; chemicals; leather and leather goods; metals; pulp, paper, and printing; textiles; woodworking and furniture; railroad construction; railroad operation; and miscellaneous occupations. In building and construction the anticipated increase for July 12th, was 1.4 per cent. and the actual increase 2.9 per cent. For the other groups the corresponding figures were: leather and leather goods, 1.1 per cent. and 6 per cent.; metals, 3.6 per cent. and 4. per cent.; chemicals, .4 per cent. and .7 per cent.; textiles, 1.3 per cent. and .1 per cent.; woodworking and furniture, 1 per cent. and 1.4 per cent.; railroad construction, 7.1 per cent. and 6.4 per cent.; railroad operation, .5 per cent. and .5 per cent.; miscellaneous, .5 per cent. and 1.2 per cent. Pulp, paper and printing changed from an anticipated decline of .1 per cent. to an actual increase of .4 per cent.

Declines in Some Industries

The only minus industries reported during the week ending July 12th, were: commercial and mercantile; lumbering; clay, glass and stone products; food products; vehicles; and quarrying and mining. Declines were anticipated in both the food groups and quarrying and mining, the food group expecting a decline of .7 per cent., whereas the actual decline was .8 per cent. Quarrying and mining anticipated a decline of 1 per cent., the actual decline being 2.2 per cent. The 4 remaining groups commercial and mercantile; lumbering; vehicles, clay, glass and stone products anticipated slight increases during the week ending July 12th, which were not realized. All six groups, however, with the exception of vehicles, expected to add to their staffs during the week ending July 19th, the vehicles group on the other hand, registered a slight anticipated decline of .4 per cent.

For the whole Dominion 3,426 firms reported to the Employment Service of the Department of Labor, for the week ending July 5th. Of these 190 were in Maritime Provinces, 1,839 in Ontario, 897 in Quebec, and 320 in the West. On July 5th, these firms had 452,927 persons on their payroll, compared with 454,486 the previous week, or a decrease of .3 per cent. On the other hand during the week ending Saturday, July 12th, these same firms anticipated making a net addition to their staffs of 3,957 persons or .9 per cent.

The largest single decline during the week ending July 5th, was in the metal industries where 516 firms reported a decline of 2.490 persons or 3.8 per cent., in large part this was due to a temporary closing down for stock-taking purposes. Most of the employees thrown out of work were to be taken back during the following week.

Substantial declines during the first week in July were also registered in building and construction; clay, glass and stone products; textiles; woodworking and furniture; shipping and longshore work.

During the week ending July 12th, the only minus industries were food, drink and tobacco; vehicles; pulp, paper and printing; quarrying and mining. In all these cases the declines were very slight. The other fourteen industrial groups registered net anticipated increases. In the metals group an increase of 1,936 persons or 3 per cent. was registered. In textiles an increase of 606 or 1.3 per cent. In railway construction, 917 persons or 4 per cent.

In the Maritime Provinces as a whole there was an anticipated decrease of 1 per cent. during the week of the 12th, as compared with a decrease of 1.33 per cent. the previous week. In Quebec an anticipated increase of .69 per cent. as compared with an actual decrease of .53 per cent. In Ontario an anticipated increase of 1.18 per cent. as compared with an actual decrease of .86 per cent. Employers in the four western provinces, reported an anticipated increase of 1.2 per cent. as compared with an actual increase of 3.12 per cent. This increase was shared by all groups with the exception of quarrying and mining.

Strikes are not taken into account in the above figures.

THE RAILWAY DEFICIT

Parliament was informed before the close of the session that there will be a loss of $28,000,000 during the present fiscal year on account of the railways now under control of the government. Commenting on this expense, the July number of "Investment Items," issued by the Royal Securities Corporation, says:—

"A large proportion of this loss is caused by the continuance of unreasonably low rates; a large proportion of it also by the inefficient and uneconomic management characteristic of public ownership; and a part by the failure to provide capital for the proper maintenance of way and rolling stock. The true solution of Canada's transportation problem, and the solution which will eventually force itself upon the acceptance of the Canadian people (though not, possibly, until they have suffered severe losses through temporizing and experimentation) is the restoration of efficient and economic management (which can best be obtained under properly regulated private ownership), the provision of ample capital for upkeep and betterments, and, as a necessary preliminary to both of these conditions, the establishment of railway rates upon a scale that will make the consumers of transportation pay for the service which is rendered them. The present system saddles the entire country with the cost of maintaining and improving the transportation facilities, whereas the users of those facilities are only a part of the population.

"The policy of starving the transportation systems of the country by insufficient revenues is inimical to all the best interests of Canada. Improvements in transportation have always preceded, not followed, increases in population and wealth. To check the former by refusing a fair return to railway capital is to discourage the latter. The immense railway mileage of Canada will eventually be justified by the growth and productivity of the country, but in order to be so justified it must be utilized in the most efficient and economic manner. That end can only be secured by allowing it to be self-supporting and to attract to itself the supplies of capital which it requires from time to time for its own development."

CANADIAN PUBLICITY OFFICE IN NEW YORK

A Canadian publicity office is being opened in New York to further Canadian interests in the United States. This office will be managed by Lieut.-Col. John A. Cooper, formerly editor of the Canadian Courier, and Mr. M. E. Nichols, formerly Director of Public Information at Ottawa, will also be there. The office will make available for the American public the latest news of Canadian industry, and will also handle Canadian news despatches. Australia and most of the South American countries have arranged to establish similar offices there.

Subscription Lists will close on or before August 15th

New Issue

MONTREAL, *July 30th, 1919*

$1,500,000

Whalen Pulp and Paper Mills Limited

6% First Mortgage and Refunding Mortgage Serial Gold Bonds

Dated May 1st, 1917, and May 1st, 1919. Maturing in annual series from May 1st, 1921, to May 1st, 1934.

Interest ($30 every six months on each $1,000 of Bonds) payable on May 1st and November 1st. Principal and Interest payable at Montreal, Toronto, New York or Chicago.

DENOMINATIONS: $1,000 and $500

ISSUED CAPITAL

Common Shares	$8,000,000
7% Preferred Shares	2,102,500

The Bonds are secured by a specific First Mortgage on all the Company's present and future fixed Assets, and a floating charge upon all other Assets, subject only to a Mortgage on the Mill Creek mill alone for $520,000, redeemable $65,000 annually from November 1st, 1919, to November 1st, 1926, inclusive.

Complete prospectus, copies of which will be forwarded on request, contains a letter from Sir George Bury, President of the Company, from which we summarize as follows:

1. **Whalen Pulp & Paper Mills, Limited,** is one of the largest Canadian producers of Bleached and Easy Bleaching Sulphite Pulp and high-grade Spruce Lumber and Cedar Shingles. It operates at Mill Creek, Swanson Bay and Port Alice, British Columbia, modern Pulp Mills designed for an ultimate yearly capacity of 96,000 tons.

The Company is the second largest producer in Canada of Easy Bleaching and Bleached Sulphite Pulp.

2. Present Annual Output is as follows:—

Easy Bleaching Sulphite Pulp, tons per annum	36,000
Bleached Sulphite Pulp, tons per annum	18,000
Total Pulp Production, tons per annum	**54,000**
High Grade Spruce Lumber, feet b.m.	**50,000,000**
Shingles	**75,000,000**

Pulp Production in course of extension to 70,000 tons per annum.

3. **Water Powers—38,000 horse-power,** of which **6,000** horse-power is developed and in operation.
4. **Timber Areas—155,000** acres, mostly located near tide-water, containing **6,000,000,000** feet of timber.
5. **Plant and Property Values—$15,455,074.14** against **$3,500,000** Bonds Issued.
6. **Net Liquid Assets (Working Capital)** after deducting all Current Liabilities—**$1,200,000,** equal to 35% of Bonds outstanding, including this issue.
7. Earnings available for Interest, Depreciation, Taxes and Extraordinary Charges, etc.:—

BRITISH EMPIRE TRUST COMPANY (LIMITED)

CAPITAL AND CREDIT UNIMPAIRED—GOOD HOME INDUSTRIAL BUSINESS SECURED

The 18th Ordinary General Meeting of the British Empire Trust Company, Ltd., was held on Monday, July 7th, at the Liverpool-street Hotel, London, England, Mr. J. Davidson, the managing director, presiding.

The Secretary (Mr. H. Bower Clark, A.S.A.A.) having read the notice convening the meeting and the auditors' report.

The Chairman said: Gentlemen,—I regret that owing to ill-health your Chairman, Mr. Horne-Payne, is unable to preside to-day. He has asked me, as managing director, to take the chair, and he has sent the following speech, which I shall have pleasure in reading to you:—

"For the last four years our annual meetings have been held under the shadow of the great war. Now that victory has been achieved, my first duty is to pay tribute to the memory of those of our gallant employees, who, in securing victory, have sacrificed their lives. Our losses have been grievous. They include Lieut. A. H. Bowling, the assistant manager of the company, who, in the very prime of manhood, succumbed to illness contracted in the fighting line only a few weeks before hostilities ceased; Mr. D. N. Ebben, the registrar of the company; and Mr. D. H. Garner and Mr. W. J. Peacock, both young employees of great promise —all gallant men who nobly served their country. Others of the staff were wounded, but, happily, have now recovered, or are on the road to recovery. I am glad to have this opportunity of recording with most earnest thankfulness our indebtedness and gratitude to those of our employees who have fought and died for their country. Later on I will refer to the proposals of the directors for marking in a tangible way their appreciation of the employees' patriotism, and I feel sure that the plans proposed are such as will meet with your approval."

Capital Intact.

"So far as the company is concerned, we are pleased to be able to present to you to-day a statement showing that, after valuing the investments at the lowest quotations—and in some cases these quotations are undoubtedly below the intrinsic values—the capital of the company is intact, with a margin of over £20,000 of undistributed profits. We are also pleased to say that the profits for the past year enable us to recommend you to authorize the payment of dividends of 5 per cent. on the Preferred Ordinary and 7 per cent. on the Deferred Ordinary shares. If you will be good enough to refer to the profit and loss account you will see that the interest income alone is more than sufficient to provide for all the dividends, including those now recommended, without taking into account the income derived from trusteeships and secretaryships or arising from appreciation of investments or underwriting or other financial business. You will also note that after payment of these dividends there will remain to be carried forward £21,669, as compared with £12,031 carried forward last year. I think you will agree that this is a very satisfactory showing, especially as the restrictions imposed upon financial issues made it impossible to earn anything in this direction during the war. The balance-sheet is clearly expressed, and does not, I think, call for any explanations. Investments, as stated in the report and the auditors' certificate, are valued at the lowest nominal prices. The liability for 'trust funds' of £503,185, payment of which may be required from us at any moment, is more than provided for by 'cash at bankers and call.'"

Employees' Profit Participating Shares.

"The only new item in the balance-sheet is the contingency fund of £2,833, the origin of which is explained in the report. During the war full salaries, plus 10 per cent. less Army pay and allowances, were paid to all employees on active service. The difference between the salaries thus paid and the salaries which would otherwise have been payable was accumulated in a contingency fund, and this fund, as shown in the balance-sheet, now amounts to £2,833. The directors have decided to distribute this contingency fund among the returned employees who have served their country, on condition that the amounts so distributed are used in subscribing for new Employees' Profit Participating shares. At the conclusion of the business of the present ordinary general meeting an extraordinary general meeting will be held for the purpose of authorizing the creation of a special class of Employees' Profit Participating shares. The nominal amount of these shares will be limited to £20,000, and after they are created the profits of the company will, as explained in the report, be distributable in dividends in the following manner: (1) To the payment of the dividend on the Five per Cent. Cumulative Perpetual Preference shares; (2) to the payment of 5 per cent. on the Employees' shares; (3) to the payment of 5 per cent. on the Preferred Ordinary shares; (4) to the payment of a further 3 per cent. on the Employees' shares; (5) to the payment of 7 per cent. on the Deferred Ordinary shares, and if there remains any surplus of distributable profits it will fall to be divided between the Preferred Ordinary, the Deferred Ordinary and the Employees' shares, the last mentioned being for this purpose treated as though they were Preferred Ordinary shares. In respect of capital the Employees' shares will rank behind the Five per cent. Cumulative Perpetual Preference shares and in front of the Preferred Ordinary shares. The right to subscribe to these shares will not be confined to those of the employees who have served in the war. The shares will also be available for subscription by any of the employees of the company. The directors feel sure that the shareholders will agree that the spirit of cooperation engendered by the war should be continued and developed by giving the employees of the company an opportunity of earning a substantial rate of interest, increasing proportionately with the profits of the company, and also that they should have the satisfactory capital security which the ranking of the new shares insures."

Increase of Directors' Remuneration.

"Notice is also given of a resolution to increase the remuneration of the directors. No apology for this resolution is necessary, nor do I think that the shareholders will have any hesitation in agreeing to it, when I remind them that the volume of work and responsibility arising from trusteeships alone, amounting to £64,000,000, is very great, and that the present remuneration of £100 per annum is exceptionally low. With regard to the future of the company, we look forward with great confidence. Our capital and our credit have withstood the strain of the war and both are unimpaired. Restrictions on the raising of new capital for investment outside of the United Kingdom and upon the making of loans abroad continue, but are removed as regards home business, and for the present we are directing our efforts in this direction and have already secured some good home industrial business which promises satisfactory results."

Gentlemen, I now beg to move:—"That the accounts for the year ended the 30th April, 1919, and the reports of the directors and auditors thereon be received and adopted."

Mr. N. Scott-Russell, M.Inst.C.E., M.I.E.E., seconded the resolution, which was carried unanimously.

The Dividends.

The Chairman then proposed: "That the payment of the dividends on the Five per Cent. Cumulative Perpetual Preference shares for the years be approved, and that dividends of 5 per cent. per annum on the Preferred Ordinary shares and of 7 per cent. per annum on the Deferred Ordinary shares be and they are hereby declared for the year ended 30th April, 1919, payable to all shareholders of record on the 7th July, 1919."

Mr. T. Blundell Brown seconded the resolution, which was carried unanimously.

On the motion of the Chairman, seconded by Brigadier-General E. F. O. Gascoigne, C.M.G., D.S.O., the retiring directors, Mr. R. M. Horne-Payne and Mr. D. B. Hanna, were re-elected, and on the proposition of Mr. F. Coleridge Simpson, seconded by Mr. Duncan Robson, Messrs. Robertson Hill and Co., chartered accountants, were re-elected auditors of the company for the ensuing year.

An extraordinary general meeting was then held, at which the Chairman proposed and Mr. Scott-Russell seconded the adoption of the resolutions relating to the creation of Employees' Profit Participating shares, which was unanimously agreed to.

Mr. Robson next proposed a resolution increasing the remuneration of the directors to £150 per annum each, with an additional £200 per annum for the Chairman and for the Deputy-Chairman.

Mr. F. C. Simpson, in seconding the resolution, said he considered that the remuneration which the directors were receiving before the war was not sufficient now. It seemed, indeed, to be generally acknowledged that double the amount ought to be paid nowadays, but that was not the proposal in the resolution, and in his opinion the additional remuneration suggested was very moderate. Having regard to the strenuous times which had been passed through during the last four years, he thought that the directors were to be congratulated on the state of affairs which they had been enabled to submit to the shareholders on that occasion. He also thought that the shareholders might congratulate themselves that they had in their managing director, Mr. Davidson, a man of exceptional ability and capable of doing a vast amount of work. He hoped that directors would accept the proposed increase in their remuneration as a small token of the shareholders' esteem and appreciation of the efforts they had made.

The resolution was carried unanimously.

At separate meetings of the Preferred and Deferred Ordinary shareholders resolutions were passed sanctioning the creation of a special class of 20,000 Employees' Profit Participating shares of £1 each.

At the meeting of the Preferred Ordinary shareholders Mr. W. E. Coulter objected to the Employees' shares taking precedence of the Preferred Ordinary shares for their dividend, but intimated that he would not vote against the resolution after the Chairman had pointed out that if the whole 20,000 shares were issued, it would only amount to 5 per cent. of the whole of the Preferred Ordinary capital.

The proceedings then terminated.

Penniless Old Men

You know many of them—men who in their prime made plenty of money, but who spent as freely as they earned. Old age finds them in a sorry plight.

You can escape their bitter experience if you will. A few dollars saved each year and invested in an Imperial Endowment will provide for your comfort in old age. Or it will take care of your family should death call you early.

Write for a free copy of our very interesting booklet entitled "Penniless Old Men." Address:

EXPORT TRADE AND THE CENTRAL GOVERNMENT

How Canadian Industry Was Able to Expand During War Period—Advantages of Centralized Research and Information—A National Trade Commission Might Help

BY C. KENNETH JOHNSTON

DURING the war there has been in Canada and allied countries, a great and increasing control exercised by the various central governments over the processes and means of production. This fact of government control has been noticeable also in the field of distribution and exchange, as evidenced, for instance, in our Canada Food Board. One of the greater phenomena of the war has been, therefore, a varying amount of government control over the various fields of endeavor in which men gained a livelihood by competitive means before the war. As to whether this has been merely a war-time necessity, whether its development was rooted in conditions *ante bellum*, or whether it is a process which the war hastened and developed, it is not my intention to consider. The fact that control has been exercised by the central government, and that this central control over industry aided in keeping up the necessary production has resulted in the view that it is the special function of the government to take the initiative and to plan for all future development. Whether this is a good viewpoint or not is a very controversial matter—the fact remains that at present there are some activities favoring the industrial life of the nation, which the government, and the government only, can successfully pursue.

But beforehand let us look at the industrial conditions which have existed in Canada and allied countries during the war. In 1914 Canadian industry was passing through a period of depression, of curtailed credit and lessened orders; work on permanent construction had practically ceased, and many of our factories were running at half and quarter capacity. The reasons for this depression are well known—too much optimism, too much credit, over-expansion and wild-cat speculation, all had helped in causing us to over-estimate the future—the break came before the war, business sails were reefed, and in some cases furled, and Canadian industry was in large part prepared for the confusions of the war which struck us with such unexampled suddenness. For a year or more depression continued, but in the autumn of 1915 and the beginning of 1916, with a huge wheat crop and with war orders coming in, Canada was again on the high road of prosperity. Industrial conditions in Canada are to a great extent dependent upon agricultural prosperity, so with a good wheat crop it was only to be expected that some break in the gloom would occur. But, industrial prosperity, though given a fresh start by the well-being of the farmers, was not occasioned solely by that cause—the large and increasing orders for shells, munitions of war and all the many commodities required by our armies in the field, the orders from foreign governments for those same articles, all these had a very appreciable effect upon industrial conditions. In 1914 many of our manufacturing companies had formed amalgamations which were hugely capitalized, with debts and mortgages on their capital equipment—in 1918 by means of steady and secure profits on munitions work and war orders, in many cases those debts had been wiped off, additions had been made to factories, paid for fully, and investments made in productive securities of other firms and in government war loans. In 1918 Canadian industry was in a prosperous condition. What, we may ask, were the causes which produced this prosperity?

Standardization and Science

In the first place the most potent cause was increased production, which, of course, was necessitated by the huge wastage on the battlefront. With lessened forces of workmen, due to the drain of enlistment and conscription, this increase could not have been possible without standardization in machinery, in the articles produced, and in the processes of manufacture. The fact of standardization to-day appears a mere commonplace, everyone realizing its importance in large scale production, but without the economics occasioned by the use of standard parts in articles which otherwise would have had to have been scrapped, our war production could not have kept pace with the wastage and breakage which war on a stupendous scale occasioned. Standardization as a cause of increased production we may then conclude has an inestimable influence in the part which Canada has played in the great war.

Closely allied with standardization in production there has been a larger and increasing use of science and scientific discoveries in securing speed and economy of production. The governments of all belligerent countries being intensely interested in keeping adequate supplies of war materials on hand, subsidized and encouraged by all means in their power further discoveries and inventions which would speed up production, which would make for shorter and therefore faster processes; and because Germany had monopolized the market or was geographically so situated that she could control certain necessary materials such as potassium, allied scientists had to discover and invent methods for obtaining these products in ways which had never before been thought of. Without our men of science and their application of scientific knowledge to industrial processes and production, the allies would have been very much handicapped in the race for victory.

Centralized Control

Added to these two factors, standardization and science, there is another which I have called centralization of control, or in other words, authoritarian control over the industrial affairs of the nation. To bring the various producers into line, to make them realize that the world for the duration of the war could no longer run according to competitive standards, with each man working for his own individual personal interests, it was necessary to introduce some coercive control, some power to force them all into line for the best service of the state for which they were capable. In order to secure this two main plans were adopted; either the government bought or directly took over the operation of the factories concerned or leaving the technical details in the individual's hands, they entered the competitive market giving specifications and instructions as to the exact variety of article required, leaving it to the manufacturer who secured the order to turn out the article in whatever way he thought best, so long as it came up to specifications. The latter method was followed in Canada, and due partly to patriotism and partly to assured profits, Canadian manufacturers turned out war materials as good as those of industrial plants of other nations. Centralization and unification of control we may then include as one of the main factors in Canadian industrial progress during the war, but under that factor and largely conditioning it, we must include the form of business organization which Canadian industry had almost providentially assumed in the four or five years immediately preceding the outbreak of war. That form of organization was the merger or amalgamation, which united, securely, under a central control, a number of formerly competing factories which, under the necessity of increased war-time production, really made possible the use of standardization, science and centralized control, which as we have seen, helped so largely by facilitating production, to win the war.

As I have noted above, the war has practically put Canadian industry on its feet—in 1914, reorganizations and receiverships were becoming very common—our mergers had only been formed a few years, had been heavily capitalized and under the depression of that and the preceding year were in a very bad financial condition. But because of the adaptability and resourcefulness of Canadian manufacturers, because also the foundations had been laid and were ready for use, disaster was averted and to-day, except for difficulties in the labor world, Canadian industry is in an excellent position. With a lessened force of laborers, with sources of supplies cut off or made inaccessible, with the necessity of opening up new and unexplored sources, Canadian producers have in conjunction with government distributing boards, not only adequately supplied the domestic

market but have made a name for themselves in foreign countries—Canada because of the war is at present in a position to become one of the greater exporting nations in the industrial markets of the world. "There is a tide in the affairs of men."

Same Experience in Other Countries

Turning now to allied countries we find that the same forces have been in operation as in Canada. In the United States the federal government has taken over and operated industries without number, making use of standardization, centralization and science to a greater and more widely advertized extent than in Canada. It has co-ordinated its means of transportation, it has built a large and increasing merchant marine, its manufacturers have pooled their patents, secret processes and methods, in all ways the industries of the United States during the war have gone far on the path of centralized control. In Great Britain the same or practically the same course has been followed—munitions and war manufacturing in general early in the war were put under central boards; centralization of control in both of these our strongest allies was the most noticeable phenomena, and not only in domestic industry has centralized control been advocated and practiced, but in export trade, in preparation for that after-the-war trade rivalry, governments have taken a hand, have helped industrial commissions make plans and gather information; in short, the central governments have been the native power, have supplied the initiative which has resulted in the plans which have been made for a centralized control over export trade after the war. The Webb Law in the United States making trusts or amalgamations for export trade valid in the eyes of the law is but an instance of the acknowledged necessity for a wider, more embracing but unified control over the industry of a country which hopes successfully to compete in the world's markets after the war.

We may conclude then, I think, that it is a generally accepted fact in the industrial world to-day that a unified control over the national industries is a necessity. The severity of that control will, of course, vary in the various countries, but the fact of the necessity of centralized control must, I think, be admitted.

But war conditions are very different from those of peace. In war, the main object is to secure the goods—in peace goods are usually plentiful and price plays a more important part. The war has been won largely by the armies, but behind those armies was a vast, co-ordinated system of production which kept the fighting forces supplied with all the many kinds of equipment which they needed. Are we then to return to the unorganized, competitive system of production which was in use before the war? Organized control over industry has proven its success during the past four years—previous to 1914 the competitive system was considered the only method when Canadian manufacturers were supplying only the domestic market. In the near future what is needed is a regulative body providing information and scientific knowledge which will be available for the use of all our industrial leaders in order that there may be as little chance as possible of any slipping back from the position Canadian industry has attained during the war. That bureau or board or commission or whatever it may be called should be established by the federal government, so that when, within the next six months, Canadian industry is beginning to recover from the abrupt change from war to peace time production, a definite plan, a solid foundation of knowledge and information will be ready for our business men to use in their struggle in the world's markets. To-day Germany is practically a non-entity as far as the commercial world goes—her great and varied markets are, therefore, open to the merchants who can secure them—her pre-war success was largely secured by an intelligent system of government and bank aid to her exporting societies which were known as Kartells. So great was Germany's success with her Kartells that we find the British government following in its main essentials the system which the Germans had adopted and had shown to be so successful.

Example of British Commission

Why then should not the Canadian government appoint a commission or board to aid in our future export trade? Like the present British Commission it could at least gather information about the world's markets for Canadian produce and manufactured goods, it could disseminate that knowledge as the British Commission is doing, it could make arrangements for a large export bank to take care of foreign credits, and lastly, it could encourage the formation of societies of manufacturers for export trade. All these and many other functions are not beyond the powers and capacities of a government commission—its value would be inestimable to Canadian trade besides giving to the foreign buyer that measure of confidence in Canadian business which givernment encouragement and aid always produces.

The question naturally arises, however, as to whether Canada is adequately equipped with sufficient supplies of raw materials, with facilities of manufacture and of transportation for a large export trade. As to the first two nothing need be said beyond the fact that at present we are in an admirable position for a future growth of industry. During the war our manufacturers have proven their ability to produce as cheap and as good products as the manufacturers of other nations—in war materials it is true, but added to that we have the factor of adaptation which Canadian manufacturers showed so conclusively in 1915 when they turned their factories from producers for peace into producers for war. Can it be thought now that they have lost that faculty? That they cannot as readily and as efficiently render the necessary stimulus and encouragement turn from a successful war-time production to just as highly successful peace-time production? That faculty or ability or whatever it may be called, they still possess—all that is needed is that they should be shown the necessity of change and improvement in order that Canada may be able to live up to that name which has been made for her in war time export trade—we have the raw materials, the labor force, the capital equipment, the leadership, and to a certain extent the transportation facilities necessary, but the motive power, the driving force, the incentive has so far been lacking. What is necessary is a government commission with similar powers to that established in Great Britain during the last six months of the war.

But as I have indicated above, the transportation facilities of Canada are not quite all that they should or could be. We have a continued wide system of railways for internal transportation, but when Canadian products reach Montreal or Quebec or the point of loading, they are loaded on to foreign-owned ships—it is the last link in the chain that is missing, and with regard to revenues only, the loss to Canada is huge (about $40,000,000 per year), besides the loss in prestige and service. During the war ships were built in Canada for Great Britain on Canadian credit to the mother country. Canada was able to finance the building of those ships, to provide facilities for building them, and to supply the necessary material and technical ability. At the end of the war those ships were handed over to Great Britain and all we had was a British debt. If those ships had been kept for Canadian use, if shipbuilding on our own account and for our own purposes had been continued, we should to-day have had a fair start toward a Canadian merchant marine, which in the end would have been able to carry all our overseas traffic. That policy has not been pursued. It is for our government trade commission to complete the last link in the chain, as the United States government at the present time is supplying that country with its own merchant marine.

At present, then, we may justifiably conclude, I think, that domestic industry and domestic transportation in Canada is in an excellent condition, and is fully capable of still further increased growth. But unless steps are taken to follow up, our export trade will be lost—two things being necessary:—(1) A government trade commission similar in practically all respects to the British Trade Commission, and (2) a merchant ship building program to complete our excellent transportation facilities.

DAMAGES FOR BREACH OF CONTRACT

Profits of Employee Cancels Claim Against Trusts and Guarantee Company

By M. L. Hayward, B.C.L.

It is seldom that the courts are called upon to decide as neat a point as that passed upon by the Supreme Court of Canada in the case of Cockburn vs. The Trusts and Guarantee Company, which case arose out of the following state of facts:—

Cockburn was employed by the Dominion Linen Company as a sales manager, on a five year contract at a salary of $5,000 a year, and, as Cockburn apparently had doubts of the solvency of the company, he insisted upon and obtained a guarantee of payment of the above salary by one Kloepfer, a director of the Dominion Linen Company. Cockburn's fears as to the financial ability of the company were amply justified, because, after Cockburn had worked for three years and received his salary, the company went into liquidation, and Cockburn then entered suit against the Trusts and Guarantee Company, as administrator of Kloepfer's estate, on the above guarantee, to recover the sum of $10,000, being his salary at $5,000 for two years.

Cockburn, however, was evidently a shrewd business man and had an intimate knowledge of the affairs of the Dominion Linen Company, as, when the assests of the company were sold, Cockburn bid them in and resold, making the neat and tidy profit of $11,000, so that, if he had recovered the $10,000 which he claimed from Kloefer's estate, he would have had $21,000 for his two year's work.

The Trusts and Guarantee Company as administrator, however, resisted payment on the ground that, while the estate might under ordinary circumstances be liable, Cockburn would first have to deduct from his damages claimed the profit which he had made on the assets of the insolvent Dominion Linen Company, so that, if this contention were upheld, Cockburn, of course, could recover nothing.

The Supreme Court of Canada upheld this view, on the ground that Cockburn had realized a profit exceeding the amount of his salary claimed, which profit arose out of the fact that he had been so employed by the Dominion Linen Company, and that such profit must be deducted from his claim for damages for breach of the contract.

"If the contract had been carried out and Cockburn had continued in his employment and had been paid his salary of $5,000 a year for the two years, it is clear he could not have earned the $11,000 which he did from other sources. He has, therefore, not only sustained no loss, but is better off than if the contract had been fulfilled," said the Chief Justice.

"The action of Cockburn in acquiring and disposing of at a profit of a considerable part of the manufactured stock in the Dominion Linen Company arose out of his relation to them," said Judge Duff. "It involved the employment by him of time, labor and ability which he had engaged to give to them. For his loss of an opportunity to use these in earning a salary from the company he is now asking that the surety shall be compelled to pay him that salary by way of damages. It would seem to be manifestly unfair that if Cockburn would have to be remunerated on a salary basis by way of damages, he should not be held accountable for the money made by using for his own purposes the time, labor and ability so to be paid for.

"By devoting his time, ability and skill for two years to the service of the Dominion Linen Company Cockburn would have earned $10,000. A breakdown in his health, or other unforseen contingency might have prevented him from doing so. Excused from that service, he was enabled by a happy combination of circumstances and by making use of his time, labor and ability and by taking advantage of the opportunity afforded by the company's misfortune, he was able to make a clear profit of $11,000, and he still had at his disposal, in which to add to his earnings if so inclined, or to amuse himself if he prefers doing so, the remaining year and ninety-nine days, seems equally clear that he did not sustain any actual damage as a result of losing his salary."

PUBLICATIONS RECEIVED

Trial of Sir Roger Casement.—Edited by Mr. G. H. Knott, M.A. The Canada Law Book Co., Toronto. $2.75.

The spectacular trial of this Irish knight, who was arrested in 1916, tried and executed for high treason in connection with the Irish rebellion, will be remembered. This volume is one of a "Notable Trial" series.

Pocket Register of Life Associations.—The Spectator Co., New York. 50 cents. This register, which has now been issued for the thirty-fourth year, shows the condition and business of stipulated premium, assessment and fraternal life insurance associations doing business in America. The figures are for the five years ending January 1st, 1919.

Wake Up, Canada!—By C. W. Peterson. The Macmillan Co. of Canada, Toronto. $2.00.

Many phases of economic and political life are dealt with in the chapters of this book in a style which is both entertaining and instructive. The author has had a long experience in close touch with the institutions and customs which he is discussing. Of late he has been deputy fuel controller for Canada. Finance, industry, transportation and politics are among the subjects.

Canadian Fire Insurance Year Book, 1919.—Published by Stone and Cox, 6-10 Johnston Street, Toronto. $1.50.

Fire underwriters will find this a convenient reference book. It contains a short-period table, showing at a glance the premiums to be charged for broken periods; forms of policy wordings used in Canada; an explanation of the co-insurance clause; a legal section, giving Dominion and provincial laws; a directory and financial section, giving the statements of the companies doing business here. There is also included in this year's issue a review of Canadian fire insurance in 1918 by Mr. C. S. Wainwright and other sections of interest.

American and Foreign Investment Bonds.—By W. L. Raymond. Thomas Allen, Toronto. 324 pages, with index. $4.

The second chapter in this book, on United States and foreign government bonds, is one of the most valuable contributions on this subject, and will be of wide interest to Canadians. It includes much historical matter regarding the terms of large war loan issues and an examination of the factors which determine the price levels of such bonds at various times. Other chapters are on state bonds, county, municipal and district bonds, steam railway bonds and those of public service and industrial corporations. Much of the material in these chapters is also valuable to Canadians.

What Happened to Europe.—By Frank A. Vanderlip. Macmillan Co. of Canada, Toronto. 188 pages. $1.40.

Mr. Vanderlip needs no introduction to the Canadian financial public. Until a few weeks ago he was president of the National City Bank, New York, and his recent statements regarding the financial position of European countries have attracted widespread attention. This volume was written during his return from a visit to Europe, where he had interviewed financial leaders of practically all the nations there. With the trained eye of a banker Mr. Vanderlip selects topics which are both comprehensive and fundamental, and his treatment of intricate topics is unusually clear. His chapters on "The International Scale-Pans," "Credit" and "The World's Financial Centre" are particularly instructive.

The most significant thing which Mr. Vanderlip found in Europe was the disorganization and paralysis of industry. "The great obstacles," he says, "are the difficulties of obtaining credits to purchase in foreign markets, the inability to get ocean tonnage, the breakdown of domestic transportation, labor unrest, and throughout the great war area the destruuction of machinery." No more vivid, even if brief, picture of European conditions could be imagined than is contained in this volume, and probably there is no one more competent to draw it than the author.

WHY THE "MUTUAL LIFE OF CANADA" IS SO POPULAR

The Mutual placed upon its books in the first five months of 1919 100% more business than in the corresponding months of 1918. The wonderful war-record of the Mutual Life and the prompt payment of the many unexpected claims during the recent epidemic—these have proved the value of the institution. The Mutual, moreover, is in a peculiar sense a people's company, being in its control democratic, in its economy strictly co-operative. This means that the system is in line with the "spirit of the age," and so the people naturally turn to the Mutual. The record of the Company for nearly half a century has been one of increasing beneficence, and an ever-growing number of gratified policyholders help on the good work of the agents. As a result, there probably is not a more prosperous group of workers in Canada to-day than the representatives of our Company.

"Be a Mutualist."

The Mutual Life Assurance Co. of Canada

Waterloo Ontario

"THE COST OF LIVING"

IT is a significant and gratifying fact that while the cost of everything else in the line of necessity has gone up—the the price of one of the chief necessities of all—Life Insurance —has gone DOWN.

To those looking for the best available in Life Insurance, it is sufficient to point to the fact that for thirteen successive years the public have shown that they consider The Great-West Life Policies unequalled. For thirteen successive years The Great-West Life has written the Largest Canadian Business of all the Canadian Companies.

Policies are inexpensive — liberal — profitable—arranged to cover all needs. Ask for personal information, stating age.

GOVERNMENT AND MUNICIPAL BONDS

Ontario Will Float $3,000,000 Loan—Midsummer Brings Slackness in Bond Markets

SEASONAL slackness has been in evidence in the bond market recently, and the depression in prices caused by the terms of the Canadian loan floated in New York is not yet removed. Nevertheless, there is no apparent surplus of good bonds, although the stiff prices paid for some of the recent issues has made it difficult for the dealers to place their issues at a profit in the face of a sagging market. The Dominion domestic loan will likely be somewhat later than was anticipated earlier in the season, and, while pending issues have been for the most part cleared up, doubtless purchasers will not be inclined to do business until the terms at least are made known. Ontario, however, is asking for bids on a $3,000,000 issue.

The following quotations of active bonds are supplied by the National City Co., Ltd., and are in New York funds:—

	Bid.	Offered.
Anglo-French 5% (Oct. 15, 1920)	97⅛	97¼
United Kingdom 5½% (Nov. 1, 1919)..	99 15/16	100 1/16
United Kingdom 5½% (Nov. 1, 1921)..	98⅝	98⅞
United Kingdom 5½% (Feb. 1, 1937) .	96½	97
Canadian Pacific 6% (Mar 2, 1924)....	100⅛	100⅝
City of Paris 6% (Oct. 15, 1921).......	96¾	97⅛
Dominion Canada 5% (Aug. 1, 1919)...	99 15/16	100
Russian Govt. Ext. 5½% (Dec. 1, 1921)	49	52
Russian Govt. Ext. 6½% (July 10, 1919)	55	58
Swedish Govt. 6% (June 15, 1939).....	99	99¼
Dominion Canada 5½% (Aug. 1, 1921).	99⅛	99¾
Dominion Canada 5½% (Aug. 1, 1929).	96¾	97¼

The following is a list of debentures offered for sale, of which particulars appear in this or previous issues of *The Monetary Times*:—

Kenora, Ont.	10,000	5½	15-instal.	Aug. 22

Chatham, Ont.—An issue of $130,000 5½ per cent. debentures has been disposed of locally at par.

Ingersoll, Ont.—An issue of $20,000 5½ per cent. 10-year factory debentures has been disposed of locally.

Sudbury, Ont.—A by-law, dated July 7th, 1919, for the issuance of $10,000 6 per cent. 20-year debentures has been passed.

Preston, Ont.—Tenders will be received up till August 5th, 1919, for the purchase of $38,000 5½ per cent. 20-instalment debentures.

Kenora, Ont.—Tenders will be received up till August 22nd, 1919, for the purchase of $10,000 5½ per cent. 15-instalment debentures.

Vankleek Hill, Ont.—Tenders will be received up till August 4th, 1919, for the purchase of $20,000 6 per cent 15-instalment debentures.

York Township, Ont.—Tenders will be received up till August 5th, 1919, for the purchase of $10,000 6 per cent 20-instalment debentures.

Grantham Township, Ont.—Tenders will be received up till August 2nd, 1919, for the purchase of $3,500 5½ per cent. 20-instalment debentures.

Regina, Sask.—Authorization has been granted by the local government board to the Regina public school board to borrow $139,000 for the purpose of erecting and equipping the new Eastern Annex school.

Dundas, Ont.—Sealed tenders will be received up till August 2nd, 1919, for the purchase of $55,995.50 of 5½ per cent. 30-year instalment debentures. The proceeds of the sale will be used for sewage disposal works.

Calgary, Alta.—The Public Utility Commission is reconsidering the application of the city for the issuance of debentures to the amount of $500,000 for the construction of a sewerage disposal plant and an extension of the waterworks.

Ontario.—Sealed tenders will be received up till August 11th, 1919, for the purchase of $3,000,000 gold bonds of the province, bearing interest at the rate of 5½ per-cent., dated August 15th, 1919, and due August 15th, 1924. (See notice elsewhere in this issue.)

Windsor, Ont.—A by-law has been adopted by the city council authorizing the construction of concrete sidewalks and the issuance of debentures to the amount of $100,000. Also, a by-law has been adopted authorizing the issuance of debentures to the amount of $20,000 for the purchase of two motor truck street flushers.

Winnipeg, Man.—The city is contemplating several local improvement works, and in the respective cases in which such local improvement work is proceeded with the city will issue debentures sufficient to raise an amount equal to the cost of said work, and will assess and levy an annual uniform frontage rate sufficient to pay interest and raise a sinking fund to repay the loan or amount of said debentures, and to provide for the discount and collection charges in the respective term of years for which same are issued, according to the class of work as mentioned in the said schedule, interest on debt being calculated at 6 per cent., or such lower rate as the money market may warrant, and on reinvestment of the whole sinking fund at 4½ per cent. per annum.

Saskatchewan.—The following is a list of authorizations granted by the Local Government Board from July 14th to July 19th, 1919:—

School Districts.—*Edgeley, $4,000 10-years not ex. 8 per cent. annuity. *Rugby, $900 9-years not ex. 8 per cent. instalment. *Turtleford, $1,500 10-years not ex. 8 per cent. annuity. Ormsby, $2,000 10-years not ex. 8 per cent. annuity. Asquith, $9,000 20-years not ex. 8 per cent. annuity. Metropole, $1,500 10-years not ex. 8 per cent. annuity. White Cap, $2,500 10-years not ex. 8 per cent. annuity. *Katepwe, $5,700 20-years not ex. 8 per cent. annuity.

Rural Telephone Companies.—High Bluff, $23,600 15-years not ex. 8 per cent. annuity. Guernsey, $14,200 15-years not ex. 8 per cent. annuity.

Village.—Riverhurst, $3,000, sidewalks, 7-years not ex. 8 per cent. instalment.

*Being sold by Local Government Board.

Following reported sold July 14th to July 19th, 1919:—

School Districts.—Asquith, $9,000; T. K. McCallum, Saskatoon, Sask. Brooksdale, $3,000; Bond and Debenture Corporation, Winnipeg, Man.

Rural Telephones.—LeRoss, $13,000, Dunblane, $18,000, Bergthal, $3,125, Power Mine, $2,750, Hillside, $1,500, Tyvan, $2,200; W. L. McKinnon and Co., Regina, Sask. McGee, $7,300, South Flaxcombe, $800; Harris-Read and Co., Regina, Sask. Cloverley, $18,600; Pirt and Pirt, Regina, Sask.

Business Patriotism

During the war Canadians bought nearly $1,500,000,000 of War Loan Bonds.

It was good business as well as good patriotism, as holders of Victory Bonds know to their profit.

The war in Europe is over. But the Battle for Markets is barely begun, and Canada must enter that fight, too.

It is good patriotism for Canadians to buy the securities of Canada's great Exporting Industries.

The future will show that it is good business as well.

St. Andrew's, Man.—A by-law authorizing the raising of $356,000, to be expended on roads, has been passed by the ratepayers of the municipality.

Saskatoon, Sask.—As mentioned in these columns last week, the issue of $223,377 5 and 5½ per cent. debentures for various maturities was sold to A. Jarvis and Co., of Toronto, at 91.50. Only three tenders were submitted, other houses declining on account of the usual unfavorable position of the market at this time of the year, and also in view of the pending Dominion loan. The three tenders were:—

Name of firm.	Offer.	Net proceeds.
Æmilius Jarvis and Co., Toronto.....	91.50	$204,390.79
Hettle Drennan Co., Saskatoon	91.07	203,430.26
C. H. Burgess and Co., Toronto......	90.54	202,246.64

FINANCING FOR WHALEN COMPANY

As has been forecasted in these columns, public issue is now being made by Royal Securities Corporation of the unsold balance of $1,500,000 first mortgage bonds of Whalen Pulp and Paper Mills, Limited. More than two-thirds of the total issue has already been placed by private sale during the past ten days or two weeks. More than usual significance attaches to the securities of the big British Columbia pulp, paper and lumber concern, for the purpose of the new financing is to provide funds not only for working capital but for the expansion of the Whalen Company's activities to enable it to aggressively develop its growing export trade to the Orient, Australia, and to Central and South America, an expansion in Canadian trade which is most desirable at this juncture in the commercial life of the Dominion.

The bonds are offered for public subscription on a basis to yield 6¾ per cent. They are secured by a specific first mortgage upon the company's plants and timber limits valued at $15,455,074. As to principal, the securities are therefore, backed by assets valued at more than four and one-half times total bonds issued. It is believed that under the direction of Sir George Bury, the new president of the company, earnings for the next twelve months will amount to more than four times bond interest. The new financing will place the company in a strong position with regard to working capital, net liquid assets totalling 35 per cent. of outstanding bonds, including the new issue. The bonds mature from May 1, 1921, to May 1, 1934, the serial maturity feature operating to retire each year a large fraction of the total issue, thus making progressively stronger the equity behind the remaining maturities.

The Toronto stock exchange will be closed on Saturday, August 2nd, and on Monday, August 4th, which is Civic holiday in Toronto.

Messrs. Foster and Barrett-Lennard, chartered accountants, of Vancouver, B.C., announce removal of their office from 470 Granville Street to 304-5 London Building, 626 Pender Street West.

VANCOUVER STOCK EXCHANGE ANNUAL MEETING

At the annual meeting of the Vancouver Stock Exchange held about the middle of July, G. I. Gwynn, of Waghorn, Gwynn & Co., was elected president; S. W. Miller, of S. W. Miller & Co., honorary secretary, and Robert Gelletly, honorary treasurer.

PLANS FOR DOMESTIC WAR LOAN

While no announcement of a successor to Sir Thomas White has as yet been made, it is understood that this will be done shortly. Meanwhile the present minister is proceeding with arrangements, and for this purpose a meeting of the Dominion executive committee which had charge of the 1918 loan, is being held to-day. It is not certain whether the objective will be sufficiently large to provide for all the war and demobilization requirements, or whether part will be left for a later flotation. The minister has stated that since September last credits aggregating $167,000,000 have been advanced to Great Britain, for the purchase of last year's wheat crop, $25,000,000 for foodstuffs, and over $12,000,000 for timber. A meeting of the executive of the Ontario section of the Bond Dealers' Association was held on July 31st, to discuss the loan.

SPANISH RIVER ISSUE SOLD

An issue of $3,500,000 ten-year second mortgage notes of Spanish River Pulp and Paper Co. has been sold in the Chicago financial house of Peabody, Houghteling & Co. The rate of interest arranged and the details of the offering of the issue are not as yet disclosed, but it is understood that a portion of the probable public offering of the notes may be available to Canadian investors.

The proceeds of the Spanish River issue just sold are to be devoted to the payment of postponed interest on the 30-year bonds of the Lake Superior Paper Co., official notice of which was given this week, as well as the retirement of the £3,000,000 second mortgage held chiefly, if not altogether, in Great Britain When these are disposed of action on the deferred preferred dividend obligations will be open to the directors. These, according to present plans, will be funded with additional preferred shares of the same class as the old ones, announcement to this effect being made at the annual meeting of the company several weeks hence.

The proceeds of the new note issue will also provide funds for the erection of two additional paper machines at the company's plant, which will add some 100 tons to the daily paper output, bringing the output up to a total capacity of approximately 600 tons of newsprint per day, or nearly double that of any other Canadian mill.

The National Board of Fire Underwriters' of the United States has issued its 1919 Regulations for the Installation and Operation of Acetylene Equipment.

NEWS OF MUNICIPAL FINANCE

Hamilton's Assessment Will be Higher—Discussion of Swift Current Finances

New Brunswick.—The provincial government received on July 22nd the sum of $900,000 from the Dominion government for housing purposes. This money is now available for municipalities.

Prince Albert, Sask.—According to a report of the chief accountant, submitted to a meeting of the city council on July 21st, receipts for the past six months have increased by 38 per cent. compared with the amount collected during the same period last year; the loan from the bank has been reduced by $52,000.

Edmonton, Alta.—The city's telephone department yielded a surplus of $26,376 during the first six months of 1919, compared with $16,579 for the first six months of 1918. This was accomplished in spite of an increase of $7,300 in operating expenses. The number of telephones in service is 11,236, an increase of 1,398.

Belleville, Ont.—The tax rate of this city for this year will be 38 3-10 mills, compared with 35 1-10 mills last year. The total amount required to meet the obligations of the city is $306,922. The increase this year is in the general and high school rates, the latter caused by increases in salary and additions to the teaching staff.

Vancouver, B.C.—On or about September 30th a by-law will be submitted to the ratepayers providing for the expenditure of $60,000 for a new school at Kitsilano, and equipment for other schools. If it is not approved the school board intends to finance this expenditure by charging high school pupils a fee of $2 per month.

Nelson, B.C.—The city has a debenture debt, aggregating $672,742. It is made up of the following items: Schools, $75,000; streets, $40,000; fire department, $20,000; hospital, $30,000; water-works, $22,500; electric light and power, $300,000; sewers, $27,500; local improvements, $26,742.19; street railway, $81,000; gas department, $50,000.

Verdun, Que.—At a meeting of the city council held on July 28th it was decided that the financial position of the city makes it impossible to increase the wages of civic employees. The expenditures for the first six months of the year have already exceeded the appropriations. The city laborers receive $2.70 per day for a nine-hour day.

Toronto, Ont.—As a result of the street car strike the city of Toronto is $20,462 "out of pocket." During the month of June the earnings of the company were $431,082, of which the city's share was $86,216. For the month of June, 1918, the total earnings were $533,393, and the city's share was $106,678, or $20,462 greater than the city's receipts for the corresponding month this year.

Regina, Sask.—The city commissioners have authorized the city clerk to place specific insurance totalling $61,550 on city property not included in the schedules authorized by the city council in May. The additional insurance is as follows:—Downing warehouse, $36,000; civic stores, $20,000; crop city farm, $5,550; total, $61,550. The insurance on the crop at the Boggy Creek farm is against hail, the other two items being fire insurance. The insurance is divided among some twenty-three agencies represented in the city.

Swift Current, Sask.—At a recent meeting of the city council it was decided that assessments should be thoroughly revised. A committee of three aldermen was appointed to act with two ratepayers for this purpose. Upon this survey being completed it is the intention of the city council to arrange a joint meeting with the chairman of the Local Government Board, the superintendent of the Bank of Commerce, and a representative of Wood, Gundy & Company. At this meeting the city's financial position could be surveyed and suggestions made.

Hamilton, Ont.—The city's assessment rolls for 1919 will show a general increase, according to preliminary returns. The figures for four out of the eight city wards have already been totalled, and show an increase of $2,144,640 in the assessment of taxable property, business assessment and taxable income, comprised as follows; increases in taxable value of land, $810,470; increase in taxable value of buildings, $560,350; increase in business assessment, $93,810; increase in taxable income, $680,010. A net increase in the population of these four wards is also shown.

Brantford, Ont.—Out of the total tax roll for 1919 of $728,600 the city has already collected $431,812, or practically 60 per cent. The taxes are due in two equal instalments on July 5th and October 5th; the amount received on the first payment was therefor 10 per cent. in excess of the amount due.

The financial statement for 1918 shows a total revenue of $764,357, and expenditure of $813,262, leaving a deficit of $48,904. The debenture debt at the end of the year was $3,377,205. Operation of the municipal utilities during the year showed revenue of $324,636, operating expenses $205,778, and a net surplus of $9,566 after meeting fixed charges and depreciation.

On July 14th the city voted in favor of guaranteeing the bonds of the Brantford Realty Company to the extent of $400,000. The proposal to have a public utilities commission was also approved.

Calgary, Alta.—A statement of the business of the Calgary Street Railway department for the six months ending with June 30th, has been issued by the superintendent. The statement shows that the department faced a deficit of $9,551 at the end of last month, while at the same time last year there was a surplus of $5,775. In commenting on these figures the commissioner said that he was not troubled about the deficit this year, and is quite confident that by the end of the year it will be wiped off. Business during June, he said, was particularly good, and had been improving all this month. The deficit was caused by some particularly heavy operating expenses encountered this year.

The following figures are included in the report. They are for the first six months of the present year. Miles operated, 1,404,651; hours operated, 143,332; passengers carried, 7,335,520; revenue, per car mile, 24.540 cents;; operating expenses, per car mile, 18.716 cents; operating expenses, per car hour, $1,830; cost of power, per car mile, 3.476 cents; average fare per passenger, 4.690 cents; average daily receipts, $1,984; average daily operating expenses, $1,452; average daily operating expenses, including fixed charges, $2,036; per cent. operating expenses to revenue, 73.2 per cent.

Winnipeg, Man.—City officials express the opinion that twenty thousand dollars has been saved in one year by insuring the city employees through their own scheme rather than with private tariff companies. The city started about 18 months ago a compensation fund. The approximate fees which would have been charged by private companies amounted to $38,000. The city decided to set aside 50 per cent. of this sum, or $19,000, and the payments out of the fund for the year, including pensions, administration expenses of the Workmen's Compensation Board, compensation claims, etc., amounted to approximately $7,000, allowing $12,000 to be paid to the sinking fund trustees. This will be added to the reserve they are building up, and which now amounts to $30,501.51.

A tax sale is being arranged to take place shortly and a list is now being prepared. This will include lands on which the tax is unpaid for more than one year from December 31st in the year in which the tax was and including 1911 and subsequent years. The only exceptions are lands belonging to soldiers who benefit by the soldiers' taxation relief fund.

Collections this year up to June 30th have been as follows:—

Realty tax	$6,225,332
Water district rate	420,864
Total	$6,646,196
Collections for the same period in 1918 totalled	$5,731,191

DEBENTURES FOR SALE

$3,000,000

PROVINCE OF ONTARIO

FIVE-YEAR 5½ PER CENT GOLD BONDS

Sealed tenders, endorsed "Tenders for Province of Ontario Bonds," addressed to the undersigned, will be received for the purchase of $3,000,000 (Three Million Dollars) five-year gold bonds of the above Province, dated 15th August, 1919, due 15th August, 1924, bearing interest at the rate of five and one-half per centum per annum, payable half-yearly on 15th August and 15th February. Principal and interest payable in gold at the office of the Treasurer of Ontario, Toronto, or at the Bank of Montreal, Montreal, Canada, or at the Agency of the Bank of Montreal in the City of New York, U.S.A., at the option of the holder.

Bonds to be in the denomination of $1,000 each, with coupons attached, and may be registered as to principal only.

Payment for bonds to be made at the Office of the Treasurer of Ontario at the Parliament Buildings, Toronto, as follows: $1,000,000 on or before the 15th August, 1919, the balance, with accrued interest, less the amount of the deposit, to be paid on or before the 25th August, 1919. Interim certificates will be supplied on payment of the money, to be exchanged for the definitive bonds on completion by the engravers.

Tenders to be addressed to the Hon. T. W. McGarry, Treasurer of Ontario, Parliament Buildings, Toronto, and delivered not later than 12 oclock noon on Monday, the 11th day of August, 1919.

Tenders must be for the whole amount offered, and must be accompanied by marked cheque for $100,000, to be applied in the case of the successful tenderer on the final payment for bonds.

The highest or any bid not necessarily accepted.

T. W. McGARRY,
Treasurer of Ontario.

Toronto, July 29th, 1919.

CITY OF ST. BONIFACE

Notice to Holders of 5% Treasury Notes of the City of St. Boniface, Due July 2nd, 1920

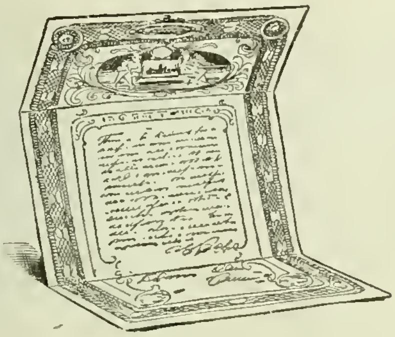
Treasury Notes of the City of St. Boniface, Nos. 1 to 100 under By-law 1128, and Nos. 1 to 100 under By-law 1129, due 2nd day of July, 1920, will be redeemed at par and accrued interest if presented for payment at Toronto, Ont., Montreal, Que., or Winnipeg or St. Boniface, Man.

JOS. C. DUSSAULT,
Treasurer.

The housing scheme in the province of Quebec will be operated entirely through building societies, according to a statement made by the provincial director on July 29th.

Insist on a CANADIAN Bond Paper

For Your Stock Certificates

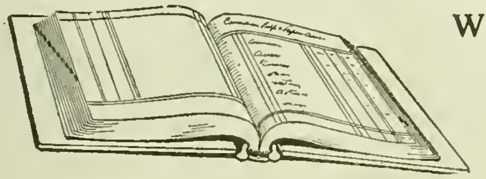


No man is justified in buying a foreign made article when a Canadian made product of equal quality is obtainable at the same or a lower price.

This applies especially to PAPER, for Canada is one of the greatest manufacturers of paper in the world.

No finer paper could be desired for Stock Certificates than is made right here in Canada. It has the weight, the surface, the crackle, the feel and the CHARACTER.

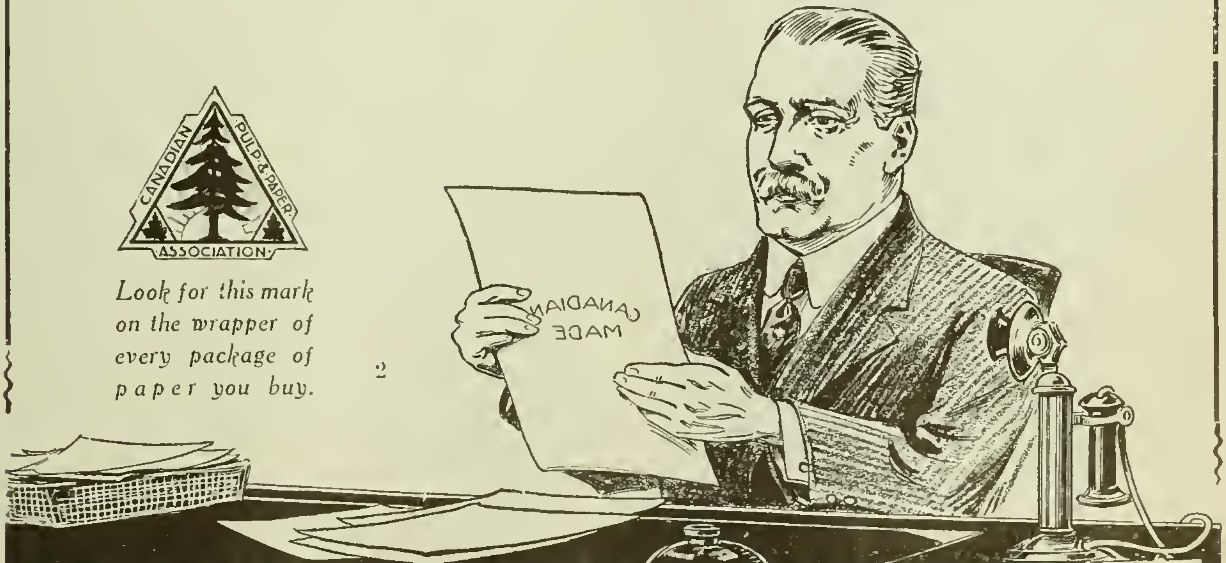
For Your Ledgers



For your ledgers, too, a great variety of eminently suitable papers is at your command, without sending money out of the country. You want preference as a CANADIAN producer. We all do. It is a vital factor in Reconstruction.

Give the word that all papers—Bond, Stationery, Booklet—used on your firm's work must be strictly Canadian.

Look for this mark on the wrapper of every package of paper you buy.



Write for booklet "Some Facts About the Pulp and Paper Industry of Canada."

RECENT FIRES

This Week's Losses are Exceptionally Heavy—Carelessness is in Evidence as a Cause of Loss

Brampton, Ont.—July 26—Barns on the farm of C. H. Bull and Son, just outside the town limits, were destroyed by lightning.

Burnaby, B.C.—Residence of G. Grady, 1055 Nineteenth St., was destroyed. Cause, defective chimney. Estimated loss, $1,100. No insurance.

Casselman, Ont.—July 30—Two hotels, four stores, a livery stable and other buildings were damaged to the extent of $150,000. Cause, boys smoking in livery stable.

Chaplin, Sask.—July 26—Home of Mr. A. Owens was destroyed. Cause, overheated stove.

Dover Township, Ont.—July 26—Barn of J. C. Montgomery, Concession 10, was destroyed by lightning.

Edmonton, Alta.—July 26—Much damage is being caused by Alberta prairie fires between the north fork of the Highwood River, across the intervening area into the valleys of the north and south forks of Sheep Creek and down past Kew to the immediate vicinity of Priddis. Farmers and ranchers are being burned out and the soil destroyed for years to come, so far as fertility is concerned.

Edwards, Ont.—July 29—The Michigan Central depot was destroyed. Cause, overturning of oil lamp.

Erindale, Ont.—July 29—Barn of John M. Brown was destroyed. Estimated loss, $4,000. Cause thought to be incendiarism.

Fredericton, N.B.—July 26—The Victoria Hotel, Queen Street West, was damaged. Cause, children playing with matches.

Hanover, Ont.—July 26—The large grist mill, owned by Wm. Knetchtel and Son, was destroyed. Estimated loss, $125,000.

London, Ont.—July 28—Coal and wood sheds of M. Hoehn and James Lee, York Street, were destroyed. Estimated loss, $10,000.

Lynn, Ont.—July 27—Barn, stables and garage of J. W. Stewart were destroyed by lightning. Estimated loss, $5,000.

Montreal, Que.—July 27—The Hamilton Court Apartments, corner of Kinkora Avenue and Mackay Street, were damaged. Cause, defective wiring. Loss, unknown.

Nelson, B.C.—July 26—According to reports received, forest fires have broken out afresh and have forced their way up the mountain. In that district and the Kootenay district considerable damage has been done to valuable timber, and unless the fires are checked in time the loss will be very heavy.

Newtonbrook, Ont.—July 26—Barn on the farm of Mr. John Breakey was damaged by lightning. Estimated loss, $5,000. Insurance carried on building, $2,000.

Nicolet, Que.—July 26—The Beaulieu foundry and two adjoining buildings were damaged. Estimated loss, $10,000.

North Lake, Ont.—July 26—Sawmill of A. Bishop was destroyed. Estimated loss, $25,000. Cause, fire from forests.

Orangeville, Ont.—July 26—Barns of W. H. Hunter at "The Maples" were destroyed by lightning. Estimated loss, $18,000.

Port Arthur, Ont.—July 23—The roof on the plant of the Port Arthur Shipbuilding Co. was destroyed. Estimated loss, $10,000.

Quebec, Que.—July 25—The three-story warehouse, the property of the Wilfrid Cantin tanning and glove manufacturing plant, was damaged to the extent of $3,000.

Raleigh Township, Ont.—July 29—The barn of J. J. Moore, Concession 7, was destroyed. Estimated loss, $7,000. Cause, incendiarism.

Sherbrooke, Que.—July 25—Home of John Bethel, 21 Birch Avenue, was damaged to the extent of $2,000. Cause, defective wiring.

St. Thomas, Ont.—July 26—The building on Talbot Street, occupied by the New Method Laundry, was damaged. Estimated loss, $15,000, partly covered by insurance.

Toronto, Ont.—July 27—The building occupied by the Marshall Ventilated Mattress Co., 8 Market Street, was damaged. Estimated loss, $17,000.

Waterloo, Ont.—July 26—The stables at the Kuntz Brewery were destroyed. Estimated loss, $7,000.

Wingham, Ont.—Barn of Allan Scott on his farm, between the 9th and 10th concessions, was destroyed by lightning. Insurance to the amount of $2,500 was carried.

ADDITIONAL INFORMATION CONCERNING FIRES

Sturgeon Falls, Ont.—July 19—Building and contents of the Michaud and Levesque general store were damaged. Estimated loss, $30,000. Insurance was carried to the amount of $31,500 as follows: On building: North America, $3,000; Liverpool and London and Globe, $6,000; Mount Royal, $6,500. On contents: North America, $3,000; Liverpool and London and Globe, $7,000; Mount Royal, $6,000.

NEW MONTREAL BROKERAGE FIRM

Major F. Stanton Mathewson, D.S.O., has been elected a member of the Montreal Stock Exchange, and will be the floor member of the new firm of Riddell and Mathewson, which is taking over the business of A. F. Riddell & Co. Mr. A. F. Riddell, the present head of the firm of A. F. Riddell & Co., is retiring after a connection with the Stock Exchange since 1881. The new firm will be composed of J. A. Riddell, Hugh Mathewson and F. Stanton Mathewson. All three members served with units of the Royal Highlanders of Canada.

MONEY MARKETS

Messrs. Glazebrook and Cronyn, exchange and bond brokers, Toronto, report the following exchange rates to *The Monetary Times*:—

	Buyers.	Sellers.	Counter.

Mont. funds	par	par	⅛ to ¼
Sterling—			
Demand	$4.55	$4.56	....
Cable transfers	4.56	4.57	....

Rates in New York, sterling, demand—High, $4.36; low, $4.34.

Bank of England rate, 5 per cent.

SUN INSURANCE OFFICE

For the year 1918, the net premium income in the fire account of the Sun Insurance office was $10,131,900; losses amounted to $4,267,250 (42.12 per cent.) and expenses of management were $3,715,505 (36.67 per cent.). Interest required $372,860, and after reserving as unearned 40 per cent. of the premiums to cover liabilities under current policies, there was a credit balance of $1,861,735. A balance of $927,975 from the previous year made a total of $2,923,010. The sum of $500,000 was carried to fire fund, $100,000 to burglary and general fund, $200,000 to pension fund, and $25,000 set aside for writing down sundry investments. This left a balance of $2,098,010, and $1,414,010 remained after paying dividends to the amount of $684,000.

Congress will probably repeal the Canadian Reciprocity Act, the terms of which have been open to acceptance by Canada since 1911. Recommendations to this effect have been made by the Ways and Means Committee, and the repeal may be passed immediately. This is one of the first acts of the new Republican Congress.

Redemption of British Empire War Debts

Comprehensive Scheme for Administration, Conversion and Extinction is Presented by the Australian Government—Joint Commission Would Save Expense—Each Government Responsible for its Own Amount—Would Ensure Repayment Within Fifty Years

AN official plan for meeting the war-incurred financial obligations of all parts of the British Empire has been drawn up by the Commonwealth government of Australia, and is set forth in a pamphlet prepared by Honorable W. A. Watt, treasurer. The total amount is estimated at £7,350,000,000, and it is admitted that the measures necessary for the redemption of this vast sum will entail no small burden.

The proposals are outlined by the treasurer as follows:—

1. The treasurer of the Commonwealth of Australia, with the approval of the government, has the honor to submit for the consideration of the governments of the United Kingdom and of the various British Dominions a scheme for the administration of the war debts of the Empire, their conversion from time to time, and their ultimate extinction.

2. It has been estimated that the present war debts of the Empire are as follow:—

United Kingdom	£6,500,000,000	or about £141 per head of population
Canada	300,000,000	or about £37 per head
Australia	300,000,000	or about £60 per head
New Zealand	70,000,000	or about £60 per head
South Africa	30,000,000	
India and other Dominions	150,000,000	
Empire total	£7,350,000,000	

3. Even after allowing for any moneys which may be paid by the enemy, these debts represent a great burden. Their liquidation will tax the resources of the nation during one or two generations, and to devise the best means to clear off the debts deserves the most earnest attention of all British statesmen and financiers.

4. Though the loans were raised for a common purpose, each government made itself separately liable for a definite share corresponding to the expenditure incurred with respect to its own fighting forces. Reasons might be found for altering this arrangement and for making a redistribution of the obligations according to the respective numbers of the peoples, or their wealth or some other factor, but the difficulty of arriving at a fair basis of allocation seems insurmountable. That does not mean, however, that each government must be left to contend as best it may with its own financial troubles. On the contrary, mutual help is possible, and certainly would be highly advantageous to all.

5. A scheme for joint management and liquidation of the debts is a natural development from the war. During the struggle all members of the British family pooled their strength, and their future resources were necessarily pledged. This combination, which brought the nation safe through the world-war, should be maintained, as far as possible, until the debts have been paid. To meet the financial difficulties, and to continue the practical relationships of the war, a great association of the British peoples is suggested.

6. It is the opinion of the government of the Commonwealth of Australia that the debts should be vested in, managed, and ultimately discharged by a continuous expert commission representative of the interests of the whole Empire and of each of the Dominions.

7. The debts as they mature would be converted by the commission into a war loan stock of the British Empire, but the commission would have discretion to establish more than one common stock, and, with the consent of bondholders, to convert loans before maturity. The commission would be given absolute power to determine, in relation to every conversion, the place, the time, the rate of interest, and all other conditions.

8. Each government would pay to the Commission a fixed annuity equal to the yearly amount payable by that government at 31st December, 1919, for—

(*a*) interest on war debts;
(*b*) expenses of paying that interest; and
(*c*) sinking fund or contributions towards redemption of war debt.

The commission would thus be provided with funds to pay interest to bond-holders and to meet general expenses, and would be able to accumulate moneys for the ultimate discharge of the bonds. The commission would have the right, on finding the fixed annuity at any time insufficient to maintain a sinking fund at the rate of at least one-quarter of one per cent. per annum in respect of the debts of any government, to call upon the government concerned to make good the deficiency by a payment to the commission in addition to the annuity.

Each Government Liable for Own Debts

9. While the debts remain subject to the existing periods of currency, the liability of each government will be plainly discernible, but on conversion into one or more common stocks the debts would lose their identity, and the commission would therefore have to determine the amount of the common stocks for which each government would be responsible. This allotment to the several governments, while chiefly an arithmetical matter, would sometimes involve the exercise of discretion, but the commission might safely be trusted to make an equitable distribution in all circumstances. A similar adjustment would be necessary in relation to redemptions of debt and other transactions. In that way, all the debts administered by the commission would be duly apportioned amongst the several governments, each of which would be required to continue payment of its annuity until its portion of the debts had been paid. Each government would be liable only for the discharge of its own debts as handed over to the commission. One government's share of the debt might be liquidated, and its annuity might therefore cease long before another government could discontinue its payments to the commission. That government which contributed the largest sinking fund would be the first to earn its freedom from war debt.

10. The time at which any government might expect to have liquidated its debt cannot be indicated with anything like precision. If, after payment of interest and expenses out of the moneys contributed by the government to the commission, there remained a sum sufficient for a sinking fund of only one-quarter of one per cent. per annum, the government's whole debt would be paid off in about seventy-two years. The scheme for a commission is put forward, however, on the assumption that, after conversion of the debts into common stock, interest rates would be lower than they are now, and that the money saved would be paid into a sinking fund. These savings might be so large as to result in the complete discharge of the debt of every government in fifty years, or even less.

11. An important feature of the scheme is that the commission would have discretion to raise conversion loans in foreign countries as well as in Great Britain and the Dominions. In this way the field for borrowing would be enlarged and money would be obtained in the cheapest market.

12. There is apparently no need to fear that the operations of the commission would result in locating an unduly large portion of the loans in London, and that the Dominions would consequently find themselves in the positions of paying additional interest to external creditors, instead of to their own residents as at present. It is true there would be some possibility of disturbing the present location of debts, but there seems to be as much chance of location being transferred from London to the Dominions as of transfers in the reverse direction. In any case, the commission would be an expert body charged with the duty of making the best arrangements in respect of the public debts, and that duty could not be performed properly without regard to the general financial welfare of every country concerned. It is inconceivable that one of the peoples could be treated unfairly or injuriously. A transfer of location of debt from a Dominion would occur only when interest rates were relatively high there and bank exchange was adverse to the Dominion. These unfavorable conditions would indicate that a transfer of location of debt away from the Dominion would be generally beneficial.

Compulsory Loans not Suggested

13. In one Dominion at least, subscription to war loans was made compulsory by law. No doubt that action was advisable in the circumstances, and may still be necessary for raising the further loans required, but compulsion under an Empire scheme could not be arranged and is not suggested in relation to the debts which may be taken over or which may be raised by the commission.

14. Considerable portions of the war loans were issued on the condition that the interest should not be subject to income tax. Freedom from the tax would not cause any difficulty to the governments or to the commission as long as the debts continue in their present form, but it would be necessary that the interest on conversion loans be made subject to tax. This will probably not be regarded as a hindrance to the acceptance of the scheme, because tax-free loans are objectionable on many grounds, and some at least of the governments would be glad to abandon the system at the earliest oportunity. The proposal is made that the holder of securities issued by the commission should pay income tax to the country in which he is domiciled, and to that country only. Under such a condition, it would not matter that the rates of income tax be not the same in all countries.

15. The question of apportioning each country's representation on the commission is important, but it is not intended at this stage to submit a definite proposal. The proper place for that is at the conference of representatives of Great Britain and the Dominions, which it is suggested should be called to discuss the project, if its main features commend themselves to those interested.

16. Although the consolidation of war debts is the immediate object in view, it may be possible, if the scheme proves acceptable to the responsible authorities of the Empire, to extend its scope to embrace some, if not all, of the pre-war debts.

17. It is not proposed that any limitations shall be imposed on the future finance of any government, apart from loans which have been or which may be necessary for the conduct of the great war, their conversion and their extinction.

Parliaments Not Fettered

18. The creation of an independent commission to discharge the duties indicated would not deprive any of the parliaments of a discretion which they habitually and legitimately exercise. Unfettered action as to taxation would remain with the parliaments, each of which would be free, as at present, to distribute amongst the people under its jurisdiction the burden of the war debt in the proportions which it regards as equitable.

19. Autonomous rights would not in any way be affected, except the right of each to compete against the others, and no argument is needed to sustain the proposition that competition in the loan markets for conversion of war debts in itself would prejudice the interests of all. Competition between governments in operations on the stupendous scale of the war loans must, by the consequent increase of interest and of the expenses of the operations, result in the long run to the disadvantage of all the parties. The creation of an independent commission would eliminate competition, would guarantee continuity of management by experts, would establish a stock attractive to investors in all parts of the world, and would relieve successive governments of responsibilities which must otherwise fall upon them and which are greater than any yet experienced in the history of governments in any time or in any part of the world. The war, in other ways, will weigh statesmanship throughout the Empire with duties more varied, more complex, and more onerous than anything which governments have yet had to perform. Any proposal which, while preserving the essentials of self-government, has for its object the transference of this immense responsibility to a capable and representative body, demands therefore the earnest consideration of public men and of the people generally.

Advantages of the Scheme

20. The chief advantage which may be derived from the appointment of a commission is the immense saving which can be secured by expert management operating in the cheapest markets. A well-informed body with a wide outlook and with the power necessarily attaching to a great financial organization might be trusted to obtain loans for conversion purposes at the lowest possible rates of interest. Underwriting charges, brokerage, and other expenses could also be reduced to a minimum. These benefits are in addition to those resulting from the elimination of competition. Not only has the scheme all these attractions, but it is probable the combined resources of Great Britain and the Dominions would be regarded by investors as a better security than that which can be offered by any one government. In that case, the common stocks issued by the commission would take a leading place in the markets of the world, and a corresponding reduction in interest rates naturally might be anticipated.

21. It might be said that the scheme aims at securing for the Dominions a share in the borrowing power of Great Britain. That is not so. The proposals are made in the firm belief that both Great Britain and the Dominions would benefit. The securities of Great Britain are regarded in every quarter of the globe with confidence. This is the result of her great power and her long-continued and honest finance. But the fact that great Dominions have now grown around the mother country must not be overlooked. The Dominions can bring strength and support of a financial nature ,just as they supplied men to fight side by side with soldiers from the old Land. To the honorable name, the wide experience, the might and the resources of the mother country, may be added the present financial strength of rich Dominions and the great future wealth to which they will attain. Population in new countries increases in greater ratio than in old, and it appears to be certain that, as years go on, the riches of the Dominions will show a greater

proportional increase than those of Great Britain. Thus the hoped-for advantages would be reciprocal.

Details of Plan

22. The full details of the scheme are:—

(1) That there be created an Empire War Debt Commission representative of the governments of Britain and her Dominions, on a basis to be arranged;

(2) The commission to take over the war debts at 31st December, 1919, of the United Kingdom, Canada, Australia, New Zealand, South Africa, India, and other Dominions or Colonies participating;

(3) All war loan sinking funds and redemption funds existing on 1st January, 1920, to be vested in the commission; and an annuity, calculated in the manner hereinafter described, to become payable by each government to the commission as from that date;

(4) Interest and principal moneys falling due after the date named to be paid by the commission;

(5) The debts as they mature to be converted into a war loan stock of the British Empire, the commission to have discretion to establish more than one common stock, and, with the consent of the stock-holders, to convert loans before maturity;

(6) All the terms and conditions of issues of the common stock or stocks to be determined by the commission;

(7) Additional loans necessary in consequence of the war to be raised by the commission;

(8) The commission to have discretion to raise redemption loans in foreign countries as well as in Great Britain and the Dominions;

(9) War debts due by the Dominions to the British government, including the cost of maintenance of Dominion soldiers at the front, to be included in the scheme as part of the debts of the several Dominions;

(10) Each government to pay to the commission a fixed annuity equal to the yearly amount payable by the government at 31st December, 1919, in respect of—

(*a*) Interest on war debts;
(*b*) Expenses of paying that interest;
(*c*) Sinking fund or contributions towards redemption of debt;

the annuity to be paid in such instalments as may be desired by the commission and to run until the debts handed over by the particular government, including debts converted into common stock, have been discharged by repayment to the bondholders;

(11) If at any time the annuity payable by a government is not sufficient to pay—

(*a*) Interest then actually payable on the debt taken over by the commission from the government, including debt converted into common stock;
(*b*) Interest on any additional loans raised for the government by the commission;
(*c*) The government's proportion of the commission's general expenses; and
(*d*) Sinking fund or redemption contribution of five shillings on every £100;

the government concerned to make good the deficiency by a payment to the commission in addition to the annuity;

(12) The amount of payments by a government to the commission in excess of—

(*a*) The interest paid by the commission on debts taken over from the government, including debts converted into common stock;
(*b*) Interest on any additional loans raised for the government by the commission; and
(*c*) The government's proportion of the commission's general expenses;

to be treated as payments towards the redemption of the principal of the debts of that particular government;

(13) The commission to keep an account of the obligations of each government, charging and discharging it with principal and interest; for this purpose the commission to have power to decide how much of the common stocks is chargeable to each government, and how much of the earnings of general investments is to be credited to each;

(14) The general expenses of the commission to be charged to each government on such basis as the commission may direct;

(15) Costs of conversion, including cost of acceptance of subscriptions below par, not to be included in the general expenses of the commission, but to be provided for out of capital;

(16) Continuing appropriations of revenues to be made by the several legislatures for the annuities and additional moneys (if any) payable by the governments to the commission.

Empire Co-operation

23. These proposals are submitted by the Australian government as the best business method of dealing with the subject. It is believed that they have merits which will appeal strongly to that spirit of Empire co-operation made manifest during the great war. Co-operation for the achievement of an end of transcendent importance was found even in the great stress of war to be not incompatible with the independent existence of, and the independent power exercised by the pre-existing governments. The more intimate relationships between the United Kingdom and the Dominions, and between Dominion and Dominion, which have been one of the most conspicuous developments of the war, should not be allowed to weaken. These newly-created interests in the family of nations composing the British Empire would be preserved and strengthened by the establishment of a closer governmental alliance for this common purpose. Such a financial partnership would not impair the freedom of each in its own proper sphere, and the combination formed would be powerful beyond anything known hitherto.

24. In the confident belief that this scheme offers a practical solution of a great problem, the Commonwealth government submits its proposals to the governments and to the peoples of the various parts of the Empire.

COMMERCIAL UNION ASSURANCE CO.

During the year 1918, the net premiums in the fire department of this company amounted to $26,312,385, being an increase of $3,582,555, as compared with the year 1917; the claims amounted to $11,129,610, or 42.29 per cent. of the premium income. From the profits of this department, the sum of $1,250,000 was carried to profit and loss, leaving the fire insurance fund at $26,549,685.

In the marine department net premiums were $4,106,400, being an increase of $357,455, compared with 1917; claims paid and outstanding amounted to $1,642,220. The sum of $500,000 was carried to profit and loss, leaving the marine insurance fund at $7,151,215.

In the accident department premiums were $23,044,800, an increase of $3,611,335, and claims were $12,043,125; $1,500,000 was carried to profit and loss, leaving the accident fund at $14,801,245. In the life department new business consisted of 2,826 policies for $8,893,010, compared with 2,720 policies for $8,309,110 last year.

Details of the company's present financial position will be found in the balance sheet, given elsewhere in this issue. The past financial year was also marked by the death of James McGregor, the company's manager for Canada. W. S. Jopling, who has been with the Commercial Union for some time, has since conducted it in the capacity of acting manager.

CANADA'S NEW FINANCE MINISTER

On August second premier, Sir Robert Borden announced that Sir Henry L. Drayton, K.C., K.B., would succeed Sir Thomas White as minister of finance. Sir Henry Drayton is already well known as chairman of the Board of Railway Commissioners. He was born in Kingston, Ont., in 1869; in 1891 he was called to the Ontario bar, and created a K.C., in 1908. In 1893, he was appointed assistant solicitor for the city of Toronto, from which position he resigned in 1900, to form a partnership with C. J. Holman, K.C. Various public organizations in Ontario used his services and in 1910 he became corporation counsel for the city of Toronto, which position he held until he was appointed to the chairmanship of the Railway Board in 1912. He is a man of outstanding personality and one who will creditably represent the Dominion both at home and abroad.

RAILWAY COMMISSION CHAIRMANSHIP

The new head of the Board of Railway Commissioners is the Hon. Frank B. Carvell, formerly minister of public works in the Union government. He is a New Brunswick lawyer, a K.C., and an opponent of public ownership. It was also expected that a chairman for the new Board of Commerce would have been appointed by this time, but no announcement has yet been made. Neither is there any statement as to who is to take the place of Minister of Public Works. It is thought that Judge Robson of Winnipeg may be head of the Board of Commerce, and Hon. J. D. Hazen, Minister of Public Works, but there is nothing definite in this connection.

WELLINGTON FIRE INSURANCE COMPANY

Among the old-established financial institutions in Ontario is the Wellington Fire Insurance Co., of Guelph, a mutual and stock company, which commenced business in 1840. Its record is honorable as well as long, and a conservative policy has been pursued by the directorate. At the end of 1917 the liabilities to the public were $50,681, compared with assets totalling $112,585, not including stock subscribed but unpaid. The Canadian managers of the company, Shaw and Begg, Ltd., Toronto, are inviting applications for agencies throughout the province.

PERSONAL NOTES

Mr. J. E. Bentham, formerly with the Royal Bank, has left the service of that institution to work for the Manitoba government in connection with its rural credit system.

Mr. F. C. Clayton, a Canadian who was in the employ of the Union Bank from 1892 to 1900, has entered the service of the Asia Banking Corporation. In 1900, he went to the Passaic National Bank, of Passaic, New Jersey, and joined the Guaranty Trust Company in 1917.

Mr. H. Beverly Robinson is the head of the newly organized firm of H. B. Robinson and Company, Montreal, which will handle only government, municipal and corporation securities. Mr. Robinson returned in April from overseas with the 13th Battalion. He started his financial career with the Bank of Montreal in 1896, and after spending six years with that institution he left to join N. W. Harris and Company, of Boston. Since 1911, he has been in charge of the Montreal office of J. M. Robinson and Sons, members of the Montreal Stock Exchange, and with whom the new firm will be closely affiliated. J. M. Robinson and Sons will continue as heretofore with offices at St. John, Fredericton and Montreal.

CANADIAN NEWSPAPER SERVICE PHOTO

MONTREAL EXCHANGE FIRM OPENING IN TORONTO

The Montreal Stock Exchange firm of Messrs. Ryan, Grier and Hastings, who are the successors of Fenwick and Ryan, are opening a branch at 33 Melinda Street, Toronto, Ont., under the management of Mr. H. A. Doheny. The Toronto office will be connected by private wire with the Montreal office and to Messrs. Hirsch, Lilienthal and Co., members of the New York Stock Exchange, New York.

BRITISH OVERSEAS BANK

The banks which will be represented by this organization, reference to which has already been made in these columns, are as follows: Dominion Bank of Canada, Union Bank of Scotland, Ltd., Williams Deacon's Bank, Ltd., Anglo-South American Bank, Ltd., Glyn, Mills, Currie and Co., Northern Banking Co. of Belfast, Ltd., Imperial Ottoman Bank, Ltd., Hoares' Bank.

One of the objects of this important British corporation is to facilitate the foreign trade of the empire by specializing in exchange payments, commercial credits, and all matters relating to international trade. Through the establishment of branches in various parts of the globe, the British Overseas Bank, Ltd., will be fully equipped to render the most efficient service to exporters and importers having large dealings abroad. The connection thus formed will afford the Dominion Bank widely extended avenues for the handling of the foreign business of its customers. The total assets of the banks interested in this new enterprise amount to over $900,000,000.

THE NATIONAL LIBERAL CONVENTION

THE fiscal demands of western Canada have evidently found expression in the platform gradually worked out by the Liberals, who have this week been in convention at Ottawa. The support of the government budget by members from the west, who believed that the tariff reductions made, in conjunction with substantial increases in the income tax, were sufficient concessions, has not met with general approval in the west. The tariff can easily be linked with the high cost of living, and a reduction has large possibilities as a political plank, even in the cities of eastern Canada, where it is not always realized what an important part protection plays in maintaining city prosperity.

The tariff resolution, which was passed at the convention on August 6th, is as follows:—

"That the best interests of Canada demand that substantial reductions of the burdens of customs taxation be made with a view to the accomplishing of two purposes of the highest importance:—

"First—Diminishing the very high cost of living, which presses so severely on the masses of the people.

"Second—Reducing the cost of the instruments of production in the industries based on the national resources of the Dominion, the vigorous development of which is essential to the progress and prosperity of our country.

"That, to these ends, wheat, wheat flour and all products of wheat; the principal articles of food; farm implements and machinery; farm tractors, mining, flour and sawmill machinery and repair parts thereof; rough and dressed lumber; gasoline, illuminating, lubricating and fuel oils; nets, net twines and fishermen's equipments; cements and fertilizers, should be free from customs duties, as well as the raw material entering into the same.

"That a revision downward of the tariff should be made whereby substantial reductions should be effected in the duties on wearing apparel and footwear, and on other articles of general consumption (other than luxuries), as well as on the raw material entering into the manufacture of the same.

"That the British preference be increased to 50 per cent. of the general tariff.

"And the Liberal party hereby pledges itself to implement by legislation the provisions of this resolution when returned to power."

The movement to have the free list enlarged will appeal to those specially benefited, and it seems somewhat inconsistent that free traders who have continually opposed the special advantages conferred on certain industries by the tariff should, in turn, advocate special relief for certain branches of industry rather than a general reduction. Hon. John Oliver, Liberal premier of British Columbia, emphasized this point in addressing the convention, urging that all necessities at least should be placed upon the free list. His radical proposals were voted down, however, as a majority of the delegates appeared to agree that the tariff was still necessary for revenue purposes. The income tax is looked to for the revenue lost by such reductions as are made.

THE DECLINING CANADIAN DOLLAR

IN the world market across the line the Canadian dollar now stands at a little better than ninety-five cents. The exchange of other countries is worth from par down to discount of as much as forty per cent. The pound sterling is worth about four dollars and forty cents. The equanimity with which Great Britain views this seeming reflection on her financial position is an object lesson to Canadians who have been complaining against our situation and urging the government to adopt remedial measures.

The rehabilitation of the Canadian dollar is not impossible. It might be done by the sale of Canadian securities in the United States. The difficulty would then be postponed, to return in aggravated form in proportion as the interest payments on our borrowings would be added to our obligations already outstanding.

The level of the exchanges is the reflection of a trade and financial relation, and reacts to adjust this relation. The premium on New York exchange retards purchases there, and the discount of the Canadian dollar encourages the purchase of our products by Americans. The British point of view is an illustration of their reliance on free and open markets, and natural methods of adjusting trade relations.

WOMEN EMPLOYEES IN CANADIAN BANKS

THE Canadian banks will not immediately dispense with the female clerk, according to Jean Graham, who writes on this subject in the July number of the "Canadian Bankers' Journal." The clerical work and the surroundings of the bank have been found suitable, and a fair proportion of a bank staff can very well be constituted in this way. The Canadian banks are busier than ever before, and by their policy of opening many new branches at the present time they are able to absorb their returning employees and still retain some of the temporary help.

On the other hand women do not cultivate "mobility," which is such a characteristic part of Canadian banking. Again, they are not suitable for very small branches, where the employees act to a certain degree as protectors. Moreover, they do not respond to opportunities for promotion as readily as men, who are in the business as a life work. They have not so large a capacity for work as the average male employee, and consequently more clerks are necessary. As regards quality, however, the writer of the article referred to above finds that "the women who have been in the service of these institutions during the war have discharged their duties in a highly creditable manner." "Altogether," she concludes, "the war test proved that the majority of women, employed in a new sphere, during the world's greatest emergency, were sincerely anxious to fulfil their duties in a workmanlike manner, and were worthy helpers in the work of the country's greatest financial institution."

RIGHTS OF INVESTORS RECOGNIZED

BRITISH COLUMBIA'S new public utilities commissioner, J. L. Retallack, takes the stand that public utility enterprises should be self-supporting; this is a self-evident proposition, but one which is not always recognized by parties bent on destructive work. The case in question was that of the ferries serving North Vancouver. The financial statement showed that the enterprise was operating at a loss and increased rates for the transportation of motor cars were granted.

FORCING THE PUBLIC OWNERSHIP MOVEMENT

ONE of the factors which has helped forward the public ownership movement of recent years has been the unsatisfactory financial position of enterprises which have had to face rapidly rising costs with a comparatively fixed revenue. The uncompromising attitude of a hostile public has resulted in the alternative solution of public ownership being welcomed by anxious shareholders. While this frame of mind has existed side by side with public favor for municipal and government enterprise, and has been supported and encouraged by its theoretical exponents, yet the two are unconnected in the public mind. The causes, however, are common; a prolonged period of rising prices favorable to industry has given rise to an exaggerated view of the size of corporation profits, and to the opinion that public ownership and operation at cost is the best means of appropriating these profits for the public benefit.

From the viewpoint of the investor the present is an opportune time for the transfer of funds from private to public securities. A period of rapidly falling prices is undoubtedly near at hand. One of the first effects of such a decline is always a contraction in business profits. At the beginning of this period a security with an assured income is preferable to one the return from which is dependent on variable factors. That this view is extensively held is indicated by current market prices; bonds of the Dominion and provincial governments, and of first rate municipalities yield from five to five and one-half per cent.; those of good public service and industrial corporations yield from six to seven per cent.; while some stocks of good companies pay as high as over eight per cent.

*

Czecho-Slovakia, one of Europe's new nations, is to have an office in Montreal for the convenience of exporters who seek knowledge of trade possibilities in that country. The representative here, Mr. Paul Reich, of Prague, has already been discussing the subject with Canadian manufacturers. It is not often that the buyer seeks the seller, and this opportunity should have careful attention, having in mind the probability that the next few years may see selling competion of the keenest sort. Mr. Vanderlip's views of the serious conditions of European finances may not be correct.

UNION BANK CONFERENCES

Following upon the meeting of head office officials and branch managers of the Union Bank, held in Winnipeg, referred to in these columns last week, similar meetings were held in Regina, Saskatoon, Edmonton and Calgary. The convention held in the latter place on July 30th closed the series, which is an innovation in the work of the Union Bank. In summing up the results, Mr. H. B. Shaw, general manager, stated that they had had a profitable experience, and had obtained first-hand knowledge of crop conditions at all points at which the bank is represented. Reports from Manitoba managers were encouraging, and those from Saskatchewan, while not uniform, included some good ones.

Some of the larger phases of the bank's business were also dealt with. Mr. Shaw described the services offered by the Park-Union Foreign Banking Corporation, which represents the first working alliance between a Canadian and an American bank, the Union Bank of Canada and the National Park Bank of New York, with combined assets of $400,000,000. The corporation, already established at San Francisco, and Seattle; Yokohama, Japan, and Shanghai, China, will open immediately at Kobe, Japan; Hankow, China; and Paris, France, thus giving to the Union Bank of Canada direct connections abroad. Viscount de Breteuil has accepted the chairmanship of the advisory board in Paris, and the branch will be under the active management of Georges Carrere, formerly general manager for the Far East of the Russo-Asiatique Bank.

MAY SELL BONDS THROUGH GOVERNMENT BOARD

At the next session of the Saskatchewan legislature, a measure may be introduced empowering the provincial Local Government Board to handle municipal bonds. Legislation of this kind has been under consideration for some time, as it is believed locally that centralization of the work would result in economy, especially to small municipalities.

FORMER BOND DEALER REOPENS BUSINESS

Mr. J. F. H. Ussher, formerly senior partner with Ussher, Playfair and Martens, and Ussher, Strathy and Co. has returned, after five years' absence in the Canadian army, to the ranks of dealers in bonds and investment securities, and has opened an office at 807 Royal Bank Building, Toronto. Lieut.-Col. Ussher went overseas as Major, receiving his promotion on the field. He was captured on the 2nd of June, 1916, and was a prisoner of war for nearly 2½ years, being repatriated about a month after the armistice was signed.

Loan companies in the west have assured the provincial governments that no undue pressure will be brought to bear upon bona fide farmers who have suffered crop failure this year.

Marketing This Year's Wheat Crop

Description of Government Plan—Amount of First Payment not yet Fixed—Farmers Well Looked After—Banks will Receive Six Per Cent.

By W. L. EDMONDS

OF the many orders-in-council passed by the Dominion government under the provisions of the War Measures Act none were as comprehensive and important from the commercial standpoint as the order of July 31st creating machinery for the control of the country's business in wheat and flour.

The order goes into effect August 15th, on and after which date all wheat, either for domestic or export account, and the sale of all flour for export, will be under the control of the Canadian Wheat Board, a body comprising ten members, and which supplants the Board of Grain Supervisors. Mr. James Stewart, of Winnipeg, will be chairman of the board. The other members of the board have not at the time of writing been appointed, but it is understood that there will be two each from the grain and milling trades, a like number representing the consumers, and three farmers. The chairman and assistant chairman will be paid such salaries as the governor-in-council may direct, and the other members of the board will be paid traveling and living expenses and a per diem allowance while actually engaged in the performance of their duties.

Duties of the Board.

Under the authority creating it the Wheat Board is empowered to take delivery of wheat at any point in Canada, to fix dates up to and not beyond which the board is prepared to take deliveries at different points in Canada, and to draw up and enforce such regulations as may from time to time be deemed necessary, subject, however, to the approval of the governor-in-council.

The wheat will be purchased through such agents as the board sees fit to designate. These, it is understood, will be individuals, organizations, and companies such as are already engaged in the grain business. As far, therefore, as buying mediums are concerned, the machinery is already in existence.

When purchasing wheat these agents will, instead of paying the full market price, as is now the custom, advance to the farmer from whom they buy, a certain amount of money based on a fixed price for No. 1 northern, according to grade, quality and place of delivery. This fixed price has not at the time of writing been stipulated. It is generally understood, however, that it will be somewhere about $1.75 per bushel Fort William, although $1.50 and $2 have been given consideration. The probable $1.75 is, therefore, "splitting the difference."

Method of Payment

On purchasing wheat the agent will furnish the farmer with a voucher, much similar, it is understood, to that now used by grain dealers, although altered in certain details to fit the new conditions. This voucher the farmer will present to his banker and either have the amount entailed credited to his account or receive payment in cash. He will also receive from the bank what is officially designated in the order-in-council as a participation certificate which, as its name implies, enables him, as soon as the Canadian Wheat Board has received payment in full for all wheat delivered to it and subsequently sold, to participate in the profits which may have been earned on the season's operations.

"That there will be profits," explained to the writer one who has been in close touch with the government in the preliminary drafting of the terms of the order-in-council, "there can be no doubt. Governments the world over have taken, or are taking, steps to stabilize the price of wheat, and this means, in view of the conditions, generally obtaining, a high as well as a stabilized figure for wheat during the current crop season. The Canadian farmer may, therefore, be assured that he will ultimately obtain a better return than $1.75 per bushel for his wheat. How much more no one can, of course, say."

When the board has received payment in full for all the wheat it has bought and sold, and an accounting has been made, a public announcement will be issued setting forth the financial results. All that the farmer, or anyone else who may in the meantime come into possession of the participation certificates, has to do in order to secure his share of the profits accrued is to present them to the bank and obtain his money.

Remuneration to Agents and Banks

Remuneration to agents or companies handling wheat for, or delivering wheat to the board will be fixed by the latter, subject to the approval of the governor-in-council. Opinion among those on the inside is to the effect that remuneration will be on the basis of about five cents per bushel of wheat handled by each agent, an amount similar to that allowed during the past couple of years by the Board of Grain Supervisors. For this remuneration the agents will have to take care of such incidental charges as handling and elevating the wheat, and securing insurance. Obviously, therefore, the net remuneration will fall short of the five cents per bushel. The head of one grain company that handled wheat under the system obtaining during the past crop year is authority for the statement that the five cents per bushel allowance enabled them to break even on the operations in the province of Ontario, while in the west they experienced a slight loss.

The banks will be allowed interest at a rate not to exceed six per cent. on the money they advance to the farmers on the vouchers they received at the time of purchase from the agents representing the Wheat Board.

All wheat required by the millers will have to be purchased from the Canadian Wheat Board "at such prices and subject to such conditions as the board sees fit," the price of sale "being governed as nearly as may be by the price obtainable at the same time in the world's markets for wheat of equal value, regard being had to the cost of transport, handling and storage."

This means, for example, that the milling company which has, say, half a million bushels in the elevator purchased at the fixed price of $1.75, will have to pay to the board the difference between the latter figure and that obtaining in the world's market for such quantity of wheat as may be required for milling purposes. Should the market price be $2.25 the difference payable will, of course, be fifty cents.

Standards of quality of the flour ground in the mills of Canada will be determined by the board; also the maximum prices or margin of profit at which flour and other products made from wheat may be sold.

The export trade in flour will be wholly controlled by the Wheat Board. As far as the domestic trade is concerned the millers will have a free hand except in respect to prices and margin of profits, these being determined by the board.

Powers Regarding Transportation

The authority of the Canadian Wheat Board is by no means confined to the control of the wheat and flour trades. They extend, for instance, to the matter of transportation. That its powers in this respect is a large one is evident from the fact that it is authorized by the order-in-council to allocate Canadian lake tonnage and to distribute cars for rail shipments. But in order that there may be no hitch in the facilities afforded for the transportation of wheat

(Concluded on page 16)

MANY NEW INDUSTRIES LOCATE IN CANADA

Municipalities in Both East and West Report Arrangements Already Made and More in Sight

IN spite of narrowed markets, uncertain price levels and general industrial disturbances, large amounts of capital have been invested in new enterprises since the armistice, and the prospect that the Canadian tariff will not be materially reduced for the present is bringing more branches from the United States.

The Carr Fastener Co., of Boston, Mass., the largest manufacturers of metal fasteners in the world, have completed arrangements for the immediate establishment of a large Canadian branch in Hamilton, Ont. A two-and-a-half acre site in the heart of Hamilton's manuafacturing district has been purchased and building operations are to be commenced at once. The Carr Fastener Co. is capitalized at a quarter of a million dollars, and the buildings to be erected will cost in the neighborhood of $100,000.

Guelph is also to have a new industry in the Sherer-Gillett Co., of Chicago, which has completed arrangements to occupy the factory building formerly occupied by Libby, McNeil and Libby, and now under lease to the Fried-Grills Hat Company.

The city of New Westminster, B.C., has an opportunity to secure a $80,000 cordage factory with equipment worth $90,000, and the council has decided to submit to the ratepayers a by-law to provide a free site worth $8,000, as required by the company, the Western Cordage Co. This is a new concern, including many returned soldiers among its shareholders, and it is expected that the provincial government will supply part of the capital under the terms of the Industrial Act passed at the recent session.

The British Columbia Manufacturers' Association has for some time been planning a "home industry" campaign, and it is expected that this will be launched shortly.

Trenton, Ont., has a new brick manufacturing plant, which has just been opened. The plant has one machine with a capacity of 12,000 per day, and others will be added as required. Most of the capital in the concern comes from Buffalo, the president, L. H. Stephens, being a Buffalo man.

An outstanding event of the coming week is the Alberta Industrial Congress, plans for which have been outlined in recent issues of *The Monetary Times*. Many industrial leaders will be present, as well as representatives of municipalities. An excellent opportunity will be afforded for examining the possibilities of the west for manufacturing, especially in Alberta, which has ample coal supplies in process of development.

CANADIAN BOND AND MORTGAGE CO.

The seven-year record of this company is an excellent one, dividends having been regularly paid and the financial position gradually strengthened. The figures given elsewhere in this issue show in detail the present state of the finances. Total assets have increased by about $12,000, compared with last year; organization expenses, valued in 1913 as an asset to the amount of $1,916, have been reduced to $638. There is a small amount of cash on hand this year, in place of loans amounting to $4,338 last year and $50,000 in 1913. The company does not receive deposits or issue debentures, the funds consisting of the paid-up capital, supplemented when necessary by loans.

During this period of seven years, and after the regular payment of dividends of 4 per cent. per annum during the earlier years and 5 per cent. per annum recently, a balance of $74,525 has been accumulated in the profit and loss account. For the financial year ended April 30th, 1919, the net profits were $34,925, approximately the same as last year. After paying the dividend the profit and loss account was increased by $11,000.

BANK BRANCH NOTES

The following is a list of branches of Canadian banks recently opened:—

*Clinton, B.C.	Bank of Montreal
*Warrenton, Man.	Bank of Hamilton
*Paswegin, Sask.	Canadian Bank of Commerce
Nordegg, Alta.	Canadian Bank of Commerce
Vanderhoof, B.C.	Canadian Bank of Commerce
Erickson, Man.	Royal Bank of Canada
Vancouver, B.C. (25th Ave.)	Royal Bank of Canada

Mr. G. C. Burbidge has been transferred from the Merchants Bank of Canada, Winnipeg, Man., to the branch at Cornfield, Sask.

The Royal Bank of Canada has announced its intention of establishing at an early date, a branch near the corner of Morris and Barrington Sts. Halifax, N.S.

Mr. L. F. Cross, who has been manager of the Canadian Bank of Commerce at Barrie, Ont., for the last five years, has been transferred to the Amherst, N.S., branch.

A new structure is to be erected by the Union Bank of Canada at Hastings and Seymour Streets, Vancouver, B.C., shortly. Razing of the old building on the site has begun.

The Bank of Nova Scotia has just completed the purchase of fifty feet of land directly west of the Pantages Building, on Jasper Avenue, Edmonton, Alta., and a new branch will be erected there shortly.

The Canadian Bank of Commerce will shortly erect a branch at the south-west corner of St. Clair and Lansdowne Avenues, Toronto, Ont., to take the place of the present sub-branch premises at 1,380 St. Clair Avenue.

The following information has been received by *The Monetary Times* from the Bank of Montreal, concerning the bank's agency in San Francisco:—

"Upon the acquisition of the Bank of British North America, who had maintained a branch in San Francisco since the year 1864, it was found that under the present laws a better service could be given the public as a bank organized under the laws of the state of California rather than as a branch of the Bank of Montreal. The British-American Bank was organized for this purpose and our business in San Francisco was taken over by the new institution."

According to Mr. W. M. Chandler, superintendent of western branches, Winnipeg, of the Union Bank of Canada, who was in Regina attending the branch managers' convention, the Union Bank will endeavor to meet the accommodation needs of several of its Saskatchewan branches in immediate future. New buildings of the standard type, two-story brick structures, will be erected at Limerick, Wawota, Abbey and Sceptre. At the two latter points the new buildings will replace buildings destroyed by fire. Extensive remodelling of the Moose Jaw branch has just been completed. Further building in the future, will depend largely upon crop conditions and the need which may arise for an extension of banking service throughout the province.

---

*Sub-agency.

CONTINENTAL GROUP SHOWS INCREASE

The semi-annual statement of the Continental and Fidelity-Phenix fire insurance companies has just been published. The assets of the Continental, as at July 1st, 1919, are $39,009,088, an increase of no less than $2,508,584 over the figures shown in its statement issued January 1st, 1919. The statement of the Fidelity-Phenix Fire Insurance Co. shows assets of $24,748,087, an increase of $2,400,487 over the statement for January, 1919.

A new fire hazard has entered its record. An aviator flying over an Arkansas town fell on the roof of a residence; the plane's gasoline tank exploded, setting fire to the dwelling with a loss estimated at $3,500.

MARKETING THIS YEAR'S WHEAT CROP

(Continued from page 12)

and flour provision is also made whereby under paragraph eight the co-operation of the Board of Railway Commissioners may be secured, this paragraph reading:—

> Notwithstanding anything in the Grain Act or in the Railway Act, the Board of Railway Commissioners of Canada shall have power to order any railway company to provide cars and other transportation facilities for handling grain, and to transport as directed wheat delivered to or by the board, or in which the board is interested, and at the request of the board to withhold transport of other wheat or grains for a fixed time.

Authority to appoint representatives overseas as well as within the Dominion is a further power delegated the board.

Trading in futures on the grain exchanges or elsewhere, except on the wrtiten authority of the board, is prohibited, thus eliminating for the time being pernicious wheat speculative practices.

That there will, however, be speculative trading in the participation certificates issued by the board as advance payment for wheat bought from the farmers is quite probable. This, at any rate, is the experience of Australia, where a similar scheme to that just adopted by Canada for the handling of the wheat crop has been in vogue during the last two or three years. In fact the Canadian order-in-council is an adaptation of the Australian instrument with certain modifications and changes necessary to comply with the conditions obtaining in this country.

Wisdom of the Move

That the creation of the Canadian Wheat Board, endowed with the powers it is, is a wise move on the part of the government is generally conceded by those consulted by the writer, and these include grain men, millers and bankers. Criticism is heard from some of the farmers regarding the $1.75 per bushel which it is understood is to be the amount to be advanced at the time purchase is made. But as farmers' organizations have for some time been urging the government to adopt some such scheme as that to be inaugurated August 15th, it may be taken for granted that in principal the order-in-council will prove acceptable to the agricultural community as a whole.

As far as can be gathered the bankers of the country were not called into consultation by the government when the preliminary draft of the order-in-council was being prepared. As it is understood the bankers were advocates of some such scheme as that adopted, it is possible that the government did not think their presence at the round table conference necessary. In view of the part the banks must necessarily play in financing the new crop the omission of their representatives from the conference cannot be considered as being any other than a regretable inadvertance.

That at least some provision for the control of the wheat and flour trade for the current crop season was necessary there can be no doubt, and for several reasons. True the price of wheat, and it naturally follows, flour as well, promises to rule high for some time to come. The fact that a few weeks ago, when dealing in options on the Canadian exchanges was temporarily permitted, the price of October wheat suddenly jumped to $2.45 at Winnipeg is a pretty good indication of what might be expected on a free market with speculatora in the saddle. That speculators did get into the saddle during the few days the market was open there can be no doubt. And what is more, it is maintained by those who are in a position to venture an opinion that the root of the short-lived temporary bull movement was the action of certain speculators in the United States who aimed to work the price of Canadian wheat up to a figure that would preclude its export and thereby enable the American product to get in on the ground floor as far as the European market was concerned. At any rate, whether American speculators had a hand in the pie or not, it would be little short of disastrous to the financial welfare of the Dominion were October to December wheat futures boosted to a price which precluded exportation.

In view of the conditions obtaining throughout the world to-day, without a stabilized wheat market in Canada the bankers would scarcely be disposed to be liberal in their advances on the new crop. And the health of the commercial body politic is dependent upon the extent to which the banks provide the financial means by which the crop can be marketed.

Canada's Need of Cash

There never was a time in the history of the Dominion when the wheat, the flour, and every other line of merchandise the country produces should be turned into cash with the greatest possible expedition. The extent to which the forthcoming $250,000,000 domestic loan will meet with success largely depends upon the facility with which this can be accomplished. Furthermore, it is imperatively necessary that the export trade should be stimulated to the utmost in order that the farms and the factories of the country may find an outlet for their surplus products and that the present favorable balance in its export trade may be maintained, and the export of gold obviated.

That the desideratum, as far as wheat and flour are concerned, can best be secured through the regulation of the trade and the stabilization of prices there can be no doubt, especially when the fact is taken into consideration that the export trade in grain and grain products during the last three fiscal years had an average annual value of no less than $365,207,136.

MONEY MARKETS

SIBERIAN TRADE PROSPECTS DOUBTFUL

Inland Transportation Not Available, and Country Lacks Suitable Currency, Says Trade Official

THERE is no possibility of establishing an extensive trade with Siberia, according to a letter received by the Canadian Department of Trade and Commerce from A. D. Braithwaite, financial expert of the Canadian Economic Commission, Siberia. The letter, which is dated April 12th, says:—

"At the time of writing this report there is complete disruption of trade throughout Siberia, owing very largely to the disorganization of the railway system, caused partly by military requirements for transport of troops and supplies, partly by the vast number of passenger and freight cars requisitioned as dwelling places for Russian and allied officers and for government officials and refugees. This requisitioning not only withdraws that amount of rolling stock from the active operations of the railway, but fills up the sidings at all the principal stations, making it a very difficult matter to operate the road, even to the limited extent which is now being done.

"While the temporary Siberian (Kolchak) government claim to have some gold, there is no gold standard on which to base the issues of currency. There is no constitutional government whose pledges of revenues from the various sources, such as customs, inland revenue, railways, telegraphs, postal or taxes of any kind could be accepted as a security or basis for such issues, nor could concessions of lands, forests, mines, etc., be taken with any degree of safety. At the time of the revolution the Kerensky government, being faced with heavy expenditures, adopted the simple expedient of operating a printing press and turning out currency by the millions. Following the fall of the Kerensky government the plates were seized and the operations of the printing press continued by the Bolsheviks. There are also large issues of the old Romanoff currency outstanding—that is, issues made by the Imperial government before the revolution. None of these issues have any security in the way of gold reserves behind them, although it is well known that before the declaration of war Russian currency issues were amply secured by gold reserves, but as the notes now printed and being printed have no dates, series or numbers, it is impossible to say whether the notes were issued before or after the Bolshevik revolution, and it is difficult to even roughly estimate the amount of such issues.

"I am told each army has its own printing press. If regulations were ever made regarding the issues of currency, they are now entirely disregarded. The Siberian (Kolchak) government are also making issues to provide for their regular or usual requirements and for military purposes, and there are several municipal and local issues in various districts. Coupons of government bonds and stamps pass freely from hand to hand in lieu of small surrency.

"In an interview at Omsk on March 28th, Mr. Michayloff, Minister of Finance in the Siberian government, gave me the following estimate of currency outstanding. He stated there are now outstanding, according to figures furnished the government: (1) Of the Romanoff and large Kerensky issues—35 milliards of rubles. (2) Of the Kerensky issues of 40 and 20 ruble notes—70 milliards. (3) Of the Imperial, Kerensky and Bolsheviki bonds and Treasury bills—20 milliards. (4) Of the Siberian (Kolchak) government issues and Treasury bills—1½ milliards. A total of 126½ milliards of rubles. This is exclusive of local and municipal issues estimated at 200 millions.

"Mr. Michayloff also stated that the government has reserves amounting to 8 milliards, consisting of gold, platinum and silver, valued at the current rate of exchange. This is practically substantiated by Mr. Nicolsky, director for Department of Ministry of Finance in the State Bank, Vladivostok, who states that the State Bank holds for the government 700 million rubles in gold bars and coin taken from the Bolsheviks at Kagan, and 25,000 poods of siluer, say, 900,000 pounds, and some platinum. There is a very large amount of counterfeit money in circulation, chiefly of the Kerensky issues of 40's and 20's.

Ruble Quotation is Falling

"The value of the ruble has been rapidly decreasing. Whereas on my arrival at the end of February the ruble was roughly calculated at 10 to the dollar, to-day's quotation is 18.50, and it is impossible to buy exchange on foreign countries at any rate.

"Under such conditions as now exist, owing to the lack of railway transport, there are practically no exports and no means of creating foreign balances against which bills of exchange can be sold to pay for imports or to in any way help to stabilize the value of the ruble, so that should the Canadian manufacturer wish to sell goods in Siberia, he could only receive in payment a currency which is rapidly depreciating in local value, and is of no purchasing value outside of the country of issue, and in exchange for which he could not receive funds available in any market in the world, except perhaps to a limited extent in Japan and China; in fact I understand that the importation of the ruple is forbidden into England, France, the United States and Canada.

"The government sources of revenue are not in any degree sufficient to meet ordinary expediture, and great difficulties are experienced in the collection of taxes. In fact to sum the question up, owing to the lack of railway transport, the stoppage of exports, the consequent inability to purchase exchange, the rapid and continuous fall in the price of the ruble, the difficulties confronting the government in handling the Bolshevik insurrection, the prisoners of war and the refugees from all parts of Russia, the question of placing the finances of the country on a firm and stable footing seems quite hopeless.

Suggests Allied Intervention

"It appears to me that the first step must be for the allies to acknowledge and support the Siberian (Kolchak) government, if the various powers interested feel that their interests and investments are of sufficient importance to justify such action. Should the allies not take the necessary steps to that end, Siberia politically, financially and commercially must fall under the dominance of Germany, China and Japan, and in time it would naturally follow that European or older Russia would come under the same influence. The second step I would advise would be to create Siberia into a separate province, drawing the boundary line at the Ural mountains. It would not, I gather, be a very difficult task to restore law and order in Siberia, as apart from the western part of Russia. Then, if thought advisable, the parts could again come together, making a united Russia.

"The third step would be to create an allied advisory financial council, who would be in full control of all finances in Siberia, and in this conection I would advise the establishment of a Siberian State Bank, apart from the State Bank of Russia, with an authorized capital, supplied partly if possible by the people of Siberia and partly by the allies, of £10,000,000, of which £2,500,000 should be paid up and a further £2,500,000 subscribed before the bank opens for business. The shares should carry a double liability and the bank should have no powers to lend on real estate. The government should give the bank all its reserves and should deposit with it all its revenues. The bank should be the only bank authorized to make issue of notes in Siberia. Such issues would be secured: (1) By the government reserves. (2) By the subscribed and unpaid capital. (3) By the double liability of the shareholders. (4) By all the available assets of the bank and the resources of the government. The amount of the circulation to be limited and determined by an Act of government. The bank to be under allied control and to make monthly return of assets and liabilities, showing particularly amount of metallic reserves and circulation. And until such time as the country has been placed on a firm, stable basis, it would be advisable that the greater part of the reserves should be deposited outside of Siberia. It would also, I think, be desirable that a name other than that of the ruble, should be given to the new paper money to be put into circulation. The question of the redemption of the present issues should be decided upon by the financial council.

"Your Vacation is Planned"

History passes

OLD streets are filled with memories, the centuries crowd thick between the walls, and history seems itself a passer-by, in the old quaint sections of Quebec, Montreal and Halifax. About these cities lingers the glow of old-world romance, and a charm which will never be forgotten.

"9 Ideal Vacations"

In the wide lands of Canada, thousands of happy surprises wait the vacationist. Health and strength renew themselves in the invigorating atmosphere of Prince Edward Island, Cape Breton, St. John River Valley and Muskoka. For the hunter of moose, deer or bear, there is abundant sport in Nova Scotia, New Brunswick, Quebec, New Ontario and Eastern Manitoba. Great grizzlies and nimble mountain goats draw the sure shot of the hunter in British Columbia. The fish are biting at Rainy Lakes, Nipigon, Lake of the Woods and other ideal spots.

A Vacation Planned to Meet Your Needs—Choose!

You'll find real camping at the Laurentides, Algonquin Park, New Ontario, Nagogami, and Jasper Park. A wonder panorama unrolls before the traveler through the Canadian Rockies, Matapedia Valley, La Baie de Chaleur, Gaspe, Cape Breton, and along the ocean shore of Nova Scotia. If you have only a few days, spend them joyously at Muskoka, Sparrow Lake or the Maritime Provinces. Or, wishing to combine business with pleasure, visit Western Canada, and such thriving cities as Winnipeg, where you "hear" opportunity grow.

free

Our Art Booklet "9 Ideal Vacations." In it you'll find suggestions that will help you choose YOUR vacation. Call, or write to the address below for your copy. It's free—without obligation.

Every Detail Planned!

The Canadian National Railways have collected facts about Canada that will help you plan any kind of vacation.

Transportation May Improve

"It is hoped that under the new Railway Commission, referred to in the report of the Sub-Committee on Transportation, transport will greatly improve and proper provision will be made for movement of merchandise. As soon as conditions are more settled and good money can be obtained in payment for goods, I think it decidedly advisable that manufacturers should send out their own representative with samples, who could place orders with responsible local merchants, as the demand for manufactured goods of all kinds, especially for agricultural implements suitable to Siberia, is and will continue to be of large proportions.

"Feeling that I could not acquire sufficient knowledge of the subject by remaining in Vladivostok, I decided, with the full approval of the commission, that I would visit Omsk, the seat of the Siberian (Kolchak) government, and I accordingly left by express train for that city on March 16, a distance of some 3,566 miles, the journey taking nine days. The first part of the trip was by the Chinese Eastern Railway, through North Manchurta, a rich fertile farming district capable of producing all kinds of grain, beans, cattle, horses, etc., the soil very similar to that of our Canadian prairies between Winnipeg and Regina. Three hundred miles west of Vladivostok the country is largely mountainous, with fertile valleys; passing out of the province of Manchuria at the town of Manchuria, into Siberia, the same rich soil is found and the prairie land, rolling but not hilly, appears very well adapted for farming purposes. Some big rivers cross from south to north, many of which are navigable for fair sized passenger steamers for six months in the year. A little further on the country gets more wooded and gradually assumes a more broken aspect, where coal of a rather inferior quality is found. After passing over the mountainous country, along the shores of Lake Baikal, another stretch of prairie land is found, well suited for farming and grazing but very sparsely settled. Leaving Irkutsk more settlements and fences are seen and as Krasnoyarsk is approached, considerable timber is seen and some lumbering is carried on, changing again into a prairie country suitable for farming and live stock. From all accounts gold, platinum, silver copper, iron and coal have been discovered in several localities all through Siberia, and have been developed to quite an extent in some places.

"Siberia has a population of about thirteen millions and has practically no manufacturies—the bulk of the population being west of Irkutsk, some 2,000 miles west of Vladivostok. Siberia is three times as large as European Russia. The people, it is claimed, are more intelligent than European Russians. It has 6,000 miles of coastline on the Pacific. Produces wheat, rye, barley, oats, flax, cattle, sheep, timber, fish, butter, furs, hides, lead, zinc, copper, coal and gold. The trade was controlled almost wholly by Germany before the war. There is plenty of Chinese labor. Sanitary measures are practically unknown, for instance, Vladivostok with a population of 120,000 has electric light and short street railway, but no water works or sewage of any kind. Trading is very largely in the hands of the cooperative societies, but as they have made large advances on merchandise, which they have been unable to export, they find themselves at present short of working capital."

TRUST AND LOAN CO. OF CANADA

Results for the financial year ended March 31st, 1919, show a reduction of profits from £126,892 to £110,062. This is accounted for by increased expenses, a smaller interest return owing to a decline in the amount of mortgages held, and less profit on exchange. On the other hand, the income tax was correspondingly less, and £10,000 was appropriated to contingencies account, as compared with £5,000 last year. About £100,000 was carried down to the credit of profit and loss. The statutory reserve fund is approximately the same as last year—viz., £600,000. The balance sheet shows that assets are now being held in more liquid condition.

The company maintains offices in Canada, Winnipeg, Montreal and Regina, the commissioner for Canada being J. Campbell, Winnipeg.

LONDON BROKERAGE FIRM

Messrs. J. W. P. Jones and Herbert S. Easton, who have been engaged in the stock and grain brokerage business in London, Ontario, for a number of years, and who have represented Thomson and McKinnon, of Chicago, locally during the past three years, have, along with Alexander McCallum of Ridgetown, formed the firm of Jones, Easton, McCallum Company, Limited, and have purchased a membership on the Chicago Board of Trade and have taken over the offices and business of Thomson and McKinnon.

NATIONAL FIRE PROTECTION ASSOCIATION

Following upon the annual meeting held last May, the usual meeting of the executive was held on June 19th. In addition to the usual routine business, it was decided that the 1920 convention should be held in Chicago, May 4th to 6th. Efforts will be made to increase the membership still further. The resolution of Geo. F. Lewis, deputy fire marshal of Ontario, adopted as amended at the annual meeting, was discussed, but it was decided that it would be undesirable to attempt to promote such an effort by bulletins or written communications, and that action of this kind should be deferred until sufficient funds are available to present such matters in some more effective way. The resolution in question urged a government campaign of publicity for fire prevention.

PULP AND PAPER EXPORTS LOWER

Canadian exports of paper, pulp and pulpwood for April, 1919, the first month of the new fiscal year, reached a total value of $5,598,128, as compared with $6,323,635 for the corresponding month of 1918, showing a decrease of $725,507. Paper exports alone made a gain of $473,186. The new classification adopted by the Dominion Bureau of Statistics shows that the month's exports of newsprint, the leading paper staple, amounted to 920,592 cwt., valued at $3,160,318, compared with 954,375 cwt., valued at $2,790,158, in April, 1918, indicating a smaller quantity exported this year, but at a higher price.

Exports of both chemical and mechanical woodpulp fell off this year as compared with last, the former by $926,508 and the latter by $266,230. Exports of pulpwood also fell off by $5,955. The details are as follows:—

	April, 1918.	April, 1919.
Paper	$3,157,052	$3,630,238
Woodpulp, chemical	2,047,498	1,120,990
Woodpulp, mechanical	483,941	217,711
	$5,688,491	$4,968,939
Pulpwood	635,144	629,189
	$6,323,635	$5,598,128

Two explanations are forthcoming as to the decrease in pulp exports. The first is that the American demand fell off in November as soon as the war stopped, a number of the board mills closing down and some of the American pulp mills previously diverted to war manufactures resuming their output of pulp. The decline in the demand for Canadian pulp from these causes reached its climax in April and since that month the tendency has been reversed and exporters now report the demand equal to this period of a year ago.

The other explanation given is that some large American producers found themselves overstocked in the first three months of this year and marketed their product at the 1918 price, to the disadvantage of the mills selling at the higher prices prevailing this year.

The decrease in the export of groundwood is regarded as without significance, the American demand fluctuating with varying conditions, such, for instance, as the water supply at the American mills, which was favorable to home production in April.

HISTORY AND VALUE OF THE MINIMUM WAGE

Originated in Australia—Now Adopted by Some Canadian Provinces—Its Economic Value

By Louis A. Wood, Ph.D.

THE minimum wage principle has been introduced through legislative action into the industrial life of various countries. Wherever minimum wages are paid, although they may be fixed by different methods, they have two characteristics in common. In the first place, as their name would imply, they form a basic level of remuneration; that is, they are the lowest rate which can be paid to the wage-earner in any given trade. Secondly, they are legally protected rates. The employer of labor who pays less than the minimum scale is subject to penalties imposed by the law. Occasionally the plan of a government has been to pass legislation authorizing a certain minimum wage throughout the entire field of industry under its jurisdiction. More frequently, however, power to fix wages has been delegated to an independent body, a board or a commission, which represents in its personnel both the employed and the employing class.

The minimum wage principle had its origin in 1896, in the Australian colony of Victoria (the Factories and Shops Act). At first, four trades were singled out and an experiment made with reference to these. Then, by subsequent legislation the system was gradually extended in that state until now more than one hundred trades are affected. According to the plan adopted by Victoria, minimum wages are fixed for both male and female workers in the various employments by tribunals, known as wage boards. Upon these boards both employers of labor and employees in the particular trade are represented.

The plan inaugurated by Victoria has spread with variation of detail throughout the whole Commonwealth of Australia and into the Dominion of New Zealand. In fact, the minimum wage system—having passed completely beyond the experimental stage—is a well-tried and much favored phenomenon of industrial life in the Antipodes.

A minimum wage law (Trade Boards Act) was first written upon the statute books of Great Britain in 1909. The object of this legislation was to apply the minimum wage principle wherever, for either male or female employees, the wage scale was "exceptionally low as compared with that in other employments." Trade boards were set up under the law which already have fixed minimum wages in a great number of employments. Recently, in August, 1918, the original act was amended (passed upon the advice of the Reconstruction Committee of Great Britain), with the main purpose of protecting female labor during the period of reconstruction. The minister of labor of Great Britain is now empowered to apply the provisions of the act to any trade where he thinks that there is insufficient machinery to effectively regulate wages. A quick extension of the minimum wage system should follow these elastic terms. The British plan, according to the noted parliamentarian, L. G. Chiozza Money, "has proved a triumphant success." "A great principle," he asserts, "has been vindicated."

Within the past few years a surprising expansion of the minimum wage system has occurred within the federated areas of Canada and the United States. Already twelve American states and the district of Columbia have legally endorsed the principle. In Canada, the four provinces of Alberta, Manitoba, British Columbia and Quebec, have legislated upon the subject. While the tendency has been for the western states and provinces to accept the principle with greater enthusiasm, from now on the system will undoubtedly spread with great rapidity throughout the east.

In the Provinces of Canada

The provincial legislature of Alberta was the pioneer governmental body in Canada to authorize a minimum wage scale. In April, 1917, an act (the Factories Act) was passed in that province wherein a general minimum rate of wages was established for all industrial workers, both male and female. No person, according to the act, could be employed in a shop, factory or office of Alberta, for any wage lower than $1.50 a shift.

On the other hand, the plan of allowing an independent tribunal to fix minimum wages has been adopted in the province of Manitoba. By an act of 1918, a single wage board was authorized for the province, which was to consist of five members (two members of the board must be women) and to have well-defined powers with respect to the fixing of minimum wages for adult female workers and minors. A board was appointed with Dr. J. W. Macmillan, of Manitoba College, as chairman, and commendable progress has been made in regulating wages. When a preliminary survey was made in Manitoba, it was found that some female wage earners were only receiving $5 per week, which was considered totally inadequate in the face of high living costs. By January 1, 1919, twenty-three employments had been dealt with, and minimum wages for adult females and minors legalized. In the case of fourteen of these the minimum wage for skilled adult females has been set at $12 per week; in seven others the rate is $10 per week, while in two trades only can the employer pay as low as $9.50 per week. A rate averaging $10 per week has been arranged for trained minors in thirteen trades; in all other cases it is stipulated that $8-$9 per week must be paid to minors, except where girls of 14-15 years of age are employed in stores, when a wage of $7 per week can be given.

In the province of British Columbia a wage board of three members has been created under statutory authority to regulate the wages of female employees and other matters of industrial concern. The deputy minister of the province is ex-officio the chairman of this board. To assist him there have been appointed a woman judge of the juvenile court in Vancouver and a male school trustee prominent in the educational affairs of the same city. The regulations of the wage board of the Pacific province are awaited with interest.*

A bill has been lately introduced in the legislature of Quebec which will permit of the fixing of minimum wages in that province. According to its terms, whenever a sufficient number of female workers in a trade make application to the government, a commission will be empowered to conduct an investigation and settle the lowest legal wage in that employment.

Advantages of the System

(1) The prime object of the introduction of this system into industry is to secure a living wage for all such workers as sell their services at the cheapest rates in the labor market. In other words, it aims to deliver a blow at subnormal conditions, wherever found, among the wage-earning classes. By a living wage is meant, not one which merely supplies the subsistence wants of the workers, but will afford as well some of the comforts of life and an opportunity for recreation. It is clearly advisable, then, that the minimum wage scale should be revised at stated intervals in order to keep it attuned to the changing cost of living.

(2) From the foregoing it becomes apparent that the principle of the minimum wage should serve to eliminate the evil of sweating in our industries. In certain employments it is the custom to send out work to be done at home and for such work very often meagre wages are paid. As a rule, women and minors form the majority of out-workers in these sweated trades. Several years ago a committee investigating conditions in Great Britain found that in the cotton and linen industries many girls and women were earning less than two cents an hour. Trade boards have since been able to deal with this unhappy situation.

(3) If subnormal conditions can be removed by the minimum wage system, it may be argued that the standard of living of the working classes can be insured against regression. Alien labor, having come in, is no longer able to undersell native labor and drag down the worker's standard. The aim in Ontario, especially with respect to women workers, should be to raise the standard of living rather than to allow it to become depreciated.

(4) The moral value to society of the minimum wage system is beyond question. Low wages paid to female workers are often the principal cause of moral degradation. In the long run, such degradation will be more costly to the state than the extra sum demanded from industrial capital in order that living wages may be paid.

(5) The issuance of minimum wage regulations as a rule brings to light many new facts with respect to labor conditions. Whenever an investigation is made by a board acting with wide powers, a great deal of information is gained concerning the relations of employer and employee. For example, the wage board established in Manitoba, has authority to call witnesses and to examine them under oath with respect to any trade.

(6) Interest in the problems of labor will be stimulated among the workers when the minimum wage principle has become effective. Female employees, singled out for consideration by government boards, will naturally take more pride in their toil. The trade union movement, therefore, should not be hindered by the fixing of minimum wages, but rather may be helped. Trade unionists in Canada are, on the whole favorable to the system. The best proof of this is the strong resolution passed at the last meeting of the Trades and Labor Congress of Canada (thirty-fourth session of the congress held September, 1918) in which the principle of the minimum wage was fully endorsed.

Advisable in Ontario

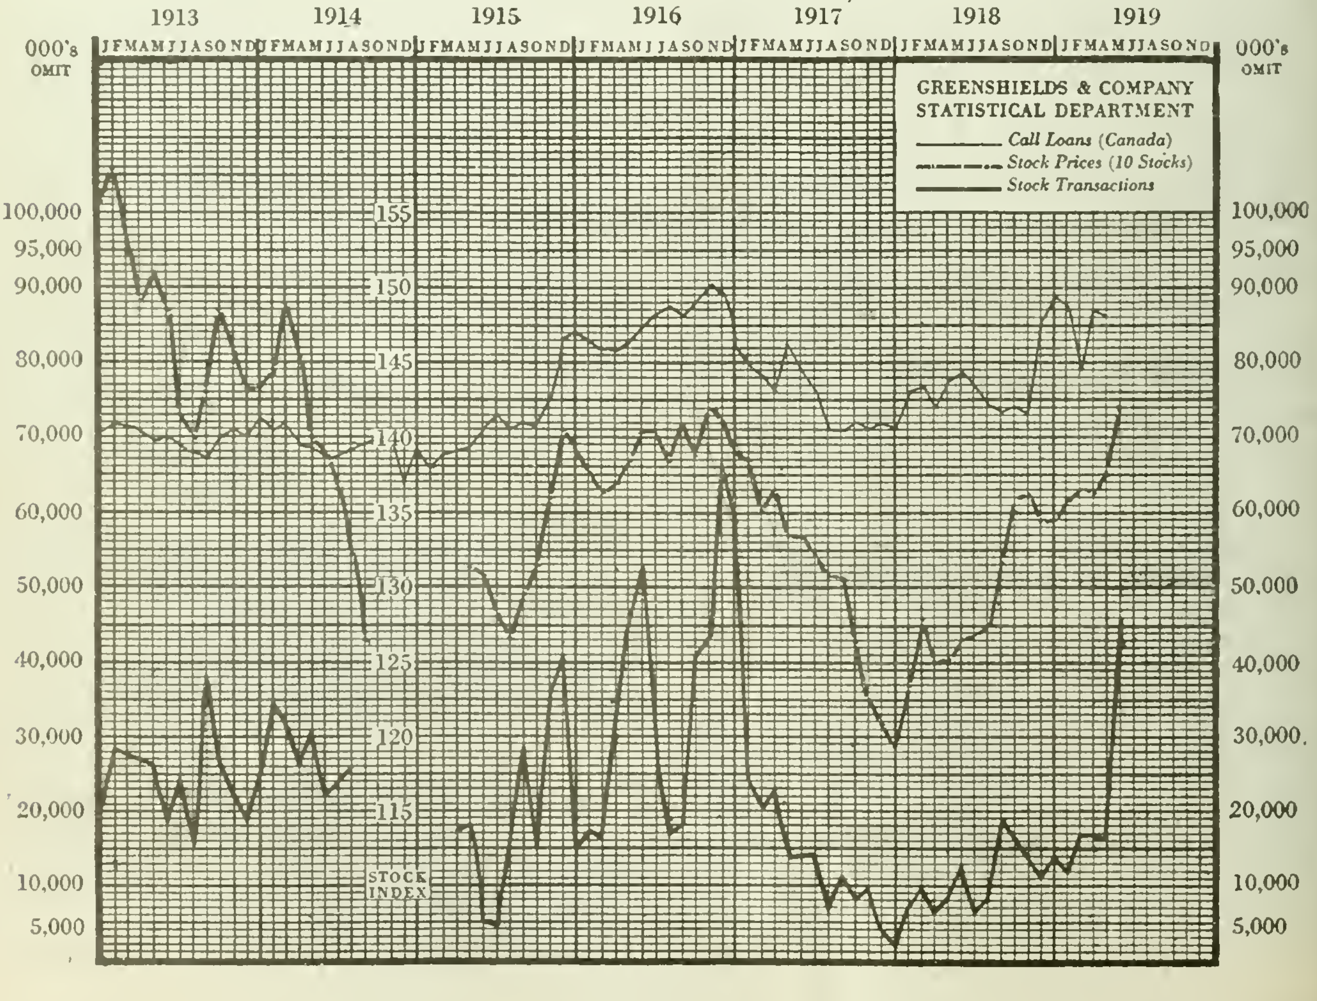
The writer advocates the enactment of minimum wage legislation in Ontario which will authorize the fixing of wages for adult women workers and minors in this province. Such legislation would be very timely if introduced during the reconstruction period, and its advantages would soon be marked. A proper initial step would be to make a comprehensive survey of conditions among the groups of labor to be affected. It is likely that 75,000-100,000 female workers in the province would have to be dealt with in a survey of this kind. Later, the wage board plan might very well be adopted, and one or more boards be set up under statutory authority to arrange for minimum wages in the various employments.

STOCK MARKET, PRICES AND CALL LOANS

The activity of the Canadian stock markets during the past three months, compared with the period of slack business extending through 1917 and 1918, is well illustrated in Greenshield's Monthly Review just issued. Stock transactions, call loans and stock prices for the past six and one-half years are graphically compared, as reproduced below. By way of comment, the monthly says:—

"The active security markets of the past two months lend interest to the foregoing chart, showing the average movement of prices of leading Canadian stocks since 1913, the fluctuating volume of trading, and the trend of that market barometer of the bank statement—call loans in Canada. A rise in call loans such as that registered in the early part of the year would ordinarily be interpreted as a danger signal for the market. It may still be so, but allowance is to be made for a comparatively new factor—namely, the extent to which temporary advances in connection with the financing of government and other bonds, rather than stock market operations, enter into the total. The ten stocks on the stock index, although not altogether representative of the present situation, as they were chosen in 1910, approximate the highest level of the war period, but the average is still far below the level of 1913-14."

STOCK TRANSACTIONS, CALL LOANS (CANADA) AND STOCK PRICES



LIFE COMPANIES' SASKATCHEWAN INVESTMENTS

THE attractiveness of Saskatchewan first mortgages, municipal bonds and other securities of a similar classification, is evidenced in the fact that a total of $35,894,080 of these assets located in that province were held by life insurance companies as at December 31, 1918.

A first statement of holdings of life insurance companies has just been prepared and issued by Arthur E. Fisher, fire insurance commissioner for that province. The statement shows that of the total mentioned, $34,519,129 represents the investments of 21 Canadian companies in the province, the remaining $1,374,950 being distributed among seven foreign companies. Another division shows that of the total investments $24,461,590 is invested in mortgages, $10,421,727 in bonds, principally municipal, telephone and school issues and the remaining $1,010,762 in other securities.

A very heavy investor in Saskatchewan mortgages and securities is the Canada Life Insurance Co., whose holdings in the province total $7,818,919, or about 22 per cent. of the total of all companies, Canadian and foreign combined.

The following statement which is based on reports to the superintendent shows the investments of each of the Canadian and foreign companies in Saskatchewan mortgages and bonds:—

Company.	Mortgages.	Bonds.	Other securities.

CAN ASSESSMENT EXCEED VALUE?

Supreme Court of Canada Decides that it Can Not Under Manitoba Assessment Act

By M. L. HAYWARD, B.C.L.

THE case of the Archbishop of St. Boniface vs. the town of Transcona decided by the Supreme Court of Canada turned on the point whether under the Manitoba Assessment Act property could be assessed at *more* than its actual value, provided that all property was assessd on a uniform basis, and the Supreme Court held that it could not.

The section of the Manitoba Assessment Act under which the case arose reads as follows:—

"In cities, towns and villages all real and personal property may be assessed at less than actual value or in some uniform and equitable proportion of actual value, so that the rate of taxation shall fall equally upon the same. The expression 'actual value' used in this section shall mean the fair market value of such property, regardless of a prospective increase or decrease, either probable, remote or near."

For the town of Transcona it was argued that as long as all property was assessed on a uniform basis it was immaterial that the property was over assessed, but the Supreme Court disposed of this argument in the following words:—

"The general principle that in construing legislation imposing taxation clear language must be found supporting the taxation must be borne in mind.

"Now in the section before us while express language is used permitting assessment at less than actual value, there is no such language permitting assessment at more than actual value.

"It was contended that such permission should be inferred from the words 'or in some uniform and equitable proportion of actual value.'

"These are vague and indefinite words and I do not think that from them alone a permission should be inferred to assess at more than the actual value of the land.

"They are useful and probably necessary in cases where the permission to assess at less than the actual value is exercised as in such case preserving the general principle of uniformity and providing that the permission so to assess must be exercised not in a haphazard way but uniformly 'so that the rate of taxation shall fall equally upon the same,' which latter words I construe to mean upon all the lands and property assessed. If the policy of assessing 'lands and personal property' at less than their actual value is adopted by the assessors it must be applied generally 'to all real and personal property' and on some fixed principle, so that uniformity may be maintained and injustice prevented.

"But, however, that may be worked out under the statute, it seems to me reasonably clear that no intention to assess property beyond its actual value can be assumed or inferred.

"I am not insensible to the many and great difficulties which existing conditions of the absence of any actual value of the lands in many parts may give rise to in making an assessment. But if the two main principles which I suggest are followed these difficulties can be largely minimized if not entirely overcome. These principles are that the Act does not authorize assessments greater than the 'actual value' of the property assessed which the section goes on to say means the fair market value of such property regardless of a prospective increase or decrease, either probable, remote or near, and that when assessed at less than the actual value it must be done on a uniform principle applied to all the lands and property assessed."

The 1919 annual convention of the Fire Marshals' Association of North America is to be held in Toronto, August 26th to 29th. This year's president is T. Alfred Lleming, fire marshal of Ohio. The usual reports and addresses will be followed by a round table discussion.

*** By virtue of special bylaw "A" of the Company the liability of the shareholders upon calls in arrears has been reduced to $63,000.00.**

We have audited the Books and Accounts of of the Canadian Bond and Mortgage Corporation for the year ended 30th April, 1919, and report to the Shareholders that we have received all the information and explanation that we have required.

We have examined the Mortgages constituting the security for the Corporation's investments and have found same in order, the Corporation's Solicitors certifying to the sufficiency of the title and conveyancing. In our opinion the above Balance Sheet is properly drawn so as to exhibit a true and correct view of the affairs of the Corporation, according to the best of our information, the explanations given us and as shown by the books, subject to the accompanying report.

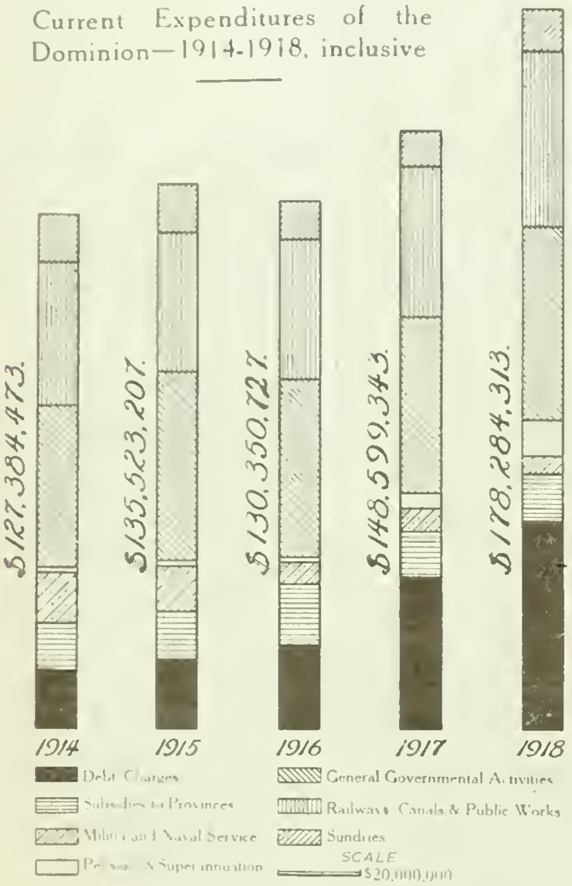
DOMINION EXPENDITURE HAS QUADRUPLED

Increase in National Budget During the Past Five Years has Been Particularly Rapid, Due to Debt Charges

DEBT charges, which in 1914 absorbed about 12 per cent., now constitute about 30 per cent. of Canada's national expenditure on current account. These and other interesting facts concerning our national budget are brought forth in a pamphlet which has just been issued by the Citizens' Research Institute, Toronto. Receipts and current expenditures for the past fiscal years are shown as follows:—

CHART I

Current Expenditures of the Dominion—1914-1918, inclusive



Year.	Receipts.	Current expenditures.
1914	$163,174,395	$127,384,473
1915	133,073,482	135,523,207
1916	172,147,838	130,350,727
1917	232,701,294	148,599,343
1918	260,778,953	178,284,313

A division of the annual expenditures, 1914 to 1918, inclusive, is shown in graphic form in Chart I. herewith. From this chart, it will be noticed that debt charges have increased very rapidly, from about $15,000,000 in 1914 to $51,500,000 in 1918, due largely to the war. In this period the total debt of Canada increased from $544,391,369 to $1,863,335,899.

Subsidies to provinces have remained practically constant at about $11,000,000. These, in most cases, are fixed payments made under the British North America Act, by which each provincial government receives:—

(a) A fixed grant according to population.

(b) A grant at the rate of 80 cents per head of population up to 2,500,000 and at the rate of 60 cents per head for any exceeding that number;

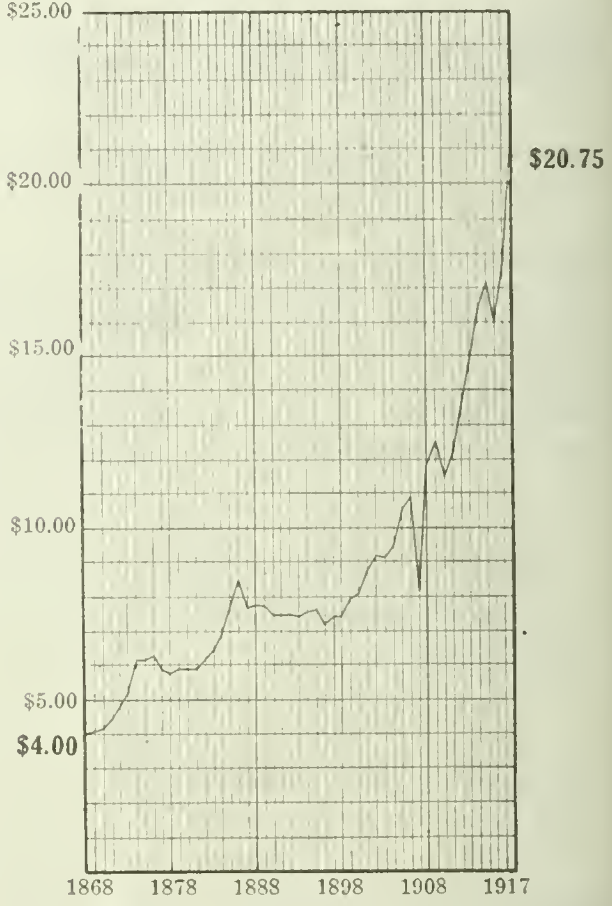
(c) Other amounts consisting of special grants as compensation for lands, allowance for buildings, allowances in lieu of debt, etc.

Expenses for the militia and naval service have dropped from about $13,000,000 to $5,000,000, owing largely to the fact that the work previously performed by these departments was taken up by the Canadian Expeditionary Force. The increase in pensions, from $300,000 to $8,000,000, is a direct result of the war. Superannuation expenditures have remained practically stationary at $500,000.

Under the heading "General Governmental Activities," are grouped such items as cost of civil government and legislation, as well as money expended in connection with arts and agriculture, mines, fisheries, labor, immigration, etc. The largest single item under this heading is the post office, the cost of which has risen from $13,000,000 to $18,000,000. This, however, more than pays its way, the revenue in the same period having risen from $13,000,000 to $21,000,000. Annual expenditures for this total group have remained comparatively constant at between $40,000,000 and $45,000,000. In the next division, expenditures on railways and canals have risen from $15,500,000 to $35,000,000, while those on public works have decreased from $20,000,000 to $8,000,000. Sundries consist of such items as care of Indians, which creates an annual expenditure of about $2,00,0000; mail subsidies, about another $2,000,000; lighthouse and coast service, about $2,000.000; and other smaller items making, in all, $10,000,000 or $11,000,000 annually.

CHART II

Per Capita Expenditure by the Dominion Goverment 1868-1918, inclusive



The second chart shows the increase in expenditure per capita since 1868.

The Canadian National Exhibition, Toronto, will be held this year from August 23rd, to September 6th. The industrial and manufacturing exhibits are expected to be better than ever. Special attractions this year will be a visit from the Prince of Wales, aerial exhibitions, and a display of war trophies and paintings.

COST OF LIVING REMAINS STEADY

General price levels in Canada, as indicated by the index number of the Department of Labor, were practically unchanged in June, and show an increase of only just about 1½ per cent. for the year. The index number is, of course, based upon wholesale prices. Both increases and decreases are found in practically all the groups. The details are as follows:—

DEPARTMENT OF LABOUR FIGURES	No. of Commodities	Index Numbers		
		*June 1919	*May 1919	*June 1918
I Grains and Fodders				
Grains, Ontario	6	326.5	325.4	3 7.7

DOMINION CHARTERED ACCOUNTANTS CONVENTION

A provisional program for the 1919 convention to be held in Winnipeg on September 9th to 11th, has been prepared. In addition to the usual routine business there will be on the 10th a report on "Uniformity of Standards and Practice," by a standing committee, and an address by J. H. Evans, deputy minister of agriculture for Manitoba, on "Agriculture as a Western Industry." Many features of a social character are also being planned.

INCREASE IN BUILDING PERMITS

Building permits in Canada showed a large increase in May, judging by the figures compiled by the Department of Labor for thirty-five large cities. Compared with last year, the difference is over 44 per cent. This change has been made in the face of record costs of building, and indicates that property values are rising to levels in accordance with present rents. Permits issued under the government housing scheme are, of course, included in these figures. From the detailed figures given below it will be seen that there were some decreases in all provinces, excepting Alberta and Nova Scotia. The very low figures for Winnipeg were the result of industrial conditions there.

DEPARTMENT OF LABOUR FIGURES	April 1919	May 1919	May 1918	May, 1919, compared with May, 1918. Increase+ Decrease−	
				Amount	Per Cent

ROYAL BANK STOCK SALE

On or about August 20th, the Royal Bank will invite tenders up to September 2nd, for a small balance of its stock remaining from the issue made early this year to shareholders at $150 per share. This balance remains unsold because some of the shareholders did not avail themselves to purchase, and because of the fact that there were fractional shares which could not be allotted under the Bank Act. This has nothing to do with the second issue of $2,000,000 made in April in connection with the arrangement with London County, Westminster and Paris Bank, Limited.

Messrs. V. D. Harbinson and Loftus A. Allen, chartered accountants, announce having formed a partnership under the name of Harbinson and Allen, and opened offices for the practise of their profession at 508 Lumsden Building, Toronto.

WHY THE "MUTUAL LIFE OF CANADA" IS SO POPULAR

The Mutual placed upon its books in the first five months of 1919 100% more business than in the corresponding months of 1918. The wonderful war-record of the Mutual Life and the prompt payment of the many unexpected claims during the recent epidemic—these have proved the value of the institution. The Mutual moreover, is in a peculiar sense a people's company, being in its control democratic, in its economy strictly co-operative. This means that the system is in line with the "spirit of the age," and so the people naturally turn to the Mutual. The record of the Company for nearly half a century has been one of increasing beneficence, and an ever-growing number of gratified policyholders help on the good work of the agents. As a result, there probably is not a more prosperous group of workers in Canada to-day than the representatives of our Company.

"Be a Mutualist."

The Mutual Life Assurance Co. of Canada

JULY FIRE LOSSES

Large Decrease in Total—Forest Fires and Lightning Take Heavy Toll

The Monetary Times' estimate of Canada's fire losses during July, 1919, is $1,118,377 as compared with $3,337,530 in June, and $3,369,684 in July a year ago. The following is the estimate of July losses:—

Fires exceeding $10,000	$ 889,000
Small fires reported	83,500
Estimate for unreported fires	115,877
Total	$1,118,377

The Monetary Times' record of the past three years and this year to date shows the following monthly losses:—

	1916.	1917.	1918.	1919.
January	$ 1,649,217	$ 1,918,660	$ 2,688,556	$ 3,915,290
February	3,275,600	2,009,953	2,243,762	1,091,834
March	1,406,501	2,050,650	1,682,286	2,154,095
April	1,160,437	1,317,714	3,240,187	1,080,070
May	1,850,205	1,163,110	3,570,014	1,785,030
June	494,557	1,184,627	3,080,982	3,337,530
July	3,039,634	1,101,734	3,369,684	1,118,377
August	1,057,109	1,230,183	3,110,445	....
September	981,703	1,301,700	917,286	....
October	1,077,815	704,605	5,119,145	....
November	923,235	959,049	1,059,580	....
December	3,271,496	5,144,100	1,733,917	....
Totals	$20,487,509	$20,086,085	$31,815,844	$14,482,226

The following is a list of fires at which the losses amounted to $10,000 and over:—

Boston Creek, Ont., July 2, mill at the Patricia Syndicate, $30,000.

Port Rowan, Ont., July 4, Central Hotel and Ashford grocery store, $10,000.

Granum, Alta., July 6, business section of town, $100,000.

Wymark, Sask., July 7, two grain elevators and contents, $30,000.

Winnipeg, Man., July 11, building of the Hudson Auction Co., $150,000.

Rock Island, Que., July 15, factory of the Telford Garment Co., $10,000.

Ottawa, Ont., July 16, residence of C. F. Whiteley, $20,000.

Halifax, N.S., July 18, warehouse of offices of T. A. A. DeWolf and Son, $15,000.

Thorold, Ont., July 19, Gardner's basket factory, $25,000.

Toronto, Ont., July 22, store of Finn and Rubin, $14,000.

Kingston, Ont., July 24, photo gallery and store, $10,000.

Sturgeon Falls, Ont., July 19, general store of Michaud and Levesque, $30,000.

Casselman, Ont., July 30, business section, $150,000.

Hanover, Ont., July 26, grist mill of Wm. Knetchel and Son, $125,000.

London, Ont., July 28, coal and wood sheds of M. Hoehn and J. Lee, $10,000.

Nicolet, Que., July 26, Beaulieu foundry and two adjoining buildings, $10,000.

North Lake, Ont., July 26, sawmill of A. Bishop, $25,000.

Orangeville, Ont., July 26, barns of W. H. Hunter at "The Maples," $18,000.

Port Arthur, Ont., July 23, plant of the Port Arthur Shipbuilding Co., $10,000.

St. Thomas, Ont., July 26, building of the New Method Laundry, $15,000.

Toronto, Ont., July 27, building of the Marshall Ventilated Mattress Co., $17,000.

Harold, Ont., July 31, barns of G. Bailey and J. Cranston, $15,000.

Lightning and forest fires are again reaping their usual harvest, and the month of July has come in for its fair share of destruction. Northern Ontario and the mountainous districts of British Columbia have suffered the most from forest fires, while in Alberta and Saskatchewan prairie fires have done a great deal of damage to the fertile land. Farmers in all parts of Canada have suffered from lightning, many barns, with their valuable contents, having been totally destroyed. Although no estimate has yet been made, the loss from these sources will be very heavy.

Among the structures destroyed or damaged last month were: Business blocks 2, mills 2, stores 11, barns 13, residences 23, sawmills 3, hotels 5, farmhouse 1, livery stables 2, convent 1, business buildings 7, factories 4, guardhouse 1, stables 4, warehouses 2, grain elevators 2, railway station 1, grist mill 1, coal shed 1, garage 1, apartment house 1, plant 1.

Among the causes reported were: Overehated oil stove 1, spark from match 1, lightning 7, defective wiring 3, spontaneous combustion 1, careless smoking 2, plumbers' blowpipe 1, defective chimney 2, overheated stove 1, overturned oil lamp 1, incenidarism 1, playing with matches 1, fire from forests 1.

The following is a list of fires last month at which fatalities occurred:—

Chatham, Ont., July 5—Trapped in burning house	1
Winnipeg, Man., July 14—Fire from hot ashes	1
Hamilton, Ont., July 18—Playing with matches	1
Cornwall, Ont., July 19—Trapped in burning house	6
Millington, Ont., July 24—Trapped in burning house	1
Ottawa, Ont., July 31—Playing with matches	1
Total	11

ANOTHER NEW MONTREAL BROKERAGE HOUSE

Announcement has been made of the opening on August 1st, of an office by May, Child and Jarvis, members of the Montreal Stock Exchange, at 67 St. Francois Xavier St. Stanley May is well known on the Montreal Street, being formerly associated with Edgar Smith and Co., and was latterly a partner of A. E. Rex and Co. H. J. Child has been acting as floor member of Pitblado and Co. for some years. W. L. Jarvis has recently returned from overseas after four years' service at the front. Mr. Child will act as floor member of the new firm.

IMPROVEMENTS IN WHALEN PULP PLANT

Sir George Bury, president, James Whalen, chairman of the board of directors, and Henning Helin, general superintendent of Whalen Pulp and Paper Mills, Limited, recently returned from an inspection trip to the company's plant at Mill Creek, B.C. Mr. Whalen is on the coast on a general inspection trip of the company's properties and expressed himself as being very well satisfied with the progress being made.

"The company's plants are undergoing some slight alterations," said the visitor, "which will improve the quality of the product, and with normal shipping conditions returning, an opportunity is opened to greatly expand the export markets for British Columbia pulp, which in quality equals the product of any country in the world. Shipping facilities are, of course, of first importance, and British Columbia must develop its shipping and handling utilities. With the wealth of raw products in British Columbia, it should be a much larger manufacturing centre than it is at present, and with co-operation it should become one of the greatest provinces in Canada.

"British Columbia has the last big stand of timber in Canada, and it is the opinion of the large lumbering concerns in the east that sufficient attention has not been paid by the Pacific Coast mills to the development of export markets. Lumber has not increased in price in the same proportion as many other commodities, but the present outlook is excellent. The Pacific Coast mills must make a point of going after the business, rather than wait for the business to come to them."

GOVERNMENT AND MUNICIPAL BONDS

No Large Municipal Financing in Sight, and Just One Provincial Issue—Prices About Recent Levels

THE Canadian market for government and municipal bonds shows no general change. Prices are about the same, the demand is fair, but dealers are rather anxious to dispose of what they have on hand.

The following quotations of active bonds are supplied by the National City Co. Ltd., and are in New York funds:—

	Bid.	Offered.
Anglo-French 5% (Oct. 15, 1920)	97⅛	97¼
United Kingdom 5½% (Nov. 1, 1919) ..	99 15/16	100 1/16

62 CHURCH STREET TORONTO
1206 McARTHUR BLDG. WINNIPEG

Grantham Township, Ont.—Messrs. G. A. Stimson and Co. have been awarded an issue of $3,500 5½ per cent. 20-instalment debentures.

North Bay, Ont.—Messrs. A. Jarvis and Co., Toronto, have purchased an issue of $52,500 6½ per cent. 20-instalment debentures at 101.07. A. E. Ames and Co. bid $51,335 and Brent, Noxon and Co. $51,360.

Peace River, Alta.—The village is offering for sale debentures to the amount of $4,200. The debentures are repayable in five consecutive annual instalments, and the interest is at the rate of 6 per cent. per annum.

Belleville, Ont.—Sealed tenders will be received up till August 15th, 1919, for the purchase of $67,352.62 6 per cent. debentures as follows: $16,635.06, 17-years; $32,871.06, 27-years; $13,820.28, 7-years; $2,218.21, 3-years; $1,808.01, 4-years.

Scarborough Township, Ont.—Messrs. G. A. Stimson and Co. have been awarded the $40,000 6 per cent. and $25,000 6 per cent. bonds at 104.10, which is on a basis of about 5.60 per cent. The first issue is for twenty-five instalments and the latter for thirty instalments.

Niagara Falls, Ont.—Two money by-laws have been passed, one to authorize the city to issue debentures for $50,000 to grant aid to the general hospital for the purpose of increasing its accommodation, and one to provide for the borrowing of $21,000 to establish an incinerator plant for the disposal of garbage in the city.

Township of York, Ont.—The Canadian Bank of Commerce has been awarded an issue of $10,000 6 per cent. 20-instalment debentures at 104.189. The following is a list of tenders:—

Bank of Commerce	104.189
G. A. Stimson and Co.	103.21
Æmilius Jarvis and Co.	103.07
C. H. Burgess and Co....................	101.89
Dyment, Anderson and Co.	101.03

Prince Albert, Sask.—The city and school boards have authorized an issue of consolidated debenture stock to be exchanged for outstanding debentures of the city and school boards respectively, with accrued interest to December 31st, 1918, and holders of debentures and unmatured interest coupons are required to surrender them in exchange for the debenture stock having a par value equivalent to the principal of such debentures and accrued interest to the 31st December, 1918. Interest on outstanding debentures ceased after 31st December, 1918. Debentures should be delivered to Imperial Bank of Canada, head office, 2 Leader Lane, Toronto, Canada, without delay, when the new stock will be issued and a cheque given for the first payment of interest thereon, as of 1st July, 1919.

Alberta School Districts.—Twelve blocks of school district debentures amounting to $24,900, bearing interest at 6½ per cent., have been sold by the debenture branch of the Department of Education as follows:—

Block No. 1, Rural, 10-years.—Cardiff S.D., $4,000 Awarded to Manufacturers Life Insurance Co., at 100.75. Block No. 2, Rurals, 15-years.—Mars S.D., $1,800; Fawn Hill S.D., $2,500—$4,300. Awarded to Manufacturers Life Insurance Co., at 101. Block No. 3, Rurals, 15-years.—Woodrow S.D., $2,000; Holm S.D., $900—$2,900. Awarded to W. Ross, Alger and Co., at 100.55. Block No. 4, Rural, 10-years.—Valley Gardens S.D., $2,000. Awarded to Manufacturers Life Insurance Co., at 100.75. Block No. 5, Rural, 10-years.—Pathfinder S.D., $2,000. Awarded to Manufacturers Life Insurance Co., at 100.50. Block No. 6, Rural, 10-years.—Green Prairie S.D., $2,500. Awarded to Manufacturers Life Insurance Co., at 100.80. NEWS OF MUNICIPAL FINANCE

Many Cities Report Good Tax Collections—Regina Has Sinking Funds to Invest—Victoria Tax Rate Up

South Vancouver, B.C.—The sum of $200,000 has been invested in a special fund to meet payments falling due at the beginning of the year. The surplus from this account, with accrued interest, will be applied for road improvements.

Lachine, Que.—The city council at a meeting held on July 24th provided for reductions in expenditures to prevent a deficit of $15,000 during the year. The fire and police departments will henceforth be under one administration; the fire chief, three policemen and a number of other civic employees will be dismissed.

Medicine Hat, Alta.—July 31st was the last day of the first discount period for the payment of taxes in Medicine Hat. The receipts amounted to $85,518, which is the largest amount on record for one day's collections. Of the taxes levied for 1919 approximately 46 per cent. were collected in one month after the tax notices were mailed.

Bridgeburg, Ont.—The town council has set a tax rate of 35 mills. This is the largest on record, in view of the fact that last year's rate included five mills for the Dominion Patriotic Fund. The assessment is increased by a million and a half dollars, but one million two hundred thousand increase in assessment on the international bridge has been appealed and not yet settled.

Sherbrooke, Que.—The city is having difficulty with the amusement tax, collection of which was recently taken over from the province. The latter had been allowing theatre proprietors a discount of five per cent. of the tax, as remuneration for collecting it. The city was not doing this, but it was expected that the difficulty would be adjusted at a meeting of the city council.

Saskatoon, Sask.—The half-yearly auditor's statement of revenue and expenditure of the city of Saskatoon shows a deficit of $8,643 during the six months. Power house and water works showed a profit of over eleven thousand dollars, but the street railway sustained losses of more than five thousand dollars during the recent strike. The audit does not take account of surplus earnings on the sinking fund, which amounts to about $10,000 for the half-year.

Victoria, B.C.—The tax rate this year will be 26.65 mills, an increase of 1.65 mills compared with last year. The rate is made up as follows:—General, 7 mills; payment of principal and interest, 10.75 mills; schools, 7 mills; board of health, 3 mills. Rates and taxes shall be due and payable on October 31st. On November 30th, 15 per cent. of the amount of the current year's taxes imposed and unpaid shall be added to the amount of such unpaid taxes, and taxes unpaid after December 31st shall bear interest at the rate of 8 per cent. per annum. At the meeting of the council held on July 21st, when these measures were passed, an effort was made by some of the aldermen to have improvements taxed, but the majority of the members were opposed to it.

Montreal, Que.—The city administrative commission expects to inaugurate a systematic classification of employees about January 1st. This will be done through a civil service commission, which would be permanent. It is expected that the plan will be complete in time for the 1920 budget late this year.

Hardly more than half of the realty proprietors paid their property tax to the city on time last year, while up to this date there still remains due to the city on real estate, balances amounting to $2,987,000. The total amount of the property tax for 1918 was $13,550,000; and on January 1, 1919, there was still due from this source $5,723,017. From January to July of this year, $2,473,736 was collected and during July, about $275,000. On January 1, taxes due the city for 1917 amounted to $1,160,167. Of this amount $620,000 has since been paid. Of the taxes due for 1916, there is still due $55,184; most of which represents litigations now before the courts. On May 1 last, 11,848 properties had been put on the list to be sold by the sheriff. Since then about 4,000 properties have been taken off that list; and when the date of sale of the balance comes due, it is not believed that more than 500 will remain to be sold.

Regina, Sask.—As a result of tax collections during the first half of the year, there is a sum of approximately $100,000 standing to the credit of the city's sinking fund waiting to be invested. It is expected that this money will be placed out at interest at the first favorable opportunity which presents itself. There is every likelihood that the sinking fund trustees will make application to the local government board for permission to invest about $53,000 in the city's own debentures. There is an issue of $53,000 five-year sidewalk debentures which matures in July, 1920. Although the money was authorized and expended in sidewalk construction, the debentures were not sold. In the meantime the necessary amount to retire the issue at maturity has been set aside in the sinking fund and some of the officials are of the opinion that the issue should be bought up by the sinking fund, though no offer has as yet been made to the sinking fund trustees by the city. With the exception of annuity bonds this is the only debenture issue falling due next year and provision will have to be made for the sale before that time. The period of maturity is now so short that it is not likely that an attempt would be made to dispose of them on the open market. Since the outbreak of the war there were two or three authorized issues for which debentures were not sold. These were for small amounts, and have been taken care of in other ways, and this sidewalk series is the only issue outstanding at the present time.

Over one hundred thousand dollars more in city taxes was collected in the month of June than during the first six months of 1918. The total amount of current taxes and arrears taken in by the officials of the assessor's department in June was $720,079, making a total of $786,726 for the first half of the year. Last year the officials took in over the counter in June the sum of $553,368, and during the first six months of 1918 a total of $614,746, or less than the collections for the month of June alone this year by $105,333. It is pointed out that the total for the first half of this year does not include about $33,000 of discounts and volunteer and reservists' exemptions allowed under the Act and civic by-laws. City officials point out that the total taxes collected during the first six months of this year is equivalent to 45 per cent. of the entire year's levy, which is very much in excess of the proportion collected during the first half of any previous year in the city's history. Another indication of the splendid manner in which the taxes are being paid early, is conveyed in the information that 1,500 more receipts were issued during the first six months of this year than during the corresponding period of 1917, and 500 more receipts than the same period of last year. The allocation of taxes collected during June is as follows:—

1915 arrears	$ 41
1917 arrears	368
1919 arrears	20,199
1919 taxes	697,973
Sundries	1,495
Total	$720,079
Collected January 1 to May 31	66,646
Total for first half of 1919	$786,726

Mr. Henry J. Tudhope, of Orillia, Ont., for the past twenty-seven years clerk and treasurer of Oro Township, died on August 6th.

The statement of the Commercial Union Assurance Co., Ltd., appearing in this issue, contains several errors which could not be corrected in time. It will appear next week with the necessary corrections made.

JULY BOND SALES

Unsettled Condition of Market Keeps Total of Municipal Sales Down—Many Industrial Issues

According to *The Monetary Times'* record, bond sales in July, 1919, amounted to $21,942,108, compared with $18,292,335 in June. The following is the summary:—

Municipal	$ 3,492,108
Corporation	8,450,000
Railroad	10,000,000
Total	$21,942,108

Many industrial issues were made last month totalling $8,450,000, and an issue of Canadian Northern Railway notes was made through Wm. A. Read and Co., New York.

According to *The Monetary Times'* records, industrial, public utility and railroad financing for the first seven months of the year, approximate over $51,000,000.

Although the total of municipal bond sales for July was the third highest this year, the unsettled condition of the market owing to the pending Dominion loan, kept it down, many municipalities declining to borrow. The total of $3,492,108 was made up chiefly of four sales—viz., Ottawa, $865,694; Halifax, $761,000; Montreal, $624,000; Saskatoon, $223,377. The following is the summary of municipal bond sales last month by provinces:—

Ontario	$1,307,681
Quebec	759,900
Manitoba	105,000
Saskatchewan	513,777
Alberta	44,750
Nova Scotia	761,000
Total	$3,492,108

The following table, compiled by *The Monetary Times*, shows the bank loans to municipalities since January, 1916. Although the seasonal increase is visible, there is a decline in the June figure of about $6,000,000, compared with the corresponding period last year:—

	1916.	1917.	1918.	1919.
January	$32,015,371	$24,487,272	$40,015,466	$32,640,198
February	35,149,915	26,121,324	43,535,628	36,830,183
March	38,649,462	29,877,911	50,652,061	41,993,305
April	44,371,050	35,931,996	55,685,350	47,911,199
May	43,924,036	39,700,191	57,728,226	50,356,227
June	46,773,032	42,757,673	58,000,424	52,349,353
July	42,385,096	43,989,207	56,589,173	....
August	39,882,811	43,940,176	56,662,931	....
September	38,708,745	42,721,563	47,977,472	.....
October	37,613,530	41,204,781	46,275,106	....
November	32,945,963	36,459,598	40,865,358	....

A Newspaper Devoted to Municipal Bonds

THERE is published in New York City a daily and weekly newspaper which has for over twenty-five years been devoted to municipal bonds. Bankers, bond dealers, investors and public officials consider it an authority in its field. Municipalities consider it the logical medium in which to announce bond offerings.

INVESTMENTS AND THE MARKET

Ontario Steel Product's Earnings Down—Marconi Capital May be Reduced—Davidson Gold Mines

Allied Packers of Canada, Ltd.—Supplementary letters patent have been issued, changing the name of the Allied Packers of Canada, Ltd., to that of the "Canadian Packing Co., Ltd." The Allied Packers of Canada was incorporated only about a month ago, representing the Canadian interests of the Allied Packers, Inc., of New York.

Marconi Wireless Telegraph Co. of Canada.—The annual general meeting will be held at the head office in Montreal on September 17th at 11 a.m. At this meeting shareholders will be asked to consider, and, if deemed advisable, ratify a by-law to reduce the capital stock of the company from $5,000,000 to $3,750,000 by reducing the par value of the outstanding stock from $5 to $2.50 per share and authorizing an additional issue of 500,000 shares of new stock at the lower par value.

North American Pulp and Paper.—The company and its subsidiary companies report for the year ended December 31st last sales and gross operating revenues of $4,268,367; cost of sales and operating expenses, $3,283,199; gross operating profit, $985,168; other income, $501,559; total income, $1,486,727; general expenses, $287,198; net income, $1,199,529; bond and other interest, $757,302; balance, $442,227; sinking fund, $261,730; balance, $180,497; amortization of bond discounted, etc., $142,492; surplus, $38,005.

The consolidated balance sheet of December 31st last shows cash in banks and on hand of $142,575; notes receivable, $71,681; accounts receivable, $465,109; inventories of supplies on hand, $991,955; notes payable, $874,878; accounts payable, $1,240,128; surplus subsidiary companies, $635,485; surplus North American Pulp and Paper Co., $502,002, and total assets and liabilities of $24,254,696.

Canada Iron Foundries, Ltd.—A special general meeting of the shareholders will be held at the company's office, in Montreal, August 29th, for the purpose of considering, and if deemed advisable:—

(a) Approving of a scheme for the redemption of all the presently outstanding "A" and "B" debenture stock;

(b) Approving and confirming By-law No. 22, enacted by the directors, decreasing the common capital stock of the company by the cancellation of 20,000 unissued common shares of the par value of $10 each;

(c) Approving and confirming By-law No 23, enacted by the directors, increasing the preference stock of the company by the creation of 200,000 new preference shares of the par value of $10 each; and

(d) Sanctioning By-law No. 24, enacted by the directors, authorizing the creation and issue of twenty-year first debenture stock of the aggregate par value of $1,000,000, bearing interest at the rate of 6 per centum per annum from the date of issue thereof.

Davidson Gold Mines.—A special general meeting of shareholders of the Davidson Gold Mines has been called for the 8th of August for the purpose of ratifying an agreement entered into by the directors for the sale of property and assets of this company to the Davidson Consolidated Gold Mines, Ltd., a company incorporated as a mining company with an authorized capital of $5,000,000. The agreement provides for the issue of shares by the Davidson Consolidated Gold Mines sufficient to distribute to shareholders of the Davidson Gold Mines one and one-third shares for each share of issued stock of the Davidson Gold Mines. In a letter to shareholders the president of the Davidson Gold Mines says that as a result of development at the property and the advice of competent engineers the management came to the conclusion that operations could be materially benefited by the acquisition of a substantial area of adjacent properties, which seem to be connected naturally with the Davidson property.

The Davidson Consolidated Gold Mines has made arrangements to provide $125,000 for treasury purposes, and has entered into an underwriting agreement covering 500,000 shares of its treasury stock at 75 cents a share to provide money for future requirements. It now proposes to Davidson Gold Mines, Ltd., to take over the property and assets of this company for a stock consideration sufficient to exchange with the issued stock of Davidson Gold Mines, Ltd., on a basis of one and one-third shares of stock in the Davidson Consolidated Gold Mines, Ltd., for each share of stock now held by the shareholders of the old Davidson company. Upon the approval of this proposition by the shareholders of Davidson Gold Mines, Ltd., the Davidson Consolidated company will have undertaken to issue, in all, $4,000,000 of fully-paid stock in consideration for:—

(a) The Davidson company's properties, which will absorb approximately $2,600,000 out of the said $4,000,000.

(b) The sum of $125,000 in cash.

(c) The adjoining properties above referred to, comprising about 300 acres.

This will leave $1,000,000 stock in the treasury, of which, as above stated, 500,000 shares will be underwritten at the rate of 75 cents a share.

Ontario Steel Products Co., Ltd.—The annual financial statement for the year ended June 30th shows lowered earnings as compared with the fine showing of 1918. Net profits amounted to $198,770 as against $208,107 in 1918 and $182,295 in 1917. After deducting bond interest of $36,000, preferred dividends, including arrears paid of $73,125 and sinking fund write-off of $12,000, surplus amounted to $77,645, as against $98,232 in 1918 and $60,420 in 1917. This, added to surplus carried forward from the previous balance at credit of profit and loss account, amounts to $359,374, compared with $281,729 in 1918 and $183,497 in 1917.

Profit and loss account compares as follows:—

	1919.	1918.	1917.
Net	$198,770	$208,107	$182,295
Bond interest	36,000	36,000	36,000
Preferred dividends	*73,125	61,875	61,875

DEBENTURES FOR SALE

CITY OF ST. BONIFACE

Notice to Holders of 5% Treasury Notes of the City of St. Boniface, Due July 2nd, 1920

Treasury Notes of the City of St. Boniface, Nos. 1 to 100 under By-law 1128, and Nos. 1 to 100 under By-law 1129, due 2nd day of July, 1920, will be redeemed at par and accrued interest if presented for payment at Toronto, Ont., Montreal, Que., or Winnipeg or St. Boniface, Man.

JOS. C. DUSSAULT,
Treasurer.

DEBENTURES FOR SALE

TOWNSHIP OF CHARLOTTENBURGH

Sealed Tenders will be received up to September 15th, noon, for $300,000.00 Township of Charlottenburgh Debentures in $1,000 denominations, with coupons attached, payable in twenty equal annual instalments; 5½% interest.

GEORGE A. WATSON,
Clerk.

Williamstown, Ontario, August 5th, 1919.

CONDENSED ADVERTISEMENTS

"Positions Wanted," 2c. per word; all other condensed advertisements, 4c. per word. Minimum charge for any condensed advertisement, 50c. per insertion. All condensed advertisements must conform to usual style. Condensed advertisements, on account of the very low rates charged for them, are payable in advance; 50 per cent extra if charged.

General Loan Agency Wanted

We desire a loan connection to cover Saskatchewan, either to broker mortgages or to place mortgages direct. Business established 1901. First-class loans placed total $1,400,000. Saskatchewan Head Office recently moved to Regina. Insurance department covers the Province with Agents in almost every good district. Loan applications to the end of the year will probably total $200,000 to $250,000. Correspondence invited with a view to permanent arrangement.

Canadian Liverpool Mortgage Corporation Limited

McCALLUM-HILL BUILDING, REGINA, SASKATCHEWAN

LIFE INSURANCE SALESMEN

Seeking to improve their positions, should get in touch with the undergsigned **The Continental Life's** business increased by over 50 per cent. during the first five months of this year, compared with 1918. This Company issues all the desirable forms of policies, and has attractive openings for good, live agents of sterling character. Every assistance given to new men. Apply at Head Office, stating experience and references, to

S. S. WEAVER, Agency Manager for Ontario

THE CONTINENTAL LIFE INSURANCE CO.
Head Office - - TORONTO, ONTARIO

DIVIDENDS AND NOTICES

BANK OF MONTREAL

Notice is hereby given that a Dividend of Three Per Cent. upon the paid-up Capital Stock of this Institution has been declared for the current quarter payable on and after Tuesday, the second day of September next, to Shareholders of record of 31st July, 1919.

By Order of the Board.
FREDERICK WILLIAMS-TAYLOR,
General Manager.

Montreal, 22nd July, 1919.

THE CANADIAN BANK OF COMMERCE

DIVIDEND No. 130

Notice is hereby given that a dividend of Three per cent. upon the capital stock of this Bank being at the rate of twelve per cent. per annum, has been declared for the quarter ending 31st August next, and that the same will be payable at the Bank and its Branches on and after Tuesday, 2nd September, 1919, to shareholders of record at the close of business on the 16th day of August, 1919.

By Order of the Board.
JOHN AIRD,
General Manager.

Toronto, 22nd July, 1919.

THE ROYAL BANK OF CANADA

DIVIDEND No. 128

Notice is hereby given that a Dividend of Three per cent. (being at the rate of twelve per cent. per annum) upon the paid-up capital stock of this bank has been declared for the current quarter, and will be payable at the bank and its branches on and after Tuesday, the second day of September next, to shareholders of record of 15th August.

By Order of the Board.
C. E. NEILL, General Manager.

Montreal, Que., July 15th, 1919.

Nay and James, well-known bond dealers and general financial brokers, will erect at once a business block at the corner of MacIntyre Street and Eleventh Avenue, Regina. It will cost about $25,000.

The London and Lancashire Life and General Assurance Association, Limited, of London, England,

offers excellent opportunities to young men desirous of permanently connecting themselves with a thoroughly reliable life company.

RECENT FIRES

Several Fair-Sized Fires This Week, But Total not Heavy—Losses at Sorel Shipbuilding Plant

Cobalt, Ont.—August 1—The sawmills owned by Clark and Francis were destroyed.

Donalda, Alta.—July 26—A large house and restaurant in the process of building, and drug store of C. B. Murphy, were destroyed.

Gatineau Point, Que.—August 2—Two stores, the post office and a residence were damaged. Estimated loss, $20,000.

Harold, Ont.—July 31—Barns and contents of G. Bailey and J. Cranston were destroyed. Estimated loss, $5,000, partly covered by insurance. Cause, from blower on thrashing outfit.

Halifax, N.S.—August 4—C. H. Mitchell's fish warehouse and adjoining property were damaged. Cause, boys playing with matches. Estimated loss, $15,000.

Moncton, N.B.—July 30—Barn of A. Cudmore, Caanan Station, was destroyed by lightning. Estimated loss, $3,000; insurance, $500.

Montreal, Que.—August 4—The malt storage warehouse of Molson's brewery, Notre Dame St. E., was damaged. Estimated loss, $10,000.

Ottawa, Ont.—August 5—Bush fires burning to the north and west of the city and in the Gatineau Valley are causing much damage.

Sault Ste. Marie, Ont.—July 31—Forest fires are continuing throughout the Algoma district. A large quantity of hay has been destroyed on the C.P.R. line. The fires are being fanned by a strong north-west wind and there is little prospect of abatement.

Toronto, Ont.—August 5—Automobile of A. F. Parke, 390 Palmerston Ave., was damaged. Estimated loss, $200.

Toronto, Ont.—August 5—Greenhouses of W. W. Tattle and Co., Walmer Rd., were damaged. Estimated loss, $10,000.

Toronto, Ont.—August 4—Dwellings at 4 Hamilton St. and 11 Munroe St. were damaged. Estimated loss, $800.

Torrybarn, N.B.—August 3—The lime kiln owned by the Provincial Lime Co., was destroyed.

ADDITIONAL INFORMATION CONCERNING FIRES

Sorel, Que.—July 23—The sawmill of the Leclaire Shipbuilding Co. was damaged. Estimated loss, $35,000. The following companies are interested to the amount of $94,600: Norwich Union, $5,000; General of Perth, $3,000; British Empire, $3,000; British Crown, $5,000; St. Paul, $5,000; Glens Falls, $4,350; Springfield, $2,500; Niagara, $4,500; Queensland, $4,350; British Dominions, $5,000; Royal, $5,000; Firemens of Newark $3,200; Guardian, $3,000; Atlas, $5,000; British Colonial, $1,200; Aetna, $4,000; North British and Mercantile, $6,000; National Union, $5,000; Globe and Rutgers, $5,750; London and Lancashire, $5,750; Nationale, $4,500; Fire Insurance Co. of Canada, $4,500.

STANDARD RELIANCE REORGANIZATION

The Standard Reliance Assets, Ltd., which will be the name of the company to be formed to take over and administer the assets of the defunct Standard Reliance Mortgage Corporation, will not carry on the business of a loan company. This and other points connected with the plan were explained at the meeting of creditors held in Toronto on August 6th. There were about 500 present in person, and delegates brought with them proxies from other depositors and debenture holders. Some of those present expressed a wish not only to limit the loss as much as possible, but to bring down the terrors of the law upon any who might be found guilty of misdemeanour in handling the affairs of the corporation. Curiosity was evinced as to why Toronto deposits were so low compared with those of the other centres in which branches were maintained. In answer to this the provisional liquidator, G. T. Clarkson, said that this was the normal condition, and Toronto creditors had not had an opportunity to withdraw their funds before the crash came.

Mr. Clarkson submitted, upon request, a list of stock holdings of the directors at the time of the failure as follows: R. H. Stevens, 40; R. H. Green, 80; D. Kemp, 20; S. G. McNally, 211; S. Ratz, 24; H. Waddington (dead), 125; Jas. Green (dead), 20; W. S. Mowett, 20; Rev. G. S. Taylor (dead), 21; John Firstbrook, 100; G. Grant, 20; F. C. L. Jones, 40.

NEW ISSUE FOR DONNACONA PAPER

It is definitely announced that Royal Securities Corporation, Ltd., has purchased $1,750,000 6 per cent. first mortgage sinking fund bonds, maturing 1940, of the Donnacona Paper Co., Ltd. The company's plant is located at Donnacona, Quebec, at the junction of the Jacques Cartier and St. Lawrence Rivers, between Montreal and Quebec city, thirty miles west of Quebec, on the provincial highway. The original financing of the Donnacona company was carried out some years ago by a group of American capitalists, including the late Geo. H. P. Gould, president of the Gould Paper Co., Utica, N.Y.; Chas. B. Rogers, of the First National Bank, Utica, and George McKee, the company's present manager. The original issue of $3,000,000 preferred and common shares were placed almost entirely with American investors.

Practically the whole of the Donnacona output of pulp and newsprint is exported direct to the United States, a large part of the requirements of the Hearst papers in New York City being supplied from the Donnacona mills. The company ranks amongst the largest Canadian producers of pulp and paper, its annual output of newsprint paper totalling 30,000 tons, in addition to which it produces 18,000 tons news sulphite pulp and 37,500 tons groundwood pulp.

The new financing is for the purpose of funding large expenditures made by the Donnacona company in plant extensions during the last few years, and also to supply working capital necessary for development.

Efficiency in the Selling of Life Insurance

The Man With the Rate Book a Factor in Increased Business—How Long will Present Growth Last—Experience Following Previous Wars—Contributing Causes

By M. P. LANGSTAFF, A.I.A., F.A.S.

ONE of the noteworthy pieces of recent insurance legislation has been the amendment of section No. 96, of the New York Insurance Act relative to the limitation of new business. This section, which was originally enacted to restrain the too rapid growth of the gigantic companies and to prevent them monopolizing the field of life insurance, reads as follows:—

"No domestic life insurance corporation, except a corporation more than one-half of the outstanding insurance of which on December thirty-first, nineteen hundred and five, consisted of industrial insurance, shall issue in any year new policies for a larger amount in the aggregate than as follows, to wit: If the total amount of the insurance by said corporation in force on the thirty-first day of December of the preceding year, including only policies upon which the first premiums have actually been received, is in excess of fifty million dollars, the amount of new insurance which may be issued shall be determined by the following percentages of said insurance in force, to wit: If said insurance in force is more than fifty million dollars and less than one hundred million dollars, not more than thirty per centum thereof; if more than one hundred million dollars and less than three hundred million dollars, not more than twenty-five per centum thereof; if more than three hundred million dollars but less than six hundred million dollars, not more than twenty per centum thereof; if more than six hundred million dollars but less than one thousand million dollars, not more than fifteen per centum thereof; and if said amount of insurance in force shall be in excess of one thousand million dollars, not more than one hundred and fifty million dollars of new insurance shall be issued; provided, however, that in the case of any corporation excepted as aforesaid the policies issued in any year, excluding industrial policies, shall not exceed in amount fifty per centum of the total amount of the outstanding insurance on the thirty-first day of December in the year next preceding, including only policies other than industrial policies upon which first premiums have been actually received, nor in any event more than the amount of one hundred and fifty million dollars."

So great and unparalleled, however, has been the inrush of new business during the current year among all companies, that it was early apparent that the majority of the companies of New York State would pass the limitations as prescribed by the Act, many months before the end of the year and the benefits of insurance be thus precluded to a large body of the insuring public, a result not within the intention of the Act. What is called the Towner amendment to the once bitterly controversial Section No. 96 of the New York Insurance Act was therefore passed without demur. It probably marks the first step—and, in our opinion, a wise step—in the restoration of the complete freedom of the life companies in regard to the amount of new business that may be written. This amendment, Section No. 96a, of the Act, provides that: "If during any calendar year, the Superintendent of Insurance shall be satisfied that insurance corporations, writing not less than fifty per centum of the amount of life insurance written by insurance companies authorized to do business within this State, will, in the normal course of their business, properly and economically conducted, reach the limits provided for in Section 96 of this Chapter before the end of such calendar year, the Superintendent of Insurance is authorized to suspend the said limitation for such calendar year as to any corporation making application for such suspension; provided, however, that in the case of any such suspension for any calendar year, the amount of insurance permitted to be written by such corporation for the next succeeding calendar year shall be determined upon the basis of the amount of insurance which would have been allowed under the provisions of Section 96 if there had been no such suspension of limitation under this Section, or shall be limited by the amount of insurance actually written during the year of such suspension, whichever amount is greater, and the limitation so determined for the said next succeeding calendar year shall be controlling unless a further order of suspension be granted for such calendar year under this Section."

How great the amount of new business has been may be gathered from the following citations and figures: The Insurance Monitor points out that "1919 will be the best year the life companies have ever known. New York companies in the first quarter of 1919 nearly doubled their 1918 figures." The Insurance Field states that "some agencies have written more business during the past quarter than they wrote in the whole year of 1918. . . . . Life insurance is being so easily written that agents are asking themselves how long it will last and when the 'slump' is to be expected." Actual figures are still more striking. Comparing the first quarter of 1919 with that of 1918, the Metropolitan Life shows a percentage of 224 per cent., the Northwestern Mutual 227 per cent., the Massachusetts Mutual 228 per cent., the Prudential 210 per cent., the Connecticut General 224 per cent., etc. Figures received from the Canadian companies show similar large increases. To what cause or causes can we ascribe this great influx of new business? There is, without a doubt, a variety of causes which we shall proceed to enumerate.

The Effect of the War

We think no factor had so marked an effect on the increased production of new business as the war. True, the influenza epidemic, in its transitory effect, was more marked and sensational in its influence, but it was the war with its contributory factors which produced the tremendous and apparently permanent upward swing in the curve of production. In the early period of the war market attention was directed towards life insurance by the various communities placing insurance on the lives of all their enlisted men. The individual soldiers, too, realizing the protection which life insurance and only life insurance could adequately furnish their dependants applied for insurance in large numbers. The policy loan feature, too, proved of particular value in those critical times, when so many investments were going badly and when so many families had to adapt themselves to a new standard of living. As the war progressed and casualties mounted up, the claims paid by the insurance companies carried at least financial reparation to many a stricken household and advertised the benefits and value of life insurance far and wide over the land. With the advent of the United States into the war came the collossal scheme of government insurance there, a scheme which placed some 4,250,000 policies aggregating over $36,250,000,000 insurance on the lives of soldiers and sailors and which popularized and advertised life insurance to the masses of the people in a truly wonderful degree. The government, in effect, put its imprimatur on the great business of life insurance.

Then the great domestic loans began. Beyond all institutions, the insurance companies were in the foreground with their subscriptions to these loans. As list after list was published, the insurance companies were seen to be diverting their insurance assets in this patriotic service, and rendering their countries untold benefit in successfully floating the huge war loans. Not only did they lend their assets, but their huge organizations of trained insurance salesmen gave up weeks of their valuable time in the able direction of the loan campaigns. But bread cast upon the waters was returned. The huge propaganda for thrift which these loans necessitated, inculcated in the people those qualities which are the very bone and gristle of life insurance—viz., habits of thrift and providence, and the reflex action has brought new floods of insurance to the life companies. Add to this fact that the war closed the avenues to, or smashed completely, speculative ventures and we have vast funds which had to be diverted into other and saner channels. Life insurance was one of these great channels. The war has indeed proved a permanent and far-reaching advertising medium for the business of life insurance. The work done by the life insurance companies during the critical time of the last few years has written a deep impression on the public mind.

The Influenza Epidemic

Turning to the effect of the influenza epidemic we find the second great contributory cause in the increase in new business. We said above that its effect was transitory. On reflection we withdraw this assertion. When we consider how this great scourge spread across the continents and almost decimated the population, throwing a strain upon the resources of the insurance companies the like of which they had never before experienced, and bringing before the public with an insistence not to be denied the uncertainty of life even among the young and most robust, can we wonder that virtually millions of the people blessed life insurance for its benefits, and became the exponents and self-constituted and permanent advertisers of its merits? The effect of the epidemic must indeed be permanent and far-reaching.

The Rise in the Cost of Living

The fall in the purchasing power of money has necessitated higher wages, and, though the greater proportion of such increased wages is used up in the higher costs of living, nevertheless, a greater margin, too, has remained to be diverted into savings and life insurance. · Then, no doubt, an appreciable proportion of the people regard insurance as a "good buy" in this period of unprecedented cheap money, reasoning that while the premiums are to be paid now, the benefits of insurance will be derived at a later period when money has risen in value. A consideration of the depreciated value of money leads us, however, into the admission that the increase in insurance is perhaps more apparent than real. It is a certainty that new and most powerful factors have come into play in connection with life insurance in this and other countries, and demand a far-reaching readjustment of all our ideas on the subject of the relativities of life insurance, both towards its own past and towards other businesses. The decreased purchasing power of money or "the new valuation of money," as it has been called, has cut in half the effective worth of the entire body of outstanding life insurance. The $5,000 policy of to-day, in real worth to the beneficiary, is only what the $2,500 policy was five years ago. A great part of the increased new business of to-day is the effort on the part of the insuring public to adjust its insurance holdings to the new requirements demanded by the depreciated value of money.

Greater Efficiency of the Insurance Salesman

But in any and all events we must admit that these great increases of business, whether real or only apparent, or partly both, could not be brought about except with the great and growing efficiency of the man with the rate book. The Man with the Iron Mask was the antithesis of our Man with the Rate Book. The one was seclusive, unsociable, retiring—whether compulsory or not, makes no difference. The other is a man of the active world, sociable, pleasing, enterprising. He is to be found in every rank of society, charming his fellowmen by his convincing and seductive arguments and bringing to every nook and corner of our life the benefits and blessings of life insurance. He is daily becoming more recognized at his true, high value, for he is no narrow, dyed-in-the-wool opinionist, but in conventions with his fellow workers gathers new ideas and increased impetus towards the better and fuller performance of his duties. The Man with the Rate Book follows one of the highest professions in our land.

Experience of American Civil War

In conclusion, what prediction can we make as to the continuance of the present flow of new business? Probably the history of the progress of life insurance in this continent following the American Civil War may give us an indication of what we may reasonably expect for the years subsequent to the great war. So far the relative progress has been strikingly parallel. From a pamphlet before me dealing with the business in United States and giving the figures in each case, starting with the year before the war, we have the following:—

Year.	New life insurance.		Year.
1860	$ 35,589,934	$2,549,816,531	 1913
1861	24,978,444	2,456,548,936	 1914
1862	43,471,429	2,621,013,624	 1915
1863	89,812,093	3,213,091,791	 1916
1864	155,803,897	4,000,000,000	 1917

Year.	Increase in new insurance.		Year.
1861	$ 10,611,490	$ 93,267,595	 1914
1862	18,492,985	165,464,688	 1915
1863	46,340,664	592,078,167	 1916
1864	65,991,804	800,000,000	 1917

For several years following the civil war, business continued to come in at an accelerated rate. Consequently, if the parallel continues to be maintained, we shall see an unprecedented amount of new business written in this continent during the next few years. The trend in the cost of living, however, will be one of the great factors which will determine this. This trend is influenced by so many factors, such as monetary inflation, gold supply, tariffs, production and consumption, etc., that it is well-nigh impossible to prophesy accurately its true course in the future. But opinion among economists seems to be that the trend will be upwards for some considerable time. In that event we can most assuredly look for a maintenance of new business production. And to quote again from the leaflet before me: "As Professor S. N. Patten, the distinguished economist, recently observed, this makes for security and increased happiness. In the light of existing events, it is doubtful if any other agency of civilization is doing as much as life insurance to increase human happiness; it is the practical, every-day accomplishment of homes saved, families fed and clothed, children educated, old-age made comfortable and care-free, business enterprises saved from disaster, and financial emergencies of all kinds met and provided for."

Union of Canadian Municipalities' Convention

Urges Provinces to Establish Departments of Municipal Affairs—Union may be Re-organized—Attendance not Large—Relation to the Cost of Living Problem

MUNICIPAL delegates to the number of less than one hundred met in Kingston, Ont., on August 12th to 14th at the annual meeting of the Union of Canadian Municipalities. Only a few delegates were present from the west, for which the unfavorable crop conditions are in part responsible. Included among those present, however, were J. N. Bayne, representing the Saskatchewan Department of Municipal Affairs; John Perrie, Deputy Minister of Municipal Affairs in Alberta, and Oscar Morin, Deputy Minister of Municipal Affairs for Quebec. These are the only provinces which thus far have established such departments.

After an official welcome from Mayor Newman, of Kingston, the president, Mayor Bouchard, of St. Hyacinthe, Que., delivered his address, referring especially to the change in the outlook since the last convention. The financial statement, and the report of the parliamentary agent, were also presented. The latter dealt principally with the Consolidated Railway Act, which has just been passed by parliament after having been postponed for several sessions. The amendment inserted by the senate, however, meets with strong objection on the part of the municipalities, who regard it as a recognition of "vested rights," as instanced in the case of the Toronto and Niagara Power Co.

The report of the honorary secretary-treasurer, W. D. Lighthall, K.C., who has just resigned, gave a resumé of the work of the Union. He said in part:—

"In 1900, the Montreal Light, Heat and Power Company had just merged all the first electric companies of greater Montreal and had obtained from the legislature of Quebec, against the strenuous protests of the citizens, including that of Westmount, of which I was then mayor, a new charter empowering it to enter upon, place its poles and wires along, and tear up, any street or highway in that large district—the most populous in Canada—without the consent of any municipal authority. Local circumstances threw me into the hottest of the fight and, after the charter had been obtained, I and others, saw the triumph of money and political trickery over honesty and popular right a precedent without limit in its evil presage for Canadian life and character. If money and wrong were inevitably to succeed, it was clear that all our commercial and public life would sink into a fostering bog of corruption. It was equally clear that if the public could not preserve these rights, there was a sure end to our liberties, for all their rights could be similarly taken from them and sold for money. The cynical example to our young men that honesty was not the successful policy was one of the most dangerous aspects. Moreover, the triumph of corrupt money was not even good for property in general. It was inaugurating an unlimited reign of plunder, taxes, high costs, and 'gatemoney.' And it would with logical certainty lead to what is now called Bolshevism, unless the forces of right and order could meanwhile find a remedy.

Origin of the Union

"The Union of Canadian Municipalities was the remedy which then occurred to me. My friend Howland took up my call and, as mayor of Toronto, convened the Convention of 1901 in that central city, he becoming the first president, and I the first honorary secretary.

"In Toronto, and other Ontario places, the charter of the Bell Telephone Company was occasioning similar contests concerning streets and highways; although it must be said for that company that it had obtained its charter quite honestly in days before the future scope of electric enterprises could be known. In due time a reasonable view of vested rights corrected its excessive powers.

"The second thing I was to say is that the Union is a great power in the state. And this, notwithstanding certain limitations. After fighting for the insertion of municipal protective clauses in various single characters—such as attempts to obtain for nothing all the water powers in the west, powers over all the streets in Canada, and we framed, and obtained the adoption of the well-known standard municipal clauses. For years they have been automatically inserted at Ottawa in all electric company bills and others similar. We also took a chief part in the act establishing the Dominion Railway Board. In battling for our principles we ran up against the most powerful and persistent combinations in the country and downed them by sheer force of right. Incidentally we demonstrated the creditable and hopeful fact that the bulk of our policemen are honest and faithful to their trust, and not boodlers as is so often superficially contended.

"In the protection of the rights of the people the question of rates charged by railways, street railways, telephone, telegraph, power and light companies were necessarily prominent. These all partake of the nature of monopolies, either absolute or virtual. That fact shapes certain principles for which we fought, and these I ultimately put into the following form as fundamental and permanent stands to be taken:—

"1.. The Canadian people shall not be ruled by any irresponsible monopoly.

"2.. They shall not submit to methods of fraud or corruption.

"3. There shall be no perpetual franchises.

"4. Our heritage of natural resources affecting municipalities must not be sold, but leased, if not publicly operated.

"5. One generation cannot legislate away the rights of another.

"6. Municipalities must control their streets.

"7. Each Canadian shall have a fair deal from all who are granted corporate or other public privileges.

"8. Some court or council must always exist free and equipped to enforce the fair deal.

"9. The life of the poorest citizen must be made worth living, through his share of the best civic conditions and services.

Will Attempt to Control Prices

"The third thing I want to say is that we are now at the beginning of a vastly important struggle which is connected with the foregoing principles Control of all the essential necessities of life—bread, meat, oil, shoes, rubbers, textiles, have recently passed into the hands of mergers which are virtual monopolies. By the nature of monopoly the monopolist fixes his price. The era of the laws of supply and demand has thus passed away. The people will not obtain the fair deal unless these irresponsible monopolies are absolutely controlled. In bringing about such control—in which process I believe a series of special tribunals like the Railway Commission are necessary—it is the duty of municipal men to take a leading part.

"The fourth thing I wish to say is that fighting has not been our sole aim, but rather we have principally sought to confer together for improvements in all that concerns the happiness of our communities. When we visit the cities and towns of both east and west, the results of the Union's past work in pressing for parks here, incinerators there, and vast systems such as the government telephones of the three prairie provinces, testify to the imprint we have been able to make by thus standing together. We are indebted for much light on these things to the municipal men, and Unions of the United States, as well as to those of Great Britain, with whom we have kept up a constant contact.

"The fifth thing I wish to say is that municipal office is a great privilege, a great opportunity for service, a dignified and most important part of the Dominion's system of government. Not only so in itself, but in this and our Provincial Unions, the humblest holder of office in the smallest rural municipality will find that he has an opportunity outside his local circle, to help forward and upward the whole national life—be it only by faithful attention to a part of the work of his Union, or by some loyal and inspiring word fitly spoken at the convention. And I have taken some personal satisfaction at times in feeling that this Union has enabled me to help at introducing far more beneficient legislation into parliament, and to contribute far more to the establishment of beneficent institutions like—rural telephone systems, hydro-electrics, parks, playgrounds and so forth, than at least nine-tenths of our members of parliament.

"The sixth thing I want to say is: **Do not let this union** die. It will always be needed. Even were it to fall to pieces temporarily, it would have to be recreated, because the needs for which it has existed will continue. Appoint a small special committee to consider its future. Find an energetic and zealous secretary, knowing Canada well and if possible speaking French. Let him study the methods devised out of our experiences of the past twenty years, and improve on them if he can. Form some good financial plan which may afford a permanent and adequate support to the institution, which it has lacked in the past. Bring the permanent officials into our councils. Make the Union thus a permanency in place of an interesting makeshift. It will then have a more regular place and a still more powerful influence."

The delegates were also addressed by Professor O. D. Skelton, of Queen's University; while probably the universities had been out of touch with practical affairs in the past, he said, he felt sure they would in the future support organizations such as the Union, in efforts for better government. A paper describing the work of the Nova Scotia Union of Municipalities was read by its secretary, A. Roberts, K.C., as an instance of the value of provincial unions.

Descriptions of the powers and methods of operation of the provincial departments of municipal affairs were given by the three representatives mentioned above. Emphasis was laid upon the fact that the aim was not to restrict municipal autonomy, but rather to guide municipalities and keep them within the bounds of the law.

On Wednesday the attention of the delegates was called to the subject of undeveloped water powers, an address being given by A. Amos, chief engineer of the Hydraulic Service, province of Quebec. The convention also became absorbed in a discussion of the high cost of living, which brought forth pronounced difference of opinion, and threatened to displace subjects of more immediate interest to municipal representatives. Finally, the following resolution was passed:—

"Whereas the investigations of the Committee of the House of Commons has adequately proven popular allegation that profiteering existed in the handling of the necessities of life:—

"Be it resolved that the U.C.M., speaking for the citizens of their communities, urge that the greatest efforts be made to solve this pressing question of the high cost of living without delay in view of the great hardships resulting to the common people and the bitter and dangerous feelings in evidence towards classes and individuals thought to be responsible for the same;

"That the machinery provided for investigation by municipalities is cumbersome and unworkable and further, that, in the opinion of this convention such investigations should be at the cost of the federal government; and

"Further that the government should see that the new Commerce Court, or some other body properly constituted and with an adequate supply of funds, should properly investigate the cost and profits in the case of all necessaries of life without any delay, and where profiteering is found, adequate means should be provided for the prosecution and punishment of those responsible;

"Further this convention demands that the statements recently made by Dr. McFall, if true, should be followed by immediate action on the part of the government."

Resolutions Passed

The following resolutions were passed by the convention at its closing session on Thursday morning:—

1. "Whereas a certain number of provincial parliaments amongst which the legislatures of the provinces of Quebec, Nova Scotia, Manitoba, Alberta and Saskatchewan have abolished the rights of any municipality to subsidize industries by cash bonuses, or by-law grants. Whereas money levied by taxes should be applied for the administration of municipal affairs and not for the promotion of private corporations or the supplying of capital to individuals for private pursuits;

"Whereas the practice of subsidizing industries by grants of money, land or exemption from taxes or otherwise is against this principle and has given rise in no few instances to abuses;

"Whereas there are still some provinces allowing this practice within their limits;

"Whereas this practice should be abolished in every province;

"Be it resolved that the Union of Canadian Municipalities goes on record against any law allowing municipal councils to derive municipal funds or credits from their natural ends in subsidizing industries; and it is further resolved that any provincial governments where this practice has not already been stopped should be prayed to enact the necessary restrictive laws to that end as soon as possible and that copies of this resolution should be addressed to the proper officials of all the provincial governments of Canada."

It was also moved that:—

2. "Whereas statistics show that during the past few years the withdrawal of several millions of men from ordinary pursuits has seriously reduced the production of life's necessities;

"And whereas the drift of thousands of men from rural to urban communities has also minimized the volume of farm and dairy products;

"And whereas the tendency of this age seems to be to satiate the appetite for luxuries regardless of cost;

"Be it resolved that this convention urge public persons in all responsible positions, the press and other moulders of opinion to try to educate citizens to produce more of every needed commodity in order to overcome a critical economic defect, also to promote the spirit of frugality and thrift."

3. "That the executive be authorized to make such rearrangement of paid officers of the Union as it may think advisable, having regard to the finances of the Union;

"That Mr. Lighthall be requested to continue in office as secretary until his successor is appointed by the executive.

"That the convention strongly condemns the practice of loading down our public utilities with worthless securities in the nature of common or bonus stock and recommends that securities on such utilities be confined to first mortgage bonds on which an attractive interest return should be allowed."

4. "That the Union of Canadian Municipalities respectfully petition the provincial governments recommending that a uniform system of municipal accounting be established and adopted by all municipalities in their respected provinces."

5. "That the annual convention be held alternately in the west and the east, the division lines being the Ontario and Manitoba boundaries; the place of meeting for 1920 to be left for the executive."

6. "That the constitution be amended by striking out Section 8 and substituting the following section therefor:—

"Section 8. The officers of the Union shall be a president, first, second and third vice-president (so as to provide representation for the Central, Maritime and Western provinces) and five members of the executive committee for each province, three of whom shall be elected annually at the annual convention and two of which shall be the president and secretary, for the time being, of each provincial union, and a secretary-treasurer is to be elected at the annual convention."

CO-OPERATON OF CANADIAN MUNCIPALITIES

WHILE municipal affairs are essentially of provincial interest, problems throughout Canada are similar, and municipal legislation of most of the provinces does not differ fundamentally, so that subjects of common interest can profitably be discussed by municipal representatives. The 1919 convention of the Union of Canadian municipalities, held this week in Kingston, Ontario, was therefore a somewhat disappointing affair, because municipal issues were sidetracked by topics not of special interest to the institutions represented. An account will be found elsewhere in this issue. The discussion of the high cost of living was a particularly unsatisfactory part of the meeting. Another unfortunate incident was the introduction of a resolution asking that the government, in view of the destruction of the Port Colborne elevator, should consider reopening one in Kingston, now standing idle. These and other similar problems are national in scope, and even if they could be intelligently discussed by municipal delegates, it is certain that the conclusions reached would not carry much weight. The resolutions actually carried, however, mainly concerned municipal questions.

The proposal that the Union should be reorganized should be taken up and carefully worked out. Until a constructive program is developed, municipalities cannot be expected to send delegates, and until the Union convention becomes really representative, it will not carry much weight. Municipal officers change frequently, and in almost every case the work is merely a side issue, so the real work of the Union must be done by permanent officers, who can carry on a continuous program, adjusting it to new conditions from year to year by means of resolutions submitted for the approval of the delegates.

The Dominion convention should therefore be a purely business meeting, while those of the various provincial organizations can be left more open for the initiation of new questions. Canada is spread over too wide a territory in proportion to the population to permit of such a general convention, on any particular subject, to be successful. A number of other organizations are finding the same difficulty, and seeking a practical solution by developing the local meetings, confining the national one to a conference of business executives. It is particularly easy for the municipal Union to find a solution in this way, because there are so many topics of interest only to the members within one province.

The 1919 conference was particularly short in financial topics, and this is at the present time the one thing of outstanding interest to them. There is no other organization to take up assessments, tax rates, etc., and broad comparisons of the different provincial systems could be profitably made. The federal government housing program was not even mentioned. It is important that municipalities at the present time should proceed carefully in the public works, for the present high costs would impose a great burden upon it in the way of capital charges upon future years. Nothing was said about the organization of fairs, boards of trade and other organizations for municipal development, while much time was lost on subjects from which no profitable conclusion could result.

The value of a nation-wide organization of municipalities is undoubted. Occasionally there are questions, such as that of repatriation, concerning which the Dominion government desires to communicate direct, and in such cases the organization is very useful. It has been suggested that an officer should be appointed to form a connecting link between the Dominion government and the municipalities, but, as communications of this kind are only occasional, it is probable that the heads of the organization will be sufficient for this purpose. An active bureau of information should be operated by the organization, and this one phase of its activities would require the continuous attention of a permanent officer.

LINING UP THE LOW TARIFF FORCES

By including tariff reduction as the principal plank in its platform the Liberal party has created an organization which can reasonably be expected to exert a powerful influence in Canada's political life during the next few years, even if it does not secure control of the reins of government. There is no doubt but that the tariff is at present the principal question in Canadian politics, and on this point at least the agriculturists are in complete accord. Quebec is unquestionably Liberal; and just what success may be attained in manufacturing centres by pledges of efforts to bring about lower living costs, cannot be determined at present. The heads of the party are moderates, however, including the leader, Mr. W. L. Mackenzie King, and if the Liberals were faced with the problem of administering our distended national finances, it is altogether likely that the experience of 1896 would, in some degree, be repeated.

The relation of the tariff to our present industrial life should be thoroughly impressed upon all concerned, especially those in large manufacturing centres, lest, in the heat of radicalism, measures should be adopted which would be disastrous to many of our industries. Manufacturers have lost much and gained nothing by maintaining that protection of some commodities was not essential, and that Canadian manufacturers could compete with the world. Most of our industrial leaders admit that this is not so. But protection has a broader and firmer basis, in the fact that a well-balanced economic system has weighty advantages, political as well as economic. The war which has just ended has stimulated the view that commercial policy must be weighted by considerations of internal and external politics.

These developments have an immediate and substantial bearing in the investment field. While the earnings of our great transportation and public service enterprises are indirectly affected by such changes as are brought about by tariff revision, the profits of manufacturing enterprises are directly concerned. Provided that tariff reduction remains a potential reform in the Liberal program, the market value of the securities of industrial concerns will vary with each change in the political outlook.

LIFE INSURANCE AND INDUSTRIAL PROGRESS

The personal and domestic advantages of life insurance protection have been the arguments invariably advanced to prospective insurers, coupled with emphasis upon the investment and savings features in the case of those not immediately in need of the indemnity. By driving home still further the latter point, an appreciable benefit can be conferred on the nation. For the vast accumulations of the life insurance companies represent almost entirely regular savings of an immense number of people in all walks of life. Apart from the indemnity feature the life company is a great investing institution, like the loan company, which, through its superior skill and organization, can pay expenses and still handle funds to better advantage than can the ordinary individual. The paid-up value of a life policy represents a claim upon assets, varied in character but high grade in quality, spread over the entire field of a company's operations and therefore protected against the set backs to which localities are subject.

Life agents have good reason to be proud of the records established during the past year, and not only have these records brought higher financial remuneration, but underwriters have also the satisfaction of knowing that each policy issued is an additional influence for stability. The further linking up of policyholders with the constructive side of economic life will react to the benefit of life insurance as an institution.

British Columbia's salmon pack for 1919 is estimated at one and one-quarter million cases, or four hundred thousand less than last year. This reduction is partly due to natural reasons and partly to a prodigal policy in the past. The fisheries have been one of the province's most dependable industries, and it would do well to guard those natural resources which give it special advantages rather than waste money in efforts to promote industries for which it is not favorably equipped.

NEW MONTREAL INVESTMENT FIRM

The new financial and investment firm of Balfour, White and Co., has leased the entire fourth floor of the Yorkshire Building, St. James Street, Montreal, Que., and will shortly open their offices for the transaction of public business.

TRADE PROSPECTS IN NEWFOUNDLAND

Addressing the Kiwanis Club at Montreal several days ago, Chas. O'Neil Conroy, K.C., of Newfoundland, stated that there was unquestionably a good opening for Canadian trade with Newfoundland. In the course of his remarks he said:—

"Newfoundland is the fifth largest island in the world. It is a country rich in all sorts of natural resources, in addition to its fisheries, but so far the population is mainly scattered along the coast line, the only town of any consequence inland being Grand Falls, where Lord Northcliffe's pulp and paper works are established.

"The main inland industry is with the lumber and pulp production, agriculture as yet having been little practised. Manufacturing had grown to a good extent in the coast towns, chiefly in connection with the lumber and fishing industries. During the past ten years, he said, the trade of the island had developed greatly, exports having more than doubled and imports tripled, which, even allowing for wartime advances in values, meant a great growth in trade. But last year the exports to Canada were $2,750,000, and to the United States over $7,000,000, with a similar disparity in imports to the advantage of the United States.

"That is a condition that should be rectified," said Mr. Conroy, "and I hope the Canadian business men will send trade experts to Newfoundland to take advantage of the opportunities for business there between the two dominions."

CANADA AND ENGLAND TO PROMOTE TRADE

An agreement has been reached between the Canadian Manufacturers' Association and the Federation of British Industries for the promotion of trade between the mother country and Canada. The C.M.A. will keep the federation informed as to supplies of raw material required by Britain which exists in Canada; the requirements of Canadian markets, including goods now supplied by the United States, and the standing of Canadian firms. In return the federation will supply the C.M.A. with names of British firms desirous of purchasing raw materials in Canada and firms desirous of supplying the needs of the Canadian market.

ACCOMMODATION FOR POLICYHOLDERS

One of the features of the new head office building of the Sun Life Assurance Company of Canada on Dominion Square in Montreal is a visitor's room. Policyholders from distant parts make use of this room as headquarters for the receipt of mail, telephone calls, etc. The Sun Life decided to devote one of the rooms in the very fine head office building for the use of visiting policyholders, the rapid development of the company's international connections showing the desirability of having accommodation for this purpose.

PRELIMINARY ESTIMATE OF CANADIAN CROP

Yield of 28¾ Bushels Fall Wheat Per Acre—Outside of Western Canada, Reports are Fair or Good

THE Dominion Bureau of Statistics issued on August 14th the following report as compiled from the returns of crop correspondents at the end of July. This is, therefore, more recent than the summary appearing on page 26 of this issue:—

The preliminary estimate of the yield per acre of fall wheat for Canada is 28¾ bushels, as compared with 19 bushels last year, and with 22½ bushels, the decennial average for the years 1909-1918. The yield per acre for 1919 is, therefore, the highest average on record, the previous record being 28½ bushels in 1915. Upon the harvested area of 797,750 acres the total yield is 22,875,800 bushels, as compared with 7,942,800 bushels last year and with 29,320,600 bushels, the record fall wheat yield of 1915. In Ontario, where the bulk of the fall wheat crop is produced, the total yield for 1919 is 21,762,000 bushels from 744,000 acres, an average yield per acre of 29¼ bushels. Last year the Ontario yield was only 7,054,800 bushels from 362,616 acres, an average per acre of 19½ bushels. The total yield of hay and clover in Canada is estimated at 17,408,800 tons from 10,662,870 acres, an average per acre of 1.63 ton. The total yield is the highest on record, and compares with last year's record yield of 14,772,300 tons. Of alfalfa, the total yield is 290,300 tons as against 446,400 tons last year.

Field Crops Other Than Wheat

In consequence of continued drought the condition of grain crops in Saskatchewan and Alberta at the end of July was worse by from 8 to 10 points than at the end of June. Thus the condition of wheat in Saskatchewan on July 31st was 73 per cent. of the decennial average as against 91 per cent. on June 30th. In Alberta the July percentage for wheat was 70 as compared with 80 in June. In Manitoba spring wheat, owing to a general outbreak of rust, has deteriorated by 8 points; so that the condition is expressed by 92 per cent., or 8 below average as compared with 100, or the promise of an average yield, a month ago. In the maritime provinces conditions continue favorable, the percentage for wheat being 103 in Prince Edward Island, 101 in Nova Scotia, and 96 in New Brunswick. In Quebec the condition of a month ago has been maintained or even improved wheat being 98 for both months, and oats being 102 for July as against 99 for June. In Ontario spring wheat is 85 in July as against 87 in June, and oats are 80 as against 85. For the whole of Canada the condition of the principal field crops on July 31st, in percentage of the decennial average is as follows, the corresponding percentage for July 31st, 1918, being given within brackets:—Spring wheat, 77 (77); oats, 81 (85); barley, 85 (86); rye, 88 (83); peas, 92 (101); beans, 95 (95); buckwheat, 94 (93); mixed grains, 89 (101); flax, 74 (71); corn for husking, 89 (86); potatoes, 88 (95); turnips, etc., 88, (96); fodder corn, 93, (85); sugar beets, 84 (92); pasture, 93 (92). The figures, including the preliminary estimate of fall wheat, expressing condition, indicate a total yield for Canada of 248½ million bushels of wheat, 405,819,000 bushels of oats, 67,656,000 bushels of barley, and 8,172,000 bushels of flax. For the three prairie provinces the yield indicated by condition is for wheat, 213,260,700 bushels; for oats, 258,354,500 bushels, for barley, 47,815,500 bushels, and for flax, 7,882,100 bushels.

Latest Reports from the West

A communication received from the Manitoba Department of Agriculture, dated August 7th, states that the harvest began this year almost unprecedentedly early. There has been no frost, and the damage from hail is slight; but rust is very prevalent in all grains, and this, together with the heat, has reduced the yield very greatly. The rough estimates of correspondents as to the wheat yield average about 15½ bushels per acre. Almost everywhere there is enough straw, with a very generous supply on the average. The Saskatchewan Department of Agriculture telegraphs (August 11th): "Seventy-five per cent. of wheat and 25 per cent. early sown oats cut. Thrashing will start next week. Good rains reported in some parts of the province, which will benefit the late-sown oats and flax, and also relieve the feed situation." The report of the Alberta Department of Agriculture at the end of July indicated satisfactory conditions in the Peace River district, a failure of the grain crop over a considerable portion of southern Alberta, and a marked improvement in Central Alberta, due to a general rain, which broke the drought immediately after the middle of July.

UNION OF CANADIAN MUNICIPALITIES' CONVENTION

(Continued from page 8.)

Election of Officers

The officers elected for the year 1919-20 are: H. Fisher, mayor, Ottawa, Ont., president; A. Roberts, K.C., Bridgewater, N.S., 1st vice-president; C. H. Grant, alderman, Edmonton, Alta.; 2nd vice-president, H. W. Newman, mayor, Kingston, Ont., 3rd vice-president. W. D. Lightall, K.C., was re-elected honorary secretary-treasurer, and G. S. Wilson, assistant secretary.

The following members of the executive were elected as representatives of the provinces, some of which were not sufficiently represented at the convention to make such election possible:—

Ontario.—C. W. McCrea, treasurer, Sault Ste. Marie; J. M. Elson, mayor, St. Catharines; and a representative to be appointed from Toronto.

British Columbia.—Mayor Gale, Vancouver; Reeve T. W. Fletcher, Port Grey; and Mayor S. A. Shatford, Vernon.

Nova Scotia.—Hiram Goodey, Yarmouth; Warden W. G. Clarke, Annapolis; Mayor A. C. MacCormick, Sydney Mines.

Quebec.—Mayor Thurber, Longueuil; Alderman C. Rondeau, Westmount; Alderman P. H. Bedard, Quebec.

Alberta.—Fred Freeman, Lethbridge; Alderman W. F. Adams, Calgary; Alderman H. M. Martin, Edmonton.

The following delegates were appointed to represent the Union of Canadian Municipalities at the Industrial Congress to be held in Ottawa in September: E. D. Bouchard, mayor of St. Hyacinthe, Que.; C. H. Grant, alderman, Edmonton, Alta.; A Roberts, K.C., secretary of Union of Nova Scotia Municipalities, Bridgewater, N.S.

The selection of the meeting place for next year rests with the executive.

WANT TO INVEST RAILWAY MONEY

Permission to invest $139,360.92 in five-year Dominion government bonds was temporarily withheld from a number of Ontario municipalities by the Ontario Railway and Municipal Board this week. Mayor Wigle, of Goderich, appeared before the board, supporting a resolution passed by these municipalities to invest money in government bonds which had been derived from the sale of the defunct Ontario West Shore Railway. Mr. Gilday, of Proudfoot, Grant, Duncan and Gilday, appeared on behalf of the trustee, Mr. Thomas Stothers, requesting that the money be left with the Toronto General Trusts Corporation to invest, and promising that there would be no brokerage fees in connection therewith. An interest rate of 5½ per cent. was promised.

Chairman D. M. McIntyre believed that the municipalities had not reckoned on the brokerage charges, and withheld consent until such costs would be laid before a joint meeting of the municipalities interested.

At a meeting of the executive of the maritime branch of the Canadian Manufacturers' Association, held in Moncton, N.B., on July 30th, with President Angus McLean, of Bathurst, in the chair, H. R. Thompson, secretary, was appointed to attend the big trade conference in Calgary next month. It was decided to take up with the provincial governments the question of having next year a maritime trade conference and tour similar to that being held in Calgary.

INVESTMENTS AND THE MARKET

Frontenac Breweries Increasing Capital—Peabody Corporation Enlarging

Toronto Street Railway Co.—According to the monthly returns of the city auditor's department, the earnings of the Toronto Railway Co. for July show a decrease in comparison with July of last year. The total revenue for the month is given as $534,411.60 as compared with $540,296.15 for July, 1918. The city's share of last month's earnings will be $106,882.32.

United Hotels Co. of America.—The statement has been made that plans are being prepared for the erection of additions to the King Edward Hotel, Toronto, on the present site of the John Catto Co.'s building, King Street East, and when completed will be able to accommodate over 500 more people. The hotel will be fifteen stories high, and the total cost will be approximately $2,000,000.

Alberta Flour Mills, Ltd.—The company has under erection in Calgary, Alta, an eight-story mill, which, when completed, will have a capacity of 6,000 barrels per day. It is expected that an offering of stock will be made this fall.

The total amount of the common stock is $2,500,000. Of this, $1,000,000 has already been sold in Alberta, and it is expected that the entire balance will be sold in the west. It is not proposed to offer any in Eastern Canada or the United States. In addition to the common stock, arrangements have already been made to place bonds in Britain to the amount of $2,500,000. The stock will be offered at par.

International Safe and Register Co., Ltd.—An offering is being made by Mr. D. R. McLellan, Bank of Hamilton Building, Toronto, of the unsold balance of a $20,000 issue of 6 per cent. convertible bond notes, dated September 1st, 1918, due September 1st, 1923, in denominations of $500 and $100. The price is 94, yielding 7.76 per cent. The International Safe and Register Co., Ltd., of Fort Erie, Ont., was incorporated under the laws of Ontario, June 11th, 1914, having a capitalization of $100,000, $61,000 of which has been issued. Every employee is compelled to hold some of the stock of the company, thereby eliminating all labor trouble and adding to the attractiveness of the company's stock and bonds.

Peabody Overall Corporation.—Announcement has been made by Industrial Commissioner F. Maclure Sclanders, of the Border Chamber of Commerce, that the corporation will spend $500,000 to enlarge its plant at Walkerville, and when the improvements are finished it will be the only concern in the British Empire making the finished product from the raw cotton.

It is estimated the additions to the plant will increase the output of the Peabody corporation from 2,000,000 to 4,000,000 yards of blue denim cloth a year, which output will be distributed throughout Canada, the United States and most European countries by 6,000 agents of the Peabody corporation.

Canada Iron Foundries, Ltd.—A special general meeting of the shareholders of the company will be held at the company's offices, Montreal, on Friday, August 29th next. The shareholders will be asked to approve of a scheme providing for the redemption of all the outstanding "A" and "B" debenture stock, and to confirm a by-law enacted by the directors decreasing the common stock of the company by the cancellation of 20,000 unissued shares of the par value of $10 each.

Confirmation will also be asked of a by-law increasing the preference stock of the enterprise by the creation of 200,000 new preference shares with a par value of $10 each and the sanctioning of the issue of twenty-year first debenture stock of the aggregate par value of $1,000,000, bearing interest at the rate of 6 per cent.

Nova Scotia Tramways and Power Co.—The earnings of the company have been showing steady increases since the beginning of the current fiscal year. In the first five months of 1919 the company earned the full interest on its recent issue of $1,000,000 7 per cent 3-year coupon gold notes and still had a surplus of $20,000.

The statement for the five months shows as follows:—

Gross earnings	$538,565
Operating expense	359,229
	$179,336
Interest and taxes	89,129
Net earnings	$ 90,207
Same period, 1918	63,718
Increase	$ 26,489

Sarnia Realty Co.—The liquidator, Osler Wade, has forwarded a cheque of 10 cents on the $1 to shareholders, bringing the aggregate amount of interim dividends to date to 50 cents. Further dividends will follow with more or less irregularity, as remaining assets are of a nature that will take some time to liquidate. On March 15th a statement of affairs showed assets of $265,197, secured and ordinary liabilities $51,483, and a further liability to shareholders on paid-up capital of $222,480. A claim of $64,755, due from the private bank in the way of deposit account, has been realized in full out of dividends due the private bank on shareholders in this insolvent company.

In connection with the private bank of F. C. Watson (deceased), Sarnia, Mr. Wade has forwarded an interim dividend of 20 cents on the $1, making a total to date of 40 cents. Further dividends depend largely on dividends available from the Sarnia Realty Co. Under March 10th a statement of the affairs of the estate showed assets of $211,325 and liabilities of $196,185. Of the assets, $183,700 have been realized upon.

Frontenac Breweries, Ltd.—A special general meeting of shareholders of the company has been called for August 19th, 1919, to authorize the board of directors to apply for supplementary letters patent to enable the company to increase its capitalization and funded obligations. According to the plans of the board, it is proposed to increase the capitalization of the company is $2,000,000, or double the present amount, a well as to issue as the occasion warrants a further $400,000 in bonds.

Additional bonds to an amount not yet decided upon will be issued when the necessary authority has been received from the shareholders, and under the supplementary letters patent to fund considerable expenditures in recent months, while the new capital stock, which will include a small proportion of preference shares, will be sold as circumstances render necessary and desirable. Whether the present shareholders will receive preferential treatment in the new stock offering is still under consideration by the directors, but it is probable that some definite announcement in this regard will be made at the coming meeting.

FRASER RIVER SALMON RUN NOW ENDED

According to statements from Vancouver, B.C., Fraser River fishermen and canners are agreed that the Fraser is fished out. In good seasons ten years ago as high as a million cases of fish were packed. This year's fish crop will be less than a tenth of that amount.

The end of the Fraser's production came in sight six years ago, when Canadian Northern contractors dynamited a mountain of rock into the river at Hell's Gate Canyon, and altogether prevented the salmon from ascending to the spawning grounds. From the time the sockeye heads towards the Fraser, American and Canadian traps, nets and seines lie in wait over an ocean highway of three hundred miles, the salmon has only about one chance in a thousand of getting through.

On the Skeena and other northern British Columbia rivers, the salmon are running in record numbers. Fishermen there are making as high as $500 a week.

PERSONAL NOTES

Mr. Frank C. C. Mead, who, for a number of years, has been connected with the National Trust Co., Ltd., Montreal, in the capacity of real estate officer, has joined the Dominion Securities Corporation. Mr. Mead will attend to the selling end of the business in Montreal for the corporation. He starts in on his new duties immediately.

Hon. H. A. Robson, K.C., Winnipeg, has been appointed chairman of the Federal Board of Commerce, a new body composed of three commissioners appointed by the government. W. F. O'Connor, K.C., author of the legislation creating the board has been elected one of the members, and J. A. Beaudry, Quebec, the choice of the Retail Merchants' Association of Canada will be the likely third.

Mr. W. A. Higinbotham, superintendent of foreign agencies for the Sun Life Assurance Co. of Canada, who only four months ago returned from a two-and-a-half years' tour of the world, sails from New York on August 16th, for Great Britain. Mr. Higinbotham will sail on the Orduna and will remain abroad for at least three months on company's business. While in England Mr. Higinbotham will meet Mr. E. A. Macnutt, treasurer of the Sun Life.

Sir Herbert B. Ames, M.P. for St. Antoine Division of Montreal, has been appointed by Premier Borden, as financial director to the League of Nations. The creation of the League of Nations involves the establishment at the seat of the League, which will probably be Geneva, Switzerland, of a permanent secretariat, and Canada, being one of the signatory parties to the treaty of peace, has been invited to nominate a Canadian as financial director to that organization.

Mr. Alfred W. Smithers, chairman of the board of directors of the Grand Trunk system, and who is at present in Canada in connection with business pertaining to the Grand Trunk, and who will make his official tour of inspection of the road during the next few weeks, has had knighthood conferred upon him by his Majesty the King. Sir Alfred has been intimately associated with the activities of the pioneer Canadian line for the past 25 years, having been elected a director of the company in 1895, and chairman of the board in 1909.

H. E. M. Kensit, who joined the C.E.F., in September, 1915, has returned to the Dominion Water Power Branch, Ottawa. He was attached to the Canadian Engineers for two years, and after being wounded at Vimy Ridge was transferred to the Ministry of Munitions, England, for a further seventeen months. Since the armistice he has represented the Dominion Water Power Branch, as a member of the water power committees now sitting in England, including that of the Conjoint Board of Scientific Societies on water powers of the Empire, and that of the Board of Trade, formed at the request of the Ministry of Reconstruction, on the water-power resources of the United Kingdom. Mr. Kensit is known to readers of *The Monetary Times* as the author of a series of articles on "Municipal Accounting," which appeared in these columns several years ago.

OBITUARY

Mr. Warren L. Green, president of the American Bank Note Co., New York, died in the Plaza Hotel of that city on August 12, 1919. Born in New York in May, 1866, he attended public schools and entered the employ of the company as an apprentice, gradually rising until, in 1898, he came to Canada to take charge of the company's interests here. He returned to New York in 1901 as one of the vice-presidents, and in 1906 was made president, which position he held until he died a few days ago. Among the concerns with which he was connected are the Westchester Avenue Bank and the American Building Co.

MONEY MARKETS

Messrs, Glazebrook and Cronyn, exchange and bond brokers, Toronto, report the following exchange rates to *The Monetary Times*:—

Cable transfers	4.51	4.5175	....

Rate in New York—Sterling, demand, $4.3150.
Bank of England rate, 5 per cent.

ALBERTA INDUSTRIAL CONVENTION

(Staff Correspondence.)

Calgary, Alta., August 13th.

The Alberta Industrial Congress and Provincial Tour was held this week. The delegates assembled at Medicine Hat on August 11th, and were conveyed by special train to Lethbridge the following day, thence to Calgary, where a two days' session of the Industrial Congress was held on August 13th and 14th.

Hon. Mr. Mitchell, provincial treasurer of Alberta, who was to speak at the banquet given by the Board of Trade of Medicine Hat, was unable to be present through illness. The principal speakers at this first meeting of the Industrial Congress were Col. Nelson Spencer, M.L.A., for Medicine Hat; Jas. Ramsay, M.L.A., for Edmonton; D. S. Coleman, vice-president, Canadian Pacific Railway, and Mayor Brown, of Medicine Hat. They all emphasized the wonderful industrial possibilities of Alberta, and of the opportunities for manufacturers in Medicine Hat and in western Canada generally.

Great credit was accorded Mayor Brown, of Medicine Hat, for conceiving and promoting the present industrial movement which, it is felt, will develop into large proportions and be of great importance to western Canada.

In Lethbridge, the congress, numbering over two hundred, were entertained at lunch by the City Board of Trade. Hon. Mr. Buchanan, Dominion member for Lethbridge, and several others spoke, all urging strongly the necessity for and value of irrigation in southern Alberta. Splendid crops are being reaped, especially alfalfa on irrigated land. The outlook for feed is also much brighter since recent rains.

What Companies Think of the Part Timer

Views of Representative Life Insurance Superintendents—Value in Rural Districts is Admitted—Part-time Work is Useful Field for New Agent

THE part-time life insurance agent continues to be the object of much criticism on the part of whole-time agents, particularly in the cities where the part timer is regarded as a parasite in the life insurance business. At a meeting of the Toronto Life Underwriters' Association, held in June, a resolution was introduced condemning the part timer, and the subject was referred to a committee for the purpose of having a new resolution carefully drafted. While the agents are unanimous in their disapproval of "spotters," yet they recognize that under certain circumstances the part-time agent is useful. A number of expressions of opinion have been received by *The Monetary Times* from agency superintendents of life insurance companies doing business in Canada. Some of these, with the names of the superintendents, are given herewith:—

J. O. McCarthy, general manager of the Security Life Insurance Co.—"There are part-time agents and part-time agents. There are localities, with limited possibilities, where the part-time local agent is a useful and proper part of an agency organization. In cities and larger centres, my experience has been that the part-time agent creates little business and usually writes through his local or personal influence the business which some regular agent has worked up or created. The trouble is not so much with part-time men, as it is with appointing as part-time agents inefficient or second-class men who may secure local information for the general agent, but who does not add any prestige to the business of life insurance."

W. H. Robinson, provincial inspector for the London Life Insurance Co.—"My views are as follows: (1) In the best interests of the small communities, remote from agency centres, the bona fide part-time life agent is a necessity; (2) Frequently, it is advisable to try out the prospective full timer by giving him a part-time contract; (3) Many successful full timers would not be in the business had they not been induced to try it as part timers. On the other hand, the one-case part timer should, if possible, be eliminated. It would be effective to make it illegal for companies to pay commissions to any part-time agent before said agent had paid for at least ten cases. It would also be effective towards eliminating the one-case agent, if a full list of licensed agents were published monthly."

E. J. Harvey, supervisor of agencies for the North American Life Assurance Co.—"In my opinion there is a place in our business for the part-time agent, and if the companies decide to discontinue using part-time agents, I am satisfied that he would still remain in the business under cover of the connection with the full-time agent, in place of a connection direct with the company as at present. By virtue of the present system of the connection direct with the company he is compelled to measure up to the standard maintained by the company."

Sydney C. Tweed, superintendent of agencies, Mutual Life Assurance Co. of Canada.—"I consider the part-time man necessary for the proper development of the life insurance business in rural districts. I do not approve of the employment of part-time men in city districts."

Alexander Bissett, manager for Canada of the London and Lancashire Life and General Assurance Association.—"The question is one of great importance and in my opinion it would be a mistake for anyone or any body of men to form an opinion without giving the subject careful study from all points of view. There has no doubt, crept into the system objectionable features, but I feel that this fact should not condemn the system entirely. It is for those who are vitally interested, and I refer now to the general agents and district representatives, to take such steps as will improve the conditions. If we were to eliminate entirely the part-time agent, I consider that an injustice would be done, not only to the general agent or district representative and the company, but particularly to the prospective agent. I submit that it is not fair to the prospective agent to have him give up a position which may be yielding him a fair income, and have him enter the life insurance field as an agent, without first giving him the opportunity of ascertaining whether or not he is likely fitted for the work. Some of the very best writers of the present day have come from the ranks, and am I stretching a point when I go as far as to say in a general way that probably the majority of the real live agents of to-day have come from the ranks of the part timer? I believe that this viewpoint will be shared by many, not only managers of companies, but also general agents and district representatives."

R. C. MacKnight, supervisor of agencies for the Northern Life Assurance Co.—"The part-time agent cannot be eliminated without doing a great injustice to the life insurance business, because all field organizers know the value to agency organizations of the sincere part-time men. It is from this source that the best whole-time men are in many cases produced. I am not at all in favor of paying part-time men renewal commissions until they have demonstrated consistent producing ability. The determination of the value of the part-time man is a matter that should be left almost entirely to the discretion of the agency manager of the company and so long as the agency manager devotes his time and thought as fully as possible to the development of the most prominent material among his part-time men, the result will be a benefit to himself, the par timer and the company, and should, in the long run, mean production of business for companies at a lower expense. The part timer represents, in my opinion, raw material in the hands of the agency manager and the results depend entirely upon the personality and sincerity of the agency manager. There is, of course, much opportunity for abuse and unfair methods on the part of the agency managers, but I think the education of these men by the company, is the most important field for focusing real co-operative clean-spirited action. With agency managers of a high calibre, there are few impossibilities for any company in Canada. I believe that an agency manager's opportunities should be made as much as possible, a real man's job."

A. Mackenzie, manager of agencies for the Manufacturers' Life.—"I do not think the time has yet arrived to eliminate entirely the part-time man. Canada is a country of great distances and vast area, and as yet but sparsely populated, and in certain districts the part-time man performs a very necessary work in placing life insurance protection; yet he might be unable to make a sufficient income from this source alone to maintain himself and family. Then again experience has shown that most of the companies have developed a fair percentage of their whole-time agents from part-time men. My present opinion is that under conditions as they exist in Canada to-day, taking into full consideration both country and city business, the part-time man has his place in the general organization of a company and does make a real contribution to the work we are engaged upon. These conditions, however, may change in the future, but at present I do not believe it would be in the best interests of the business as a whole to take any drastic steps without the most careful consideration of the subject from all standpoints. I would differentiate between the legitimate part-time agent and the spotter or occasional broker, whose interest in the business is but of a passing nature and who might be safely eliminated."

C. E. Robertson, superintendent of agencies for the Dominion Life Assurance Co.—"Personally, I am very much in favor of part-time agents, but such part-time men should not be appointed unless they are willing to work for part-

time commission. The difficulty lies at the door of the whole-time men who appoint part-time agents indiscriminately and give them the full commission as called for by their contracts. In the experience of this company, part timers have frequently become whole timers, and we warmly welcome the real part timers in the service of the company. It appears to me that if the companies made a ruling that part-time agents must only secure part-time commission, uniform action would result in uniform practice."

LIFE AGENT AND THE COMPANY

Clause Providing for Trial in Ontario Upheld by Manitoba Court

By M. L. Hayward, B.C.L.

THE case of Brand vs. National Life Assurance Company recently decided by Judge Mathers, Chief Justice of the King's Bench of Manitoba, involved the construction of a clause which many insurance companies insert in all contracts with their agents. In this case it appeared that Brand was an insurance agent residing in Winnipeg, that the National Life Assurance Company had its head office at Toronto with branches in Winnipeg and other Canadian and American cities, being duly licensed to do business in Manitoba under the Canadian and Manitoba Insurance Acts, and that by a written contract executed at Toronto Brand agreed to act as agent for the company in Manitoba and Western Canada for a certain remuneration fixed by the contract.

One section of the contract—Clause No. 27—provided, however, that "any action or proceeding involving any matter arising out of this contract or the employment agent, shall be tried at the city of Toronto, and not elsewhere," and after working under the contract for a year or more Brand sued the company for damages for breach of the contract in the Manitoba courts.

The company then set up the claim that as clause No. 27, quoted above, provided that any suit was to be brought in Toronto "and not elsewhere," the Manitoba courts had no jurisdiction, and applied to have the suit stayed.

The decision of Judge Mathers was that clause 27 was legal and binding on Brand, that the clause was a "submission" within the meaning of the Manitoba Arbitration Act, and the company was entitled to a stay of proceedings if the application for the stay were made in time, which, however, the company had not done in this particular case.

SUN LIFE ACTUARIAL APPOINTMENTS

At a recent meeting of the board of directors of the Sun Life Assurance Company of Canada, J. J. Cooper, and J. B. Mabon were appointed assistant actuaries of the company. Mr. Cooper has been connected with the Sun Life since 1902. He was born in the Isle of Man and studied at Cambridge University, graduating in 1897, winning high honors in mathematics. He is a Fellow of the Actuarial Society of America and an Associate of the Institute of Actuaries (Great Britain). Mr. J. B. Mabon was born at Inverness, Quebec, in 1890, and attended school at Lachute, going from there to McGill University, where, in 1910, he graduated in mathematics, winning the Anne Molson gold medal. He then took up civil engineering in the Faculty of Applied Science at McGill and graduated in 1914, winning the British association gold medal. In November of the same year he joined the actuarial department of the Sun Life. He also has passed the examinations for Fellowship in the Actuarial Society of America and is an Associate of the Institute of Actuaries (Great Britain).

THE BANK'S INTEREST IN A SALES POLICY

Wide Variety of Methods Used for Distributing Product—Policy Must be Suited to Kind of Business

THE banker's interest in a customer's business does not end with production, but includes the problem of marketing, which is one of the most important phases of business, and a substantial factor in costs. The July issue of the "Teller," issued by the Sterling Bank, discusses this subject as follows:—

"No profit is earned in a manufacturing business until the product is sold and the money is collected. Thus, selling the product is an essential feature of a business. And it presents problems which may often arise in the bank manager's discussions with his customers. He owes it as a duty to himself, to the bank and to the customer to give enough close study to selling problems to enable him to talk intelligently and helpfully when questions about sales and selling are raised. Particularly is this true in small towns, where manufacturers are men whose experience and training lean towards producing rather than towards selling.

"Marketing merchandise depends on a combination of four factors: (a) The product itself; (b) selling or distribution; (c) advertising; (d) the service involved. The product itself must be well fitted for the purpose for which it is offered. Whether it is designed to fill a need or is a luxury, it must always give value for the price. Each of the above four factors is as important as the others. Without the quality and workmanship behind the merchandise it is a waste of time and money to employ salesmen for the distribution of the merchandise, or to advertise it in order to have the consumer purchase, for it will not repeat. The value for the price of the merchandise depends upon the ability of the manufacturer to turn out an article at the lowest possible cost, which is at the same time the best value possible for the selling price procured, and which will compare favorably with the goods sold by any competitor in a similar line at the same price.

"That, however, is a straight manufacturing problem. In this article we are more concerned with the question of selling the product. The most important prbolem for a manufacturer to solve in selling goods is the channel of trade he must follow. Just as he must keep production costs down to the minimum, so must he keep selling costs down to the minimum. Just as the production costs per unit on his merchandise are reduced as his output is increased, so are his selling costs decreased in proportion as his volume of sale is increased. He must, therefore, figure closely and carefully which channel of trade will give him the lowest selling costs for the volume of merchandise he can economically produce.

"Every marketing campaign must be built on the characteristics of the goods to be sold. Wide variations in methods of marketing follow as a result of wide variations in the nature of the goods themselves. The methods of marketing farm implements and the methods of marketing silk hosiery must be different. Custom has great weight in determining selling methods; but customs, even though no longer logical, must have risen originally for some good reason, and that reason, as far as selling methods are concerned, is almost invariably to be found in the characteristics of the goods.

Trade Channels

"The most elemental form of transaction—where one person sells direct to another—is still in use to-day. Mail order sales are in this category. Mililons of dollars worth of goods are sold by mail order houses and by manufacturers through no other channel than this simple direct-to-the-consumer channel.

"The next simplest method of selling goods is through an 'agent' appointed by the manufacturer. Books, pianos, farm implements and equipment and scores of other goods are sold through 'local agents.' In many ways, 'agent' is a term very loosely used in business. He works on a commission basis—works independently of the manufacturer. Yet he

OUR BUSINESS

"Believing that trust companies created for the administration of trusts should practically last forever, the Board of this Corporation have laid down the principle and have acted on it from its inception (in 1882) that we shall exclusively confine ourselves to a trust and agency business."

binds the manufacturer absolutely within the scope of his agency and does not assume responsibility for his acts.

"In recent years, owing to the demands of modern specialty selling, the agent has acquired a new and different status. Concerns like those making cash registers, adding machines, electric plants for farms, still employ 'agents' on a commission basis. But they select high-grade men, give them intensive training, and keep them actively and aggressively interested.

"Beyond this stage a manufacturer must sell his product through stores. His selling problem then assumes a more complicated aspect. If he is in the grocery, dry goods, hardware or drug line, he will probably follow the traditional channels. Ninety per cent. of the goods in these lines pass through manufacturer, commission merchant or broker, jobber or wholesaler, retailer and consumer.

"There are reasons that make this trade channel a powerful factor in merchandising. In the first place, heavy staples, like sugar, flour, etc., are usually sold through jobbers, because their bulk is too great to permit the ordinary retailer to purchase in sufficient quantities to justify direct relations with the manufacturer. In the next place, this method of distribution keeps the manufacturer's selling expense down to the minimum, gives him more time to attend to production problems, and simplifies enormously the question of collections, because he deals with a few large accounts instead of a great many small accounts.

"The majority of manufacturers follow this traditional channel. But according to the nature of the product and the market, the system of distribution may assume noteworthy varieties.

"Here are some typical examples:—

"A milk products company—selling a grocery specialty —use the complete chain-broker, jobber, retailer. The broker carries little or no stock, but acts as a salesmaan for factory, working on a commission basis. Enough brokers are appointed to see that each section of the country is thoroughly cultivated.

"A phonograph manufacturer, who, two or three years ago, began to make phonographs, faced three questions: (1) Should they attempt to sell by mail? (2) Should they sell their whole output (unbranded) to the jobbers? (3) Or should they sell direct to the retailer? They followed the last course, because, while the initial sales were less than they would have been under (2), they had a permanent channel for their output which could be developed by advertising; and their product retained its identity.

"In the automobile industry the product is marketed through similar stages, though the different channels have rather an altered relation towards the manufacturers. The Maxwell-Chalmers organization, which is typical, sells to a distributor for a certain territory, who is expected to create a dealer organization. The dealers buy from the factory, and a commission is allowed to the distributor on each car dealer buys. The distributor must, in turn, carry a stock of parts for service. Six supervisors are employed by the factory to develop the utmost business in their respective territories. On the other hand, the Ford Motor Co. found it necessary to cultivate territory more intensively. They, therefore, organized nine branch houses at strategic points in the Canadian market. These branch houses look after the dealer organization.

"Sometimes a manufacturer finds it best to get rid of his selling problem completely by contracting his complete output to a sales agent. This plan is followed by the largest knitting concern in Canada. The sales agent then sells to the regular trade channels. It would, indeed, take volumes to detail how the old distribution chain has been modified to meet the demands of modern merchandizing. The more bank managers study this problem of distribution, the more valuable will they become to the bank, because the more valuable and helpful can be the understanding they show of the problems of our manufacturing clients. In another article we will show how the force of modern advertising has been harnessed to develop distribution and to increase the volume of sales at low cost."

PROVINCE WILL RETAIN INCOME TAX

British Columbia and its Municipalities Needs Every Source of Revenue Available—Intimates Help for Municipalities May be Found in New Taxes

IN a recent address before the Vancouver Board of Trade, Hon. John Hart, Minister of Finance of British Columbia, declared that, personally, he regarded the personal property tax as unfair. Relative to the agitation by municipalities for increased sources of revenue, he made it clear that the government would not be disposed to allow any deductions from its own sources of revenue, but that an effort would be made before the next session of the legislature to find an entirely new channel for the exclusive benefit of the municipalities. He announced that the government was preparing to dispute the right of the Dominion to levy a direct income tax on British Columbia residents as soon as the War Measures Act was repealed, and said that the province would not attempt to increase taxation until the present recognized means were absolutely exhausted.

Mr. Hart took his hearers back to the early days of the present administration. When the late government had taken office in 1911, the provincial credit had been $9,000,000 with a public debt of $10,000,000. If the sinking fund was deducted, there would have been enough surplus to pay the total indebtedness, but this was not the situation when the Brewster government took control. The debt had increased to $23,000,000 by that time, while the simultaneous revenue of $48,000,000 had been spent, making a total expenditure during the years 1911-'16 amounting to about $70,000,000. In November, 1916, when the conservative government was overthrown, the annual revenue was $6,000,000 in round figures, while expenditures approximated $11,000,000, not including the interest on the Pacific Great Eastern. The deficit was over $6,000,000. The province had only $34,000 to its credit in the banks and there was a large overdraft in treasury bills. The government was offered an opportunity to borrow $4,000,000 at 7½ per cent. per annum on a twenty-year basis, but the bid had been turned down, and the government then settled the principles of the provincial financial policy which still was being maintained.

The government, he said, subsequently made an effort to borrow $2,000,000, half of its actual requirement, and a rate of 6¾ was offered. Finally a loan from the Dominion government for $3,000,000 at 6½ per cent. was arranged. Although confronted with heavy fixed charges and a large public debt, the government managed to cut down yearly expenditure to about $10,000,000, and increased taxation brought the revenus up to $9,000,000. The inauguration of the surtax, the poll tax, the amusement tax and the provisions of the 1917 Taxation Act accomplished this. Another aid was the inclusion of mining companies and canneries in the scope of the income tax, as well as the application of the income tax to other industries, merchants, farmers, etc.

Mr. Hart made the announcement that the license fees for motor cars would be increased next year, although the taxes on cars would be eliminated.

With regard to the income tax, he said that it was not fully understood by the majority, and for years it had not been taken seriously. So far as he was concerned, it would be enforced completely and fairly. The Act provided for severe penalties for defaulters, but he believed that proper education of those subject to the tax would make it unnecessary to invoke any coercive or punitive measures.

The tax sale in 1918, he said was the first one in five years. Henceforth the government intends to hold one annually, including this year. "I estimate," he said, "that in 1920, our revenue will be about $10,000,000 and that we will be called upon to expend about $13,000,000, but the deficit will be for the purpose of meeting capital expenditures, as represented by the building of roads, trails and bridges that will be in use for fifteen years or more. Demands for the creation of employment to returned men and others have been so insistent that the government felt compelled to depart from a cold-blooded policy of economy, and the large schemes of public works that we have embarked

upon should absorb labor until it gradually finds a place in the industrial life of the province."

Referring back to the refusal of the government during the early days of its existence to accept loans at 7½ and 6¾ per cent. he said: "You, as business men, will appreciate that it took courage to refuse those bids when we had no money in sight, but we had confidence in the resources of the province, and our judgement was vindicated by results. The latest loan was floated at a rate of 5.55. That means a saving of $80,000 a year when compared to the previous offer. We can compliment ourselves in getting such a rate when we know that the best terms the Dominion of Canada could get was 6.20."

The minister referred to the demands of the municipalities for increased revenue. "We don't want to see the municipalities go down. Naturally, it would hurt our provincial credit, if nothing else. But we cannot give to the municipalities the sources of revenue which the province already controls, because we need everything we have. But we may work out plans for finding new sources. I feel that we can do that without adding to the burden of those already paying taxes. It seems to me that we could find a way of bringing in taxes from those people who contribute nothing to the treasury, although they are occupants of rented houses and enjoy all the benefits of property owners and others who are subject to taxation."

CANADIAN MINT HAS NEW HEAD

James Bonar, who has been deputy master of the Canadian branch of the Royal Mint, Ottawa, since 1907, has retired, and is succeeded by A. H. W. Cleave. Mr. Bonar was born in Scotland in 1852, and his early career was devoted to academic pursuits in England and Scotland. He is also well-known as an author and contributor, among his books being one on political economy published in 1903.

James Bonar.

His successor is also an old country man, having been born in England in 1868. In 1893 he entered the service of the Royal Mint in London, Eng., and in 1906 came to Canada as superintendent of the branch at Ottawa. He is an engineer by profession.

The business of the Western Empire Life Assurance Co. for the first seven months of this year exceeds one million dollars says Wm. Smith, president and managing director. This is just about the total amount written by the company during the whole of last year.

AMERICAN TRADE WITH EUROPE

Virtual Receivership May be Necessary, With Long-Term Credits—Situation More Complicated Than in Case of Private Corporation

BY A. B. BARKER

DISCUSSING the problems of trade with Europe from the United States' standpoint a writer in the "Saturday Evening Post" indulges in some very plain speaking; and as Canada also depends on the European market to dispose of her surplus raw materials and foodstuffs, the subject is of vital interest in this country as well. The facts given are that a large part of the continent as distinguished from Great Britain is financially embarrassed; that before the war the various governments were put to all sorts of shifts in order to balance their budgets; that industry and trade are crippled; that the interest alone on their funded debts and war obligations amounts to more than their pre-war expenditures; and that it is impossible to see at present how they can provide for these except as they are now doing—by fresh borrowing.

The whole continent is off a gold basis and doing business on a depreciated currency which tends to increase in volume and naturally will depreciate further as it increases. This is indicated in the rates of exchange, and is a serious obstacle to a resumption of normal trade and industry. Certain supplies of raw material must be purchased from North and South America, and must be paid for in the currency of the country in which it is purchased, or by its equivalent in goods, and the question is, how is it to be done.

Idleness is the rule all over Europe, with the result that men are hungry, discontented, mutinous and a menace to social stability. Without a settled, orderly, debt-paying and rights-respecting social state, reconstruction will be impossible. The starting up of industry is the first step towards the establishment of a settled state, and industry cannot get into normal production without credit. Credit, then, is the first essential.

The situation as described is analogous to that in which Canada has had little experience, but which has frequently been the case in the United States, where a large corporation has gone into a receiver's hands and been carried on by him as a going concern. The old debts stand in abeyance, and the business operations are financed by the use of receivers' certificates. These pay for the raw material, the sellers and banks readily accepting them as they constitute a first lien on the property and earnings. The goods purchased in this way by foreign manufacturers would be settled for by the manufactured articles later. The transactions would be somewhat more complicated than in the case of similar transactions in the same country, and the terms of credit would necessarily be longer, but the principle would be the same.

This is practically Mr. Vanderlip's suggestion, and it has also been urged by Mr. Davison and others. Any such credit, however, would not rest on government obligations as no direct loan to a European government would be taken up by investors in general at the present time. Obligations incurred under such a scheme would necessarily, like receivers' certificates, be a first lien on the industries and their earnings with or without specific government guarantee, preferably without, so as to be clear of political complications, the present funded debts and the war debts to stand in abeyance. The problem is a serious one, and its difficulties are increased by the necessity of considering national pride and prestige, but a solution must be found before normal conditions abroad can be even measurably restored.

The article suggests in conclusion that some practical plan to apply this principle to the financing of foreign trade is now being considered by the leading financiers and business men of the various countries. What the outcome will be time will tell, but as conditions obtaining among the chief customers for our exports have an important bearing on our own well-being, the results of any plan adopted will be eagerly watched for.

Ford

Electric Starting and Lighting

NO car has a better starting and lighting system than that now available to purchasers of Ford Cars.

It is a Ford product, built into the motor—

—a positive starter as reliable as the motor itself:

—a powerful lighting system, uniform under all engine speeds.

On the open models—Touring Cars and Runabouts—it is OPTIONAL EQUIPMENT.

On closed cars—Sedans and Coupes—it is STANDARD EQUIPMENT.

On all models the Ford Standard Magneto also provides ignition independent of the batteries.

See the Ford car with this new equipment.

Ford Runabout $660; Touring $690
On open models the Electric Starting and Lighting Equipment is $100 extra.
Coupe $975; Sedan $1175 (closed model prices include Electric Starting and Lighting Equipment).
These prices are F. O. B. Ford, Ont. and do not include the War Tax. 111

CROP PROSPECTS FROM COAST TO COAST

Feature of Year is Early Harvest—Wheat Crop Poor but Other Grains Good in Some Parts

A SUMMARY of telegraphic crop reports received on the condition of field crops throughout Canada was issued recently by the Dominion Bureau of Statistics as follows:—

Prince Edward Island.—(Charlottetown)—July weather favorable for all crops. Hay making commenced 17th; about one-third cut; cereal crops promise yields above average; Black Leg caused many misses in late potatoes; potatoes free from disease look extra good. Roots and corn growing well. Small fruits abundant; large fruit crop above average.

Nova Scotia.—(Amherst)—July weather unsettled. Upland hay good; marsh fair. Wheat, oats and buckwheat fair; barley poor. Potatoes, turnips, also turnip seed, fair; some club root in evidence. Bush, fruit and apple crop fair.

New Brunswick.—(Fredericton)—Dry weather during early part of July shortened a portion of the hay and grain crops, but generally these crops are nearly average, with potatoes and roots promising well. Rains during the last ten days have delayed hay, but beneficial to all crops. Small fruits have given good yield, and apples, while somewhat affected by scab, are a fair crop.

Quebec.—(Ste. Anne de la Pocatiere)—Beneficial rain has fallen during the last three weeks of July. Prospects much better than a month ago. Cereals better than last year; potatoes very good; field roots good. Hay a little better than anticipated; field peas above the average, small fruit below the average. European plums very poor. (Quebec)—Hay in pasture poor; some very good. Grain good; roots below average; potatoes good; small fruits very good; apples about average; plums and cherries bad; grapes good; all vegetables very good except carrots, beets, parsnips, turnips, which are medium.

Ontario.—(Toronto)—Hay and fall wheat all harvested; yields about average; spring grains have very short straw owing to the drought; low yields probable; potatoes rather disappointing; roots backward but may rally; second growths of clover and alfalfa light; corn relatively best growing crop; drought at picking lessened great promise of berries.

Manitoba.—(Winnipeg)—Recent weather mostly hot causing very early harvest; considerable rye cut; wheat cutting commences, probably above average yield, considerable rust in spots. July rainfall too heavy, some places too light; straw fairly heavy; barley and corn promise well; oats and flax fair; potatoes scarcely reach average. (Morden)—Wheat cutting began this week. Much rust everywhere and wheat of rather a poor grade, yield not greater than 50 per cent. of normal height. Temperature high. No rain.

Saskatchewan.—(Rosthern)—Highest temperature since beginning of month 102 on the 16th; total rain 1.05; crops ripening prematurely; wheat estimate, seven bushels per acre on area not blown out; cutting under way two weeks earlier than normal estimate; three-quarters sufficient feed this winter between Ducklake, Saskatoon and Two Rivers. The Department of Agriculture reports that wheat cutting has commenced in many parts. Early sown rye thrashed near Fort Qu'Appelle yields 25 bushels per acre. It is expected that the harvest will be general next week in almost all districts, except certain parts of the south-eastern district, where plentiful rainfall has caused a heavier growth than in other parts of the province. (Scott)—Weather unusually warm and dry, a few favoured sections report some rain and fair crops, but more sections report little rain and very little crop. Very light, harvesting early grain has commenced. (Indian Head)—Good rains from the 1st to the 13th greatly improved crop conditions and assure an average yield in this district. Wheat promises 5 to 10 per cent. ahead of last season; oats 10 to 15 per cent.; barley not up to average; hoed crops fair. Harvesting commences on experimental farm, will be general throughout district by 8th or 10th; rains have been local and many districts report continued dry weather with little crop or pasture.

Alberta.—(Lacombe)—First three weeks of July warm and dry, crops suffered, rainfall over two inches during last ten days; crops good in this district, but light in eastern section of province; few early crops being cut; putting up light crop of hay commenced under unsettled weather conditions.

British Columbia.—(Invermere).—The extreme heat and no precipitation, only .33 being recorded, have combined materially to reduce crop yield. Haying is nearly completd, it has been cured under ideal conditions and will yield above the average this season. Cereals under irrigation are fair, while roots and corn promise well. (Summerland)—Crop conditions good; apples will be biggest crop in Okanagan history; Yellow Newtowns and Northern Spies are light crop this year. Peaches are good; plums only fair; potato crop not showing up well and the yield will be low. Season very dry and rain would help with crop and water supply. (Agassiz)—Excepting years 1914 and 1917, July was the driest for 15 years, precipitation being .66; excellent hay crop and in good condition; corn late but growing well now; roots need mosture; potatoes average; early cereals jus ready to harvest; livestock in good condition.

TELEGRAPH TOLL RAISE

Four Canadian telegraph companies have applied to the Board of Railway Commissioners to increase the scale of tolls. The petition argues that since the tolls were reduced by the board on March 30, 1916, wages have increased 60 per cent. and cost of material 85 per cent. The companies consider, therefore, that an advance in tolls of 25 per cent. is necessary.

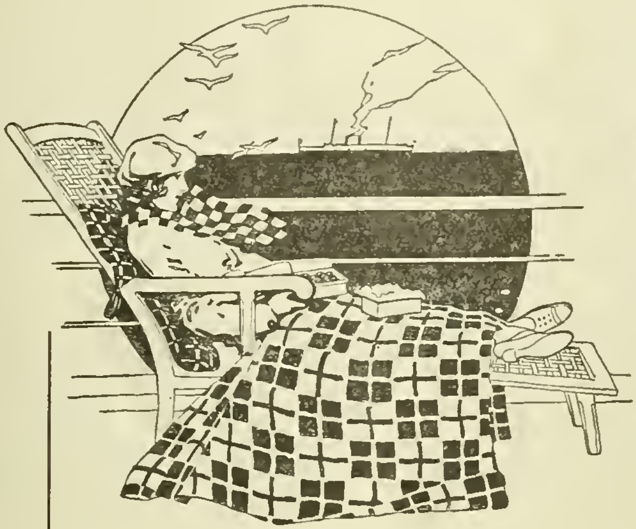
The application is signed by officials of the Great Northwestern Telegraph Co., the Canadian Pacific Railway Co., Grand Trunk Railway Co. and Western Union Co.

FIRE CHIEFS HAVE INTERESTING PROGRAM

At the 1919 annual convention of the Dominion Association of Fire Chiefs, which is to be held in Calgary next week, concurrently with that of the Life Underwriters' Association of Canada, there will be several features of outstanding interest in fire prevention work. One of these will be a discussion of the smoke mask as a fire-fighting instrument.

The following topics have been selected for discussion: "Proper Tire Equipment for Motor Fire Apparatus," by Chief C. J. DeFields, Windsor, Ont., and Chief J. E. Buchanan, Winnipeg, Man.; "Building Construction and By-Laws Governing Same," by J. Grove Smith, Dominion Fire Commissioner, Commission on Conservation, Ottawa, Ont.; Building Construction and How it Applies to the Work of Fire Chiefs and Fire Departments," by Chief John Healey, Denver, Colo, U.S.A.; "Municipal By-Laws for Building and for Fire Prevention, Having Been Adopted by Municipal Councils, Should They Not be O.K.'d by Provincial or Dominion Authorities and Not Allowed to be Suspended, Amended or Repealed Without the Consent of the Same Authorities?" by Chief T. E. Heath, Saskatoon, Sask., and Chief D. Guthrie, Nelson, B.C.; "Adjustment of Fire Losses from the Standpoint of the Insurance Adjuster," by H. Thomas, Insurance Adjuster, Calgary, Alberta; "Advantages of a Fire Prevention Campaign," by Chief A. C. Cameron, Oshawa, Ont., and Chief J. W. Churchill, Halifax, N.S.; "Precaution Against Fire in the Home, from the Housewife's Point of View," by Mrs. (Chief) J. E. Keyes, Galt, Ont.

In addition to the above set topics there will be the usual round-table discussion, and the following subjects have already been selected: "The Smoke Mask: Is it Suitable for Fire Department Work?" "Fire Caused by Steam Pipes"; "Filling Up of Basement Area Windows During Winter Seasons"; "Pensions for Firemen—Volunteer, Part-Paid and Full-Paid"; "Should Motor Apparatus Drivers be Paid More Than Other Members of Fire Departments in Same Grade of Service." And any other topic of interest to the members that may be placed in the hands of the secretary, Chief James Armstrong, Box 56, Kingston, Ont.



Make This Fine Boat Your Hotel for a Week

HERE'S the kind of a holiday you have been looking for. Here's a boat trip that enables you to see the most beautiful of the beauty spots of Canada—one which permits you to loaf ashore as well as lounge on deck.

The Steamer "Syracuse" will leave Montreal every Wednesday for a cruise on the St. Lawrence and Saguenay Rivers, the farthest port of call being Chicoutimi, at the head of the Saguenay. On the return trip the boat steams slowly down the Saguenay, spending an hour in Trinity Bay and giving passengers a night at beautiful Tadousac. The next stop is at Murray Bay—the Newport of Canada—where the boat remains from 5.15 Saturday afternoon until 2.30 Sunday afternoon. From this point the cruise proceeds to Quebec City, the boat going over to the picturesque South shore of the River, when the weather is fine. Allowing a full day for the travellers to roam about the quaint streets and see many points of interest in Quebec, the trip culminates in a daylight trip to Montreal, where we land our passengers at 3 o'clock Tuesday afternoon.

You can figure exactly what such a wonderful holiday will cost. The rate from Montreal to Chicoumiti and Return ($60.00 for outside room and $50.00 for inside room) includes meals and berth. There's no hotel expense, as you live on the boat for a whole week, going ashore only for such sight-seeing as you may wish to do.

In spite of the low rate, the accommodation is the best—de luxe service throughout and a cuisine such as you have learned to expect on Canada Steamship Lines' Steamers.

Rates from Montreal to Saguenay River and Return

$60.00 in Outside Room. **$50.00 in Inside Room.**

These rates cover meals and berth. There are no "extras" of any kind.

Boats leave Toronto daily at 3.30 p.m. for Rochester, 1000 Islands, Montreal and Points East.

Tuesdays, Thursdays and Saturdays

An additional boat leaves Toronto at 5 p.m. direct to Clayton, Alexandria Bay and Ogdensburg, connecting for Montreal, Quebec and Points East. (Schedule subject to change without notice).

For Tickets, Berth Reservations and all information, write our City Ticket Office, 46 Yonge Street, Toronto.

CANADA STEAMSHIP LINES, LIMITED

CITIZENS' RESEARCH INSTITUTE OF CANADA

Will Stimulate Interest in Industrial, Social and Financial Questions of National Scope—Standardization Will be One of Objects

AN organization has been formed under the above name, with headquarters in Ottawa. The provisional trustees of the institute are: Chairman, John Firstbrook; vice-chairman, F. Barry Hayes; honorary treasurer, John I. Sutcliffe; Mark Bredin, Oliver Hezzelwood, J. P. Hynes and Frank Wise. The director is Horace L. Brittain, and the secretary, Joseph E. Howes. For the present the work is being conducted from the office of the director at 813 Bank of Hamilton Building, Toronto. The objects as outlined in a first bulletin are:—

"The institute is a Dominion-wide organization of citizens established (1) to obtain, in an unbiased and nonpartisan manner, the fact basis underlying the administration of the people's affairs in the Dominion, the provinces and the municipalities, and of community interests in general, and (2) through the publication and discussion of such facts to create a well-informed citizenship.

"The complexity and many-sided interests of modern life make it impossible for the average citizen to devote the time and money necessary for securing for himself the fact basis above mentioned. A group of citizens, however, by joining forces, can get this work done not only for themselves, but for the citizens as a whole. That this is necessary may be illustrated by the fact that even in the larger municipal fields, where citizens are right on the ground, it has been found impossible to keep in touch with the civic government, and in many places Bureaus of Municipal Research and similar organizations have been established to keep the citizens informed about their city's business. If such research organizations are necessary in the municipal field, how much greater must be the need in the provincial and national fields?

"At present a very real unrest exists in the industrial, social and political phases of our national life. The only way to remove this is to discover and remedy the causes. The institute, by obtaining, in the unbiased spirit of research, the pertinent facts in relation to the various phases of community life and presenting them in a form easily assimilated by the people, should assist in promoting clear thinking and effective action in this connection.

Objects of the Institute

"Some of the objects are:—

"(a) To ascertain, collect, classify, analyze, correlate, interpret and publish facts in connection with or relating to public administration and community affairs, in order that the people may have accurate information from an unprejudiced source, independent of any government (Dominion, provincial and municipal), all publicity being given in the spirit of research;

"(b) To assist in the establishment of local Bureaus of Municipal Research, Citizens' Research Institutes, or similar associations, when requested to do so by citizens of any municipality;

"(c) To act as a central organization and clearing house for local bureaus, institutes or similar associations, thus ensuring mutual assistance and co-operation amongst them. For instance, all material gathered by local institutes would be supplied to the Canadian institute. Any such material considered of general interest and importance could be given Dominion-wide circulation by the institute.

"The fundamental work of the institute will be to give the widest publicity to the results of research on all great public questions of general interest. Some of the work the institute might undertake would be:—

"(a) To conduct national, provincial and local surveys of government departments, and assist public officials in the reorganization of their departments where necessary;

"(b) To conduct studies of public and semi-public institutions, and assist boards of directors in the organization or reorganization of institutions rendering community service;

"(c) To make available to small communities thoroughgoing studies of their needs.

(Note.—All such work would be done at cost.)

"(d) To gather and analyze facts regarding our national experiences and those of other countries in order to make possible the formulation of a far-reaching and intelligent policy on such questions as: Education, immigration, civil service reform, organization of industry, taxation and assessment, the relation of government to the people, and vice versa.

"(e) To promote the movement toward the standardization of municipal, provincial and national accounting, which would, among other things, make possible the trustworthy comparison of statistics;

"(f) To act as a clearing house of information so that the experience gained in a new departure in any part of the Dominion, or in other countries, could be made available to governments, organizations of citizens and private citizens throughout Canada.

Methods of Conducting Work

"(a) The institute will be governed by a board of trustees elected by and from the members at the annual meeting. The trustees will have the general control of the activities of the institute. No trustee shall receive any remuneration for his services. No paid official of a Dominion, provincial or municipal government can hold the position of trustee. The institute will be supported entirely by voluntary contributions.

"(b) The director, or chief executive officer, is appointed by the trustees to act at their pleasure. He will be charged with the actual carrying on of the researches and the publicity based thereon.

"(c) The director will have at the beginning a small permanent staff. Then, as occasion demands, specialists in engineering, accounting and finance, education, health, sociology, etc., will be gathered together, either by borrowing them from local institutes or engaging, temporarily, men outside of the research field. When the work of the institute develops sufficiently it will carry its own specialists in each of these fields.

"The institute's reports and other publications will be sent to an extensive mailing list of citizens, citizen organizations, public libraries and similar bodies throughout the Dominion. The published results of the institute's work will be sent to all the Canadian newspapers and publications of importance. Since the reports will be of national interest and will contain material with 'news value,' their republication may be counted upon. The institute's reports and other publications will be supplied to any citizen upon request."

CANADIAN WHEAT BOARD

The names of the members of the Canadian Wheat Board, organized to arrange for the handling and disposal of the season's wheat crop, have been announced. The board consists of James Stewart, of Winnipeg (chairman); W. A. Matheson, Winnipeg; H. W. Wood, Carstairs, Alta.; W. A. Black, Montreal; N. L. Patterson, Fort William; W. L. Best, Ottawa; F. O. Fowler, Winnipeg; C. B. Watts, Toronto; W. H. McWilliam, Winnipeg; Joseph Quintal, Montreal; Col. J. B. Fraser, Durford; and F. W. Riddell, Regina.

An increase of half a cent to five cents per hundred pounds in cartage rates has been passed by the Canadian National Railways, the Grand Trunk and the C.P.R., to take effect on September 4, according to a notice received on August 9th by the Transportation Bureau of the Montreal Board of Trade.

SUCCESSION DUTY AND THE BANK ACT

Where a Stock Register is Situated in a Province Other Than That in Which Head Office is Located, that Province is Entitled to Duty

WRITING in the July number of the Journal of the Canadian Banker's Association, W. A. Henry, K.C., Halifax, discusses provincial power to collect succession duties on the transfer of bank shares. Referring to the decision in the case of Smith vs. the Provincial Treasurer of Nova Scotia, he says:—

"This is an action to determine whether or not the estate of the late Wiley Smith, a large shareholder of the Royal Bank of Canada, whose shares, pursuant to the provisions of Section 43 of the Bank Act, were registered at the Share Registry office in Nova Scotia, must pay succession duty to the province of Nova Scotia. That province claimed that the shares were 'property situate in Nova Scotia,' within the meaning of the Nova Scotia Succession Duty Act, and therefore liable to the duty, while, on the other hand, the province of Quebec also asserted the right to collect succession duty on the shares, on the ground that the shares were situate in Quebec, because the head office of the bank was in that province. The decision of the Supreme Court of Nova Scotia was to the effect that the shares were situate in Nova Scotia, and that succession duty was exigible there upon their value.

"This decision, of course, did not bind the province of Quebec, and the Quebec authorities would not permit the transfer of the shares unless the duty was paid in that province. It was determined, therefore, that an appeal should be asserted to the Supreme Court of Canada and that the necessary steps should be taken to compel the province of Quebec to intervene in the litigation, in order to put forward its claim that the shares were situate in the province where the head office of the bank was located.

"It should here be noted that, not only Quebec, but all the other provinces of Canada, and also the Federal government, were formally notified of the hearing, so that they might, if they chose, be represented and put forward their contentions at the hearing. The provinces of Alberta and Quebec alone took any action upon this notice. Alberta applied for and obtained leave to intervene, but did not pursue the matter further. Quebec filed a factum and was represented at the hearing by two of her most distinguished advocates.

"The argument was heard by Sir Louis Davies, C.J., and Justices Idington, Anglin, Brodeur and Mignault, all of whom handed down opinions in writing.

"The purpose of this article is to give a synopsis of those opinions, with a view of enabling those interested in this highly important decision to appreciate, not only the decision itself, but the grounds upon which it is based, and this especially in view of the fact that an application is to be made to the Privy Council upon behalf of the province of Quebec for leave to appeal from the decision of the Supreme Court of Canada.

Provincial Decision Upheld

"The unanimous decision of the Supreme Court of Canada was, that the shares in question were situate in Nova Scotia and that that province alone had the right to levy succession duty in respect to them. The appeal asserted by the Smith Estate was dismissed, and the decision of the Supreme Court of Nova Scotia was affirmed.

"When we come to analyze the decisions themselves, it will be seen, that while the learned judges agreed in the result, their conclusions were not reached along exactly the same lines.

"A word should be said about a Latin maxim, '*Mobilia sequuntur personam*,' which was much discussed at the argument and is frequently referred to in the decisions. Its meaning is that movable property follows the person of its owner, and no matter where actually situated, has attributed to it, for certain purposes, a situation, or *situs*, at the domicile of the owner.

"Sir Louis Davies, specifically adopting in this respect the decision of Mr. Justice Anglin, came to the conclusion that the *situs* of the bank shares in question, irrespective of the provisions of the Bank Act, and the necessity for registering the shares in Nova Scotia, was for succession duty purposes, at least, at the domicile of the deceased owner in Nova Scotia. He was also of opinion, if domicile was not the proper determining factor, that the shares were actually situate in Nova Scotia because, by the provisions of Section 43 of the Bank Act the shares in question were registered in Nova Scotia and there 'and not elsewhere' could they be transferred or effectively dealt with.

"Mr. Justice Idington held, first, that the shares were actually situate in Nova Scotia, because of the effect of Section 43 of the Bank Act, and secondly, that the doctrine represented by the maxim above quoted applied, in the case of the Nova Scotia Act, to make the shares actually situated at the Share Registry Office in Nova Scotia.

"The decision of Mr. Justice Anglin, concurred in by the Chief Justice, is the most elaborate of all those filed. He leaves the question undetermined of the *situs* of the shares apart from the domicile of the deceased owner, though apparently rather inclined to the view that for some purposes the shares might properly be held to be situate in Quebec. He arrived firmly at the conclusion, however, that for the purposes of the Nova Scotia Succession Duty Act, the shares must be held to be situate in Nova Scotia.

"The steps leading to this conclusion may be briefly summarized as follows:—

"(a) The Nova Scotia Act is a Succession Duty Act as distinguished from an Estate Duty Act.

"(b) The actual *situs* of tangible effects, and the *situs* imputed by law to intangible effects, without regard to the domicile of the owner, carries with it liability to probate or estate duty, but in the case of succession duty the maxim, *mobilia sequuntur personam*, is the proper test to determine the *situs* of intangible effects. Pointing out that it has been decided in England that succession duty is exigible only in respect of movables which pass under English law —to which the beneficiary obtains title under English law —he concludes that succession duty in Nova Scotia is exigible in respect of movables to which the beneficiary obtains title under Nova Scotia law, as is the case with the shares in question, because the title of the beneficiaries depends upon the Nova Scotia law governing the devolution of estates.

"The decision of Brodeur, J., is to the effect that the actual *situs* of the shares was in Nova Scotia, because the Share Register was in that province.

"Mignault, J., bases his decision on the maxim *mobilia sequuntur personam*, and follows the English decisions to the effect that, in the case of succession duty the situation of intangible property must be referred to the domicile of the owner. He considers that, if bank shares can have any actual *situs* other than the domicile of the owner, that *situs* should be found at the head office of the bank, rather than at the provincial registry office, but, holding the view that the *situs* is governed by the application of the maxim *mobilia sequuntur personam*, he considered it useless to determine where the *situs* would be if that maxim did not apply.

"Several of the judges dealt with the argument which was mentioned, but not pressed, that Section 43 of the Bank Act was *ultra vires* of the Federal parliament as being an interference with the provincial right to legislate with respect to 'property and civil rights within the province' or 'direct taxation within the province in order to the raising of a revenue for provincial purposes.' as granted by Section 92 of the British North America Act. All who discussed this point same to the conclusion that the section was within the legislative jurisdiction of the parliament of Canada as being within the exclusive power to legislate with respect to 'Banking, incorporation of banks, and the issue of paper money,' conferred by Section 91 of that Act.

"The reasoning of most of the decisions disposes adversely of an argument raised at the hearing (the only one by which the Smith Estate could be affected) to the effect that the shares might be liable to the duty in Quebec because actually situate there, and also in Nova Scotia because constructively situate there by reason of the application of the doctrine, *mobilia sequuntur personam*. Several of the judges held specifically that for succession duty purposes, property can have but one *situs*, and it is clear that

the idea of double taxation is repugnant to the reasoning of the judges who do not specifically discuss the matter.

"Leaving out of consideration, for the moment, the application of the Latin maxim which most of the court considered to be the controlling factor in determining the situation of the shares, three judges, Sir Louis Davies, and Justices Idington and Brodeur, came to the conclusion that the shares being registered in Nova Scotia under the provisions of Section 43 of the Bank Act, were situate in Nova Scotia, while Justices Anglin and Mignault, without actually deciding anything in this respect, indicated a preference for a situation in Quebec. The effect of this is to affirm the decision of the Supreme Court of Nova Scotia upon the only ground upon which it was founded, the actual situation of the shares without reference to the domicile of the deceased owner.

"The decision of this important case in the Privy Council, and that the Privy Council will refuse leave to appeal can hardly be anticipated, will be received with great interest. Should the decision of the Supreme Court of Canada be affirmed, it will have far-reaching consequences. Quite independent of the establishment of provincial share registry offices, shares of banks, and, inferentially of all companies, will be liable for succession duty only where the deceased shareholder is domiciled, and double liability for succession duty will, in most, if not all cases, be a thing of the past. This is a condition most ardently to be desired, and, if the doctrine by which domicile determines the *situs* of intangible personal property becomes the law of the land, the administration of estates will be much simplified, and a strong impulse will be given to the movement, which has been halted by the attitude of certain provinces, for an agreement between all the provinces for the adoption of definite principles in connection with the levying of succession duties, eliminating the possibility of double taxation and the necessity of appealing to the courts to determine, in particular cases, in which of two provinces succession duty is to be paid. On the other hand, if the Privy Council rejects the doctrine by which the *situs* of intangible effects is governed by the deceased owner's domicile, two possibilities are opened up. It may be held, either that the head office or the share Registry office of a company, where each is in a different province, controls the *situs* of the shares. This is a matter which concerns the provinces, but does not seriously affect the estates of deceased shareholders because, as they would not have to pay twice, they need not care where payment has to be made.

"In any event, the outlook for greater if not absolute certainty in these matters is fairly well assured, and after all, that is the main consideration. The investing public cares little where the succession duty is to be paid, provided that it is to be paid once only. The theory of possible double taxation has received, it is believed, its death blow, and it is not likely that any contention leading to that result will be put forward before the Privy Council, should that august body be called upon to pronounce upon the problems developed in the litigation now under discussion.

"When we consider, however, the position of holders in Great Britain of Canadian securities, the questions to be decided in the Smith case are important in a somewhat different way. Certain shares and stocks of Quebec corporations have been marketed in Great Britain and for the convenience of the British holders registers have been established in London. The province of Quebec claims the right to collect succession duty on these shares and stocks as property situated in Quebec and, accordingly, upon the death of a holder of city of Montreal stock, for instance, the province of Quebec insists, no matter where the stockholder was domiciled, upon the production of a certificate showing that succession duty in Quebec has been paid on the stock, or that there is no liability for the duty, as the case may be, before permitting any transfer of the stock.

"This has given rise to so much inconvenience and difficulty that the prices realizable for such stocks have materially declined. Representations have been made upon the subject to the Quebec government by the committee of the London Stock Exchange, and by the members of the London Bankers' Clearing House, with what result, if any, has not so far been learned. It is probable, however, that the province of Quebec has maintained its right to collect the duty, and that the representations in question have been without effect.

Should the Privy Council affirm the decision of the Supreme Court of Canada, so that only that country or province where the deceased stockholder had his domicile can legally enforce payment of succession duty upon intangible personal property, such as shares of companies, stocks issued by municipalities, etc., then Canadian shares and stocks would command better prices on the British markets, and be more readily saleable. A decision in the Privy Council, rejecting the doctrine *mobilia sequuntur personam*, would involve the determination of the question whether the location of the head office of the body corporate, or of the registry office of the shares of stocks, fixed their *situs*. It would be only in the event of a decision in favor of the head office that the province of Quebec would be able to maintain its claim to the duty on shares or stocks registered in Great Britain."

DEMURRAGE CHARGES TO STAY AT HIGH LEVEL

Judgment has been handed out by the Railway Commission on an application made by a number of shippers in Canada asking that the present high demurrage charges be lowered. The shippers are not unanimous on the application, the Ford Motor Co. pointing out that it would prefer that there should not be a return to the old conditions of continual car shortage.

The Montreal Board of Trade is also in favor of the high charges. The fact that the greater part of the country's grain will move this year through Canada, and not through the United States, as it has been doing, was thought to be reason enough for the high demurrage. The application was dismissed.

MANY NEW INDUSTRIES FOR TORONTO

As a result of the efforts of the Industries Department of the Harbor Board, Toronto, 14 new firms have been secured for the city. This information is contained in the report of E. L. Cousins, general manager, which was issued last week, and traces the activities of the department for the first five months of its existence. Up to the end of June, the department entered into negotiations with 103 business concerns with the object of inducing them to establish in Toronto. Thirty-three of the firms approached are Canadian, 71 have their headquarters in the United States, and the remaining one is at Swansea, Wales. Of those which are coming here, nine have been located on properties in various parts of the city, and five are securing their sites from the Harbor Board.

An extensive publicity campaign has been inaugurated by Mr. A. C. Lewis, the publicity manager of the department, which will ultimately place him in touch with a further 1,500 companies. Those which have thus far been located here, with the estimated number of men they will employ, are as follows:—

Anthracite Briquette Co., New Coal Co., 2,200; Baldwin, Ltd., Tin Plate and Steel Plate, Swansea, Wales, 30; Blatchford Calf Meal Co., Waukegan, Ill., 20; Consol. Wafer and Cone Co., new company, 20; Crane, Ltd., Valve Manufacturing Co., Chicago, 50; E. Fielding and Sons, Toronto, 5; Fish Coal Co., Toronto, 10 to 15; Larned and Carter Co., Detroit, 220; Merchandise Specialty Co., new company, 10; Neptune Meter Co., New York, 20 to 30; Taylor Instrument Co., Rochester, 4; Toronto Steel Construction Co., Toronto, 75 to 100; Ward Baking Co., Chicago; Select Lingerie Co., Ltd., new company, 10.

The National Industrial Convention, which was to have opened in Ottawa on September 11 for the purpose of considering trade relationship, labor laws and labor conditions, has been postponed until September 15.

INDUSTRIES USE MORE HELP IN JULY

Some Branches, However, Did Not Increase Number of Employees as Anticipated—Increases Expected for August

WEEKLY reports from employers in Ontario and Quebec to the Employment Service of Canada of the Department of Labor indicate an increase in the volume of employment in Ontario and Quebec during the third week of July and a decline during the last week of July, followed, however, by an anticipated increase during the succeeding week.

Final returns for the week ending July 19th showed that 2,409 Ontaraio and Quebec firms, with a payroll of $337,038, had increased their staffs by 1,048 persons, or .3 per cent, and anticipated making a further net addition of 1,041 persons, or .3 per cent., during the following week. Preliminary returns for the week ending July 26th seemed to show that this anticipation was not realized, though supplementary reports may alter the situation somewhat. For July 26th the reports of 2,019 employers, with a payroll of 288,684 persons, have already been compiled. These employers had actually decreased their staffs during the week, though the decrease was only a slight one, amounting to 218 persons, or only .1 per cent. of the total number of persons on their payroll. On the other hand, during the week ending August 2nd, the 2,019 firms expected to make a net addition of 1,155, or .4 per cent., of the number of persons on their payrolls.

This increase was anticipated in fifteen out of the sixteen industrial groups, railway operation alone registering a slight anticipated decline. Of these groups the following had shown actual increases during the week ending July 19th: Commercial and mercantile occupations, lumbering, chemicals, food, drink and tobacco, leather and leather goods, vehicles, woodworking and furniture, railroad construction, railroad operation, and miscellaneous occupations. Of the six remaining groups, building and construction showed an actual decrease of .6 per cent during the week of July 26th and an anticipated increase of 1.15 per cent. during the first week in August. For the clay, glass and stone industries the corresponding figures are 6 per cent. and .6 per cent.; for the metals industries, 1.1 per cent. and .2 per cent.; for the pulp, paper and printing, 1.3 per cent. and .5 per cent.; textiles, 1.3 per cent. and .8 per cent.; quarrying and mining, .6 per cent., with no anticipated improvement for the following week.

The largest single decline during the week ending July 26th was in the metals group, and was confined largely to the electrical and steel industries. Other large declines occurred in the clay, glass and stone products group. The decline here was in the glass industries. Likewise, a decline was registered in textiles, and may be accounted for by the usual seasonal decline in this group. In the pulp, paper and printing trades declines were registered in both pulp and printing industries.

For the whole Dominion 2,978 firms reported to the Employment Service of the Department of Labor for the week ending July 19th. Of these, 170 were in the maritime provinces, 732 in Quebec, 1,677 in Ontario and 399 in the west. On July 19th these firms had 429,180 persons on their payroll, compared with 427,046 the previous week, an increase of 2,134 persons, or .5 per cent. Moreover, these same firms for the week ending July 26th anticipated making a further net addition to their staffs of 1,475 persons, or .3 per cent.

The largest single decline during the week ending July 19th was in the lumbering group. Declines were registered also in vehicles, pulp, paper and printing, and building and construction.

During the week ending July 26th declines were registered in clay, glass and stone products and railway operations. All other groups reigstered net anticipated increases.

In the maritime provinces, as a whole, there was again reported an actual decrease of 1.5 per cent. for the week ending July 19th, followed by an anticipated increase of .5 per cent. for the week ending July 26th. The decline in the maritimes occurred largely in lumbering, and pulp, paper and printing. In Quebec there was an actual increase for the week ending July 19th of .9 per cent., with a further anticipated increase of .1 per cent. In Ontario there was an actual decrease of .1 per cent. for the week ending July 19th, with an anticipated increase of .4 per cent. Employers in the four western provinces again reported an actual increase of 2.5 per cent. during the week of the 19th, followed by a further anticipated increase of .4 per cent. This increase occurred principally in British Columbia, and was largely confined to the quarrying and mining industry.

Strikes are not taken into account in the above figures.

RHONDDA MILLIONS TO BE INVESTED IN CANADA

According to information given out by V. Lloyd-Evans, of Vancouver, who was secretary for the late Lord Rhondda, and has been looking after various interests for the estate in Canada for several months, millions of dollars of the estate of the late Lord Rhondda are now on their way from England to Canada and will be invested in Cobalt, Porcupine, Abitibi and Peace Rivers portions of Canada.

HUDSON BAY CO. MAY HAVE TO PAY $500,000

Hon. C. R. Mitchell, Alberta provincial treasurer, has professed the belief that the decision of the Imperial Privy Council finding that the Hudson Bay Co. must pay the Saskatchewan land surtax, will be accepted by the company as governing the wild land tax in Alberta. Mr. Mitchell maintains that the two are similar taxes, and that if the company must pay the Saskatchewan tax, it must also pay the Alberta wild land tax which it has been fighting.

Up to date the Hudson Bay Co. is in arrears to the province for some $500,000 on this wild land tax, so that if the company decides to pay it will be a substantial addition to the provincial treasury.

PRIVY COUNCIL TO DECIDE PROVINCIAL POWERS

The cases brought by manufacturers to determine the validity of clauses in the Companies' Acts of Manitoba and Alberta requiring Dominion companies to register as a condition of carrying on business, judgment on which were given by the Supreme Court of Canada on May 10th, in favor of the provinces, are being appealed to the Privy Council. The cases is question are *Great West Saddlery Co.* v. *the King*, *John Deere Plow Co.* v. *the King*, and *A. MacDonald Co.* v. *Harmer*, on the Saskatchewan Act, the *Great West Saddlery Co.* v. *Davidson* on the Manitoba Act The cases are being heard jointly as the legal points in question are similar.

GRAIN IN SASKATOON ELEVATORS AT MINIMUM

Stocks in the government elevators at Saskatoon are lower now they have been for some time, although they compare favorably with figures for August last year. This is the slack season for them, their heaviest time being from January to May. From then on there is always a fall in stocks, so that figures need not be taken as signifying small supplies. Shipments of feed have not been exceptionally heavy this year, said R. Seddon.

The capacity of the elevators is three-and-a-half million, including work room, and there have been times, he said, when they were hard put to it to keep the total below the three million mark. The extra half million goes into the work room, and this leaves little room for operation. At the present time there are 64,011 bushels of wheat in the bins, 165,937 bushels of oats, and 5,630 bushels of barley. At this time last year there were 25,352 bushels of wheat, 187,283 bushels of oats, 5,911 bushels of barley, and 754 bushels of flax.

WHY THE "MUTUAL LIFE OF CANADA" IS SO POPULAR
The Mutual placed upon its books in the first five months of 1919 100% more business than in the corresponding months of 1918. The wonderful war-record of the Mutual Life and the prompt payment of the many unexpected claims during the recent epidemic—these have proved the value of the institution. The Mutual, moreover, is in a peculiar sense a people's company, being in its control democratic, in its economy strictly co-operative. This means that the system is in line with the "spirit of the age," and so the people naturally turn to the Mutual. The record of the Company for nearly half a century has been one of increasing beneficence, and an ever-growing number of gratified policyholders help on the good work of the agents. As a result, there probably is not a more prosperous group of workers in Canada to-day than the representatives of our Company.

"Be a Mutualist."

Canadian National Railway.

August 7	$1,811,263	$1,546,287	+ $ 264,976

BANK BRANCH NOTES

The Bank of Hamilton has opened a branch at Powell River, B.C., under the management of Mr. L. G. Tyler.

The Bank of Hamilton is replacing the branch at Hammond, B.C., in the Fraser Valley, by a new brick building costing about $15,000.

Mr. John A. C. Kemp, second agent of the Canadian Bank of Commerce, New York, has been appointed chief inspector, with headquarters at Toronto.

The Bank of Montreal announces the following changes in managers at certain branches: Mr. W. J. Cormack has been appointed acting manager at Headley, B.C.; Mr. J. Galt has been appointed acting manager at Port Haney, B.C.; Mr. J. H. Cumberland has been appointed acting sub-manager at the office recently opened at Thorndale, Ont.

WEEKLY BANK CLEARINGS

The following are the bank clearings for the week ended August 7, compared with the corresponding period last year:—

	Week ended Aug. 7, '19.	Week ended Aug. 8, '18.		Changes.
Montreal	$135,168,135	$ 77,915,850	+	$57,252,285
Toronto	77,848,380	56,807,918	+	21,040,462
Winnipeg	40,538,833	34,711,501	+	5,827,332
Vancouver	12,935,704	15,384,553	—	2,448,849
Ottawa	8,809,248	6,066,143	+	2,743,105
Calgary	6,460,216	6,869,807	—	409,591

COMPENSATION EXTENDS TO FOREIGN WATERS

The Privy Council of Great Britain has decided that the dependents of sailors lost last October on the Princess Sophia, which foundered in American waters, are protected by the British Columbia Workmen's Compensation Act. The right of the board to pay for losses of life sustained in foreign water was the point at issue.

Dominion Canada 5½% (Aug. 1, 1929) ..	96⅞	97¼

The following is a list of debentures offered for sale, of which particulars appear in this or previous issues of *The Monetary Times*:—

Borrower.	Amount.	Rate %.	Maturity.	Tenders close.
Kenora, Ont.	$ 10,000	5½	15-instal.	Aug. 22
Melfort, Sask.	22,000	6½	10-years	....
Peace River, Alta. .	4,200	6	5-instal.	....
Alberta School Districts	25,800	6½	Various	Aug. 28
Brooke Tp., Ont. ..	5,190	6	5-years	Aug. 30

Windsor, Ont.—A by-law authorizing the issuance of $100,000 debentures for sidewalk extensions, has been defeated.

North Bay, Ont.—It was stated in error in these columns last week that the issue of $52,500 bonds carried interest at 6½ per cent., instead of 6 per cent.

Secure More Bids

By inserting debenture advertisements in The Monetary Times of Canada municipal officials get at once into direct touch with all investment dealers who handle municipal bonds—those responsible for the purchase of bonds for insurance, trust and loan companies, as well as most of the discriminating investors.

It means more bids, ensures real competition and the maximum price.

Send your next debenture advertisement to

Monetary Times of Canada
TORONTO WINNIPEG

Brooke Township, Ont.—Sealed tenders will be received up till August 30, 1919, for the purchase of $5,190 6 per cent. five-year debentures for drain purposes.

Roxborough Township, Ont.—Messrs. Tomenson, Forwood and Co., Toronto, have purchased an issue of $82,555.30 6 per cent. 15-instalment debentures of the township.

Medicine Hat, Alta.—Messrs. A. Jarvis and Co., Toronto, report that they have purchased the issue of $132,253 bonds on a 6.15 basis. The bonds bear interest at 5 and 6 per cent., and are for various maturities.

Vancouver, B.C.—None of the tenders received for the bonds of the Vancouver and District Sewerage Board were regarded as acceptable, and the proposed issue of $800,000 will be taken off the market for the present.

Moose Jaw, Sask.—Three by-laws to provide money for various works have been carried by the ratepayers as follows: Public comfort stations, $13,000; repair work on Fourth Ave. bridge, $16,000; waterworks system at Britannia Park, $40,000.

Brantford, Ont.—Members of the city council declare it imperative that the city council should meet and ratify the bond guarantee by-law for the Industrial Realty Co., recently passed by ratepayers. There is a chance of a fine new industry being secured if immediate ratification of the by-law is made.

Charlottenburg Township, Ont.—The authorities have decided not to accept at the present time any of the tenders for the $30,000 5½ per cent. 20-instalment bond issue which were invited up till August 4. New tenders will be asked for September 15, 1919, when, it is expected, the market will have shown some improvement.

Saskatchewan.—Messrs. H. J. Birkett and Co., Toronto, report the purchase of the following bonds: Rural Municipality of Wellington, $10,000 7 per cent. 10-instalments; Baber Rural Telephone Co., $5,400 6½ per cent. 15-instalments; Dodsland Rural Telephone Co., $9,800 7 per cent. 15-instalments.

Regina, Sask.—The city will have to issue debentures to the extent of $30,000 to meet the half-yearly payment due the government at the present time on cyclone loan account. The total amount of the payment due the government is $59,000. Towards this the city has on hand $29,000 collected from cyclone borrowers of which $9,000 represents interest.

Greater Winnipeg Water District, Man.—A bond issue of $1,000,000 at 5½ per cent. for 30 years, will be placed on the market at the most advantageous moment in the near future. This will be the last issue it will be necessary to market, and will bring the total issue up to about $14,800,000. The issue was authorized some time ago, but a favorable moment in market conditions was waited for. Another $700,000 will be required to complete the work, but this will be made up of the sale of equipment.

Regina, Sask.—The civic authorities have decided to borrow from the Bank of Montreal the sum of $899,234.56, the loan to be secured by the current year's taxes. The money is to be used for the maintenance and operation of the civic machine for the year 1919. While there have been occasions in the city's history when the policy of borrowing against the current year's revenue before the taxes have been collected, has been questioned by individual aldermen, this method of financing has steadfastly been adhered to for a number of years past and is generally looked upon by the council as a mere matter of procedure.

Alberta School Districts.—Sealed tenders will be received by the Debenture Branch of the Department of Education till August 28, 1919, for the purchase of $25,800 6½ per cent. school district debentures as follows: Block No. 1, Rurals, 10-years.—Ideal S.D., $3,000; Pearson S.D., $2,000—$5,000. Block No. 2, Rurals, 10-years.—Linaria S.D., $1,200; Daisy Bell S.D., $2,000—$3,200. Block No. 3, Rural, 10-years.—Belmont S.D., $1,800. Block No. 4, Rural, 10-years.—White Mud S.D., $3,500. Block No. 5, Rural, 10-years.—Spirit River S.D., $600. Block No. 6, Rural, 10-years.—Old Elm S.D., $1,500. Block No. 7, Rural, 15-years.—Central Valley S.D., $1,800. Block No. 8, Rural, 10-years.—Kensington

The Canada Standard Loan Company
520 McIntyre Block, Winnipeg

S.D., $1,400. Block No. 9, Consolidated, 10-years.—Foremost Consolidated S.D., $7,000.

Manitoba.—An issue of $500,000 5 per cent. treasury bills for six months, dated August 1st, 1919, has been sold in Montreal, and the money will be used by the Manitoba Telephone Commission. Another $250,000 will be required, and will be raised next January.

Ontario.—The province has again, for the fifth time this year, made another favorable loan. The issue of $3,000,000 5 per cent. five-year bonds has been taken up by a syndicate comprising one Toronto firm and four Chicago firms at a price which is costing the province about 5.58 per cent. Only two tenders were submitted, and they are as follows:—

W. A. Mackenzie and Co., Toronto; Continental and Commercial Trust and Savings Bank, First Trust and Savings Bank, Illinois Trust and Savings Bank, Merchants' Loan and Trust Co., all of Chicago	99.67
Wood, Gundy and Co., A. E. Ames and Co. and the Dominion Securities Corp., Toronto	98.11

Saskatchewan.—The following is a list of authorizations granted by the Local Government Board from July 20 to July 26, 1919:—

Rural Telephone Companies.—For 15-years not ex. 8 per cent. annuity. Willmott $16,000; St. Elmo, $1,350; Glen Mary, $20,000; Innes, $1,900; Stockholm, $15,900; Juniata, $1,300; Sovereign, $6,015; Glendale, $2,100; Gartmore Zorra, $18,350; Deep Lake, $2,100; Netterville, $1,950; Ibestone, $4,600; Birch Hills, $4,450; Spalding, $33,800; Fort Pelly, $6,000; Eddy, $6,700; Wroxton-Kessick, $27,950; Marcelin, $17,900; Richard, $2,700; Tetlock, $7,000; Viceroy, $35,400; Ituna, $11,800; Kildrum, $15,600; Wakaw Lake, $33,300; Biggar-Northern, $32,300; Leitchville, $19,200; Great Bend, $11,600.

Southey, $12,500 20-years not ex. 8 per cent. annuity.

---

*Being sold by Local Government Board.

The following reported sold July 20th to July 26th, 1919:—

School Districts.—Hubbard, $6,000; W. L. McKinnon and Co., Regina. Spruce Grove, $2,500; Waterman-Waterbury Mfg. Co., Regina. Bryn Mawr, $800; Harris, Read and Co., Regina. Hamburg, $2,500; C. H. Burgess and Co., Toronto, Ont. Wood End, $4,600; Great-West Life Assurance Co., Winnipeg. Taft, $600; G. A. Stimson and Co., Toronto. Dickson, $1,000; Wood, Gundy and Co., Saskatoon.

Telephones.—Kasuth, $8,900, Spring Grove, $16,200, Gartmore Zorra, $18,350, Guernsey, $14,200, Kandahar, $16,000; Harris, Read and Co., Regina. Tantallon, $8,000; Goldman and Co., Regina. Eagle Creek, $1,700; Nay and James, Regina. Garnock, $9,200, Crocus Bell, $3,000; W. L. McKinnon and Co., Regina.

CANADA BOND TO WIDEN SCOPE

The Canada Bond Corporation, Ltd., Toronto, has made several important additions to the personnel of its staff, and under this practically new management, will widen the scope of its activities.

Mr. F. E. Fisher, who was recently appointed vice-president and general manager, is the leader of the newly organized management. Mr. Ralph M. Bird, formerly of Ralph M. Bird & Co., has been appointed secretary of the corporation, and as such will have charge of the purchasing of all securities. The assistant secretary is Mr. Harry H. Goss, associated for several years with Æmilius Jarvis & Co., and during the past two years with the Canada Bond Corporation. Mr. Goss will be particularly interested in the selling end of the organization. Mr. Norman B. Bell, who has been with the company since last summer, has been appointed treasurer and sales manager.

MUNICIPAL FINANCE

Calgary's Tax Arrears Heavy—Montreal Exemptions from Taxation Large—Chatham Assessment Increased Over $1,000,000

Weston, Ont.—A tax rate of 36 mills for the town has been set by the council, this being 3½ mills lower than last year.

Cobalt, Ont.—The general tax rate for the year will be at least 28 mills, with a public school rate of 8 mills and a separate school rate of 14.3 mills.

Point Grey, B.C.—For the purpose of assisting in the building of new school buildings in Point Grey, the provincial government will grant the sum of $40,000.

Calgary, Alta.—The amount of $4,164,430 is the sum involved in tax arrears up to December 31st last, and $1,240,000 of this is due from main portions of the city.

Durham, Ont.—The tax rate for the ensuing year has been placed at 38 mills, one mill higher than last year's rate. The increase was necessitated by an increased county rate and greater expenditure for both public and high schools.

Newmarket, Ont.—An increase in the tax rate of 5 mills has been decided upon, the tax being fixed for the year at 37 mills. The increase in the school grants requires $10,000 more this year, $7,000 for the high school and $3,000 for the public schools. The county rate this year has decreased $5,000.

St Boniface, Man.—The estimates for 1919-20 have been considered by the school board. The gross amount reached is $172,416, of which the grant of the government of $12,416 is to be deducted, leaving a net total of $160,000 to be paid by the ratepayers. Out of that $160,000, $80,000 is paid to the teaching staffs.

South Vancouver, B.C.—Total municipal collections for 1919 to the end of July amount to $821,543, against $216,090 for the same period last year, being an increase of $605,543. The collections for last year up to the end of September, which terminated the rebate period, totalled $677,151. .This year's collections to date are $144,392 in excess of the total collections for last year. It is expected that this amount will be substantially increased by the end of September, as an additional 5 per cent. penalty will be attached to unpaid taxes.

Montreal, Que.—The newly-calculated population of the city proper is 684,464, as against 670,032 for last year. Including the outlying sections of Westmount, Outremont and Verdun, the new population amounts to 743,102, as against 729,102 last year. The assessed value of Montreal shows enormous exemptions from taxation. The total valuation is $850,474,841, with $226,653,882 exempted, leaving $623,820,959 taxable. In Westmount the figures are, respectively, $54,107,930, $9,524,980 and $44,585,350, and in Outremont, $23,008,823, $5,392,755 and $17,616,068.

Chatham, Ont.—The city tax rate for the ensuing year has been placed at 32 mills, which is one more mill than last year. The assessment of the city has been increased this year over a million dollars, but the extra assessment does not compensate for the increase in expenditures over last year. The increase in the Board of Education estimates over last year alone amounted to 2½ mills in the rate. Another item in the expenditures which has a tendency to keep up the rate and over which the council has no control is the consolidated debt debentures, amounting yearly to about $20,000. These debentures still have seven or eight years to run. Only 11 mills of the rate is based on expenditures over which the council has direct control from year to year.

The Chatham City Council will be requested, by the Board of Education, to provide the sum of $75,538 for the purpose of meeting the expenditures for the year 1919 of the Collegiate Institute and the public schools. Of this amount, the public schools are credited with $53,975 and the

Collegiate with $21,611. Resolutions to this effect were carried at the regular monthly meeting of the School Board.

Winnipeg, Man.—The city's rate this year to pay its proportion of the levy for the Greater Winnipeg Water district will be 4.22 mills, against 3.68 last year. The whole district must raise $764,177 for the purposes of the Shoal Lake water prospect, according to announcement made, following a meeting of the board on August 1st. The entire cost of the Shoal Lake scheme will be known within a few months, it was also announced by Commissioner R. D. Waugh. J. G. Harvey, solicitor of the board, wrote a letter to the board urging that every step be taken to compel railways to pay a portion of the cost of the scheme. At present railway lands are exempt from taxation for the scheme. The following statement shows the distribution of the 1919 cost of the water project:—

Municipality.	Local assessment.	Mill rate.	Amount.
Winnipeg	$146,882,650	4.22	$619,844
St. Boniface	9,795,265	4.96	48,584
Assiniboia	7,833,228	4.5	35,249
St. Vital	3,324,255	4.48	14,892
Fort Garry	3,029,860	4.73	14,331
West Kildonan	2,740,030	4.21	11,535
Transcona	3,198,625	3.37	10,779
East Kildonan	2,281,190	4.21	9,603
Springfield	7,200	9.18	66
	$179,092,303		$764,887

The question of the cost of the distribution of the Shoal Lake water to the suburban municipalities was settled on August 1st, following a private conference between city and suburban municipality representatives. The suburbs are to get water through city mains at cost at the boundary and the understanding is that all levies will be paid at a given date.

Edmonton, Alta.—The financial statement for the year 1918 shows a reduction in the net funded debt from $21,556,948 to $20,649,420; a reduction in current loans from $5,934,012 to $576,550; a surplus of $30,195 on general revenue account; a net surplus of $14,275 on the combined operations of the civic utilities; a reserve of $335,731 provided against uncollectible tax arrears. During the year the work of invoicing and collecting accounts in connection with the various utilities was also centralized. D. Mitchell, city comptroller, says in the report:—

"The year 1918 was critical in many respects, and particularly so in the case of the city with regard to the very heavy current liabilities, amounting to $3,371,563.94, which matured within the period. Of this amount, loan renewals were arranged for with Messrs. Otis and Co., Cleveland, and the sinking fund board for $1,100,000 and $335,000, respectively, the balance, with the exception of a demand note due to the bank for $178,868.62, having been otherwise discharged. It is, therefore, gratifying that the city's municipal obligations have thus far been so successfully negotiated notwithstanding the unprecedented conditions created by the war, and at the same time that the city's credit has not merely been maintained but enhanced accordingly. Sufficient comment on the situation may be derived from the circumstance that the required sinking fund instalments have been fully provided for throughout the progress of these several strenuous years of the European conflict.

"The debenture debt outstanding as at 31st December, 1918, was $25,242,518.89, inclusive of general, special (property share) and utilities. Of this the following analysis shows that taking into account the sinking fund investment, the net general (non-revenue producing) debt is $9,864,005.84 or $362,284.24 under that of 1917:—

Total debenture debt outstanding			$25,242,518.89
Deduct:			
Special debentures	$ 3,960,794.46		
Utilities	9,685,909.09		
		$13,646,703.55	
Sinking fund investment of $4,415,101.42 on gross funded debt, less sinking fund of $2,683,291.92 on foregoing specially rated and revenue-producing debts		1,731,809.50	
			15,378,513.05
Net general debt			$ 9,864,005.84

"The sinking fund investment as indicated ($4,415,101.42), inclusive of surplus earnings ($177,996.75) now amounts to $4,593,098.17.

"Current loans amount to $5,576,550.32, as at 31st December last, against $5,934,012.03 in 1917. The following are the dates of maturity, interest rate and amount of these, respectively:—

Date of maturity.	Rate %.	Amount.
On demand note Imperial Bank	6½	$ 178,868.62
On demand note Imperial Bank	6½	676,000.00
Current overdraft Imperial Bank	6½	18,536.11
		$ 873,404.73
1 Sept., 1919, treasury notes	6	35,000.00
1 July, 1920, treasury notes	6	1,497,145.59
1 July, 1921, treasury notes	6	2,075,000.00
3 July, 1922, treasury notes	6	456,000.00
15 July, 1923, treasury notes	6	640,000.00
		$5,576,550.32

"Of this amount $2,412,868.62 is borrowed on the security of unsold hypothecated debentures, while the balance ($3,163,681.70) forms a lien against tax arrears. Towards the redemption of the loans against tax arrears, collections amounting to $181,062.24 have been deposited with the sinking fund board, reducing the sum of the current loans correspondingly."

TWO IMPORTANT GATHERINGS IN CALGARY

Mr. Geo. W. Goodall, the western manager of *The Monetary Times* is attending the Alberta Industrial Congress and the Convention of the Life Underwriters' Association in Calgary. These two gatherings are being held this week and next week, respectively. Running reports of both of these important conventions, coupled with summaries of papers read thereat, will appear in *The Monetary Times*.

A Newspaper Devoted to Municipal Bonds

THERE is published in New York City a daily and weekly newspaper which has for over twenty-five years been devoted to municipal bonds. Bankers, bond dealers, investors and public officials consider it an authority in its field. Municipalities consider it the logical medium in which to announce bond offerings.

CONFLAGRATIONS OF A CENTURY

A list of the large conflagrations which have taken place on the American continent during the past century shows that the San Francisco fire of 1906 entailed by far the largest loss. The list is as follows:—

New York City, 1825	$ 17,500,000
Harrisburg, Pa., 1824	35,000,000
Constantinople, 1848	15,000,000
St Louis, Mo., 1851	15,000,000
Charlestown, S.C., 1861	10,000,000
Portland, Me., 1866	10,000,000
Constantinople, 1870	25,000,000
Chicago, 1871	165,000,000
Boston, Mass., 1872	70,000,000
St. Hyacinthe, Can., 1876	15,000,000
St. John, N.B., 1877	15,000,000
Kingston, Jamaica, 1882	10,000,000
Seattle, Wash, 1889	2,500,000
St. John's, Nfld., 1892	25,000,000
Guayaquil, Ecuador, 1896	22,000,000
Ottawa, Can., 1900	10,000,000
*Jacksonville, Fla., 1901	10,000,000
Baltimore, Md., 1904	60,000,000
*Yazoo City, Minn., 1901	2,000,000
Toronto, Can., 1904	12,000,000
San Francisco, Cal., 1906	350,000,000

to Tell People
to Use His
Made in Canada
Goods.

You see the point? He was sending money out of the country to tell people to keep their money IN the country.

Other things being equal, Canadian business firms should give preference to Canadian goods.

That is vital to Reconstruction — Reconstruction on a really sound basis.

What kind of paper has been used for YOUR printed matter? Hereafter, will you insist on Canadian made paper and raise the standard of your printed matter?

The Better the Paper the Better the Booklet

CANADIAN PULP & PAPER ASSOCIATION

Look for this mark on the wrapper of every package of paper you buy.

War covered a multitude of sins—among them, poor printed matter. There is no excuse today. Paper is such a small item of cost compared with artwork, cuts, printing, and distribution, that you simply cannot afford to sacrifice selling value to save a few dollars on your paper.

Are we all agreed then?—the best paper the job warrants, and absolute insistence on Canadian made paper where equal value is obtainable—as it always is.

RECENT FIRES

The Monetary Times' Weekly Register of Fire Losses and Insurance

Cobalt, Ont.—August 12—The building at the corner of Earl Street and Thompson Avenue, owned by Mrs. M. Talso, was destroyed. No insurance.

East Sherbrooke, Que.—August 7—The barn belonging to Mr. John Mulvena, on Bowen Avenue, was destroyed. Cause, lightning. Estimated loss, $1,100.

Montreal, Que.—August 4—The building of the Molsons Brewery was damaged. Estimated loss, $15,000. Insurance, $25,500.

August 9—The Mystic Rill and the scenic railway at Dominion Park was destroyed. Estimated loss, $45,000. Seven fatalities have been reported and several more bodies are thought to be in the ruins.

Port Colborne, Ont.—August 9—The mammoth Canadian government grain elevator was destroyed as a result of an explosion. Estimated loss, $2,000,000. Eleven men are reported to be dead. The loss from conflagration has not yet been ascertained.

Thorold, Ont.—August 8—The barn and contents owned by H. C. Hodges and Dr. W. J. McCartney were destroyed. Estimated loss, $3,000, partially covered by insurance.

Toronto, Ont.—August 8—Four sheds in the rear of 477 to 483 Richmond Street West were damaged. Estimated loss, $700, covered by insurance.

August 10—A number of cars and the building at the garage of the McLaughlin Carriage Works, Church Street, were damaged. Estimated loss on building, $300, and estimated loss on cars, $1,450. The plant of the Dunlop Rubber Co., Booth Avenue, was damaged. Cause, water from the sprinkler system. Estimated loss, $350.

August 11—The brick building at the corner of Wellesley and Ontario Streets was damaged. Estimated loss, $700 to building and $700 to contents.

YIELDS ON INVESTMENTS IN STOCKS AND BONDS

The following table of investment yields of stocks and bonds has been compiled for *The Monetary Times* by Messrs. Morrow & Jellett, Members Toronto Stock Exchange, 103 Bay Street Toronto:—

August 13th, 1919.

	Div. Rate	Price about	Yield about
Preferred			
Canadian Locomotive	7	93	7.52

BANQUE PROVINCIALE INCREASES CAPITAL

The annual meeting of the Banque Provinciale du Canada was held in Montreal on August 13th, 1919. The most interesting feature of the meeting was the authorization given to the directors to increase the capital stock from $2,000,000, the present authorization, to $5,000,000, the new stock to be issued from time to time according to the needs of the directors. On January 31st the capital of the bank was increased from $1,000,000 to $2,000,000, the new stock being issued to the shareholders.

In the report to the shareholders the president spoke of the showing of the annual report, and referred to the increase in deposits of the bank, which amounted to $22,489,456 at the end of the eighteen months covered by the report. The board of directors, as well as the board of censors, was re-elected.

DOMINION REVENUES ARE GROWING

Revenues of the Dominion for the first four months of the fiscal year totalled $99,621,970, as against $91,954,172 for the same period in 1918. While there has been a falling off in customs collections of upward of $4,000,000, receipts from excise taxes have more than made up for this decrease, while the revenue from public works, including railways and miscellaneous revenues, have grown, the latter by over $5,000,000.

Expenditures for the four months period are slightly over $76,500,000, as compared with about $33,000,000 last year, but the difference is, to a certain extent, due to the fact that a large amount of overseas expenditure last year had not been included in the returns at the end of July.

Expenditure on capital account so far this year has amounted to $117,276,824. All but approximately $10,000,000 of this has been war expenditure. The total net debt of the Dominion at the end of July was $1,670,263,691, an increase for the month of $53,392,516.

WANTS REIMBURSEMENT FOR WAR EXPENDITURE

Formal application has been made to the Federal Minister of Finance by the Hydro-Electric Power Commission of Ontario, asking that the Dominion Government reimburse it to the extent of $4,902,000 for extraordinary war expenditures incurred on unavoidable extensions due to the necessity of providing power on a large scale for the manufacture of munitions and other materials for war purposes in order to meet the demands made by the manufacturers and the Power Controller. In support of this application the Commission has forwarded to Sir Henry Drayton a file containing the voluminous correspondence and orders covering the period when the extensions were made.

This large amount is divided into three parts. There is the cost to the Commission over the cost during normal times of extensions of transmission systems and equipment on the Niagara circuit necessitated by the power requirements of the munition manufacturers, which approximates $1,750,000.

The Hartford Fire Insurance Co. has obtained a Dominion license to transact automobile insurance.

In making application for incorporation recently the Corporation of Insurance Agents of London, England, defined an insurance agent as "One who adds an insurance agency as an adjunct to his other ordinary profession or occupation, and who is the accredited agent of one or more insurance companies, and whose agency business is not confined to, nor does it mainly consist of, his own insurances or the insurances of the firm or persons by whom he is employed."

Canadian West Looks Toward Field of Industry

Delegates at Industrial Congress Impressed With Possibilities for Some Lines of Manufacture — First Meeting of This Kind, but May be Followed Up by Similar Gatherings—Addresses Given By Prominent Leaders—Coal and Power Facilities In Alberta Are Good

(Staff Correspondence.)

THE opening session of the Alberta Industrial Congress, the first meeting of its kind in western Canada, took place on August 13th, in Calgary. On the two preceding days the delegates had visited Medicine Hat and Lethbridge with a view to seeing the southern portion of the province. After spending two days in Calgary for the business meetings they went to Edmonton on the 15th. The general impression gained by the delegates was that this is the beginning of a movement which will develop from year to year and awaken the people of Canada to the wonderful possibilities of the west, not only as regards agriculture, which is already recognized, but for industrial purposes. M. A. Brown, mayor of Medicine Hat, acted as chairman of the Congress.

At the first meeting in Calgary addresses of welcome were delivered by Lieut.-Gov. Brett, Premier Hon. Chas. Stewart, acting mayor McCoubrey, of Calgary, and Wm. Toole, President of the Board of Trade. The chairman then made a few preliminary remarks regarding the objects and origin of the Industrial Congress. He expressed the hearty appreciation and tendered the welcome of the members of the Industrial Development Association to the delegates who had came to the congress from Canada and the United States. He deplored the fact that some of the prominent men who had been expected had been unable to attend the congress, but was sure that the speakers present would be listened to with the greater interest by the assembled delegates. Among those unable to attend were Sir Robert Borden, Sir Geo. E. Forster, Sir Thomas White, Sir Henry Drayton, E. W. Beatty, D. B. Hanna, Harold F. McCormick, Thos. Findlay, T. C. Norris, J. D. Oliver, T. R. Deacon, and R. B. Bennett. In continuing to discuss the purposes for which the congress was called Mayor Brown stated that the subject uppermost in everyone's mind at the present time was how the country is to pay its great obligations contracted during the great war. This could only be done by intensive development and it was plain to be seen that the development was not intensive in this country. Everybody knew, he said, that the greater portion of the resources of this country were still undeveloped. There had been an increase in development during the last 15 years, he said, but the increase had not been big enough. Some, he said, held the opinion that the country is not ready for an intensive development at the present time, but he did not agree with this view. "The time has arrived," he said, "when we should be more than producers of raw materials. We should produce the finished article for the world's markets. To convince the world of these facts we called this industrial congress. I think that the delegates will be satisfied of this when they have seen the country and heard the speakers at the meetings here. The interest of the United States in this congress speaks much for the friendship between the two countries."

The congress listened to several addresses of outstanding interest. Dr. A. B. MacCallum, chairman of the Council of Scientific and Industrial Research, said that Alberta's coal supply would last only five thousand years with the present population and two thousand years with a population of twenty millions. Canada needed an organized institution that would direct the development of her natural resources. Eugene Coste said Alberta had the biggest oil fields in the world, 1,600 miles by 300 miles wide. A defense of government ownership of railways in its practical working, by E. A. Warren, general manager of the Canadian National Railways, and the coupling by T. M. Tweedie, M.P., of expressions of cordial welcome to the large delegation of American manufacturers, with a statement that it would have been to the greater credit of the Canadian manufacturers of the east, if they had sent a larger delegation to the industrial congress, formed features of the farewell banquet in the Palliser Hotel, on August 14th.

British Capital Will Come

G. E. Whitehouse, of London, England, addressing the Industrial Congress, said, in part:—

"My visit to Canada, which is at the invitation of the Dominion government through its trade commission, is for the purpose of ascertaining concrete facts regarding Canada's present commercial position, for presentation to the British public, with a view of stimulating business between the two countries. By a happy combination of circumstances I have been able to make my plans fit in with this very important congress, and I am indeed gratified to have this privilege and pleasure, if only for the reason that it gives me the opportunity of knowing more about the wonderful resources of Alberta, within the short space of a few days, than I could possibly find out by other means in as many months.

"Although it would seem from the program and the speeches which have gone before, that special attention is being paid to securing the interest and the money of our brethren in the United States, it usually happens that when anything of importance in the development of territory or industries is taking place, the old country of Great Britain is certain to be somewhere about. Although its representation here may be very modest, I shall be given the credit for sincerity, and will assure you that I shall do my utmost to make our country acquainted with what this province has to offer. I have no doubt at all that time will show that in the general development of Alberta, Great Britain will play its part, will take its share of the responsibility and be well represented in the measure of success which will result.

"In modern commercial history, Great Britain has always been the financial backbone of the world, and will continue as such so long as it holds the proud position of being the headquarters of the British Empire. Our financial men have built for themselves a sound reputation for being absolutely dependable. They use good judgment, and whilst they will take risks, they are not gamblers with the money entrusted to them. But when they find good propositions they are not sparing with their cash, and their backing is so tenacious and so substantial that the rest of the world will rush to support the thing which is good enough for their O.K.

"The Alberta proposition stands in that category. To me it is staggering in its immensity and I am afraid I shall have to give myself a little time to regain my mental equilibrium before I set down to tell the story of Alberta to my own people, lest they suspect that my enthusiasm has caused me to trifle with the truth.

"In spite of the financial stress which has been mentioned in your press in the report of the speech of our own chancellor of the exchequer; in spite of the labor troubles which Great Britain, in common with other countries, is now experiencing, the old country will emerge and prove itself fine enough to deserve and hold the respect of the Empire and of the world.

"The men who comprise what we call the English-speaking people are possessed of that kind of common-sense which will always prevent them from making absolute idiots of themselves. They may argue among themselves—English-speaking people love an argument—but when things begin to look black they have a habit of pulling all together to set everything right again.

"One of our great English business men, Lord Leverhulme, told me a few days before I left London that the development of the resources of Canada depended almost entirely upon men. But they must be the right kind and have their due encouragement. A commercial pioneer is entitled to some security of tenure during his lifetime on what he has created. In war, the bravest men—the men who do things without being told to do them—are rewarded with the V. C., and acclaimed by all their fellows. The brave pioneer in business—the man who has the initiative to do things without being told—is rewarded by wealth, but many of his fellows in society look upon him as a parasite. Perhaps we are a little more considerate in the old country. In England a man who has been very successful in business is knighted; in North America he is indicted.

"In my journey through this great country I have found that Canada produces many things which Great Britain can buy; Great Britain produces many things which Canada wants. Let us do much more business together. Business is the most easily understood and most straightforward method of intercourse which civilization has discovered. It is a real concrete expression of patriotism. Although this reference is directed to Canada it applies equally strongly to the United States. During the great war, which happily for all the world is now at an end, Canada showed what she could do. It will stand on record that up to that date the influx of Canadian soldiers was the greatest armed invasion of Great Britain in all her history. If we can apply that same enthusiam and determination in our trade relations, the result, measured in terms of mutual prosperity, is not in doubt."

Growth of Manufactures in West

A remarkable story of the industrial development of the west in general, and Alberta in particular, was told by J. E. Walsh, general manager of the Canadian Manufacturers' Association.

"Some idea of the development of manufacturing in western Canada," said Mr. Walsh, "is given in the table which has been compiled on this subject. This table goes as far as 1917, and does not show the increases of the last two years, which have been considerable. The figures for the three prairie provinces—Manitoba Saskatchewan and Alberta, are:—

Year.	No. of Establishments.	Capital.
1900	429	$ 9,229,561
1905	554	37,036,193
1910	902	84,479,837
1915	1,881	154,874,530
1917	4,082	197,475,107

"These figures show what a remarkable increase took place in the last two years accounted for. For the period between 1900 and 1917, the figures for the whole of Canada are: In 1900, number of establishments, 14,650, and capital $446,916,437. In 1917 there were, established 34,380 and capital $2,772,517,680.

"One hundred and sixty eastern manufacturers have their offices or distribution depots in the west," said Mr. Walsh. He went on to speak of the great jump which had taken place in the manufactured exports between the years 1917 to 1918. In 1917 the manufactured products exported amounted to $477,000,000, and in 1918 had increased to $636,602,000. The total exports in 1917 were $1,151,375,768 and in 1918, $1,586,169,798. The manufacturers' capital, which the Canadian Manufacturers' Association represents, amounted in 1911 to $1,247,103,609, and in 1916 to $1,994,103,272. In speaking of the tariff and the recent changes in it, Mr. Walsh said that the attitude of the Manufacturers' Association on this matter was summarized in the resolution which had been passed at a recent convention, which draws attention to the fact that there is a constant agitation for a change in the tariff and the desirability of having a settled policy and advocates that the government bring into being a permanent staff board whose duties would be to advise them on all matters concerning the tariff. Mr. Walsh said that there was reason to believe that the government may follow out the suggestion.

"The history of the Canadian Manufacturers' Association since its first inauguration has been one of progress," said Mr. Walsh. "It was founded in 1872, and in 1899 it was launched as a national organization. In 1902, it was incorporated by act of parliament, and 1905, the membership was 1,602. In 1910 the membership was 2,450; in 1915, 3,098; and in 1918, 3,550. In the period from 1900 to 1917 the following increases have taken place in the industry which the association represents:—

Establishments	135 per cent.
Capital	520 per cent.
Number of employees on salary	140 per cent.
Salaries paid	305 per cent.
Number of employees on wages	100 per cent.
Wages paid	410 per cent.
Value of product	526 per cent.

Importance of Agriculture

Agricultural development is the basis of all industry was the theory propounded by R. C. Haskins, vice-president of the International Harvester Co., Chicago, in his address. No industrial congress can afford to ignore the oldest and most vital of human pursuits, he said. The immediate prosperity of Alberta lies, not in the industrial development, but in its agricultural development. Mr. Haskins bore upon this point emphatically, but took occasion also to express the belief that in time, Alberta, as its natural resources became developed, would have its industries, and no doubt, would be the equal of any province or state in industrial development. Even in the United States, with its industrial development, agriculture remains the chief pursuit.

If the agricultural development in Alberta is left to the individual, added Mr. Haskins, it will be slow and uncertain. Associations such as this must be behind the development of agriculture. It was within the power of like associations to make this development sure and rapid. Mr. Haskins then turned to the problem of settling the returned soldiers upon the land. He said Canada had made much more progress in this regard than the United States and urged those interested not to forget that it was not enough to drop a soldier down on the land with tools. He must be taught farming and farming methods thoroughly.

A message was read from J. Ogden Armour, who was unable to be present in person. He referred to the manner in which the war had brought the United States and Canada closer together, and also pointed out how intimately the industrial difficulties of the present time were connected with food production. Western Canada, he said, is excellently placed to take advantage of present demands. While his company, Armour and Company, packers, did not operate in western Canada, yet they had a plant at Hamilton, Ontario, with two branches in the east, and plants had just recently been erected at Spokane, Washington and St. Paul, Minnesota. These kept them in close touch with stock conditions in the west and they were, therefore, interested in its progress.

"The Coal Areas in Alberta" was the subject of an address by D. B. Dowling. He traced the geological location of the Alberta coal fields and mentioned the surface seam of anthracite in the Crow's Nest district, which was 135 feet thick. Because of its vast resources of soft coal Alberta was, he said, similar to Wales.

Alberta Power Resources

James White, assistant to the chairman of the Commission on Conservation, dealt with "Power of Alberta—Water, Coal and Natural Gas." Referring to the development of power throughout the world he stated that 75,000,000 horse-power had been developed, of which 29,000,000 is used in the United States, 13,000,000 in the United Kingdom and 6,000,000 in the British Dominion and dependencies. Coming to Alberta he pointed out that the power available was at its lowest in the winter owing to the frost. So far as water power is concerned, Calgary is more valuably situated than any other city in Alberta, the six powers on the Bow River having an aggregate minimum of 60,000 horse-power with regulated river and less than one-half of that amount with unregulated river. The Rocky Rapid power on the Northern Saskatchewan, which is sixty miles from Edmonton, would require the erection of a dam 85,000 feet high. The Baptiste power, 170 miles from Edmonton might be developed to the extent of 12,000 horse-power, and another one on the Baptiste River would yield 6,000 horse-power. There are numerous other sources but they are for the present too remote to be of practical value.

Water, said Mr. White, is, however, only one source of power and the prevailing impression that it is cheaper than steam power is correct only under certain conditions. Compared with steam power it has the following advantages:—

(1) Cost of operation is usually much lower.

(2) Very few attendants are required in the plant and no fuel is required excepting for heating the building.

On the other hand there are the following disadvantages:—

(1) Usually the cost of development and installation is much higher than with steam power.

(2) The situation of the water power plant is fixed by nature and as a rule a transmission line is required to transmit the electric energy to the user.

(3) The service is less reliable owing to the possibility of (a) injury to the transmission line and (b) lack of power due to unusually low water.

During recent years, owing largely to the introduction of the steam turbine the capital cost of modern steel plants and of many hydro-electric power developments are coming closer together and some engineers predict that at an early date steam-electric power will be produced at less expense, other things being equal, than hydro-electric energy. Alberta, he said, contains 87 per cent. of the coal in Canada and is, therefore, in an excellent position to produce steam power.

J. A. Cummingham, president of the British Columbia Refining Company, spoke on the development of the natural resources of the western provinces. The war, he said, had brought us into closer contact with the outside world. On the other hand, our vast borrowings of capital made it necessary that we should not produce in large quantities and production should be stimulated. There are a number of articles, he said, which should be manufactured on the coast or in Alberta. There was, for instance, $78,000,000 worth of paints and oils which passed through Vancouver and Seattle each year to be manufactured in the east and then shipped back to the west again. Similar examples could be found in the case of rubber and silk.

Industrial difficulties were dealt with by Senator G. D. Robertson, minister of labor. He stated that the government was supporting the international unions and spoke highly of their strength and good management and of the same program which they endeavored to enforce. The United Mine Workers of America, he said, had a membership of 500,000 in Canada and the United States and as they had promised to rebuild the coal industry in Alberta, they should have the support of the province. Much of the present good feeling between the United States and Canada is due to the international unions and they could always be relied upon to carry out their contracts. They were opposed to the radical element which has been particularly active among miners, who urged the confiscation of property and the overthrow of government. This would mean, said the minister, that one-eighth of the population would control the country. As an instance of the loss which is continually being incurred through labor disputes, he referred to the eighty strikes which took place in Canada during the month of June as a result of which 1,004,000 days of work were lost, involving the sum of $3,500,000. This increased the cost of living to everyone.

Canada and the Orient

Captain Robert Dollar, head of the well-known Pacific shipping firm, dealt with "Opportunities in the Far East," and said that western Canada has chances for trade development there which may never again be found. "In the early days," he said, "the development of this great country took up all of our time and money; our manufactories were kept busy producing goods for our own needs. At that time we were a world within ourselves. Now the conditions are entirely changed. We are now producing more than we can use; therefore, we must either sell the surplus in foreign countries, or curtail our production. This latter none of us want to consider. Instead of curtailing, we all look forward to increasing our production, so there is only one way out, and that is to increase our sales in foreign countries.

"Some people think, 'Well, this don't interest me,' but I want to say to you that there is not a man in this room that is not interested, either directly or indirectly, and I am pleased to note that nearly all of you belong to the farmer class. All farmers are, or should be, intensely interested; every manufacturer, the merchants, bankers, railroads, and ship owners. The war, increased taxes, and the results of the war, have intensified the situation. The war tax must be paid, and how can it be paid? Certainly not by us trading amongst ourselves—to use a common expression, 'swapping jack-knives'—but by selling our products to other countries and receiving from them new money, or by exchange of commodities, which is as good, especially if it is raw material from which we can manufacture and export the finished product, and anything we can do to make all classes of the community see and understand this vital question will be time and money well spent.

"For many years after the civil war in the United States, they, like ourselves, were busy in the development of the great western states, which took up all of their time and attention. As a consequence, foreign trade was neglected. At that time it was not a necessity as it has become of late years. But now the whole country is aroused by the necessity of more foreign trade, and there is intense interest in all classes of the community. In every city in the States, foreign trade clubs and committees have been formed, and there are meetings almost every day to devise the ways and means of accomplishing the desired results.

"Now, in Canada, there is some interest, but not as general as it should be, and it is up to every one of us who appreciate and know the value and the absolute necessity of foreign commerce, to be up and doing, and to convince our neighbors that we must have it. When the whole community are convinced of the importance of it, then you will see plenty of commerce with the outside world. Therefore I hope I have convinced you of the necessity of foreign trade."

Plea for Scientific Development

Dr. R. D. MacLaurin, professor of chemistry, in the University of Saskatchewan, spoke on "A Field for Reconstruction." "During the past five years," he said, "Canada's national debt has rapidly increased until it has reached the sum of $1,950,000,000, incurring interest charges to the amount of $115,000,000. Our adverse balance of trade with the United States in 1918 amounted to $292,000,000, and our exchange rate is 5⅛ per cent. The recommendation by the finance minister of Canada to meet that situation was 'increased production and thrift.' The war made it necessary for Canada to mortgage her resources, human and material, for the purpose of carrying on. The obligations were loyally and willingly assumed, but we are now confronted with the question—How is the liability to be financed? Will 'increased production and thrift' accomplish this?

"The imperative need in Canada to-day is a national economic policy based on the scientific development and utilization of our natural resources. An outstanding feature of that policy should provide for participation by the state in the results of that development, small in the initial stages, but in an increasing ratio as development and revenue therefrom advances. Canadian credit in general would benefit from such a provision for participation, and, should the proceeds remain the property of the Dominion, a sinking fund for the discharge of federal indebtedness would be created. The necessity for such a policy is evidenced by the fact that we import 98 per cent. of our petroleum products at an annual cost of 30 millions of dollars; 95 per cent. of our iron ore and iron products, at a cost of 177 millions of dollars; and over 50 per cent. of our coal, at a cost of 71 millions of dollars, making a total of 278 millions of dollars annually drained from Canada for those three minerals. That amount constitutes the major part of our adverse balance of trade. Canada is richly dowered in coal, oil and iron. To retain those millions of dollars in Canada, to extinguish the adverse balance of trade, to make Canada industrially independent, no time should be lost in inaugurating a policy for the development of our raw materials.

"For the successful carrying out of a policy formulated for the development of our natural resources, the co-operation of men of scientific attainments is essential. In 1916, in urging the development of our resources, I suggested that provision be made in the case of a research subsidized by the government and leading to a discovery, invention, or the improvement of a technical process, protecting the author in the ownership thereof. As government aid had, at least, materially contributed to such discovery, invention or improvement of a technical process, provision should also be made for a royalty to the government on its use for the purpose of maintaining a national research fund.

"The creation by the Alberta government of a ministry of industry, and the calling of this industrial congress by the Industrial Development Association of Alberta, whose guests we are, is an outstanding recognition of the value of Alberta's natural resources, and a realization of the urgency for their immediate development.

"The Dominion of Canada ranks second among the nations of the world as regards its potential coal resources, which have been estimated at 1,234,269 million tons, of which 1,059,927 million tons, or 86 per cent. of the total, is possessed by the province of Alberta. Furthermore, the total coal in Great Britain and Ireland, Australia, India, South Africa, New Zealand, Rhodesia, Newfoundland, South Nigeria, British New Borneo, has been estimated at 494,961 million tons; consequently, according to the above figures, Alberta contains more than twice as much coal as Great Britain and her other possessions within the empire."

The speaker then showed how coal had contributed to the industrial development of England, Germany and other countries.

Summarizing the Industrial Congress sessions held in Calgary, H. A. Lovett, K.C., president of the North American Collieries, called on the people of the west to devote their whole energies to the work of development, in order that the immense natural resources may be developed and that the burden which has been imposed by the great war may quickly be removed. Mr. Lovett uttered a warning note against the adoption of any plan of development without complete investigation, since "economic chickens come home to roost." He declared the future progress of the country, east and west, depended on the people as a whole, and that no single section of the country, be they owners of capital or workmen, should presume to dictate to the majority. The laws of Canada should be so developed that there should be no artificial barriers which could prevent the son of poor parents rising to the highest position in the land, as Premier Lloyd George, Lord Shaughnessy and many others born in poor circumstances under the British and American flags had done. Commerce should be regulated by such tribunals as would see that justice must be done to all.

The closing sessions of the Congress were held in Edmonton on August 15th. The delegates were entertained at a banquet in the Macdonald Hotel given by the Board of Trade, at which A. M. Frith, first vice-president, presided. Short addresses of welcome were given by Mayor Clarke and James Ramsay, M.L.A. An address by Dr. John A. Allen on the mineral resources of Alberta was interesting and instructive. He pointed out that the mineral resources of the province stood second in the matter of basic wealth, the first place going to agriculture. The last few years had seen great strides toward the development of natural resources of Alberta, he asserted, the value of production in 1917 being computed at $16,000,000, and in 1918, $24,000,000. He considered, however, that the vast wealth was yet unknown, and that the north must be looked to for the full determination of the metallic wealth of the west. Here the indications were most favorable. The clay products were so extensive that it has not been possible to develop them. The war caused some hindrance in the matter of production in this regard for while the value of the products produced in the province in 1912 amounted to one and a half million dollars, at the end of 1917 the output had decreased to half a million.

DOMINION FIRE CHIEFS' CONVENTION

The 1919 annual convention of the Dominion Association of Fire Chiefs met in Calgary on August 19th for a four-day session. There were close to one hundred delegates present. A good programme had been prepared, and the city of Calgary, through Fire Chief Smart, spared no effort to make the meeting a success. Among those present on the first day was Fire Chief Healy, of Denver, Col., who, in addressing the conference, laid emphasis on the necessity of fire chiefs having a knowledge of building conditions. Mrs. Pritchard, wife of Fire Chief Pritchard, of Chatham, Ont., spoke on how carelessness in the home was responsible for many fires. Some of the addresses appear in full in this issue.

LIFE UNDERWRITERS' CONVENTION

Over three hundred delegates registered on the first day of the Life Underwriters' Convention in Calgary, which lasted from August 19th to 22nd. This is a good attendance, considering the fact that many eastern members were unable to take such a long journey. On the first day, after the general formalities and the address of President P. A. Wintemute, of Calgary, an address was given by Mr. Reany, of Edmonton, on part timers, in which he referred to them as being parasites upon the producing members of the profession. At the close of this address, on the motion of Mr. A. R. Darker, of the Canada Life, and seconded by W. T. Hart, of the Policyholders Mutual Life, the following resolution was moved: "This convention of Life Underwriters goes on record as opposed to the employment of the part-time agent in cities or towns of five thousand population or over, and that this question be referred to the executive committee with a view to securing the co-operation of the Life Officers' Association with the above object in view."

The convention was carried out very nearly according to program. A cordial welcome was extended by Mayor Marshall and the members of the Calgary Life Underwriters' Association. Several of the addresses appear in this issue.

CAPT. WILLIAM WHITE, of Vancouver, B.C., has been appointed secretary of the Board of Commerce at Ottawa.

INDUSTRIAL CONDITIONS AND INTERNATIONAL COMPETITION

THE introduction of material betterments in the conditions of industry in any country is limited by those of the same industry in other countries. This is especially true of the great basic industries such as agriculture, the iron and steel industry, and many branches of manufacturing. Where the market for a product, as is the case with these industries, is world wide in extent, a slightly lower cost of production in one country will give it distinct advantages in the struggle for expansion.

Substantial differences now exist in industrial conditions among several countries which are competing for control of foreign trade. In the English speaking countries the hours of labor are longer, and wage scales higher, even in proportion to the cost of living, than in Japan, China, Russia and most of the South American countries. This has been the case for a long time past, but was more than offset by greater efficiency in production, with the result that they have outstripped other countries in securing international trade. The United States has taken the lead in this direction; in Great Britain, which did not adopt new and more efficient methods quite so readily, hours of work were longer and the wage scale lower. Germany accomplished much by a ready application of science, a still lower standard of living, and the governmental support of industry by means of revenue derived from its citizens in other ways.

The past few years have introduced new factors into this situation. Modern methods have been adopted by countries which still retain the old conditions of industry. This combination results in a serious handicap to those which have cultivated a high standard. Then on top of this comes an entirely new program of labor in Great Britain and America, which demands higher rewards without offering in return a corresponding increase in efficiency. The result is new costs of production which preclude successful competition outside the tariff wall, and even some loss of business within it. The withdrawal of capital, unemployment, and a high cost of living follow. As a concrete example of this phenomena, imports into Canada of Japanese goods, mostly manufactures, have increased from $8,469,255 in April, 1917, to $13,254,724 in April, 1919. This increase has taken place in spite of the substantial tariff protection afforded to domestic industries, an Imperial preference to British industries, and greater proximity of those of the United States.

With nations as with individuals there is a process of evolution which eliminates those which cannot offer a sufficiently attractive bargain. It is perhaps fortunate that there are now actively in the field countries which have preserved a comparatively low standard, for their competition sets a limit to the pursuit of gross material betterments with much the "leading" countries are occupied. Until we are prepared to submit to sterner tests of ability the field of foreign trade is practically closed.

Referring to competition of these countries, A. E. Middleton Hope, C.A., writing in the Canadian Chartered Accountant, says: "The growth of industry in these countries on a large scale, with their teeming millions, working long hours and at ridiculously low wages, would enable their manufactures to be imported into the more advanced countries at prices much below the cost of manufacture in the latter unless a very high tariff were imposed against them, and the present mind of the masses in these countries is directly opposed to the imposition of tariffs high enough to prevent the import of goods when obtainable at much lower figures from outside. In consequence, any improvement in the standard at present enjoyed by the more advanced countries is limited by the opening up of the countries of the east and their low standards. The only hope, then for maintaining the standard already attained by the more advanced nations is the raising of the standard in the backward nations. It might be truly said that the progress of civilization is being retarded by the slow development of these ignorant peoples."

The ability of a government to improve conditions is, on the other hand, strictly limited. In fact, most cases of state interference have resulted in more harm than good. Dealing with this point, the above mentioned writer says:—

"It is essential to recognize the limitations of state control of the machinery of production; and, because of the growing international status of capital, legislation designed to restrict and unduly control capital would cause capital to seek unfettered investment elsewhere. The fundamental requirements of any better relation is that labor shall become efficient or it cannot receive more than it is now getting. Capital must go on accumulating in order to pro-le investment in the machinery of production to ensure employment for the growing population. The incentive to thrift must still be security and a fair return. Brains are necessary to management and must be suitably rewarded. Brawn is just as much an investment in industry as capital or management, and must be accorded a return commensurate with its zeal and energy.

"It is necessary that the elevation of the composite intelligence of the mass of workers must be raised, so that their intelligence may be directed to the improvement of the methods and tools they use in order to increase output or efficiency; in other words, so that the growth of invention and skill shall result in the production in a shorter time than is now generally being done of the needs of existence for every twenty-four hours. Competition, without universal minimum standards, will enable unscrupulous competitors to prevent the maintenance of decent living. International standards must be raised before the best good can accrue to the people of any nation."

WHAT CANADA NEEDS TO ATTRACT CAPITAL

THE Wall Street Journal, in its issue of August 15th, contains a critical article on Canadian conditions. Dealing first with railroads, the writer finds that sentiment is turning against public ownership. In spite of heavy capital obligations and war difficulties, the Canadian people are living by a higher standard than ever before. Coming to the immediate future, he concludes that "two things are necessary for the development of Canada which should make the burdens of to-day seem comparatively light in future years. One of these is immediate, and the other cannot be taken in hand too soon. Canada's export business is in need of an immediate credit of at least $60,000,000 in the United States, to which country Canada is still a debtor, although probably not to the extent many Americans suppose. She is at least out of debt to the mother country, with a balance in her favor; and on her sound present position, as shown by the banks and the industrial corporations, the crops, present and potential, the mineral wealth and lumber, Canada may be said to be, upon the whole, the country which the financial interests of the United States could best help with promise of reimbursement and a gain far exceeding the mere interest on the financial assistance.

"The second requirement is the encouragement of immigration. Every intelligent head and useful pair of hands which the war-stricken countries of Europe can send is sure of a welcome and an opportunity for independence and increasing reward. Canada, like the United States, built railroads out into the wilderness far ahead of the settler, and it is to be noted, as anyone familiar with the American transcontinental systems can testify, that in no case are these Canadian roads built through deserts. The land throughout Grand Trunk Pacific is available for settlement. We know that American transcontinentals went through many vicissitudes before they attained the secure position which only ignorant government operation and internal Bolshevism could impair. It is an old story that pioneers have had, for the most part, their labor for their pains, especially in American railroading. But they did, as Whittier says, 'clothe the waste with dreams of drain, and on midnight's sky of rain, paint the golden morrow.' Canada has resources which can carry a population many times multiplied.

"It has already been said in these notes that there is in financial circles an underlying thought of caution—not exactly of foreboding—which may be easily understood. The combined influences of high wages, low per capita production through shorter hours and sheer laziness, the high cost of living, largely consequent and now about the same as in representative districts of the United States, have, with financial inflation, created a condition where something must give way. The deflation of labor is obviously as urgently needed in Canada as it is in the United States. The head of an independent financial institution, associated for a number of years with the flotation of important and successful enterprises, said he could place at this moment $200,000,000 of new capital with every prospect of attractive and permanent return, but that he could not conceal from himself the threat involved in high commodities and high wages, nor ask for public subscription until he could see his way more clearly.

"He did not look for any help from the politicians, and this is true of all business men here and probably elsewhere in Canada. Experience has shown that such efforts, however well meant, create new difficulties, outnumbering by far those they ignorantly endeavor to solve. So far from courting government assistance in the solution of the reconstruction problem, business men of all ranks and every branch of enterprise are only too anxious that Ottawa and the provincial governments shall keep their hands off."

TIMELY ADVICE FROM NEW ZEALAND

STATE ownership is falling into disfavor, even in its own strongholds, according to Robert Bell, a prominent New Zealand newspaperman, who has just been in Canada. It is particularly bad for a young country, he says. In an interview, Mr. Bell drew a gloomy picture of the effects of state ownership in New Zealand, where he claimed it had been carried to excess, and declared that, while it might be advisable in the case of the mails, the telegraphs, the telephones and the savings banks, the interests of a country that had just entered upon the development era were best served by private ownership, with an adequate system of state control, in the form of commissions, like the Canadian Board of Railway Commissioners and the new Board of Commerce, to prevent exploitation of the public for undue profits.

"Canada is making an incursion into state socialism," said Mr. Bell. "She has recently taken over the Canadian Northern Railway, and has in contemplation the purchase of the Grand Trunk. Now in New Zealand we have had state socialism all through our history. We have the state post-office, state telegraphs, state telephones, state savings banks, state life insurance, state fire insurance, state hotels, state coal mines, and possibly other public utilities which at the moment I don't remember. The more I see of the state's operation of these utilities, the more I feel that it would be much better to have company ownership, with state control, as opposed to state ownership.

"Take, for instance, our railways. There is no expansion in our railway system on a common-sense basis, because all the extension is done under political influence. We have about a score of railways under construction in different parts of the country, and the rate of progress is about one mile per annum. Consequently, our railways are not linked up. They end in the air, so to speak. The capital sunk in them is non-productive, and the politicians build another mile or two simply to satisfy local clamor. As one particular instance, take the railway intended to link up the east and west coasts of the South island. That railway has been under construction for the last thirty years, and is not yet completed, although the total distance would only be about fifty miles. If Canada is anxious for a similar state of affairs, then let her by all means go in for state ownership of railways. Travelling as I have done over the Canadian Pacific Railway system of railways three or four times, I cannot but help contrasting the manner in which these railways are operated, the fine service which they give to the communities using them, the splendid hotels which the company has built at different points, and the comfort which travellers using these lines enjoy. And the comparison is very much to the disadvantage of the New Zealand railways. In my opinion, it would be simply a disastrous thing for this young and expanding and prospering country if the Canadian Pacific Railway should also be taken over by the Dominion government. Kept as a private corporation, it will provide the necessary competition for other railways in the country being run on common-sense, efficiency lines. For railways and public utilities generally I would advise, not state ownership, but state control in the form of commissions."

COMMERCE BOARD READY FOR WORK

Chairman States that Ordinary Judicial Procedure Will Not be Observed

THE Canadian Board of Commerce has now been constituted and will shortly be available for such complaints as may be laid before it. It will act under the Combines and Fair Prices Act, and is given power to institute investigations on its own motion or at the request of the responsible parties who bring subjects to its notice. The chairman states that the procedure will be of an informal character. Preliminary investigations of any complaint will, of course, be made before the board moves to the place in question. On August 11th, after holding its first session in Ottawa, the board issued a statement reading in part as follows:—

"All the records made under the previously prevailing investigation system will be secured and taken over by the board, and, in addition, as soon as the board can make the arrangements, and before the lapse of many weeks, the full board will, in joint session, visit all the principal cities of Canada and conduct therein open courts of enquiry into cost and price conditions and the means of remedying these conditions. Only such delay will ensue before the board sets out as is imperatively necessary in order to enable intelligent enquiry. In the meantime, the board is organizing its personnel and preparing its itinerary.

"When the intended sittings are held, they will be open to all who wish to complain or testify, or defend allegations made. No formality whatever, nor any notice will be required. Afterward, from the information on hand and to be gained while on its itinerary the board will take such action as to it should seem proper by way of general remedy. Special remedies will be applied as the occasion for the application arises."

Statutory Powers

Provision is made in Section 23 of the Combines and Fair Prices Act that all proceedings instituted or had under order-in-council P.C. 3,069 of the 11th day of December, 1918, but not fully concluded shall continue, and may continue under this part of this act, whether the board (Board of Commerce) be substituted for the minister of labor, as fully and effectually as if said order-in-council continued in force, notwithstanding the decision thereof. Section 19 of the act constituting the board gives the board power, by notice in writing under the hand of its secretary, to "require any person who operates, controls or manages any cold-storage plant, packing house, cannery, factory, mine, warehouse, or other premises in which or in any part of which any necessary of life is prepared, manufactured, produced, or held by such person for himself or for another, or who in any manner deals in any necessary of life, to make and render unto such board or the Dominion Statistician, within a time set in such notice or from time to time, and such person shall make and render unto such board or statistician, precisely as required, a written return under oath and affirmation."

The sub-sections set forth in detail that the person notified shall show the species and amount of any necessary of life held at any indicated time or times; the time when any or all of such necessary of life was prepared, manufactured, produced, acquired or taken into possession; cost of such, including all charges and expenses affecting same; price at which it has been sold, or, if unsold, the price for which it is held, and other such information as the board may require, including a full disclosure of all contracts or agreements affecting the prices of necessaries of life or the time for which they are to be held, or limiting the quantity which should be sold to any one buyer or combination of buyers, or within any limited district. It is further provided that if the board's order is ignored by any person dealing in or holding necessaries of life, and a return is not made within the given time, the board may appoint examiners and investigate the business and examine all papers, books, premises and records of the person failing to make returns, and the same course may be followed if the returns made in the judgment of the board justify such action. The act also provides that no one may impede the board or its examiners, and every person required to give evidence touching any case before the board shall attend and give evidence whenever so required.

The effect of the order made on the 14th inst. is that the office of Cost of Living Commissioner being now abolished, the system of investigation established by Mr. O'Connor in 1916, and continued by him until his resignation two years later, is fully restored and will be augmented in its scope. So far as possible, the former staff will be gathered together under the jurisdiction of the board.

ALLIANCE ASSURANCE COMPANY, LIMITED

Total premium income of this company, for the year 1918, was $23,451,445 and interest derived from investments, $4,665,410, making a total of $28,116,855. Total assets at the end of the year were $134,581,915. Of this total $88,576,938 represents life assurance and annuity funds and $11,128,535 fire insurance funds. The paid-up capital is $5,000,000 and the company does fire, life, marine, casualty and miscellaneous business. There is a balance of $4,677,658 in the profit and loss account. These figures are translated from sterling at the rate of $5 to the pound. The Canadian branch is managed by Mr. T. D. Belfield, Montreal.

OBITUARIES

MR. LOUIS R. GRIMSHAW, secretary-treasurer of the Canadian Crocker-Wheeler Co., Ltd., St. Catharines, Ont., died recently.

MR. DUDLEY L. HILL, late chief accountant of the Dominion Bank, head office, Toronto, died last week at Cedar Island, Orillia, Ont. He had been chief accountant since 1887, leaving that position last December on account of failing health.

MR. JOHN R. FOLSETTER, of Ayr, Ont., died last week. He was manager for the past ten years of the local branch of the Standard Reliance Mortgage Corp., in which he was a heavy stockholder and bondholder.

ONTARIO HYDRO WANTS TO BE REIMBURSED

Formal application has been made to the Minister of Finance by the Hydro-Electric Power Commission of Ontario, asking that the Dominion government reimburse it approximately $5,000,000 for the extraordinary war expenditures incurred on unavoidable extensions due to the necessity of providing power on a large scale for the manufacture of munitions and other materials for war purposes in order to meet the demands made by the manufacturers and the power controller. In support of this application the commission has forwarded to Sir Henry Drayton a file containing the voluminous correspondence and orders covering the period when the extentions were made. It is pointed out by the commission that the power controller, under whose orders much of this work had to be undertaken to meet the needs of the munitions manufacturers, had authority only over Ontario. This control was exercised, it is claimed, almost solely over the Hydro-Electric Commission. In such cases as private companies ordered to make extensions, it is said by Sir Adam Beck that they were either reimbursed by the Imperial Munitions Board or the manufacturers whom they supplied.

In making this application to the Dominion government the commission states its belief that the Dominion government will recognize that the financial burden of the war should be borne by the people of the Dominion as a whole, and not by one province or group of municipalities who happened to be in the fortunate position, owing to the existence of cheap hydro-electric power, of contributing so largely to the defence of the Empire by the manufacture of these munitions.

Bank of Hamilton

Dividend Notice

NOTICE is hereby given that a Dividend of Three Per Cent. (Twelve per cent. per annum) on the paid up capital of the Bank, for the quarter ending 31st August, has this day been declared, and that the same will be payable at the Bank and its Branches on 2nd September next.

The Transfer Books will be closed from the 20th to 31st August, both days inclusive.

By order of the Board.

FIRE PREVENTION ORGANIZATION

An Address Delivered Before the Convention of Fire Chiefs at Calgary, Alta., August 19th to 22nd

By A. C. Cameron
Chief, Fire Department, Oshawa, Ontario

I HAVE always had great faith in fire prevention, or what may be termed "carefulness," and with this in mind, when appointed chief, I immediately set to work and drafted a few amendments to our local fire prevention by-laws which were passed by our city council. One was that the use of iron receptacles for the destruction of all refuse in the fire limits, was not to be left burning after business hours. I am pleased to say that we have not had one fire in two years caused by burning refuse being left to blow in fences and buildings and set fire to same as formerly. Now we have the by-law it is up to the fire department to see that this receptacle is purchased and kept in proper condition for use at all times. This was followed by an inspection of all buildings and basements in the fire limits and the conditions I found things in, with regard to fire prevention, were comparatively ridiculous. In several cases it was almost impossible to go through some of the basements because of piles of loose paper, rags, boxes and ashes.

Inspection brought about a great clean-up of all such places and I also wish to state that we inspected all chimneys, furnaces and furnace pipes. This kept the tinsmiths going for a few days. We also suggested three new furnaces, to replace the old ones, which were installed in December. In every case, where a place was found in a very defective state, it as followed up every two or three days until these conditions were remedied. At this point we started to reduce the number of fires, when the business men began to realize that our intentions were good along these lines, and in the spring of 1918 we arranged with the editor of our local paper to assist us in our efforts to prevent fires. The editor, being a popular citizen, and representing an influential paper, rendered us great assistance, inasmuch as he permitted the free use of a portion of its columns in which to suggest certain things in the way of fire prevention to the public, which we effected each week. In this way we brought about a feeling of carefulness in every factory, store and private dwelling, and by August, 1918, we had things improving very nicely. When the insurance underwriters raised our rates, this offset things for a while, but in a few days our convention was held in Toronto and a fire prevention bureau formed. This was followed by the organization of the Ontario Fire Prevention League, and with the strong support of these two organizations, working to the one objective, and being properly advertised throughout the country, and the setting of one particular day, October 9, for fire prevention day, gave us the exact assistance we required. The people commenced to realize that it was not a local campaign, but one of great strength and far-reaching in its effects. To start the thing moving for this big clean-up day, October 9th, we used the press, as I have previously stated. The matter was taken up with our city council, board of trade, and school board, and I beg to say that they rendered us great assistance to get things going.

Fire Prevention Publicity

On October 7th, we had 4,000 dodgers printed, announcing that there was to be a big street parade at 8.30 p.m., consisting of bands and the fire-fighting apparatus, also that the firemen would give free exhibitions on the street, after which they were addressed by the mayor, councilmen and other citizens on "Fire Prevention." These dodgers were distributed by boys to every employee coming from the factories and all the business men of the city. I must admit that in this way the people seemed to grasp the real meaning of fire prevention, and on October 9th, this was quite evident by the way the town was improved in appearance. In November, 1918, we had our general inspection of all buildings in the fire limits and, to our amazement, we found everything in first-class condition and we know that these conditions still prevail, as we give them an unexpected call every week. I here must admit that our great success this summer, in the way of fire prevention, has been brought about through our local league. The following is a copy of the agreement the citizens have signed:—

"We, the undersigned, hereby agree to become members of the Oshawa Branch of the Ontario Fire Prevention League, and in so doing promise to live up to the requirements of said league in every respect. It will be our duty to offer every assistance in our power to protect Oshawa properties against fire. This, we agree to do, first—by placing our own property in as near a fireproof state as possible, and, secondly—by assisting our neighbors to do likewise, and we agree to report any one neglecting to perform the above duties in the way of fire protection."

I feel sure that they are all living up to it. I can only judge the good work it is doing by the reduction of fires to one-third of what they were in 1917, and the reports which the fire department receive from members every few days informing them that some individual is not living up to the requirements of the league. All reports from members are kept strictly confidential and the wrongdoer wonders why we get wise to what is going on, so quickly.

Organization

The organization as we have it consists of the fire department, board of trade and school board, backed up by our city council and public-spirited citizens.

I may say that the power of suggestion to the public on fire prevention lies within the walls of our association. What I mean by this is that the fire chief makes a real study of fire fighting and fire prevention, which is not thought of by the average individual and in this way as an organization possessing this great power and knowledge which will enable its members to pass it on, through the local fire departments, to the citizens of our country. We must expect great results in the future along the lines of fire prevention.

In my humble opinion to accomplish what we are working for, there should be the closest co-operation possible between our association and the fire marshal. With this we can accomplish much. I admit that we have had great success in the fire prevention movement, but not to the extension that we have forgotten our duty as a fire department, inasmuch as we have our fire drill every two weeks, and in April we added to our equipment one 40 horse-power motor truck, which will accommodate 1,100 feet of hose, 6 men, equipped with ladders, axes, bars, lanterns, play pipes and chemicals. With them we possess a fair feeling of preparedness.

Electric Wiring

I feel that I am in a position to speak in this respect with more or less authority, owing to the fact that I have been engaged in this business for many years and am a practical man. I have grown up to this line of work and realize the great importance of the proper installation of all electrical appliances and wiring of all kinds, also the great danger of fire if the proper installations are neglected. I am an electrical contractor and I must say that the Hydro-Electric inspection department of Ontario is bringing about great changes in the way of fire prevention along these lines with greater safety to the public and the users of electricity. There was a suggestion made by Chief Ten Eyck, of the Hamilton fire department, in his address of last year, when he suggested the licensing of all electricians. I must say that this suggestion should receive the hearty support of every member of this association. By making all electricians pass an examination and take out a certificate, would do away with the so-called electrician, or commonly known to the legitimate contractor, as a "piker." This, in time, would give the inspection department greater assistance and render less trouble for the inspectors, which I believe would be greatly appreciated by them, and, at the same time, render better and safer service to the public. This, in my opinion, is a very important question worthy of immediate attention, and some action which would remedy all such conditions.

EMPLOYMENT CONDITIONS IN CANADA

Apart from Strikes, Reports Show Very Little Change in Number Employed in Canadian Industries

WEEKLY reports from employers to the Employment Service of Canada, Department of Labor, indicate that there was little change in the volume of employment, exclusive of unemployment, due to industrial disputes, during the week ending July 26th. There was considerable increase during the week ending August 2nd, however, and for the week ending August 9th further increases were anticipated.

Returns for the week ending July 26th showed that 3,082 firms reported to the Employment Service of the Department of Labor. Of these, 177 were in the Maritime provinces, 766 in Quebec, 1,676 in Ontario and 463 in the west. These firms had 444,173 persons on their pay-roll, compared with 444,396 the previous week, a decline of 223 persons, or .5 per cent.

Returns for the week ending August 2nd showed that 3,306 firms reported, of which 289 were in the Maritime provinces, 861 in Quebec, 669 in Ontario and 487 in the west. These firms had 455,590 persons on their pay-rolls, compared with 451,568 the previous week, an increase of 4,002, or .9 per cent. A net increase in their staffs of 1,312 persons, or .3 per cent., was anticipated for the week ending August 9th.

During the week ending July 26th the minus industries (those that registered net decreases in the number of persons employed) were: Textiles, lumbering, commercial and mercantile occupations, the textile group registering the largest net decrease. Building and construction, vehicles, wood products, railway construction, food, drink and tobacco, commercial, leather and miscellaneous groups registered increases.

The plus industries (those that registered net increases in the number of persons employed) during the week ending August 2nd were: Metals, pulp, paper and printing, quarrying, vehicles, railway construction, railway operation, commercial and miscellaneous. The woodworking, clay, glass and stone and lumbering groups registered decreases.

For August 9th declines were anticipated in the vehicle, railway operation, railway construction, and food, drink and tobacco groups, while gains were expected in all other groups, the lumbering group having the largest anticipated gain.

In the Maritime provinces as a whole there was a decrease of .8 per cent. in the number of persons on pay-roll for the week ending July 26th, followed by an increase of .5 per cent. in the number of persons on pay-roll on August 2nd. During the week ending July 26th gains were registered in the textile, pulp, paper and printing, building and construction, chemical and commercial groups, all other groups registering decreases. The increases for week ending August 2nd were largely in the quarrying and railway operation groups.

In Ontario and Quebec for the week ending July 26th there was very little change in the number of persons on pay-roll, but for the week ending August 2nd there was an increase of 1 per cent., with an anticipated increase of .4 per cent. for the week ending August 9th. The increase for the week ending August 2nd was in the textile, metal, pulp, paper and printing, chemical, food, drink and tobacco, leather, vehicles, quarrying, railway construction and commercial groups.

The four western provinces reported very little increase in pay-roll for July 26th over the preceding week. For the week ending August 2nd an increase of .6 per cent. was reported, with an anticipated increase of .2 per cent. for the week ending August 9th. The building and construction, clay, glass and stone products, railway construction and leather groups registered decreases, while all others registered increases.

The prize of $100, offered by the Motor Union Insurance Co., Ltd., for an essay on some insurance topic, has been awarded to S. J. Bastedo, of the Toronto office of the London Guarantee and Accident Co., Ltd.

UNION BANK CONFERENCES IN EAST

A further meeting of Union Bank branch managers was held in Toronto on Wednesday, August 20th. This conference follows up similar gatherings in western Canada, which have been referred to recently in these columns. This was attended by representatives from throughout Ontario. On Thursday a similar meeting was held in Montreal, which was attended by officers from the Quebec and Maritime provinces branches.

LARGE SUM OF MONEY STOLEN

Some time between Saturday, August 9th, and Tuesday, August 12th, the sum of $50,000 in paper currency was stolen from the Edmonton post-office. The parcels were addressed to the Merchants Bank, Edmonton, to which they had been sent by the Merchants Bank of Winnipeg. In addition to being registered, they were also insured. On August 14th two men were arrested in connection with this theft. Of the sum stolen, $25,000 was in $5 bills and $25,000 in $10 bills.

CONTINENTAL INSURANCE COMPANY

Total assets of the Continental Insurance Co., of New York, on July 1st, 1919, were $39,009,088, according to the semi-annual statement, which appears elsewhere in this issue. Most of the assets consist of bonds and stocks, valued at actual market value. Cash on hand totals over $3,000,000. After providing for unearned premiums and other liabilities there is a surplus to policyholders of $21,559,997. The paid-up capital is $10,000,000, which is considerably exceeded by the net surplus. The company's Canadian business has expanded rapidly under the management of Mr. W. E. Baldwin, Montreal. During the year 1918 the premium income in Canada was $605,059, of which $412,916 was net premium income. Losses paid during 1918 were $221,654.

MONEY MARKETS

Mont. funds	par	10c. pm	⅛ to ¼
Sterling—			
Demand	$4.31	$4.31	Nominal
Cable transfers	4.32	4.32	Nominal

Rate in New York, sterling, demand, 4.1325. Erratic.
Bank of England rate, 5 per cent.

MINIMUM WHEAT PRICE NOW FIXED

On August 18th Sir George Foster, acting prime minister, announced that the Wheat Board of Control had recommended an initial payment of $2.15 per bushel to farmers for wheat on the basis of No. 1, Northern, Fort William. The government has approved of this price. Earlier reports were to the effect that an initial price of $1.75 was contemplated.

Agriculturists claim that recent conditions will result in a reduction in the estimated wheat crop of the world and that the market price will, therefore, exceed that fixed as a minimum by the United States government. They also point out that as production costs have been high in Canada and the yield is poor in most sections of the west, the initial payment should be as high as it is in the United States. The Canadian Council of Agriculture presented its case in a letter dated August 14th, addressed to Mr. James Stewart, chairman of the Canadian Wheat Board, Winnipeg.

THE ALTRUISTIC IN LIFE INSURANCE

An Address before the 1919 Convention of the Life Underwriters' Association of Canada at Calgary, Alta., August 19th to 22nd

By T. Hilliard

President, Dominion Life Assurance Company

ALTRUISM has been defined as that quality of mind which is actuated and directed toward the well-being of others in contrast with egotism, which implies self-seeking as the primary motive of conduct. It is essential to altruism that it should, consciously and intentionally, seek the good of others, and not merely do so by instinct or accident.

Life insurance is one of the very few business transactions which can be fairly placed in the class just defined. Normally, the man who seeks and pays for a policy of life insurance upon his own life does so, primarily, for the protection of others near and dear to him, it is true, yet their welfare is the chief and essential motive upon which he acts. And this is true, even when the policy is of the complex sort known as endowment insurance, where there is a considerable probability that the insured may personally live to enjoy the benefit provided. For the chance of his dying before the maturity of the policy is usually considerable, and the provision for that event is always an important consideration in the mind and purpose of the applicant. It is clear, therefore, that the altruistic element bulks large in the mind and intention of the assured.

Does this quality exist in the thought and purpose of the solicitor, who, in the vast majority of cases, is the effective instrument in bringing about the very existence of the policy contract? I am persuaded that the perception they have of the good they are instrumental in doing, the incalculable difference between the condition of the well-insured man's family and that of the unprotected in many cases is one of the strongest of the motives actuating the noble army of life assurance solicitors. Quite true, they are in the business to make a living for themselves, and properly so—the laborer is worthy of his hire in this as well as other honest and useful avocations, yet the good they bring to others is not absent from the thought of any worthy member of his honorable profession.

Profession, did I say? Very well; it is not a slip of the tongue. Let us examine the matter a little more closely and see whether this honorable term may not find its justification upon a careful examination of the facts.

Business and Professional Service

The gainful vocations of mankind may be roughly divided into four classes. First, unskilled laborers; second, artizans, or skilled workmen; third, middlemen, those engaged in the exchange or distribution of products or money; fourth, the professions. Now upon examination it will be found that, while these classes shade into each other to some extent, there is one feature common pretty generally to the first three which is not found in the fourth to any marked extent. An example or two will indicate my meaning. The shoemaker is a tradesman, a fair type for my purpose, of class two. When he makes and supplies his customer with a pair of shoes and receives a fair price therefor, a fair trade has taken place on a fifty-fifty basis—value received both ways, each man getting what he wanted more than that which he gave, and both satisfied. Similarly, when the merchant or the banker, whom we place in class three, the distributor class, has effected a transaction, the parties are on an equal footing. The benefit each way is equivalent to cost. The same is true of the unskilled laborer.

Now consider the profesional man. Take the physician, for example. He is called to the bedside of a man sick with a disease threatening his life. The doctor applies his skill and knowledge to the case—a life is saved. The doctor gets his fee—perhaps. It may be five dollars, it may be fifty. But whatever it may be, is it an equivalent for his service?. Surely not. There is obviously no equivalence in this matter. The service rendered and its value are incommensurables. They have no common denominate, dollars against a man's life. You cannot weigh them on the same scales.

A short time ago I heard a story concerning a great man of to-day told by an intimate friend of his. A physician in Manchester, England, was called upon late one night by a man evidently, judging by his clothing, not very well off in this world's goods, who urgently summoned him to come at once to see his child, who, he feared, would die before morning if he could not secure medical aid. The doctor was very tired, had been up all night the two previous nights, and needed rest. But the man was not to be denied, and the doctor went. In a very poor lodging in a poor street he found a woman with a little boy in her arms, and a hurried examination showed the doctor that the little fellow was, indeed, in grave danger. He applied suitable treatment, stayed all night with the anxious parents, and when morning came the crisis was passed and the little fellow rapidly improved and grew up to be—can anyone guess?—Lloyd George, Premier of Great Britain.

Can anyone tell us how to measure the value in money of that night's work of that physician? If it be a question of figures, shall we turn it over to the actuarial department? Suppose they try the binomial theorem or the differential and integral calculus on the job.

In like manner, if we try to meausre the work of the lawyer, the minister, the teacher or the nurse in terms of money we shall find the same incommensurability in more or less degree. That, I think, is the main distinction between the professions and the other classes I have mentioned.

Now we are ready to consider life assurance soliciting in the light of the same test.

Life Agent's Service Cannot be Measured

A life insurance solicitor finds a man in receipt of a moderate income, whether by way of salary or otherwise, with a wife and several little ones depending upon his income for support, but with very little actually saved up. He succeeds in placing a policy on this man's life, providing a monthly income for the wife in case of his death of one hundred dollars per month. The solicitor gets a tidy little commission for his work, and it is sufficient to pay him fairly well for his time and efforts. He goes away satisfied and pleased. Has he received a real equivalent for his work? Possibly, yes, based on time and effort given to that particular man. But was it equivalent to the benefit to the other party? Follow up the transaction a bit further. Some time elapses, be it little or much. The event insured against occurs. The bread-winner is taken away, the estate is wound up. It did not take much winding. A modest home, moderately furnished, and a few dollars, which mostly went in paying doctors, nurse and funeral expenses, and a mother and four little ones would have been left to battle almost hopelessly with the problem of living if it had not been for that blessed policy. Oh, with what thankfulness that woman cashes her monthly cheque, for monthly income is surely the safe policy for the average man. With what comfort she realizes that she can depend upon its appearance promptly every month so long as she lives, and that if she should die soon, the cheque will keep on coming for at least twenty years from the time of her husband's death for the benefit of the children.

How will anyone venture to tell me that the value of that benefit to that woman and her family is measured by the commission the agent got? Surely not These two things have no common denominator. You might as well try to multiply six horses by twelve yoke of oxen and find the product in camels as to measure these two things by the same footrule.

If this be so, I take it the life assurance solicitor belongs to the professional class of mankind, and need not take a lower status than is accorded in the esteem of the community to the gentlemen who are learned in the law or in medicine, and so forth.

If you agree with me so far, may I invite you to pursue the enquiry a step or two further? We have high authority

for believing that "to whom much is given, of him much is required." High status implies high obligation. Opportunity and responsibility are equivalances. If we are engaged in a profession, we must be judged by high standards, ethically and otherwise.

Responsibilities of Life Agent

Let us take a glance at some of our obligations. They arise naturally out of our relations to others—our points of contact, so to speak. The solicitor is directly related to (1) his company, (2) his clients, (3) other companies.

To his own company it is clearly his duty to give it the best service of which he is capable, not only in getting a good volume of business, but in so presenting it to the public that he will win for it general good-will. The honor and credit of the company are largely in his hands. He can make or mar its reputation. It is told of Handel, the great composer of music, that he was a large man with a very great appetite. On one occasion he ordered dinner at a hotel for four. When it was ready the waiter found him alone, and naturally asked him where was his company. "I am the company," said the great man; "serve the dinner." So, gentlemen, to the public you are the company, and by you public opinion in relation to the company will certainly be crytallized. It is needless to say that you will not for a moment allow the matter of your commission to influence you to advise, much less press, for the acceptance of a poor risk. Remember always that the medical department is very desirous of increasing the business of the company as far as is consistent with careful selection. It does not turn down your client with malice aforethought. It has a good reason every time for an adverse decision.

Your duty to your clients is easily described. It may be summed up thus: First, to inform yourself as fully as practicable regarding the circumstances, financial, family, etc., of your prospective customer, then to advise him as wisely and disinterestedly as if he were your own son or brother as to the form of policy he should take and the amount thereof. Your experience should enable you to give judicious expert advice as to the kind of policy that will really suit him best. He may have his own view about that already. If so, it would be unwise to antagonize him, but in many cases your client will be ready to take advice from an expert, which you should be, if administered tactfully. As to the amount of policy, most men are underinsured. In general, you will be safe in suggesting a larger amount than the man is thinking of. But it is possible occasionally to load a man up with more than he can carry. Don't do that if you have reason to suspect it. Give the man, if at all possible, the kind and amount you would take if the case were your own. Persistence in that course will bring its reward.

Your duty to other companies is not difficult to discover, though sometimes in practice there is a temptation to swerve from the strict path of rectitude. If possible, do not discuss other companies at all. If you must mention your rivals, as sometimes you must, do not demean yourself by sneering at them or pointing out petty flaws, which may or may not exist. If you do this, you will not only do wrong, which is always unwise as well as wrong, but you will create distrust of the whole system of life assurance in the mind of your client. If he mentions another company, cheerfully admit that the other is a good, reliable company. If he has a policy in it, advise him to continue it by all means. You may claim that your own company is equally good, and if you put the case in this fashion, your chance of securing the application is really much better than if you had been mean enough and stupid enough to carp at the other one.

I need say nothing about twisting. I take it that any mention of this disreputable and, I hope, antiquated practice to this audience would be taken as such an unpardonable insult by every man here that I might not succeed in gettting away with a whole skin. The day of the twister is done. He is keeping company with the dodo and the German fleet, and we may hope that his next appearance will be postponed till that mighty armada again floats upon the surface of the great deep.

Gentlemen, we are a great brotherhood, engaged in the most beneficient business known to mankind. Our calling is a real profession, with the duties, the responsibilities and the honorable standing belonging thereto. In our relations to each other, to our respective companies and to the great host of men, women and children whose welfare and comfort we seek to preserve and conserve, let us never lose sight of the altruistic, the unselfish, the service to others standard that is entrusted to our keeping.

LONDON GUARANTEE AND ACCIDENT CO., LTD.

The 1918 business of this company showed an increase in premiums of £849,012. The net premium income was made up as follows:—

Net premium income on risks current at December 31st, 1918:—

Accident	£ 124,704
Employers' liability within the United Kingdom	53,187
Marine	270,476
Other classes	1,427,876
	£1,876,253

TRADE FIGURES SHOW REDUCTION

Total imports into Canada for the first six months of 1919 were valued at $869,497,503 which is substantially less than for either of the preceding years. Exports are also less than last year. An examination of the detailed figures below will show that the principal reduction in imports is in the case of those from the United Kingdom and the United States. Exports to the former country have, of course, fallen off, but in the case of the latter they have increased.

	Twelve Months ending June		
	1917 $	1918 $	1919 $

ADJUSTING FROM THE ASSURED'S STANDPOINT

An Address Before the 1919 Convention of the Dominion Association of Fire Chiefs, at Calgary, Alta., August 19th to 22nd

By W. G. Wright
Toronto, Ontario

Do not allow yourself to believe that fire insurance policies will provide full compensation for loss by fire. You may pay premiums for ample insurance to cover your loss, but when you meet the misfortune of a fire your policies, their wording and clauses attached, will be put to the acid test by an expert, employed by the fire insurance companies for that purpose, who will approach you in a sympathizing way and extract from you your idea of the value of the property destroyed, its kind and quality, age and price paid therfor.

If it is a mercantile or manufacturing loss, it is likely that the coinsurance clause is attached to the policies. If so the value of all the property insured under the affected policies will play a very important part in the adjustment of the claim, whether burnt or saved, in a damaged or undamaged condition.

For example we will say that there is:—

Property valued at		$150,000
80% insurance required	$120,000	
Insurance in force	75,000	
Deficiency in insurance	$ 45,000	
Loss by fire adjusted at		75,000
Apportionment:		
Insurance companies pay 75/120th of loss	46,875	
Assured's deficiency assumes 45/120th of loss	28,125	
		75,000

Here we have $75,000 insurance and an admitted loss of $75,000, but owing to the 80 per cent. coinsurance clause not having been lived up to by the assured and only $75,000 insurance carried on property that should have been insured for $120,000, he suffers a loss or reduction in his claim of $28,125, although he had as much insurance as he had loss. Therefore, it should be noted that in making up statistics of loss the amount paid by the fire insurance companies is a poor guide and does not always represent the real loss.

In 90 per cent. of the fires where the policies are subject to coinsurance warranties, the assured fails to collect the full amount of his loss.

Have Not Kept up With Values

There has been a general advance in cost of construction and of all commodities during the past few years and the public generally has not increased insurance proportionately to follow and fulfil the conditions of the coinsurance clause, leaving a debatable question as to increased value of property, which has a strong bearing on the amount that the assured will collect in the event of loss by fire.

The average merchant or manufacturer does not check up his property value as he should from week to week or month to month and compare the insurance in force with the value at risk. The majority take stock when it is lowest, compare insurance to stock lists and leave the value of buildings as they were, setting a 3 or 5 per cent. annual depreciation to balance an advance in reproductive value of 50, 100 or 150 per cent., which should be covered by insurance. It is quickly pointed out by the adjuster if there is a claim for fire loss, if the loss is partial and it makes you a coinsurer. But if the loss is total, he will not press this point, and show you that you are a heavy loser over your insurance and help you to make up a claim for total loss. It is not to his advantage to do so. The coinsurance clause is as treacherous as a bear and has to be constantly watched. It has put many a man on the street although he paid for as much insurance as he had loss by fire. It is a complete mystery to the policyholder in its operation; value of property insured and loss by fire, both ends beating against the middle, operated by an expert in the interests of the insurance companies—where may the assured expect to land with such advantages in the hands of the fire insurance companies? Adjusters should be chosen from the highest type of men. The policyholder has little chance and usually relies entirely on the generosity of the adjuster and the companies that carry his insurance.

Let us look at the average adjuster who represents the companies in the adjustment of fire claims. We will concede that he is human, subject to good and bad points that flesh is heir to; he is, generally speaking, selected and constantly employed by the fire insurance companies on account of being astute, resourceful and suave, a good hand at driving a bargain and getting out of a tight place by powers of persuasion, manipulation of values and figures, or all combined. Through constant practice with all kinds of people he is always on the alert to take advantage of circumstances and naturally becomes biased in the interests of those who employ him, and while intending to be fair and just, he often is the reverse. He bases his beliefs honestly on many things that are not facts and will not allow the policyholder or claimant to cause him to change his opinion. The assured in a guileless way discusses the loss, makes admissions hastily as to value and loss, which he would not do under other circumstances. This is all noted by the adjuster who compiles a set of figures which he submits for final settlement, the assured has played into his hand all through, the amount offered in settlement of the claim is not near what was expected. He has been up against stacked cards—the claim is settled—it has not been adjusted—and where is the assured?

Appraisals by competent appraisal companies are very valuable if kept revised to date.

Another important point to be watched in all fire insurance policies is to see that all policies are endorsed assenting to all other insurance on the property. This is usually done by the wording "Further insurance permitted." If there is other insurance without the assent of the companies in the province of Ontario, the statutes say: "The assured shall not be entitled to recover more than 60 per cent. of the loss or damage in respect of such property; if there is other insurance without the assent of the company." In the province of Quebec further insurance without notice to the company voids the policy. Other provinces also penalize for this omission.

It will, therefore, be noted that in all the above cases, not alone the assured, but those to whom fire insurance policies are assigned as security may suffer if the conditions of the policy are not lived up to.

Place of the Adjuster

While the foregoing has referred to the adjuster and his methods, the assured has a duty to perform which, if properly attended to, will obviate a lot of trouble.

There are many other causes by which the policies may be affected: Vacancy without notice to and permission from the insuring companies voids the insurance in most of the provinces. The storing or keeping of gasoline on the premises insured is also prohibited and voids the insurance, as does also the keeping of over five gallons of coal oil and other oils. All changes which may be defined as material to the risk must be notified to the companies. If a hardware mans adds tinsmithing to his business on his premises or a restaurant starts over a boot and shoe store and fire from an unknown cause starts on the premises, the assured has a poor chance to collect under his policies if he has not the assent of the insuring companies.

The Textile Banking Company, Inc., has been organized in New York with a fully paid-up capital and surplus of $2,500,000. It is backed by the Guaranty Trust Company and the Liberty National Bank of New York, and will act exclusively as commercial banker for mills in the textile industry and attend to their general financial business.

NATURAL RESOURCES OF WESTERN CANADA

Address of Colonel J. S. Dennis, C.M.G., Chief Commissioner, Department of Development, C.P.R., to Industrial Congress, Calgary, Alberta, August 13th, 1919

I FEEL it a great privilege to be given the opportunity to-day to address this congress on "The Natural Resources of Western Canada." The subject, like our western country, is almost unlimited in its scope, and it is not possible in the time available, to do anything more than refer in a general way to the wonderful natural resources with which nature has endowed this western portion of the Dominion and to outline briefly how the utilization of these resources will aid in the development and prosperity of our country. I note, however, from the programme that certain of the matters which I will deal with in a general way are to be discussed in detail by other speakers.

I assume that I was selected by the committee to address you on this important subject not because of any special qualifications to deal with the development of these resources from a technical standpoint, but because a residence of over forty-five years in this western country, and a more or less intimate connection with its agricultural and industrial growth up to this time, has given me a somewhat extended knowledge of the location and character of our natural resources and the possibilities of their further development.

To make my remarks as brief as possible and to summarize the facts in order for reference by those who may desire later on to consider the information offered, I propose to deal with our natural resources under separate headings and in the order of their importance as I view the subject, beginning with that natural resource which is the foundation of development and progress in all countries, viz., agricultural land.

Vast Land Area Waiting

The measure of sound prosperity in any country is the possibility of producing, through agriculture, the food needed by its inhabitants. It is recognized that many countries, which have not been favored with large agricultural areas, have reached a measure of prosperity through industrial development of their other natural resources, but the necessity for local production of sufficient food for home consumption through the utilization of available agricultural land has been specially emphasized in many countries during the late world war.

In the matter of land available and suitable for successful agriculture with all its allied interests of horticulture and animal industry, nature has been very bountiful to the four western provinces of Canada. The provinces of Manitoba, Saskatchewan, Alberta and British Columbia comprise an area of about 711,000,000 acres. Of this vast area it is estimated that at least 225,000,000 acres are available for immediate settlement and cultivation. At the present time, not more than 30,000,000 acres of this area are occupied and cultivated, leaving the enormous area of 195,000,000 acres of good land available for further extension of our agricultural activities. The total population of these four western provinces does not exceed 2,200,000, and when it is realized that this small population occupies this vast area in such a manner as to provide an average of only 1.88 people per square mile, one can get some conception of the possible density of population and the enormous value of agricultural products which will be produced, so soon as the remaining 195,000,000 acres are occupied and made productive. For comparison, it may be noted that were the western provinces occupied on the same basis of distribution of population per square mile as the small province of Prince Edward Island in the eastern portion of the Dominion, the four western provinces of Canada would to-day have a population of 20,000,000.

Our greatest problem in western Canada to-day in connection with the development of our natural resources, is that of securing settlers of the right kind to take up and cultivate vast unoccupied acreage which only awaits the intelligent effort of the agriculturist to produce vast quantities of food.

The stability of the vast unoccupied areas of the four western provinces of Canada for successful agriculture, horticulture and animal industry has now been definitely proved by the prizes won in competition with all the other countries of the world for our grain, fruit and livestock, and the grain production in the occupied areas of our prairie provinces, even under the existing conditions of sparse settlement, is already playing, as is indicated by the figure I will quote, an important part in supplying the food of the world.

It is within my recollection, and also that of other "old timers" present, that the vast areas in these western provinces, now occupied by thousands of prosperous farmers, were looked upon and characterized as a part of the "great American desert" unsuited for occupation or the growth of grain, and destined to be the home of wandering bands of hardy cattle as successors to the buffalo. This enormous idea was only dispelled by the efforts of those hardy pioneers at widely scattered points, who undertook to cultivate the soil, and it has now been entirely removed by the actual results obtained in the production of grain, vegetables, fruit and livestock all over these provinces.

The value of the agricultural, dairy and animal industry products of these four western provinces for the year 1917, the last year for which complete statistics are available, amounted to the sum of $1,222,831,000, made up as follows:—

Manitoba	
Grains and fodder	$137,470,750
Dairy produce	8,054,567
Live stock	88,350,000
Total	$233,875,317

Saskatchewan	
Grains and fodder	$349,488,200
Dairy produce	4,098,187
Live stock	218,125,000
Total	$571,711,387

Alberta	
Grains and fodder	$176,965,800
Dairy produce	10,218,876
Live stock	216,148,000
Total	$403,332,676

British Columbia	
Grains and fodder	$ 12,171,100
Dairy produce	1,365,837
Live stock	375,357
Total	$ 13,912,294

It is true that on our vast agricultural areas nature exacts intelligent effort in utilizing the facilities she has provided, and, at times, like the present year, withholds, in certain districts, the moisture necessary for successful agriculture. The introduction of irrigation in the southern portion of the province of Alberta and the western portion of the province of Saskatchewan, and the proper utilization of the water supply provided by our rivers, has proved that vast areas of land in those districts, which, at times, are lacking sufficient rainfall for successful agriculture, can be made, and are being proved, the most productive and intensely cultivated areas in the west. In this great work the Canadian Pacific Railway Company have already expended over $15,000,000 in providing canals and ditches for the proper distribution of water, but the extension of this most ancient of all systems of permanent agriculture to the vast areas which can be reclaimed is a work of national importance and one which, in the near future, must engage the attention of both our Dominion and provincial governments.

Outside of the utilization of our agricultural areas for the production of grain, fruit and livestock as food products, western Canada offers exceptional opportunities for wide extension of our milling, packing, canning and tanning plants, and of industries for the utilization of our vast quantities of cereal straws for the manufacture of paper; it having

FORD policy has always been one of progress.

We now announce a pronounced step forward.

Ford Touring Cars and Runabouts may still be purchased at the minimum price—Runabout $660; Touring $690.

Electric Starting and Lighting equipment will be supplied if desired, at $100.00 extra.

Coupe $975, Sedan $1175 (Closed model prices include electric starting and lighting equipment).

If you wish demountable rims, tire carrier and non-skid tires on the rear, they will be supplied on closed cars only, at $25 extra.

These prices are f. o. b. Ford, Ontario, and do not include War Tax. 125

already been demonstrated that the straw of the flax grown in these western provinces produces a very high grade of paper.

Situated as the four western provinces are in the northern part of the northern American continent and subjected to cold winter weather on account of their geographical position, the question of fuel for domestic use is, of course, a matter of first importance. In this connection nature has again been very bountiful and, aside altogether from the enormous supply of timber fuel contained in the province of British Columbia, which is referred to later on, I may direct your attention, first, to the recognized standard fuel of the world,—coal.

Good Fraction of World Coal Supply

Speaking in round figures, the best available estimate indicates that the known coal reserves of the world amount to seven million millions of tons. Of this enormous quantity, the four western provinces of Canada contain one million three hundred thousand million of tons. The coals of the western provinces cover all the different qualities from the lignites, up through the semi-bituminous, bituminous cooking, to anthracite, and the vastness of the coal resources, as noted by the above figures, indicates that nature has blessed these western provinces with one of the vast coal supplies of the world, and has solved the fuel supply, both for domestic and industrial use, for many centuries to come.

The coal production in the provinces of Alberta, Saskatchewan and British Columbia for the year 1917 was 7,352,945 tons. This production will, without doubt, increase rapidly with the extension of settlement and the introduction of additional industries using coal for the generation of power, but the facts quoted will be sufficient to indicate to you that in the matter of coal for fuel this western portion of Canada occupies a most advantageous position.

In this connection attention must also be drawn to the fact that so far we are only utilizing our coal deposits under the wasteful method of its use for fuel only, with the exception, in a few cases, of its conversion into coke. Ultimately, no doubt, more modern scientific methods will be adopted to utilize our coal deposits on the basis of saving the by-products and, in this way, enormously increase the value of this natural resource.

Not satisfied with endowing us so generously with almost inexhaustible quantities of coal, nature has added to her gift, particularly in the province of Alberta, by furnishing us with vast quantities of natural gas.

Gas and Oil Developments

During your visits to Medicine Hat and Lethbridge, and also in this city, you have had some opportunity of seeing something of the natural gas development, but it may interest you to know that natural gas has been developed in the province of Alberta within an area extending from the national boundary north for about 700 miles, and from the Rocky Mountains east for 200 miles.

This natural product is now being utilized both for industrial and domestic purposes, and the possibility of its extension as a fuel in generating heat, light and power is almost beyond measure.

You, no doubt, will also be interested to know in connection with our natural gas supply that investigations lately carried on have proved the possibility of extracting from this gas, at a low cost, the character of gas required for use in the balloons which will probably play an important part in the matter of transportation in the world in the near future.

Associated with our vast coal deposits and the vast natural gas area referred to, it is probable that nature has also blessed this western country with a vast deposit of oil.

We are not justified at present in claiming that we have located and developed a vast oil field in these western provinces, but the exploratory work, so far carried on, over an area extending some 700 miles north to south in the province of Alberta, and at one or two isolated points in the adjacent province of British Columbia, and the oil obtained in small quantities at these widely separated points, justify the assumption that somewhere within the province of Alberta there exists one of the vast deposits of petroleum of the globe, and after having given some special attention to this matter as head of the Canadian Pacific Railway Company's Department of Development, I personally venture the opinion that sooner or later, and in all probability in the near future, a large producing oil field will be located through the medium of some of the many test wells that are now being drilled at widely separated points, and, when that time comes, we will not only have this great addition to our fuel supply, but the benefit of the vast number of by-products resulting from the scientific use of crude petroleum.

Timber

Timber has always played an important part in assisting in the development of new countries. This is particularly true of the prairie portions of western America, where the first need of every settler is lumber. In this particular, nature has again been exceptionally kind to the four western provinces of Canada, for while the prairie provinces of Manitoba, Saskatchewan and Alberta produce a certain amount of lumber, the lumber needs of the prairie districts of these provinces could not be filled were it not for the vast timbered areas of the province of British Columbia. This province differs from its three sister provinces to the east in that it is more or less mountainous throughout, and only in the valleys is there opportunity offered for agriculture, horticulture, and animal industry, but the province possesses one of the great undeveloped timber areas of the world. Conservative estimates indicate that the commercial standing timber in the province of British Columbia amounts to 366 billion feet. This timber comprises cedar, douglas fir, spruce, hemlock, white fir, lodgepole pine, western yellow pine, yellow cypress, western larch, western white pine and cottonwood.

This vast timbered area has already been developed to a certain extent through the medium of saw-mills and allied woodworking industries, but the extension of this portion of our industrial activity will offer opportunities for a further investment of capital coincident with our extension of agricultural settlement east of the mountains, and of our overseas export lumber business. There would also seem to be an opening for the extension of our wood pulp and paper making industry in view of the vast quantities of suitable pulpwood to be found in all these four western provinces, and in this connection it is noted that we must endeavor to correct the situation which occurred last year in which Canada exported pulpwood to the value of $15,000,000, whereas this pulpwood manufactured into paper at home, at the then existing prices, would have realized the sum of $79,000,000.

The members of the Congress who visited Medicine Hat had an opportunity of seeing one of the large industrial plants engaged in utilizing our clay deposits. Throughout all the four western provinces vast deposits of clay of differing values have been located, and the utilization of these clays through our existing industries justifies us in the claim that we possess in these deposits clay suitable for all purposes from the manufacture of common brick to that of high-grade pottery, and this branch of our industrial activity offers opportunities for wide extension.

We have also been able to demonstrate the suitability of certain of our sand deposits in the west for the manufacture of glass, and where these deposits are located in close proximity to our natural gas supply, this industry offers an opening for wide development.

Fisheries

The many large lakes situated in the provinces of Manitoba, Saskatchewan and Alberta already provide large quantities of fresh-water fish, but our great fishery resources of western Canada is on the coast line of British Columbia. This coast line covers in extent some 7,000 miles, and may reasonably be claimed to provide one of the great fishing industries of the world. This industry has already been developed to considerable limits as will be indicated by the fact that the catch of eight kinds of fish during the year 1918 amounted to 233,000,000 pounds, valued at $22,000,000. The export of a large quantity of this coast fishing industry, together with freshwater fish from the interior lakes, comprises one of our important industries of the west, but like many other phases of the development of our natural resources is only in its infancy.

RIOT, CIVIL COMMOTION AND EXPLOSION

Canadian Head Office

17 St. John Street - - Montreal

W. E. BALDWIN, Manager

With unlimited quantities of coal and natural gas as fuel, and the probable addition of crude petroleum to this list, it was only necessary for nature to have blessed western Canada with a large deposit of iron ore to insure her future as one of the richest countries of the world. In this particular, however, nature seems to have been somewhat sparing in her gifts. We have indications of deposits of iron ore in the Lake Winnipeg district of Manitoba, some smaller deposits in the provinces of Saskatchewan and Alberta, and probably more important deposits at several points in British Columbia, but, as yet, sufficient development has not been completed at any of these points to justify the prophesy as to how far these deposits can be utilized in connection with our fuel to supply the steel which is rapidly becoming one of the most widely used products in the world's development.

Transportation

In developing the natural resources of any country, the transportation available not only for the movement of the raw material but of the finished product is a most important factor. The outline given above will, I hope, have served to convey to you the wonderful development which may be looked for in western Canada through the ultimate utilization of our natural resources, and fortunately the foundation for the rapid development of these resources, through the medium of transportation, has already been laid. In the four western provinces we have to-day in operation a railway mileage of 19,873 miles, which provides one mile of railway in operation for each 110 of population. This fact will indicate to you that western Canada has as great, if not greater mileage of railway per capita than any other country in the world. It is, of course, true that the vastness of the country makes it inevitable that even as yet large districts are not served by existing railway lines, but the foundation work for the extension of the system as conditions warrant has already been laid, and from the standpoint of available transportation, western Canada, with the opportunities offered for agricultural and industrial development through ready transportation of raw material and finished product, occupies a very unique position.

The vast mountainous areas of the province of British Columbia are without doubt one of the most highly mineralized districts of the world. The production of gold, silver, lead, copper, zinc, and some of the smaller miscellaneous minerals, showed the large value of $28,500,000 in 1918. Like the development of all the rest of our natural resources of the west, that of our precious minerals, especially in the province of British Columbia, is only in its infancy; vast areas of that highly mineralized country having as yet only been roughly explored and prospected.

Conclusion

As was intimated in my opening remarks, I have only endeavored to put before you in an outline manner the natural resources with which western Canada has been blessed and the steps so far taken to develop them. With the increase of our population, the demand for the finished product of many of these raw materials will increase, and the increased demand will, doubtless, result in the extension of our industrial life. This extension, however, will only be possible through the medium of the investment of large sums of capital, and the value of meetings of this kind through which reliable facts may be made public regarding our resources and interest awakened in their proper development, cannot be overestimated.

In common with all new countries, which have undergone more or less rapid development, we have experienced in western Canada the inevitable land, coal, oil, timber and other booms with concurrent disappointment, in many cases, relative to returns from capital invested with the inevitable retardation of sane development. We, however, know that we have the raw products of agricultural land, coal, gas, oil, clay, timber, precious minerals, etc., and indulge in the prophesy that sooner or later these will all be developed along proper lines and result in making these four western provinces of Canada one of the most intensively settled, highly developed and prosperous portions of the British Empire.

INDISCRIMINATE ISSUE OF AGENTS' LICENSES

Address Before the Life Underwriters' Convention at Calgary Alta., August 19th to 22nd

By W. B. Burrell

THE Life Underwriters' Association has, on the whole, been responsible for legislation designed to increase the efficiency of the agency field force and to eliminate those inaccuracies which creep into active practice, and which are detrimental to the best interests of the profession, if I may be permitted the use of the term. The provision for licensing of agents is by no means the least of such legislation This provision, however, needs amendment from time to time in a constant effort toward improvement of the status of the agency force.

One of the outstanding perversities of human nature seems to be to take advantage of—to abuse—the blessings of life. The license law, therefore, affords a convenient avenue of cover for what is known as "rebating." How simple to circumvent the necessity of an actual, old-fashioned rebate by an application to the license department, three dollars ($3) enclosed for an agent's license! This practice, I aver, is not confined to the writers of "smaller business.'

There is, on every hand, sufficient evidence of the necessity for a vigorous purging of the ranks of license-holders. Every Tom, Dick and Harry in factory, small urban settlement and in some rural districts is a sub-agent or a spotter, and a condition develops therefrom altogether demoralizing, rather than elevating, in its influence. The weakest link determines the total strength of a chain—so in the public estimation the inefficient determines the standard. How much the public is being made to suffer from incompetents handling the rate book! Such incompetency is not tolerated in any other sphere. How fortunate for the public that rates are standardized.

Why any life insurance company will submit to its business being transacted by an occupant of any craft, be he cobbler, tinsmith, bootblack, grocer, blacksmith, banker, foreman in a factory, chimney-sweep or house-breaker, I cannot understand. Nevertheless, is not this true?

What is your opinion, gentlemen, of a medical practitioner, enjoying a lucrative practice, for which he spent the necessary educational period in preparation, and who has been a success in his profession, writing applications and making medical examinations of his own applicants, and, of course, receiving regular commission? Doubtless he has an agent's license to solicit for insurance.

I am constrained to believe that a properly qualified life underwriter has sufficient scope for his entire time and energy, that is, if the welfare of the public be fully considered. I heartily endorse the attitude of the New York in weeding out those individuals among its field force who are not prepared to give their full time to the specific purpose of writing life insurance.

I have no disposition to criticize the license department —the fault does not rest there. The fault exists in the lack of properly constituted authority for checking up and approving the applications for agents' licenses.

In my humble judgment, this association should go on record as favoring amendment to the license law, requiring, first, that the name of the candidate for license should be submitted by the license department to a local district tribunal in order to ascertain whether the application be bona fide; and second, that a distinctive license for writing of life insurance be made necessary, thus lending dignity to the calling. To sum up: The operation of the license law thus amended will provide against a license being abused for purposes of rebating; will wonderfully clarify the underwriters' ranks; will stimulate the best instincts of those qualified by ability, character and experience to teach and to write insurance; will add to the membership of the association, obviating the necessity for an annual drive for membership, and, therefore, will continue to increase the volume of insurance written.

MONTHLY INCOME INSURANCE

An Address Before the 1919 Convention of the Life Underwriters' Association of Canada, Calgary, Alta., August 19th to 22nd

By J. B. Hall, A.I.A., A.A.S.

I HAVE been asked to deal with the question of "Income Insurance," a subject which is a live one for discussion and one which calls for study and attention from every up-to-date life insurance man.

Income insurance, as we know it to-day, is the result of a process of evolution working along natural lines from a very simple beginning. Its introduction dates back to the year 1893, when the late Emory McClintock, the then actuary of the Mutual Life of New York, originated the "Income for Life" policy. Prior to this date, the only form of income policies issued was what we now know as the ordinary instalment policy,—first made use of by the Pennsylvania Mutual. The evolution brought about by Mr. McClintock provided for the payment of instalments throughout the lifetime of the beneficiary, and these contracts were known as continuous instalment policies

This was a step in the right direction. Later, the monthly income policy was introduced, two hundred and forty monthly instalments only being payable. The continuous feature was then added, thus involving the beneficiary's age and making her a recipient for life of a guaranteed monthly income. Still later the participating feature was added, whereby the beneficiary after the death of the assured had her income supplemented by excess interest earnings. The guaranteed income which could be paid was arrived at by our actuaries by using a low interest rate of $3\frac{1}{2}$ per cent., and sometimes 3 per cent. With companies earning on their funds as high a rate as 6 per cent., and sometimes more, the low rate of $3\frac{1}{2}$ per cent. seemed very meagre, and shrewd business men were led to consider seriously whether it would not be more profitable to have their insurance monies pass to a trust company for investment at profitable rates, and thus enhance the income returns for the advantage of their beneficiaries. This lead to the introduction of the "participating" feature already referred to.

Then followed the addition of "disability clauses," as they are found in present-day policies with the income feature so extended that an income became payable to the assured himself should he become totally and permanently disabled before the age of 60.

Present Form Not Final

Thus, we see, the gradual process of evolution through which the "income" idea has passed to find its fuller fruition in our present-day policies. It has even developed so far, that, while we issue special income policies with special trust and commutation clauses included, we also include in every policy issued optional benefits of a similar character. In these days we do not stand still. The world moves on, it would seem, with accelerated speed, and life insurance companies must keep pace with the times. The end is not yet, and who shall say, that, as we move onward in our efforts to ameliorate the conditions of mankind, and attempt to add to the sum of human happiness, new ways shall not be found whereby the life insurance institutions in this great land of Canada can add their quota to this progressive movement. We have heard of "unemployment insurance" in the old land. Unemployment destroys the family income as does the death of the breadwinner. May it not be possible for life insurance companies to step into the breach and enlarge still further their sphere of usefulness. Facts and figures can be analyzed as our forerunners in actuarial science did analyse census returns, and there seems nothing visionary or Utopian in the belief that some day we may be able safely to insure against unemployment. This is the trend of the times, and as we visualize world conditions as they are, and the forces which operate to affect the home life of the individuals which comprise the state, do we not also see before us a vaster field of usefulness and service than anything of which we have heretofore dreamed.

"Income insurance" are magic words which open for us the ears of our prospects. Without an income we cannot live, and how small a percentage there are who possess an income from investments sufficient to support life. Each man must work to produce an income—in other words, he must work to live. This income is required, not for himself alone but for his family, his dependents. Certain forces operate to cut off this income temporarily or permanently; unemployment, disability, and last of all death itself, from whom none can escape. For the moment, we perforce, must eliminate the first of these causes until this process of evolution has worked its way further; with the second we have already dealt with in part. A total and permanent disability benefit goes a long way, and our brothers in the accident insurance field have, to a large extent, taken care of this field as far as partial or temporary disability is concerned. What we as life underwriters are most deeply interested in is the third of the trio—the loss of income by death.

This brings me to the more practical side of the problem—I have tried to have you see in a large perspective the underlying thing, we, as life insurance men are trying to do to serve humanity, and to serve it well. It is along this path of service which we have developed, and this has led us to what I believe to be the crowning achievement of our efforts—"The monthly income policy" as it stands to-day.

New Selling Talk

We have been selling life insurance for years, and our predecessors sold life insurance as well. The public purchased life insurance, and to-day they purchase it in ever-increasing amounts. We have talked life insurance in terms of principal sums, and we, myself included, still talk it. The public have bought and still buy life insurance just as we sell it to them. They think as we think, and we have led them in the wrong direction. It has not been altogether our fault,—it will be our fault if we continue to do so.

Let us change our slogan. Let us no longer sell simply life insurance. Let us sell "income insurance." When a man dies his family does not lose thereby so many thousands of dollars. He is not like a building burned down, which will call for so many thousands of dollars to replace. He is an income producer. His income ceases at death. It is his income which supports the family, and it is that which ceases at his death and must be replaced, at least in part, if his family are to be housed, fed, and educated.

The wife of the average man is accustomed to look to her husband's income for the support of the home. She has her allowance in the case of the business or professional man, her husband's pay envelope in the case of the working man. In either case she plans her expenditures a week, a fortnight, or a month at a time. She plans in this way over many years. She has no experience with principal sums, except, where, through careful planning and saving, she can accumulate enough to make a payment on a home or buy some Victory bonds. How, then, can she have obtained any experience of investments, and if she were left $5,000 in one sum, or less, or more, no matter what the amount—how could she be expected to know how to invest it safely, and so as to produce a regular income to provide for the future of herself and the education of her children. Could the average man do it himself? I think not. We all look to our income for our wants, and we look to that income to come to us in weekly or monthly instalments. It is our way of living. It is the way all over the world.

Does it not seem to you the natural and sane thing for us to insure this income? Then why sell insurance payable in one sum? From force of habit.

No Substitute for Life Insurance

Let it not be understood that I recommend nothing but income insurance. It must be conceded, that when a breadwinner dies, ready money is required to pay doctor's bills, funeral expenses, debts, and the like. For this reason some insurance should be carried payable in one sum at death, the amount varying, of course, with the circumstances surrounding the case. Each case must be considered individually. Young men usually take on life insurance before marriage to a greater or less extent, and this is invariably payable in one sum at death. Such insurance could be used

for the purposes referred to, and if more were required, more could be effected. It is the married man—the breadwinner—the support of a household to whom I refer when I argue for "income insurance."

Another point of importance is this, it is a common occurrence for an agent to neglect to suggest income insurance unless his client can afford to purchase a policy guaranteeing at least $50 a month. No amount is too small to consider. $10 per month may rent a room. $20 a home,—call it "home insurance," if you will, when dealing with the man of small means. It is all the same. With a home a widow can do much. It gives her courage to face a precarious future. No man can calmly face the possibility of his loved ones being left homeless.

With clients of large incomes, larger amounts can be suggested. With men of means there are many avenues of approach. First,—the wife to be provided with an income for life; then the daughters in a similar way, but to a less extent; the sons with an income for educational purposes, and so on. With men of wealth, legacies to relatives, bequests to servants, donations to charity, to institutions, etc., all can be provided for by adaptations of the monthly income policy.

I have touched hurriedly on these suggested avenues for business on a monthly income basis, because you are all familiar with this part of the subject. Many articles appear from time to time in our insurance journals and in our company papers, to say nothing of the "Life Underwriters' News," and I do not wish to take up your time by loitering in well-travelled byways.

I have tried in this very short and incomplete paper not to explain income insurance, but rather to stimulate it, and to stimulate you to a fuller knowledge of its immense usefulness. The trouble is that in these days business is coming to us so fast that we simply take the applicant's order for life insurance, fill in any one of the old standard plans in the space allotted for the purpose and let it go at that. Is that a square deal to the policyholder? It is true that he has the privilege of exercising the "income" option later if he so desires, but what does he know about this option? Does he ever read his policy? Are we not neglecting to give the best service possible to our clients by telling them about this real form of protection—An Income Policy? Think it over.

I should like to have a very active discussion on this subject, for I believe it to be a very vital and pertinent one. It is at conventions like these, where we get together from all parts of the Dominion, that we should discuss these problems. We come together to help one another, and only by an interchange, free and untrammelled of our opinions and experience do we derive the maximum of benefit from such an opportunity as this convention affords.

I realize that while most of us are familiar with the principle and conditions of monthly income policies there may be some who are not so familiar with them, and there may be some technical points about which information may be desired. If I can throw any light in any way on any feature connected with income insurance I shall be very glad, indeed, so far as I am able, to answer any questions which may be asked.

RAILROAD EARNINGS

The following are the earnings of Canada's transcontinental railways for the first two weeks in August:—

Canadian Pacific Railway.

	1919.	1918.	Inc. or dec.
August 7	$3,442,000	$2,882,000	+ $ 560,000
August 14	3,298,000	2,759,000	+ 539,000

Grand Trunk Railway.

August 7	$1,392,477	$1,236,343	+ $ 156,134
August 14	1,461,258	1,285,064	+ 176,194

Canadian National Railway.

August 7	$1,811,263	$1,546,287	+ $ 264,976
August 14	1,891,104	1,583,071	+ 308,033

MUNICIPALITIES AVOID HOUSING SCHEME

Show Unwillingness to Accept Financial Risk and Wish to Shift it to Provincial Government

MUNICIPALITIES of Canada are apparently ready to accept loans at the rate of five per cent. per annum for developing local house building but they do not feel justified in assuming the risks which would necessarily be attached to business of this kind. There is no provision made for losses and as a certain proportion of loss would be incurred in this as in other financial businesses, the municipalities feel that they would be certain to come out with a balance on the wrong side. Not long ago the city of Toronto appointed a housing commission composed of three well known men in the city and their report was distinctly unfavorable to taking any part in the project. In spite of this, however, the city has appointed a commission to handle the business.

Mr. George D. Mackie, city commissioner of Moose Jaw, was requested to investigate the proposal and some time ago he made his report to the city council. This report represents a western point of view. Mr. Mackie says:—

"We are of opinion that the city should apply for a sum of about $300,000, to be reserved to the city and to be used for the purpose of assisting in the construction of suitable, sanitary homes for the working classes.

Add to Borrowing Power

"The acceptance of this money by the city should, however, be provisional on the government agreeing that the said sum of $300,000, or any lesser sum which be allotted to the city, would not be considered as part of the city's debt and so would not be considered in arriving at the city's borrowing powers in terms of Section 288 of the City Act, and further, that the provincial government should agree that so far as the loan from the provincial government is concerned, that the city was acting only in the capacity of trustees for the provincial government.

"A committee should be appointed by the city in order to frame regulations and conditions regarding the terms on which the city would make loans for submission to the provincial government. These conditions would embrace:—

"(a) The amount of money which would be loaned to any prospective borrower.

"(b) The persons to whom the money would be loaned.

"(c) The type of house which the city would approve of.

"(d) The method in which the principal and interest would be repaid the city.

"(e) The appointment of a properly qualified engineer or architect to take care of the design of the houses and the supervision of their construction.

"(f) Who would bear the loss or losses in connection with any loans should such occur.

"(g) The question of paying a surrender value to any owner who should leave the city.

"(h) Special power for foreclosing in the event of default in payment.

"(i) The regulations concerning the lots on which the houses are proposed to be built being on the sewer and water line, provision in respect to sidewalks, etc.

"Assuming a loan of $3,000.00 be made in connection with a house, bearing interest at five per cent. and repayable in twenty years, the annual charges against the house would be approximately as under:—

Interest in repayment	$ 241.00
Taxes	75.00
Insurance	10.00
Maintenance	35.00
Administration	9.00
Total annual payments	370.00
Total monthly payments	30.90

The Union of British Columbia Municipalities will meet in annual convention at North Vancouver, B.C., on September 16th, 17th and 18th. The Good Roads League will meet at the same time.

BANK BRANCH NOTES

The following is a list of branches of Canadian banks recently opened:—

Roblin, Man.	Merchants Bank of Canada
Dugald, Man.	Merchants Bank of Canada
Debden, Sask.	Royal Bank of Canada
Donnelly, Alta.	Royal Bank of Canada
Winnipeg, Man. (Portage and Colony)	Imperial Bank of Canada
Kenogami, Que.	La Banque Nationale
Rolla, B.C.	Canadian Bank of Commerce
Powell River, B.C.	Canadian Bank of Commerce
Grande Prairie, Alta.	Canadian Bank of Commerce
Squamish, B.C.	Canadian Bank of Commerce

The Bank of Hamilton has opened two branches, subsidiary to Dundalk, Ontario, one at Corbetton, which will be open Mondays, Wednesdays and Fridays, and one at Proton which will be open Tuesdays, Thursdays and Saturdays.

The following sub-agencies have been opened by La Banque Nationale: St. Eugene-de-Grantham, Que., St. Malo d'Auckland, Que., Grandes-Piles, Que., St. Ludger, Beauce, Quebec.

Mr. James L. Clarke has been appointed manager of the rural service department of the Merchants Bank of Canada, and will have his headquarters in Regina, Sask. The department is a new one which has been created for the convenience of farmers.

Mr. W. A. Parker, manager of the branch of the Royal Bank of Canada at Lethbridge, Alta., has been transferred to Belleville, Ont., branch.

The village of Sylvan Lake, Alta., has decided to accept the offer of the Imperial Bank of Canada for the purchase of two lots owned by the village; following the completion of the transaction, the bank will probably erect a new branch.

Included in the extensive building program of the Union Bank of Canada in the western provinces this year, is the undertaking of the erection of a large new structure on Hastings and Seymour Streets, Vancouver, B.C. This will be one of the finest buildings in the city of Vancouver, and of the Union Bank in Canada, and it has been estimated that it will cost in the neighborhood of $500,000.

Mr. E. G. Audet has been appointed assistant-manager of the La Banque Nationale, being in the same time, manager at the Quebec, Que., branch. Mr. J. S. Blais, at head office, will act as superintendent of branches; Mr. St. Geo. Morency, as chief inspector and Messrs. L. A. Rousseau, Roland Dion, Georges Beaudry, inspectors.

The Canadian Bank of Commerce has announced the following staff changes:—

Head office—Mr. G. O. Blanchet, audit officer, to be auditor. Mr. A. G. Mordy, formerly accountant at Winnipeg, to be audit officer.

Superintendent's department, Winnipeg—Mr. T. B. Weatherbee, formerly accountant at Calgary, to be attached to the department of the superintendent of central western branches.

Inspection department, Winnipeg—Mr. J. Moreton, auditor, to be an assistant inspector.

WEEKLY BANK CLEARINGS

The following are the bank clearings for the week ended August 14th, compared with the corresponding period last year:—

	Week ended Aug. 14, '19.	Week ended Aug. 15, '18.		Changes.
Montreal	$115,864,215	$ 88,558,457	+	$27,305,758
Toronto	79,218,814	61,214,719	+	18,004,095
Winnipeg	39,715,315	29,720,701	+	9,994,614
Vancouver	12,483,287	12,110,289	+	372,998
Ottawa	10,217,931	5,215,656	+	5,002,275
Calgary	5,935,901	5,838,901	+	97,000
Hamilton	5,171,825	4,710,953	+	460,872

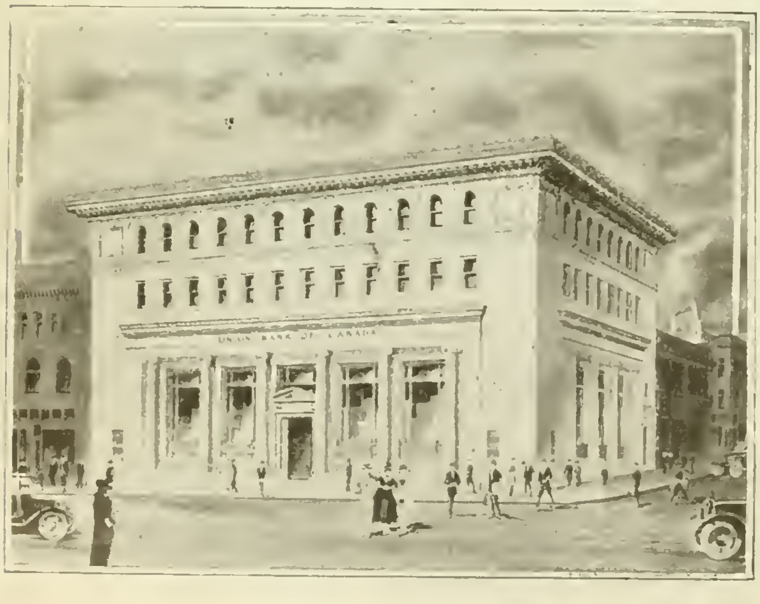
Total	$308,769,016	$238,704,563	+	$70,064,453



NEW BANK PREMISES IN VANCOUVER

IN the new building which will be erected this year in Vancouver, B.C., the Union Bank of Canada is making a radical departure from its building program. Designed in the Italian renaissance, now so much favored in modern bank building, of a monumental style, the Vancouver structure will be of handsome design. The cost will approximate half a million dollars. The building will have a frontage of 104 feet on Hastings Street and a depth of 70 feet on Seymour Street, and will be three storied. It will be fireproof having reinforced concrete frame with Haddington Island stone facing.

The Union Bank of Canada will occupy the entire ground floor which will be devoted to a banking chamber, safety deposit vault, entrance to the stair hall and elevator hall, the elevator serving the two floors above. The banking room itself will be 51 feet by 100 feet and 27 feet to the ceiling; the entire absence of structural columns frees the bank proper of all obstructions.

WHY THE "MUTUAL LIFE OF CANADA" IS SO POPULAR

The Mutual placed upon its books in the first five months of 1919 100% more business than in the corresponding months of 1918. The wonderful war-record of the Mutual Life and the prompt payment of the many unexpected claims during the recent epidemic—these have proved the value of the institution. The Mutual. moreover, is in a peculiar sense a people's company, being in its control democratic, in its economy strictly co-operative. This means that the system is in line with the "spirit of the age," and so the people naturally turn to the Mutual. The record of the Company for nearly half a century has been one of increasing beneficence, and an ever-growing number of gratified policyholders help on the good work of the agents. As a result, there probably is not a more prosperous group of workers in Canada to-day than the representatives of our Company.

"Be a Mutualist."

IDENTIFICATION OF SAVINGS DEPOSITORS

Signature Not Sufficient in Some Cases—Finger Prints Have Been Used With Success

By A. B. Barker

In a country branch the savings bank depositors are almost invariably local residents, and the question of identification, therefore, is seldom likely to be raised. In a city branch, however, it is different, and it is manifestly impossible for the members of the staff, the personnel of which is constantly changing, to be able to recognize more than a small percentage of the savings depositors. In practice the identification of such when drawing from their accounts depends on the specimen signature on file, and any description of the customer which may be entered on the card. These and possession of the pass-book are usually considered conclusive evidence of identity. This does not, however, give full protection, and many bankers can tell of instances in their own experience where attempts have been made, some successfully, to impersonate depositors after getting hold of their pass-book. This is not so difficult as it seems in the case of those of foreign birth particularly. To many, one foreigner is very like another, especially as any discussion is in broken English, and uneducated men seldom sign their names twice alike.

Some banks for this class of business use the finger print system of identification, and when the savings account is opened take, in addition to the usual signature, an impression of the first three fingers of the right hand on the back of the card. When the depositor wishes to draw any money an impression of these three fingers is taken on the back of the cheque or savings receipt, and forms an absolutely perfect identification.

The pattern of the markings on the fingers differs with every one; no two are alike. Those who have made a study of the subject divide these patterns into classes very much as one divides signatures into classes according to the letters of the alphabet, and some have even proposed their use on cheques as signatures. This, however, is hardly practical.

The system has long been used in the detection of criminals, and in some respects its results are said to be more certain than with even the Bertillon method, and so effective has it been found that the up-to-date crook wears gloves while on his "jobs" in order to leave no clue to his identity. The system is not new by any means, and in the east the Chinese formality in regard to wills is to call in the beneficiary, read to him the clause in which he is interested and have him place his finger print opposite the clause in token of acquiescence, much as a correction in a document is initialled with us.

In connection with the military records of the American forces enlisted during the recent war the finger prints of every man in the various services were taken, and now form part of the official records of the War Department. With these on file there will be no loopholes for fraudulent pension claims in the years to come as was the case in so many claims arising out of the civil war between north and south.

In banking it is much used by the South African institutions in connection with drafts issued to men returning to England. The purchaser of a draft gives the impression of each finger on two sheets which are ruled for the purpose, one of which he keeps, the other being sent forward with the advice by the bank. In England when the purchaser wants to cash the draft the impressions of his fingers make his identification absolute.

The method of operation is most simple. A special ink is smeared on a glass plate with a rubber roller, the fingers up to the second joint are rubbed on this surface and then impressed on the paper, the ink being cleaned from the hand by a cloth dipped in benzine or a similar fluid.

Considering the convenience of this method of absolute identification it is strange that it has not been generally used in connection with travellers' cheques and letters of credit, and travellers would be saved much of the trouble and annoyance to which they are frequently put when trying to obtain funds in foreign parts where identification is necessary.

DIVIDENDS AND NOTICES

NEWS OF MUNICIPAL FINANCE

Toronto Tax Collections Earlier — Finance Commissioner Cautions Against Borrowing—Winnipeg Tax Payments Increased

Almonte, Ont.—The tax rate for 1919 is 40 mills, the same as last year.

Cobourg, Ont.—The tax rate has been fixed at 32 mills for 1919, one mill higher than last year.

Hamilton Township, Ont.—At a meeting of the township council, just held, the tax rate for the year was fixed at 12 1-5 mills as follows: County rate, 5.52 mills; township rate, 4 mills; general school rate, 2.68 mills.

Bowmanville, Ont.—The tax rate has been struck at 33 mills on the dollar for the current year, and is made up as follows: 10 mills for ordinary town rates, 6¾ mills for high and public schools, 14 mills for waterworks and sewerage debentures, 2¼ mills for county rate.

Winnipeg, Man.—An increase of nearly $1,000,000 in the total collection of realty taxes is shown in the report submitted by the tax collector to the civic finance committee. Up to July 31st, the realty tax collection amounted to $6,354,736 and the water district levy $427,686, or a total of $6,782,422. Collections up to July 31st, 1918, amounted to $5,861,282.

The report for the months of May, June and July, submitted by the manager of the city light and power department to the civic finance committee, shows that earnings for that period amounted to $230,645, while expenses were $269,357, showing a deficit for the three months of $38,712.

Discussion of a city income tax will begin on the afternoon of September 16th in the council chamber. Last year the provincial government threw out the city's proposed Act, and this year the matter will be revived, and will possibly go through. The committee on legislation will take up the proposed income tax bill, which has been drawn up by City Solicitor Hunt, and is an altogether different proposition from that drawn up last year.

Toronto, Ont.—During the past five years there has been a gradual moving forward of the date for the first collection of city taxes. In 1915 it was on July 23rd. This year it was June 6th. Commissioner Bradshaw said: "Comparing the 1915 date with the 1919 date, it will be noticed that the 1919 instalment was collected 47 days earlier than in 1915, and as a consequence the annual saving in interest on borrowed capital has amounted to approximately $46,500. The yearly bank borrowings of the city in anticipation of taxes amount to approximately $6,000,000. The growth of the total taxes collected since 1912 is enlightening. The figures are: 1912, $7,431,943; 1913, $9,692,279; 1914, $11,168,760; 1915, $14,529,025; 1916, $14,981,712; 1917, $16,929,321; 1918, $20,267,727; 1919, $19,462,297.

It is the advice of Finance Commissioner Bradshaw that a halt should be called to further capital commitments this year. He declares the programme of work to be proceeded with during the current year has already been far exceeded, and he urges that, having regard to the credit of the city and the strain on taxpayers, additional capital undertakings be laid over. The capital amount of work to which the city is now committed, including local improvements recommended and which have not yet been financed, amounts to over eight and one-quarter million dollars. This includes $1,000,000 for the housing scheme, $115,000 for bridges, $200,000 for street cars, $185,000 for railway pavements, $917,000 for waterworks, $845,000 for schools, $503,000 for sewers, $102,000 for libraries, $150,000 for parks, $496,000 for improvements along the waterfront and $272,000 for miscellaneous matters. The local improvements are: Pavements, $2,042,647; sewers, $594,845; curbs, $14,598; sidewalks, $144,174; gradings, $140,858; extensions and widenings, $645,521.

This year's increases in Toronto's assessment have so far been as follows: Ward 1, $1,093,495; Ward 2, $1,755,563; Ward 5, $918,467; Ward 6, $1,539,930; Ward 7, $1,457,597; Ward 8, $1,217,166; total (with two wards to come), $7,982,208. The total increase for the city will be at least $10,000,000.

GOVERNMENT AND MUNICIPAL BONDS

Dullness Characterizes Present Market—Bond Selling Organizations being Taken Over for Domestic Loan

The following quotations of active government bonds are supplied by the National City Co., Ltd., and are in New York funds:—

	Bid.	Offered.

United Kingdom 5½% (Nov. 1, 1921) ..	98	98½
United Kingdom 5½% (Feb. 1, 1937) ..	95½	96
City Paris 6% (Oct. 15, 1921)	95½	96¼
Canadian Pacific 6% (Mar. 2, 1924)	99¼	100
Russian Govt. Ext. 5½% (Dec. 1, 1921) .	44	46
Russian Govt. Ext. 6½% (July 10, 1919)	50	52
Swedish Govt. 6% (June 15, 1939)	97¾	98
Dominion Canada 5½% (Aug. 1, 1921) ..	99½	99⅞
Dominion Canada 5½% (Aug. 1, 1929) ..	96⅞	97¼

The following is a list of debentures offered for sale, of which particulars appear in this or previous issues of *The Monetary Times*:—

Borrower.	Amount.	Rate %.	Maturity.	Tenders close.
Davidson S.D., Sask.	$ 18,000	..	30-instal.	Aug. 27
Alberta School Districts	25,800	6½	Various	Aug. 28
Brooke Tp., Ont. ..	5,190	6	5-years	Aug. 30
Cochrane, Ont. ...	5,000	6	20-instal.	Sept. 2
Charlottenburg Tp., Ont.	30,000	5½	20-instal.	Sept. 6
Weyburn S.D., Sask.	80,000	6	30-years	Aug. 29
Welland County, Ont.	100,000	5	10-instal.	Sept. 3
Pipeston R.M., Man.	10,500	..	20-years	Sept. 20
Trail, B.C.	15,500	7	20-years	Sept. 15

Victoria, B.C.—The city will borrow $1,400,000 for local improvements to finance obligations caused by the pro-rating of arrears of taxes over ten years.

Cochrane, Ont.—Tenders will be received up till September 2, 1919, for the purchase of $5,000 6 per cent. 20-instalment debentures, issued for waterworks extension.

Toronto, Ont.—By-laws providing for the raising of $500,000 for schools and school sites, presented by the board of education, have been struck out by the board of control.

Belleville, Ont.—Messrs. A. Jarvis and Co., Toronto, have purchased an issue of $67,352 6 per cent. debentures on a basis of about 5.80 per cent. The bonds are for 27, 17, 7, 4 and 3 years.

Welland County, Ont.—Tenders will be received until September 3, 1919, for the purchase of $100,000 5 per cent. 10-instalment debentures. The money will be used for good roads purposes.

Saskatoon, Sask.—A by-law is to be submitted on September 4, for the authorization of a loan of $175,000 by way of debenture issue, for the erection and equipment of Mayfair School on Block No. 12.

St. Agathe, Que.—Messrs. Versailles, Vidricaire and Boulais have purchased an issue of $65,000 5½ per cent. bonds of the school commissioner at 98½. The bonds are repayable serially from 1 to 35 years.

Vancouver, B.C.—The school board has written to the city council requesting the submission of by-laws for school purposes aggregating $465,000. If the council adopts these by-laws, they will be submitted to ratepayers about Sept. 20.

Trail, B.C.—Sealed tenders will be received until September 15, 1919, for the purchase of $15,500 civic improvement debentures, dated October 1, 1919, maturing October 1, 1939. The interest rate is 7 per cent., and is payable half-yearly.

Davidson, Sask.—Sealed tenders will be received up till August 27th, 1919, for the purchase of $18,000 public school debentures, payable in 30 annual instalments. Offers to state rate of interest for par value at Bank of Montreal, Davidson, Sask.

Business Patriotism

During the war Canadians bought nearly $1,500,000,000 of War Loan Bonds.

It was good business as well as good patriotism, as holders of Victory Bonds know to their profit.

The war in Europe is over. But the Battle for Markets is barely begun, and Canada must enter that fight, too.

It is good patriotism for Canadians to buy the securities of Canada's great Exporting Industries.

The future will show that it is good business as well.

The Canada Standard Loan Company
520 McIntyre Block, Winnipeg

Weyburn, Sask.—Tenders will be received up till August 29, 1919, for the purchase of an issue of $80,000 6 per cent. 30-year debentures of Weyburn city school district, No. 521. C. O. Davidson, secretary, local government board. (See advertisement elsewhere in this issue.)

Pipestone R.M., Man.—The municipality is offering for sale an issue of $10,500 20-year debentures, and tenders will be received until September 20, 1919. The present indebtedness of the municipality is $70,000 telephone debentures, with a sinking fund of $22,500 invested in Victory bonds. G. F. Birney, Reston P.O., Man.

Pictou County, N.S.—An issue of $100,000 5½ per cent. 20-year debentures has been sold to D. A. Cameron at 99. The tenders were:—

D. A. Cameron	99.00
F. B. McCurdy and Co.	98.52
J. C. Mackintosh and Co., W. F. Mahon and Co., and Eastern Securities Co., Ltd.	96.67

Preston, Ont.—Messrs. Dyment, Anderson and Co., Toronto, have purchased an issue of $38,000 5½ per cent. 20-instalment debentures at 97.07. Three tenders were received as follows:—

Dyment, Anderson and Co.	97.07
A. E. Ames and Co.	96.063
Brent, Noxon and Co.	94.625

York Tp., Ont.—An application from the representatives of school section No. 26 for permission to issue debentures to the amount of $60,000 for local school improvements, was referred by the council to the township solicitors for the preparation of the necessary by-law authorizing the issuance of the debentures. The interest will be at the rate of 5½ per cent., and the debentures will be repayable in 20 annual instalments.

NEW MONTREAL INVESTMENT FIRM

Announcement has been made of the formation of the new Montreal firm of Balfour, White and Co., dealers in investment securities. The partners of the firm are George S. Balfour, who was formerly engaged in the bond business at Montreal, and Stephen B. White, who far the past ten years has been associated with the Montreal Trust Co. Both partners have recently returned to Montreal after military service overseas.

Tenders re Charlottenburg Debentures

It is regretted that an error in the last two insertions of the notice calling for tenders for debentures of the Township of Charlottenburg reads $300,000.00, whereas the amount should be $30,000.00. A corrected notice appears elsewhere in this issue. The date for receiving tenders has also been changed.

INVESTMENTS AND THE MARKET

Wabasso Cotton Finances in Good Shape—Shareholders of Frontenac Breweries Approve Increase of Capital Stock

Spanish River Pulp and Paper Mills, Ltd.—The newsprint mill of the company is establishing new records, as far as construction and installation are concerned. The entire building, the construction work on which was started on June 1st, is now completed. The work of installing the machinery is now being rushed, and, according to the schedule mapped out by the engineers, one set of machines will be in operation by November 1st, and from this portion of the mill an output of 50 tons a day will be obtained.

The second set of machines will be installed and in operation sixty days after that date, or by February 1st, 1920, which will give the new mill a daily output of 100 tons.

Frontenac Breweries, Ltd.—Shareholders of the company met at Montreal on August 19th, and approved of the proposal of the directors to apply for supplementary letters patent authorizing the increasing of the capital stock from $1,000,000 to $2,000,000 and a further bond issue of $400,000. It was explained to the shareholders that, following the granting of the supplementary powers, it was not the purpose of the board to issue either capital or bonds to the full extent authorized in the immediate future, but as the requirements of the company necessitated. A considerable increase has already been effected to the plant in order to cope with the rapidly increasing demand for the company's products. This has been done largely out of current profits to fund the expenditure in the new issue of bonds.

Unanimous consent was given to the proposal by the shareholders represented at the meeting, and the necessary steps will be taken immediately to secure the supplementary letters patent.

Wabasso Cotton Co., Ltd.—Net profits of the company for the year ended June 30th last are shown at $323,541, representing earnings on the $1,750,000 outstanding stock of 18.1 per cent, compared with $385,437 in last year's exhibit, or equivalent to slightly in excess of 22 per cent. The net figures, however, are arrived at after the deduction of $100,000 for depreciation on property and plant, against $65,402 in 1918, and after allowances for discount on bonds, organization expenses and business profits war tax, separate provision for which was made a year ago after the results of the twelve months' operations were shown in full. After these deductions are made in the statement, profits are shown at $477,551, compared with $515,868 in 1918 and $181,349 in 1917.

The financial position of the company is a comfortable one, as is indicated by the fact that current assets exceed current liabilities by $591,037, as compared with $415,875 last year, despite the inclusion among the liabilities of an item of $523,620 carried in the statement under the heading "operating expenses, accrued wages and reserve for business profits war tax for the years 1918 and 1919."

Cash on hand at $106,989 is greater by upwards of $35,000 than that of a year ago, while the executive has been able to see its way clear to place $327,539 in Victory bonds and call loans, this item being a new exhibit in the statements as issued annually. Inventories of raw cotton, partly manufactured and manufactured stock, and other supplies, such as fuels and chemicals, stand at $376,549, as against $263,003 last year, an increase of upwards of $113,000, which in a time of rising costs of raw materials and other manufacturing essentials like the present should prove a profitable condition of affairs.

Among the liabilities, accounts and bills payable show a decrease in excess of $150,000, standing at the end of the company's last year at only $54,119, indicating that the inventories referred to have been largely paid for. The reserve for business profits war tax and operating expenses, already referred to, at $523,620, is, for purposes of comparison,

THE RECOGNIZED AUTHORITY ON CANADIAN SECURITIES
1919

THE
Annual Financial Review

THE ANNUAL FINANCIAL REVIEW is a carefully revised summary of facts regarding securities listed on the Montreal and Toronto Stock Exchanges, and of other prominent Canadian companies.

It includes the Current Annual Statements of Companies; the highest and lowest prices of stocks and bonds on both Exchanges for each month for ten years; number of shares sold each month for the past fifteen months; rate of dividends paid for past years, and other important items in the history of the different Companies, such as increases in capital stock, particulars of franchises, when bonds are redeemable, dividends payable, together with a mass of other facts.

It comprises 740 pages of solid information, well printed in a clear and concise manner, and is neatly bound in full cloth. The work is invaluable, not only to financial institutions, but also to the general investing public.

A Newspaper Devoted to Municipal Bonds

THERE is published in New York City a daily and weekly newspaper which has for over twenty-five years been devoted to municipal bonds. Bankers, bond dealers, investors and public officials consider it an authority in its field. Municipalities consider it the logical medium in which to announce bond offerings.

Wake up, Ontario!

Let the Referendum Battle-Cry Be

"No!"-"No!"-"No!"-"No!"

SINCE the announcement in the Legislature last spring that a Referendum on the Ontario Temperance Act would be taken this fall, the different temperance organizations of the province of Ontario have met together to consider what attitude they should take. The result has been the formation of the Ontario Referendum Committee, which comprises representatives from the organized temperance forces of the province and the temperance sentiment of the province outside of these organizations. The new Committee will conduct the Campaign. We are asking the voters of Ontario to vote "No" to all questions submitted on the ballot.

The Referendum Ballot
AND HOW TO VOTE

	Yes	No
1. Are you in favor of the repeal of THE ONTARIO TEMPERANCE ACT?..		X
2. Are you in favor of the sale of light beer containing not more than two and fifty-one one hundredths per cent. alcohol weight measure through Government agencies and amendments to THE ONTARIO TEMPERANCE ACT to permit such sale?..........................		X
3. Are you in favor of the sale of light beer containing not more than two and fifty-one one hundredths per cent. alcohol weight measure in standard hotels in local municipalities that by a majority vote favor such sale, and amendments to THE ONTARIO TEMPERANCE ACT to permit such sale?........................		X
4. Are you in favor of the sale of spirituous and malt liquors through Government agencies and amendments to THE ONTARIO TEMPERANCE ACT to permit such sale?.......		X

By the Ontario Temperance Act, sale and distribution of alcoholic liquors for beverage purposes within the province were prohibited. For practically three years the province has experienced the good effects of this law. Its repeal would be a calamity. Any of the amendments would spoil it.

For the Temperance forces to win they must secure four "No" majorities. That is, a majority for "No" on EVERY question. The Temperance forces will be defeated if there is a majority for "Yes" on any of the questions. You must mark an X after each of the four questions, or your ballot is counted as spoiled.

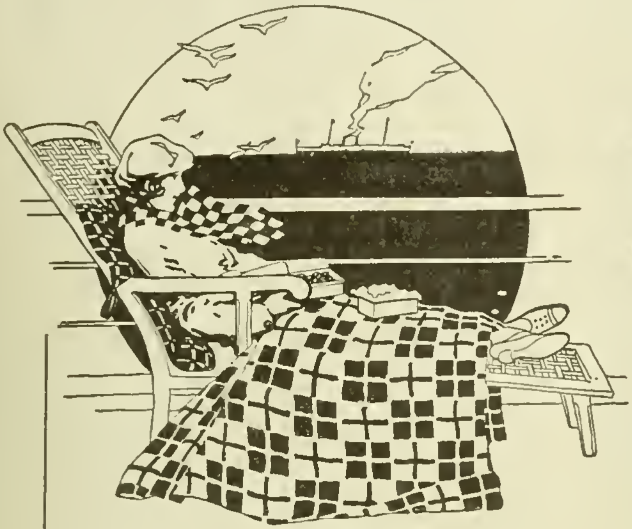
A century of temperance progress in this province is at stake in the coming Referendum. The Ontario Referendum Committee earnestly and respectfully ask you to mark your X in the "No" column after each and every question, as indicated in the sample ballot reproduced herewith.

Ontario Referendum Committee

JOHN MACDONALD
Chairman

D. A. DUNLAP
Treasurer

ANDREW S. GRANT
Vice-Chairman and Secretary
(1001 Excelsior Life Bldg., Toronto) 50



Make This Fine Boat Your Hotel for a Week

HERE'S the kind of a holiday you have been looking for. Here's a boat trip that enables you to see the most beautiful of the beauty spots of Canada—one which permits you to loaf ashore as well as lounge on deck.

The Steamer "Syracuse" will leave Montreal every Wednesday for a cruise on the St. Lawrence and Saguenay Rivers, the farthest port of call being Chicoutimi, at the head of the Saguenay. On the return trip the boat steams slowly down the Saguenay, spending an hour in Trinity Bay and giving passengers a night at beautiful Tadousac. The next stop is at Murray Bay—the Newport of Canada—where the boat remains from 5.15 Saturday afternoon until 2.30 Sunday afternoon. From this point the cruise proceeds to Quebec City, the boat going over to the picturesque South shore of the River, when the weather is fine. Allowing a full day for the travellers to roam about the quaint streets and see many points of interest in Quebec, the trip culminates in a daylight trip to Montreal, where we land our passengers at 3 o'clock Tuesday afternoon.

You can figure exactly what such a wonderful holiday will cost. The rate from Montreal to Chicoumiti and Return ($60 00 for outside room and $50.00 for inside room) includes meals and berth. There's no hotel expense, as you live on the boat for a whole week, going ashore only for such sight-seeing as you may wish to do

In spite of the low rate, the accommodation is the best—de luxe service throughout and a cuisine such as you have learned to expect on Canada Steamship Lines' Steamers.

Rates from Montreal to Saguenay River and Return

$60.00 in Outside Room. **$50.00 in Inside Room.**

These rates cover meals and berth. There are no "extras" of any kind.

Boats leave Toronto daily at 3.30 p.m. for Rochester, 1000 Islands, Montreal and Points East.

Tuesdays, Thursdays and Saturdays

An additional boat leaves Toronto at 5 p.m. direct to Clayton, Alexandria Bay and Ogdensburg, connecting for Montreal, Quebec and Points East. (Schedule subject to change without notice).

For Tickets, Berth Reservations and all information, write our City Ticket Office, 46 Yonge Street, Toronto.

CANADA STEAMSHIP LINES, LIMITED

INVESTMENTS AND THE MARKET

(Concluded from page 42)

placed against one of $43,147 contained in last year's statement.

Dominion Textile Co.—It is understood that, following a meeting of the shareholders of the company to be held on August 26 next, to grant authorization for a new bond issue, $8,875,000 will be issued almost immediately. Out of this, it is stated, $1,500,000 in bonds will be paid on September 1 to Canadian Cottons for the recently purchased Mount Royal Spinning Mill, and there will also be $875,000 cash paid in connection with this deal. Security for the bonds will be a first mortgage on the property concerned. In addition there will be $7,375,000 bonds to be placed with the trust company to be held in escrow to meet the three issues of bonds maturing between now and 1925.

United Gas Companies.—In view of the increasing cost of production and distribution of natural gas, the company will increase their rates on all consumption over 1,000 cubic feet, the new rates going into effect with the September reading. This increase in rates will not affect the ordinary domestic consumer to any extent, being aimed at the larger consumers, who use gas to a great extent for heating. The old rate for natural gas was 75 cents for the first 1,000 cubic feet, and 45 cents per thousand feet thereafter, with a discount of 5 cents per thousand on all bills paid on or before the 10th of the month. The new rate is a flat rate of 75 cents per thousand, with the usual discount. This company serves the city of St. Catharines, Ont.

Quebec Railway, Light and Power Co.—Following a meeting of the board of directors of the company, it was announced that the coupons on the first mortgage bonds, which were due on June 1st, would be paid on August 15th instead of August 30th. The improvement that has occurred in the finances of the company is making it possible for the company to waive the 90-day privilege of paying the coupons, and in future it is expected that the payments will be gradually moved back to the due dates.

Arrangements have been made for the payment of the current coupons at the Molson's Bank in Montreal as well as in Quebec. General Manager Lynch reported to the directors that the month of July was the biggest month for passenger traffic in the history of the company.

Consolidated Iron and Steel Corporation, Ltd.—A company of Detroit and Toronto parties engaged in the mining business, have formed under the above name, and a charter for $8,000,000 has been issued.

The company owns two large deposits of iron ore lands, and has opened a large hematite mine on the C.N.R., in the county of Leeds, 25 miles north of Brockville, at Furnace Falls, where it has 1,500 acres. It is said that the pioneer settlers of this region erected a smelter at this point 110 years ago, which was operated in a primitive way, the ore being grounded out by water-wheel. It is stated that the city of Brockville has offered inducements to the company to build a pig iron smelter there, and this is being seriously considered, as electric energy is available at a low rate.

DONNACONA PAPER ISSUE POSTPONED

The public issue of $1,750,000 6 per cent. bonds of the Donnacona Paper Co., the purchase of which by the Royal Securities Corporation was announced recently, will not be made until such time as the war loan campaign is completed and the government's demand on Canadian investment funds have been amply satisfied. The War Loan Committee has been tendered unreservedly the services of all members of the corporation's sales organization, numbering over sixty-five, and covering Canada and a portion of the United States. During the past eight months Royal Securities Corporation has been responsible for placing on the market $11,000,000 of new issues of securities of Canadian public utility and industrial corporations.

RECENT FIRES

Large Number of Small Fires Reported from all Parts of Canada—Heavy Loss in Strome, Alta.

Aylmer, Ont.—August 14—The large bank barn of Sanford Caverly was destroyed. Cause, lightning. Estimated loss, $3,500. Insurance, $1,800.

Brockville, Ont.—August 16—The farm of W. R. Collier in Augusta Township, was destroyed. Cause, spark from chimney alighting on the roof.

Cobalt, Ont.—August 14—Two frame buildings occupied by G. Hassan and Assef Shallsoup were destroyed. Estimated loss, $5,000.

Fredericton, N.B.—August 8—Two large barns, belonging to Oliver Pond, Burham Bridge, were destroyed. Estimated loss, $1,500, partly covered by insurance.

Herbert, Sask.—August 13—Six barns, owned by G. Wentland, Rev. N. A. Bjeldie, E. B. Kolb, A. H. Shore and Wm. Stickley, were destroyed. Estimated loss, $3,700. Insurance, $2,304.

London, Ont.—August 14—The large barns and season's crop, owned by George White, were destroyed. Cause, lightning. Estimated loss, $5,000, partly covered by insurance.

Merritton, Ont.—August 14—Six houses and a store owned by M. Sarazen, were destroyed. Estimated loss, $10,000.

Ottawa, Ont.—August 16—The building at 196 O'Connor Street, owned by Mr. John A. Brouse, was damaged. Estimated loss, $3,000, partially covered by insurance.

Parry Sound, Ont.—August 15—Forest fires, which are now sweeping the Parry Sound district completely wiped out Deer Lake settlement. Eleven buildings were destroyed.

Picton, Ont.—August 15—Two barns and contents owned by H. Knight and D. Ostrander were destroyed. Cause, electric storm.

Portage la Prairie, Man.—August 14—A large brick stable, granary, two log stables and several outbuildings were destroyed. The loss is partially covered by insurance.

Regina, Sask.—August 12—The manufacturing plant of the Young-Thomas Soap Co. was damaged. Estimated loss $5,000, covered by insurance.

Revelstoke, B.C.—August 10—The home of Mrs. Legg was destroyed. Cause, lightning.

Sardis, B.C.—August 7—A big bush fire started in the vicinity of the Vedder River, between Cultus Lake and the river. Timber to the amount of $500,000 was destroyed.

Strome, Alta.—August 8—The Phipps' general hardware store and a number of other business places were destroyed. Estimated loss, $100,000.

Three Rivers, Que.—August 15—The large stable of the St. Maurice Paper Co., containing 24 horses, 50 loads of hay and one carload of oats, was destroyed. Estimated loss, $20,000, partly covered by insurance.

Toronto, Ont.—August 15—The Physics Building, University of Toronto, was damaged. Cause, plumber's torch. Estimated loss, $260.

August 18—The home at 869 Queen Street was damaged. Estimated loss, $800.

Trenton, Ont.—August 14—The two homes of Mr. E. J. Belaire and Mr. J. Fitzpatrick, Queen Street, were destroyed.

Vancouver, B.C.—August 10—The plants of the Dust Control Co. and Kennedy's sash and door factory were destroyed. Estimated loss, $20,000.

Victoria, B.C.—August 10—The home of Mr. Thomas Watson, 831 Esquimalt Road, was damaged. Estimated loss, $1,500.

Winnipeg, Man.—August 16—The home of Mrs. J. Lawrence, 377 Arlington Street, was damaged. Cause, overturned coal oil stove. Estimated loss, $400.

Fire Marshals' Convention in Toronto

Originally Established to Prosecute Cases of Arson, Office has Now Taken Leadership in Preventive Work — Ontario Marshal Wants Co-operation here Similar to That in United States

ABOUT forty-five fire marshals and insurance commissioners from United States and Canada assembled in Toronto on August 26th for a four day convention. This is the fourteenth annual convention of the Fire Marshals' Association of North America, an organization which now has 26 members and 29 associates, practically all of the latter having been added during the past year with a view to widening the interest in the work. Many of the states in the Union have no fire marshal, but in practically all there is some officer, such as a fire commissioner, whose duties are similar. In Canada, Ontario has a fire marshal, while the other provinces delegate the pursuit of arson, organization of prevention work, etc., to some other officer.

Considering the limited field, the membership of the association is good, and the attendance at the convention in Toronto was exceptionally large. The delegates were welcomed at a reception on Tuesday evening, by Hon. I. B. Lucas, attorney-general, on behalf of the province, and by Controller W. B. Robbins on behalf of the city. Hon. W. N. Van Camp, of South Dakota, vice-president of the association, responded.

President's Address

In his address, the president, Hon. T. A. Fleming, fire marshal of Ohio, said:—

"Never in the history of this organization have its members faced such grave problems as we are facing to-day. With a score of countries seething like molten lava, an eruption is ready, at any time, to break forth, leaving a red trail of fire and a cloud of sulphurous smoke in its wake. The advance horde of the scum of Europe is present in North America, representing the brains of organizations fatal to society, to business and to the peace of our firesides. We, as fire marshals, see this danger, and must meet it unflinchingly and with loyalty not only to our governments but to ourselves. North America is trembling in the balance, with an overload of aliens, who seek to spread their nefarious doctrine—by any means in their power—among the clean, strong and virile American and Canadian working men. We have no place in free North America for the spawn of Europe; and there is but one test of citizenship, and that test is loyality.

"Some one has well said, 'What I am to be: that I am now becoming,' and never in history has that axiom been more thoroughly realized than now. We have never held a convention when the very air was fraught with danger, and when the torch of the alien incendiary was closer to our national powder mills than it is to-day. I stand by a majestic river and watch its resistless, steady flow; I know not whence it rose or whither it is going. I see only the calm, unruffled bosom of the mighty stream as it ebbs past my view. All I know of this mighty stream, is that it is here. So it is with our problems; we do not know whence they rise, or whither they flow, but we do know that they are here, and that we must solve them, if we are to continue to be a free and a peaceful nation. The accumulation of the present is the inheritance of the past; and the dynamic force thus engendered must burst in the doors, and allow us an unhampered view into the future; if not, how are we, working in the dark, to unravel the skein in which is wound the destinies of nations? The history that is in the making to-day, is unprecedented; has no parallel. We cannot judge the future by the past; the events of the last four years have so muddied the waters, that we cannot see clearly, and events have followed with such bewildering rapidity, that we can form no conception at present of what they really mean. The turmoil of war is over—for the present; but in its stead we see the bubbling of the worst that is in the great melting pot, and must steel ourselves to meet the shock.

"In this most critical period, insurance stands out like the rock of Gibraltar. Without insurance, the backbone of commerce is broken. Without insurance, there can be no credit; without credit, there will be anarchy. Credit cannot exist without adequate insurance and protection; insurance cannot live with anarchy. The credit of North America and insurance in North America depend now, as never before, on a larger vision and on the increased application of fire prevention work.

"I cannot find words adequate to express to you the magnitude and importance of the role that insurance and the insurance agent play in this period of reconstruction and unrest. The insurance agent who does not realize that there is something vastly more important and honorable in the business than his mere premium returns is asleep at the switch, tied to post, and a stumbling block in the march of progression. His work is in the highest degree important, and upon the fidelity, loyalty and thoroughness with which he conducts his business depends the future of this country. This may seem a broad statement; it is not, but it is a plain statement of fact.

"The modern insurance agency is coming into its own, and is employing experts whose duty it is to instruct all the personnel of an office in the proper manner in which to make an inspection that will be fair to the company whose money is involved, and to the assured, the safety of whose business is in question. The insurance agent must make the assured understand that the basis of his insurance rate depends upon himself and not upon agent or company, and the agent's motto should be 'I get the business because I give service.' On that word service depends the success or failure of the business. Failure means ruin to our country. The agents, who in friendly competition strive to educate the assured so that he may be able to safeguard his plant from fire, are being loyal to their country. The agent who can give the best service will get the business.

"There always will be fire insurance, for, without it, this country would face ruin, and there is an upward trend now toward a better understanding between the company, the agent and the man who pays for the policy. We all know

DOMINION FIRE CHIEFS' CONVENTION

Chiefs Should be Familiar with Building Construction—Dangers from Fires in the House

(Staff Correspondence.)

Calgary, August 23rd, 1919.

THE eleventh annual convention of the Dominion Association of Fire Chiefs, held in Calgary, August 19th to 22nd, was a marked success. A true western welcome was accorded the visiting chiefs who gathered from all parts of Canada. Chief Smart of Calgary, better known as Cappy Smart, was an excellent host and addresses of welcome were given by Mayor Marshall, Manager Richardson of the Exhibition Association, and Wm. Toole, president of the Calgary Board of Trade. In the opening address, Chief Pritchard, the president of the association, from Chatham, said that they were glad to have the opportunity of holding the convention this year in the west, and that the papers they had before them assured a most instructive and educational program. The prospect, in his opinion, was for the best convention of the association that had yet been held.

Letters were read from F. G. Burley, deputy fire commissioner, the president of the International Firemen's Association, and others, wishing the convention every success and regretting their inability to attend. A very interesting paper was read by the secretary, prepared by Mrs. Pritchard, on "Fire Prevention from the Standpoint of the House-wife." In this the various causes of fire in the home were thoroughly gone into and the preventions and precautions necessary in houses. The reading of this paper was adopted, and the thanks of the assembly passed to Mrs. Pritchard. A discussion on the paper followed, and, after having the roll of delegates called, the meeting adjourned until the afternoon.

At the afternoon session the topic set for discussion was of "Fire Prevention Organization and the Power of Suggestion," by A. C. Cameron, chief of the fire department, Oshawa, Ont. His address was given in full in these columns last week.

At the morning session on Wednesday, much time was taken up with a discussion on the paper prepared by Chief Healy, of Denver, Colorado, on "Building Construction, and How It Applies To the Work of the Chiefs and Fire Department." Comment on this was varying, and, in some cases, adverse. It was pointed out that every builder has his own idea of construction, and follows it out, and that, therefore, a superficial knowledge of construction was not of much value. In defence, it was claimed that building construction had its fundamental principles as regards joists, studding, etc., and that a knowledge of these things was of inestimable benefit to fire chiefs in preventing undue waste from entering blazing buildings in the wrong manner, and operating upon floors in the best way to save unnecessary destruction.

At this juncture, Chief Smart came in with Hon. W. H. Cushing, and introduced him as a volunteer of the first brigade which had existed in Calgary. In a short address, he described the early experiences of the Calgary fire brigade, when they had carted water in buckets from the river. There had been few serious fires in the city, he said, which was due entirely to the efficient service given the citizens by the department, under Chief Smart.

A paper prepared on "Experiences of Fire Fighters With the Army Type of Gas Mask" followed, in which it was shown that, after many experiments in serious fires, the conclusions arrived at were that the mask in its overseas form was not always an adequate protection against many gases met with. Whilst proof against the irritating and choking fumes of ordinary fires, it did not protect against ammonia except in very low concentrations. The army type of mask should be used with caution on account of its limitations, not being constructed for high concentration of gas, and should not be used at all in mines after fires and explosions. A demonstration was made after the reading of the paper of the improved gas mask, which has been evolved from the old type of army mask, and contains two canisters, one for ammonia fumes and one for smoke fumes, which is good for two hours. This mask has been worked out in numerous fires with success, and has been endorsed by chiefs of many large brigades. In the afternoon practical experiments in smoke and gas were successfully undertaken with the mask.

At the Friday morning session the main topic of discussion was the by-laws governing building in cities and towns, and how they apply to fire departments. It was claimed that whilst by-laws of great assistance to fire chiefs and their departments are passed, they are often allowed to slip into abeyance; are amended so as to be of no use, and even in some cases rescinded altogether. It was the general opinion of the meeting, after the matter had been talked over at some length, that the Dominion or provincial governments should pass some legislation, preventing the amendment or annulment of by-laws in this respect which they have passed upon.

Numerous technical subjects were discussed, and the delegates all were of the opinion that much benefit had been derived from the meetings.

FIDELITY TRUST TO HAVE BRANCH IN EDMONTON

The Fidelity Trust Co., of Winnipeg, has started the construction of a new building at Jasper Ave. and 105th St., Edmonton, Alta. According to plans, the building has a frontage of 107 ft. on Jasper Ave., with a depth of 150 ft. It will be one story high and will contain five stores and a garage, all facing on Jasper Ave. It will be of brick and steel construction, and will cost slightly over $46,000 on the contract price.

LARGE INCREASE IN SASKATCHEWAN REVENUE

According to statistics prepared by the provincial secretary's department of Saskatchewan, the revenue of the province for the fiscal year ended April 30 last, exceeded that of the previous year by nearly $200,000, according to statistics compiled by the department. The total revenue for the year was a little less than $1,250,000, as compared with $1,062,000 for the previous year. The departmental income comprises company and corporation taxes, motor licenses and railway taxes, also theatre, auctioneer, peddler and marriage licenses.

At the last session of the provincial legislature an inincreased scale of taxation on corporations was provided and while taxes and licenses are applied to the calendar year, the revenue for the fiscal year was partly benefited as the result of the increased scale. Another reason for the increase in business, a considerable number of new incorporations having been registered since the first of the year.

During the calendar year to July 31, no less than 147 new companies have been incorporated and 45 extra provincial companies have been registered. During the same period 109 rural telephone companies have been incorporated.

RAILROAD EARNINGS

The following are the earnings of Canada's transcontinental railways for the first three weeks in August:—

	1919.	1918.	Inc. or dec.
Canadian Pacific Railway.			
August 7	$3,442,000	$2,882,000	+ $ 560,000
August 14	3,298,000	2,759,000	+ 539,000
August 21	3,374,000	2,942,000	+ 432,000
Grand Trunk Railway.			
August 7	$1,392,477	$1,236,343	+ $ 156,134
August 14	1,461,258	1,285,064	+ 176,194
August 21	1,532,996	1,341,827	+ 191,169
Canadian National Railway.			
August 7	$1,811,263	$1,546,287	+ $ 264,976
August 14	1,891,104	1,583,071	+ 308,033
August 21	1,797,669	1,648,924	+ 148,745

INVESTMENTS AND THE MARKET

Shareholders of Dominion Textile Co. Ratify Large Bond Issue—Canada Bread Co. Presents Good Report

Fraser Co., Ltd.—The output of the company's pulp mills at Edmundston has reached 90 tons daily. The capacity for which the plant was constructed was 100 tons, but they do now expect to exceed this as a result of improvements which are being made.

The Fraser company is now shipping the 65 million feet of lumber which the British government recently purchased from them as part of the 40 billion feet order which it was announced was being placed in Canada.

New Brunswick Telephone Co.—At a recent meeting of directors, held at St. John, N.B., it was decided to make an almost immediate application for a substantial increase in their local rates and long distance tolls. Such action was forecast at the recent annual meeting of the company at Fredericton, and it is now known that but little further time will elapse before the formal application is filed with the Public Utilities Commission.

It is understood that the application for an increase in rates has been precipitated by recent salary demands of the employees, who, in some centres of the province at least, are said to have recently organized for the purpose of enforcing their demands.

Lake of the Woods Milling Co.—Announcement has been made that, following the annual meeting of the shareholders of the company on October 3, 1919, a special meeting will be held to increase the capital stock.

The present authorized capital stock is $4,000,000, of which $1,500,000 is preferred and $2,500,000 common. All the preferred has been issued, and $2,100,000 of the common stock is outstanding, leaving a balance unissued of $400,000. That the latter is considered insufficient for the future expansion of the enterprises business is indicated in the decision of the directors to ask for authority to increase the capitalization.

Southern Canada Power Co.—The following are the gross earnings of the company and its subsidiaries for the month of July, and for the ten months ended July 31st, 1919, as compared with the same period last year:—

	July, 1919.	1918.	Increase.
Gross	$ 47,175.02	$ 41,265.01	$ 5,910.01
Operating expenses and purchased power	25,891.08	22,773.90	3,117.18
Net earnings	$ 21,283.94	$ 18,491.11	$ 2,792.83
Ten months ending July 31st, 1919:—			
Gross	$487,847.38	$394,632.34	$93,215.04
Operating expenses and purchased power	258,966.06	218,818.36	40,147.70
Net earnings	$228,881.32	$175,813.98	$53,067.34

Hollinger Consolidated Gold Mines, Ltd.—The interim report of the company covering the six months ending June 17th has just been issued. The total income from gold and silver bullion, interest, exchange and sundries amounted to $3,166,625. The general milling and mining charges, including taxes, amounted to $1,646,868, leaving net profits at $1,519,756, out of which $738,000 was paid in dividends, leaving $781,756 to be added to surplus.

The report shows that the mill ran only 69 per cent. of the possible time, and treated 316,386 tons of ore, of which 50,477 tons came from development work. The average value of the ore treated was $9.93 per ton. On June 17th the company had 1,344 men working at the mine, of which 905 were miners, 180 mechanics, 147 mill workers, and 112 employed in general work. The assets of the company are given as $27,704,707, while the capital stock is $24,600,000, and current liabilities are $251,663, leaving a surplus of $2,853,043.

Anglin-Norcross, Ltd.—Messrs. Norcross Brothers Company, Worcester, Mass., and Anglins, Ltd., Montreal, two well-known building firms, are now known under the above name as the result of the completion of an amalgamation recently in Montreal. The object was for creating an organization capable of handling the vast quantity of building which is being planned throughout the Dominion, and to prevent this work going to American contractors as heretofore. The officers will be: J. Penrose Anglin, B.Sc., president; Mr. Henry J. Gross, late of Norcross Brothers Co., vice-president; and Mr. C. D. Harrington, of Anglins, Ltd., managing director. The company is an entirely Canadian concern, and will carry on business throughout the Dominion. As noted in *The Monetary Times* recently, financing for Anglin-Norcross, Ltd., has been undertaken by Atlas Bond and Security Corporation, of Montreal and Toronto. A public issue of preferred stock will be made shortly to provide working capital to expand the company's business, and to enable it to undertake the immense volume of work now offering.

Canada Bread Co., Ltd.—The company, in its report for the year ended June 30th last, showed a manufacturing profit of $176,208.30, a decrease of $29,563 from the figure indicated in the previous year. Generally speaking, however, the statement, which will be presented to the shareholders at the annual meeting in Toronto at noon on September 4th, demonstrates the company's finances to be in a strong position. The company has on deposit in the bank $318,892.50, and, in addition, holds $250,000 in War loan and Victory bonds.

"Now that the war is over," remarks Mr. Mark Bredin, the president, in his report, "we are looking forward to the investing of our surplus funds by establishing more branches at promising points during the present year."

Unsettled conditions during the past year affected adversely their company's profits. The Winnipeg strike resulted in the company's wagons being off the road for twenty-five days, and the war measures regarding flour substitutes operated disadvantageously to the company. The high wheat price was also another adverse factor. The company, among other things, paid out $39,818 in business profits war tax, $67,989 in bond interest, and $87,500 in dividends on the preferred shares. Fifty thousand dollars was appropriated for depreciation and bond purchase. The balance as at June 30th, 1919, was $103,418.86.

Dominion Textile Co., Ltd.—Shareholders of the company who were represented at the special meeting of the company on August 26th last ratified the proposed issue of $15,000,000 6 per cent. bonds. Sir Charles Gordon pointed out that the bonds would be used to retire the various presently maturing outstanding issues of 6 per cent. bonds as they matured, and would ultimately replace these issues and take the form of a first mortgage upon the company. After these bonds and the recent purchase of the Mount Royal Spinning Mills were covered a balance of $5,125,000 of the new bonds would remain. This amount would be applicable to new extensions and enterprise. At the moment there was nothing in the way of extensions in contemplation apart from the usual work upon existing plants and the new St. Lambert construction, which was still more or less under consideration.

The agreement under which this plant will be erected calls for the work to commence within two years of the signing of the peace treaty. There was some speculation as to whether the peace treaty had already been signed, it being pointed out that the Austrian treaty had not yet been signed. However, the president stated that the work would be under way in sufficient time. He pointed out that little would be done here until the cost of building and construction materials had gone down somewhat from their present high level. He also stated that the new bonds would be applicable to only 75 per cent. of the cost of the contemplated new works.

FIRE MARSHALS' CONVENTION IN TORONTO

(Concluded from page 5.

of the magnificent, patriotic and self-sacrificing work that has been accomplished for the government by that splendid body of men—the National Board of Fire Underwriters. No more masterly service could have been rendered our government during the war than that so freely and gladly given by the National Board. They will face present and future grave problems with the same loyal steadfastness that has characterized their work in the past; and we may be assured that they will be a veritable bulwark of strength to our members in our various lines of activity. Fortunately right now the veil of the future is rent so that we can, in a small way, discern a little light, and it is up to us individually, and to our powerful organization in particular, to see that this light is so amplified, that the dark places shall be illuminated. We must call to the colors, every available unit in the fire protection grand division. There must be no reserves. We must throw our entire strength onto the firing line, and win."

Committee Reports

Business sessions commenced on Wednesday. The secretary-treasurer, John G. Gamber, fire marshal of Illinois, reported finances in good condition, in spite of increased expenses. The revenue of the association is derived from fees of $20 for each member and $10 from each associate member. Reports were then received from the various committees, as follows: Committee on Publicity, Committee on Exhibits, Committee to Co-operate with National Board, Committee to Co-operate with Federal Government, Committee on Membership, Committee on State Building Code, and Committee on Standard Hose Couplings. When the report of the committee to co-operate with the National Board was under discussion, E. P. Heaton, fire marshal of Ontario, pointed out that the board has no jurisdiction in Canada, where its place is taken by the Canadian Fire Underwriters Association. He expressed the wish that there might be in Canada co-operation such as is carried out in the United States, and stated that fire marshals of Canada were in thorough accord with the policy in the States. W. E. Mallalieu, general manager of the National Board, said in reply that it was ready at any time to be styled the "National Board of Fire Underwriters of North America." President Fleming, here paid a tribute to the work of the National Board, the valuable records of which, representing many years of investigation, had been placed at the disposal of the government for war purposes.

Numerous Papers Read

On Wednesday afternoon the convention took up "Co-operating Agencies in Fire Prevention." The following papers were read:—"The Active Agency in Eliminating Fire Waste," by G. H. Anderson, of Illinois; "Good Citizenship," by J. S. Horan, of West Virginia; "The Best Methods and Results for Fire and Accident Prevention Day," by Frank Lewis, of Massachusetts; "The Underwriters' Laboratories and Fire Prevention," by A. R. Small, of Chicago. Each paper was followed by pertinent discussion. H. H. Friedley, of Indiana, expressed the view that the best field for prevention work was in better building construction, and instanced the case of the San Francisco earthquake and fire, where state buildings stood almost intact, while municipal buildings had been reduced to ruins, the only difference being in the quality of the construction. Risks, he said, could be best inspected by fire departments, and this should be one of the regular duties of a fireman. Within the field covered by the insurance companies, their preventive work was away above that of public officers, because the insurance inspectors worked for profits for the companies, but the company, however, always had the alternative of retiring an undesirable risk, but the duty of the fire marshal was to work for the prevention of fires whether or not they were covered by insurance.

G. H. Nettleton, of Minnesota, pointed out that when the office of fire marshal was first inaugurated some years ago, the main purpose was to investigate cases of supposed arson. It was now seen, however, that bigger and more effective work could be done by prevention. In his own state, in a town of 30,000, no less than 40 buildings had been condemned within a single week.

On the subject of "Good Citizenship," the opinion was that it should be inculcated through the school, education and the schools were the best agency for this purpose. Fire prevention day, inaugurated in 1912, was the beginning of real results.

On Wednesday morning and afternoon other papers were read, as follows:—"The Ultimate Solution of Fire Prevention is the Child," by W. N. Van Camp, of South Dakota; "New Fields for Development of Fire Prevention," by John G. Gambler, of Illinois; "Rural Hazards, How Shall They be Eliminated?" by H. L. Reade, of North Dakota; "Educational Results of Conservation Association Work," by James J. Joseph, of Illinois.

On Thursday the papers included:—"The Proper and Most Effective Procedure in Investigation of Suspicious Fires," by John Kenlon, of New York; "Survey of Results From Fire Marshals' Services in All States, What Are Our Faults?" by L. T. Hussey, of Kansas; "Fire Prevention as a Life Saver," by James R. Young, of North Carolina; "Insurance the Science of Service," by W. B. Flickinger, of Chicago; "Individual Liability Against Fire," by J. Grove Smith, of Ottawa; "How Can the National Board Assist the State Fire Marshals?" by W. E. Mallalieu; "Proper Inspection of a Flour Mill and Grain Elevator," by James J. Fitzgerald, of Indiana; "The Fire Hazard of Nitro-Cellulose Moving Picture Films and Ivoroid Products: What Should be Our Attitude Toward Them?" by Geo. W. Booth, of New York; "The Hazards of Large Industrial Plants," by W. J. Pollard, of Chicago.

The delegates were entertained by the city, the province, the Canadian Manufacturers' Association, the Canadian National Exhibition, and the Rotary Club, suitable addresses being given on each occasion.

MONEY MARKETS

Messrs, Glazebrook and Cronyn, exchange and bond brokers, Toronto, report the following exchange rates to *The Monetary Times*:—

	Buyers.	Sellers.	Counter.

TO SOLIDIFY THE EMPIRE BY COMMERCE

GENERAL CURRIE says that, though Britain and Canada's high opinion of one another has been increased as a result of the war, yet we do not like one another better than before. However this may be, all parts of the Empire at least appreciate, as never before, that the fundamental viewpoint in politics and industry which pervades the empire is considerably different from that held in the countries of continental Europe and Asia. In recognition of this common interest the development of an imperial preference to solidify the political connections is favored. Evidently Great Britain is prepared to sacrifice to some extent her policy of free trade for this purpose, and some of the colonies have already gone on record in this direction.

Speaking before the Kiwanis Club in Montreal recently, G. T. Milne, British trade commissioner in Canada, dealt with the possibilities for strengthening these commercial ties within the empire. "Among the many issues raised by the great war," he said, "none is of more importance and interest to business men than future commercial relations. To what extent the new world on which we are entering will be dominated by internationalism or by a more strongly pronounced nationalism is unnecessary to detain our attention; it is certain that a more strongly pronounced commercial rivalry will make itself felt. While tariffs, subsidies, bounties and similar artificial aids may do something to protect national interests, in the end efficiency in production and distribution will have the last word as a rule. The war has cost the world 40.000,000,000 sterling, but as an offset to this we have the enhanced efficiency of the industrial community. This efficiency cannot, however, be calculated in dollars and cents.

"The British empire has, more than any other of the political units engaged in the war, borne the heaviest share of cost in men, money and material, and within that empire the United Kingdom, as the senior partner, so to speak, in the firm, has pledged its credit to an amount which is almost staggering. In this connection, however, it may be mentioned that in the opinion of some economists the war debt of the United Kingdom to-day is, relatively to our national wealth, lighter than the war debt at the end of the Napoleonic wars, relative to our then national wealth. If this be so, it affords ground for confidence, and suggests that, black as the outlook certainly is in the United Kingdom at the present moment, that same pluck and energy which enabled us to stick it and defeat German ambition will assert itself, and that the empire, renewed and strengthened by its trial, will lead the world. To do this there must be the same hearty co-operation among the different parts of the empire as there was on the field of battle. We, as citizens of the empire, control politically the richest and most diversified areas in the world. Our resources in raw materials are incalculable, and in the coming struggle for trade this is an asset of the first importance. With a proper organization of our labor force, skill in manufacturing, shipping, banking and of all the factors which enter into production and exchange of commodities, there can be little doubt that the enormous debts incurred by Britain and her sister states in the empire can be satisfactorily liquidated. It is not suggested that a policy of exclusiveness towards our allies or neutrals in regard to those raw materials should be adopted, but we feel that the empire should have the first call on them.

"Canada led the way a good many years ago in extending to the mother country a measure of preference in her territory, and to some extent some other portions of the empire have followed the example. The mother country is now reciprocating to a certain extent, and one feels hopeful that the first instalment of preference agreed on by the British government is but the prelude to a larger and well-considered measure. It appears to be unlikely that any full revision of the British tariff, either in the direction of extending fiscal preference within the empire, or in any other direction, will be made until the whole question has been discussed at an imperial conference.

"The war has afforded Canada an opportunity to develop her manufacturing industries to an extent that would have been considered impossible a few years ago, and the activity of Canadian manufacturers in developing the export trade promises to be productive of the best results. An enormous market is open to you in the United Kingdom, and I think the majority of the people there would rather use Canadian goods than those from foreign sources. If you wish to retain that market, you must see that your repeat orders are of the same standard of quality as those made initially. Any new country entering for the first time into the export trade of course cannot avoid making mistakes. Just as the British manufacturer has been told for years that he must study what people wish to buy and not what he wishes to sell, so the same advice may be given to Canadians who are exporters. Doubtless some of your products will enter into competition with those made in Britain, but surely that need not deter you from trying to secure part of the trade. Britain has to fight against competitors in every market in the world. One other remark occurs to me to make in this connection. In the desire to develop export trade the manufacturers in a new country are sometimes apt to regard the imports from another country as a menace to a nation's industry."

FOOD STORAGE AND COMMODITY PRICES

On August 1st, there were in storage approximately two and one-half pounds of butter, two pounds of cheese, two dozen of eggs, four pounds of pork, two and one-half pounds of beef, one-sixth pound of poultry and three pounds of fish, per head of population in Canada. These figures are based upon the monthly report of the Cost of Living Commissioner, and include practically all cold storage plants in Canada. Considering the seasonal character of some of the products, the figures seem remarkably small, and do not represent more than a few weeks supply at the outside. It is desirable that reports of food commodities in storage should be given in relation to demand for with the organization upon a large scale of markets for these commodities, and the growth of large urban centres in Canada, the cold storage process has become an essential element in our food supply. Unfortunately storage has for some reason been associated with high prices, and it is forgotten that packing houses, by purchasing large quantities in the production season, and holding them until the season when production is short, equalize both the supply and the price throughout the year. If the large companies are really able by combination to manipulate the price to the disadvantage of the public they should be controlled, but in any case the essential service of the packing plant must be recognized.

The same report shows both increases and decreases in the amounts of food in storage compared with the same time last year. In his summary the commissioner says:—

"There are 20,043,991 pounds of creamery and 1,486,031 pounds of dairy butter in storage. This is approximately one and one quarter million pounds more than the total reported for a year ago, while the records for August, 1917, show that only 12,250,124 pounds were reported at that time. Moreover, from our winter's supply of last year over six million pounds were commandeered from fall production besides the large amounts taken out of wholesale stocks for the British Ministry of Food in the summer and early fall by the Canada Food Board. Oleomargarine stocks, as usual, are about equal to one-third of a month's domestic requirements, viz; 344,942 pounds.

"The cheese stock amount to 14,697,041 pounds. It is natural that stocks of cheese are increased over last month, but they are also 23.51 per cent. greater than a year ago. Now that the British price has dropped for cheese, this leaves a large amount of good food that should be made available for Canadian consumption at reasonable prices.

"The eggs in cold storage amount to about the same as last month, 12,444,971 dozen. This is 18.62 per cent. above the amount stored last August in spite of the extremely high prices at which the eggs have gone into storage this year. Eggs on hand other than in cold storage amount to 1,019,154 dozen. This is 111.07 per cent. greater than on July 1st and 49.09 per cent. greater than a year ago. The stocks of frozen eggs, which are a product for commercial confectioners amount to 510,108 pounds.

"The total stocks of pork on hand amount to 39,467,704 pounds. This is about the average of the stock carried during those last two years. A somewhat larger proportion is in process of cure this year than last, although about the same amount as last month. This amount in process of cure, or in the process of being manufactured, is by far the largest single item and about one-half the total amount —viz., 19,109,852 pounds. The frozen pork stocks are 6,570,760 pounds; unfrozen equals 1,932,187; dry salted equals 3,008,093 pounds, and sweet-pickled equals 8,846,812 pounds. These stocks are not likely to do the poor Canadian consumer much good until the price of pork and live hogs as well comes down materially.

"The stocks of beef total 20,014,417 pounds. This is about one-third of the greatest amount recorded as being in storage at any one time in Canada during these last two years. Of this quantity 453,263 pounds are in process of cure and not in cold storage; 514,462 pounds are cured; 3,666,255 pounds are unfrozen fresh beef, and 15,380,437 pounds are frozen fresh beef. We are happy to note that there has been monthly a material drop in the wholesale price of beef. The consumers and retailers should see to it that this is carried out to the consumer's price.

"Mutton and lamb stocks total 1,191,121 pounds. Thi is 25.9 per cent. less than a month ago and 45.73 per cent less than a year ago. Of this total 991,438 pounds are frozen, while 199,683 pounds are not frozen.

"The fish in cold storage amount to 21,044,744 pounds and on hand other than in cold storage to 3,587,743 pounds."

ONLY PRODUCTION CAN REMEDY WORLD CONDITION

Lloyd George's recent speech in the British House of Commons has been recognized, not only in Great Britain but throughout the world, as one of the most authoritative statements of present economic needs that has been made. In an interview in Winnipeg a few days ago, Sir Frederick Williams-Taylor, general manager of the Bank of Montreal, who is returning from the Canadian West emphasized the importance of this deliverance. He said that although we were on the North American continent, as neighbours to the nation which had profited most of all nations from the war, with the exception of Japan, it was impossible that we could remain in safety, undisturbed and unaffected, while Britain was wallowing in the trough of the sea. The statement made by Lloyd George ought to be read by every thoughtful Canadian, and it ought to be framed and read every day. Lloyd George had not glossed over the facts but had stated them plainly, and had set them down in black and white. He had explained clearly that the position of Britain was most serious. The problem therefore demanded the most thoughtful attention of every Canadian. Sir Frederick stated that he had been glad to find in the west a disposition to consider present day grave financial and economic questions more earnestly and to make more careful preparation for the contingencies and possibilities of the future.

Sir Frederick made some reference to the great impending sale of bonds in connection with the Victory loan and spoke of the needs of the government. He mentioned the name of the new minister of finance and said that the difficulties of this member of the federal cabinet would be very great during the coming years. Problems of much magnitude would be up for consideration and solution, and the solution would not be an easy task. The new minister should have the support of the whole country.

The insurance funds of the Grand Orange Lodge of British America are to be put in order by a substantial increase in the premium on policies issued prior to the year 1916. Our Dominion insurance legislation now requires such societies to be actuarially sound within a specified period. It is regrettable that sound finance had to be enforced by law, but it was apparently necessary, as practically expediency dominated the early years of these societies.

ONTARIO MUNICIPAL ASSOCIATION CONVENTION

Review of Municipal Legislation—Toronto Commissioner Wants Assessment Reform

THE twenty-first annual meeting of the Ontario Municipal Association opened in Toronto, on August 27th. A brief address of welcome was delivered by Mayor Church, Toronto, to which S. Baker, of London, replied. G. K. Dewey, city clerk of Brockville, the president of the association, pointed out in his annual address, that since the last meeting much important legislation affecting municipal government had been enacted. He referred to the difficulties which the association had faced during the war, and the satisfaction felt by all that the allied victory was complete.

An address was given by J. A. Ellis, of the Bureau of Municipal Affairs, on "Amendments to the Assessment Act," which was followed by discussion on the subject. Mr. Ellis stated that about 5 per cent. of the total income tax of the province was collected from rural municipalities, and that in many places no real attempt was made to assess incomes. He declared that he knew of millionaries whose incomes ran from two hundred to three hundred thousand a year, and yet the local assessor made no attempt to levy an assessment on their salaries.

The appointment of a provincial assessor was discussed and it was thought that many of the smaller municipalities at the present time felt the need of some higher authority to apply to when in doubt on certain assessment questions. The matter was referred to the committee on resolutions. A request that exemptions on income assessment be allowed up to $800 was also referred to the committee. Assessment Commissioner Forman, of Toronto, in referring to the amendments, declared that the legislature should give the province the power to assess the income from the dividends of the various manufacturing concerns. He instanced one man who had an income of $40,000 from that source, and who paid no tax on it. Mr. Forman stated that under the present conditions of the Assessment Act, it was not compulsory for the man to pay any tax whatever on his income from that source.

Mr. W. B. Doherty, city solicitor, St. Thomas, in his address on "Public and Private Municipal Legislation of 1919," reviewed what legislation had been brought down at the last session of parliament. He said that there has been a tendency of late years to shorten the sessions of the legislature, so as to complete the work before Easter, with the result that a great deal of the legislation is rushed through in the closing weeks of the session, and much of that affecting municipalities becomes law before their representatives even know of its introduction, and consequently they have no opportunity of giving it consideration. It was his suggestion that there be a bureau of municipal affairs to supervise such legislation and keep municipalities in touch with it through the association.

Many other important resolutions were brought up and referred to the resolutions committee.

Chamber of Commerce

At the session of the association on August 28th the programme was divided into two parts, viz., rural section and urban section. Addresses were given by C. Jones, of Petrolea, on the "Municipal Drainage Act"; and by Hon. H. J. Cody, Minister of Education, on "Consolidated Rural Schools."

An interesting paper was read during the session of the urban section by J. H. Laughton, Chamber of Commerce, London, Ont., on "Chambers of Commerce and City Government." It reads in part as follows:—

"Municipal Government is a combined citizenship, organized by law for its own maintenance, as well as for the maintenance of state and government. This statement would infer that these bodies so constituted, being the reflection of the people, would be composed of the best thought, civically, commercially and industrially, of the community.

"The Chamber of Commerce is an organization devoting financial strength and organized effort for betterment of the community, civically, commercially and industrially, and you will readily note that both organizations have a common cause, and the relationship between both, being close in theory, should be the same in practice. If not, why not?

"Chambers of Commerce have been organized in Chatham, St Thomas, Brantford, Stratford, Guelph, Sarnia and London, organizations that have been created by hundreds of citizens, those who are really interested in the municipality, paying a three years' membership of $25 a year, expressing in a real, practical way their interest in affairs, as well as making their organization financially strong. These organizations are purely democratic; their foundation is, "Love the Lord and Love Your Neighbor," and their aim is to make their several municipalities the best place in Canada to live in. The world cannot be safe for democracy until we make it safe for ourselves in our own community, and this is only accomplished through the proper relationship between Chamber of Commerce and the Municipal Government.

"We are facing the future and its great period of reconstruction, which will undoubtedly involve many problems of a civic, commercial and industrial nature. The municipal government will be as much affected by the future as the membership of the Chamber of Commerce. It would be much easier to solve those problems if the two organizations co-ordinate their efforts. Until the Chambers of Commerce, made, as they are, of the best representatives of every community, take advantage of its referendum ability in bringing about the co-ordination between itself and its municipal government, citizens will continue to keep in charge of your government that type of official who does not represent that degree of efficiency approved by the good-thinking people of your community.

"Commercially, if the mercantile and other business interests of a community are to progress, there must be a close relationship between the Chamber of Commerce and the city government. Legislation to protect the community merchant and the money he invests annually in taxes from the transient cannot be effected without co-operation between the two forces.

"Industrially speaking, the Chamber of Commerce and the city government that will not co-operate for their common good will be only defeating their prosperity. If co-ordination between the city and the Chamber of Commerce prevails in the development of the industrial strength of their community, it will provide unlimited means of additional property for taxable purposes, and out of this increased revenue will come municipal improvements that will work for the efficiency of the government, and, incidentally, reduce the cost of government, or provide community service that it at present is financially not able to give. In the industrial development of a community it would be easy to make a scientific survey of a community's industrial resources, and, once having ascertained its resources, the community could then strike out to establish within its boundaries industries in need. No wise manufacturer will locate his factory, if he believes in scientific principles, in a community where municipal government is not efficient and governmental cost high, as governmental efficiency is of no little importance to the cost of manufacturing.

"The subject at issue is so broad in its scope that it cannot be justly handled in such a short period of time, but if all of us would only take time to study this wonderful problem unitl we could be convinced of its importance, not only of the welfare of our organization, but community as well, and then muster sufficient courage to stand by our conviction, we will find our future work more pleasant and our efforts on behalf of the community more satisfying."

SOUTH VANCOUVER COLLECTIONS GOOD

Tax collections in August, up to the 28th, in South Vancouver, B.C., were $882,000. For 1918 they were $624,000, and for 1917, $552,000. A tax sale is to be held on September 10th.

INDUSTRIAL OPPORTUNITIES IN NORTHERN MANITOBA

Part of An Address Before the Alberta Industrial Congress at Calgary, Alta., August 11th to 15th

By R. C. Wallace,
Commissioner for Northern Manitoba

THE president of this industrial convention has richly emphasized the fact, and made it the raison d'etre of the convention, that a sane policy of industrial development in the west will do more than any other factor to alleviate the mistrust and lack of harmony that exists and continues to grow more menacing between eastern and western interests. The lack of understanding is due to the fact that the interests, at the present moment, are different and irreconcilable. The stage of development has now, however, been reached in the west, when industrial and manufacturing communities should be formed at many centres. When it is fully realized, as it is hardly even yet realized, that the safety of our country in the economic struggle will depend on an intensive policy of production from our varied raw resources, and when it is further realized that, to a preponderating extent, these raw resources are to be found west of the Great Lakes, no doubt can remain in the mind of an unprejudiced thinker that, provided adequate markets can be established, we must face in the west a bold and aggressive industrial policy. The province of Alberta is to be sincerely congratulated on the forward step which it has taken in instituting this convention, which is an omen of great progress yet to come. I feel justified in assuming that no jarring note is introduced into the proceedings of this convention particularly by one who has for several years realized the premier position which Alberta holds in the materials for manufacture and industry, if I be permitted to discuss the resources of the north and especially those of northern Manitoba, with which I am more particularly concerned.

Opening Up of North

In one respect, at least, northern Alberta and northern Manitoba are at a similar stage of development. In both territories railways are in course of completion, which are already of great service in stimulating colonization and active search after the wealth which these northern areas possess. In this respect, however, they differ: the Hudson Bay Railway in Manitoba, when completed, will terminate at Manitoba's seaboard, and it is confidently expected, will prove to be a potent factor in the transportation of the grain from the western prairies to the European markets. In times such as these, when expenditures on public works are based less on local than on national needs, no considerations should be permitted to further delay the completion of this railway for which the west has clamoured for half a century. Again, apart from the wealth of the soil, exploration work in northern Alberta is concerned mainly with the development of fuel resources in coal, oil and natural gas. In northern Manitoba on the other hand, apart from the development of the fur and fishery resources, interest is confined mainly to the development of the metallic mineral deposits which have already been discovered and the search for new deposits of similar character together with the development of the immense water power resources of the district.

To give impetus to the projected industrial movement in the west, it will be found necessary to supply abundant raw material in the western provinces. It is also fundamental that such raw materials should not be confined to the resources of the soil alone. To build up a sound industrial life, not only coal, oil and gas, but copper, iron, silver, gold and other metals should be produced within reasonable distance of the manufacturing centres. For this reason, it is realized by the provincial authorities in the west that our northern areas, where such deposits are possible, should be given the most sympathetic consideration. The problems of transportation and communication lie ever before those whose main concern is the development of our northern fields, where distances are vast, and settlement sparse in the extreme. Fortunately there is the example of Ontario to serve as a guide and inspiration. The faith and confidence which was the impulse behind the building of the Timiskaming and Northern Ontario Railways was rewarded beyond the dreams of the optimist by the profits which have been gained from the Cobalt and Porcupine fields, to mention only two of the many camps which have been discovered by the aid of the railway. Even in the west the time has almost passed when the mining of gold, silver, copper and iron is looked upon as a sort of illegitimate gamble. The mining industry is one of the basic industries of our country and in our progress towards industrial life in the west, it is even more—it is a key industry for the western provinces. But beyond all else there must be displayed on the part of the railway builders of today something of the vision which inspired those who pushed the Canadian Pacific Railway across the prairies, and the T. and N.O. line into what was then the desolate wilderness of northern Ontario.

Extensive Mining Resources

Geologically speaking, the whole of northern Manitoba, the northern part of northern Saskatchewan, and a corner of northern Alberta, is similar territory to northern Ontario which contributes so extensively to the revenues of the provinces from the wealth of the mines. In northern Manitoba, prospecting was unknown until operations were begun on the Hudson Bay Railway. In northern Saskatchewan, work has been confined almost entirely to the Beaver Lake country, and that only to a limited extent; while in northern Alberta and the territory beyond the sixtieth parallel, the prospector's pick is yet practically unknown. In northern Manitoba the prospector has been active only since 1914 and during the greater part of that time the energies of the majority of this class of workers have been directed elsewhere. To a large extent the progress of the work on the Hudson Bay Railway has determined the field of operations for prospecting. A short summary of the results to date will convey a concrete impression of the possibilities of the district and the opportunities for capital at the present time.

From the Mandy ore body there has been mined 25,000 tons of ore averaging over 18 per cent. copper, with values in gold and silver, and the greater part of this has been transported to the Trail smelter, notwithstanding transportation difficulties which might have been considered insuperable. The ore has been hauled 40 miles by sleigh, 130 miles by barge, and 1,200 miles by railway car. Notwithstanding this, a very good profit has been realized by the operating company. At Flin Flon Lake, a body of low-grade copper sulphide has been extensively prospected by diamond drilling and has been found to contain 20 million tons of ore with an average value of $6.71 per ton in copper, gold and silver, on the basis of a 15 cent per lb. price of copper, and 50 cent silver. This estimate will be seen to be very conservative when it is remembered that the price of copper has already reached 20 cents a lb., after the depression which succeded the close of hostilities, and that silver still stands over $1. This ore will be treated by a smelter to be erected on the property and it will be necessary to build a railway 85 miles long into the property from The Pas. This is one of the largest copper properties in Canada and its early operation will stimulate mining development throughout the entire district. Gold mining has been confined almost entirely to the eastern end of the mineral belt in the vicinity of Herb Lake, which is reached from mile 82 on the Hudson Bay Railway. On the Rex Mine a Lane Mill has been installed and the vein thus far developed shows an average width of more than 3½ feet with high values throughout. Several other properties in this district show a more limited stage of development, while others have been prospected as yet only on the surface. Of these, the Apex property is worthy of special mention, where a wide zone of granite has been silicified near its contact and good values are obtained over a width of 20 feet, and in some cases 25 feet of quartz and altered granite. From surface indications this would appear to be a very large ore body. Very recently, in the Copper Lake district, a large quartz lode mineralized with galena has been found

to carry an assay $9 in gold over widths of 20 feet.; while within the last fortnight, from the same district, and on a parallel vein, samples of most spectacular gold quartz were obtained, carrying 50 per cent. by volume of gold. In a word, the district only awaits capital. The writer is aware, from personal examination and discussions with owners of properties, that the opportunities for the utilization of capital on several properties are very favorable indeed for investors. I would confidently bespeak the active co-operation of gentlemen at this convention who are desirous of investing capital in western enterprises, and I shall be glad to furnish disinterested information on properties which I have personally examined, or on which I possess authoritative information. In the past the wealth of the north has consisted almost exclusively of its wild life. Even to-day, fur provides the staple business in northern territory. As the railway advances northward, however, the fishermen finds that still more northerly lakes can be fished to advantage in winter. The immense water power available in this territory—calculated by Dominion Water Power officials to be 3,500,000 horse-power—awaits the pulp industry and extensive mining developments with the necessary electrometallurgical industries that will follow for their utilization. When the railway reaches the Bay the salt lake water fisheries will supply the southern markets. For the sake of the north we would again emphasize the necessity of the immediate completion of the Hudson Bay Railway, apart altogether from its utility as a grain carrier, and an ample measure of confidence that a vision such as the railway builders in the early days of the west possessed, will justify itself in northern territory. If such be vouchsafed, the north will play a distinguished part in the industrial development of the west."

DOMINION BANK OFFICIALS AT WINNIPEG

Managers of branches of the Dominion Bank met Mr. C. A. Bogert, general manager, in a conference held in Winnipeg last week. Those in attendance included A. M. Cowie, of Calgary; John Snow, of Regina; M. S. Burger, of Moose Jaw; W. A. Radcliffe, of Medicine Hat; T. Van Someren, of Brandon; N. B. Robinson, of Fort William; J. L. Hunt, of Saskatoon; A. V. Miller, of Grenfell; W. E. Gordon, of Selkirk; E. C. McClelland, of Fort Frances; and J. K. Muir, of Teulon. Sir Augustus Nanton, one of the vice-presidents of the bank, F. S. Patton, the western superintendent and manager in Winnipeg, and W. S. Darling, western inspector, were also present at the sessions.

SHAWINIGAN DEBENTURE STOCK EXCHANGE

Howard Murray, vice-president of the Shawinigan Water and Power Co., has returned from London where on July 24th he presided at a meeting of the 4½ per cent. debenture stockholders of the Shawinigan Co. Of this security there was held in sterling in Great Britain a total amount of $5,500,000.

At this meeting, at which over 60 per cent. of the debenture stock was represented either in person or by proxy, a resolution was passed agreeing to the proposal of the company that the 4½ per cent. perpetual consolidated mortgage debenture stock be exchanged for 5½ per cent. 30-year first and refunding mortgage sinking fund gold bonds of the company, forming part of an issue of bonds not exceeding in all $50,000,000. This exchange is to be made as at December 1st, 1919. As the debenture stock is in sterling, fractions of $100, resulting from such exchange will be satisfied by the company as far as possible in fractional certificates for $25 each, or any balance will be paid by the company in cash. Holders of debenture stock are to surrender their stock certificates to the Bank of Scotland, London, for exchange for the bonds on December 1st.

The resolution authorizes the Royal Trust Co., as trustee for the debenture stock, to cancel the trust deeds and all mortgages and charges securing debenture stock and reconvey all property and assets to the company, upon the deposit with it of the $5,500,000 5½ per cent. bonds to be delivered to such debenture stockholders in exchange.

This agrrement with the debenture stockholders clears the way for the company's programme outlined in the notice to shareholders for a meeting to be held on October 8th, and immediately upon the ratification by the shareholders of by-law No. 31, creating 5½ thirty-year bonds of Series "A," aggregating $5,500,000, this exchange can be put into effect.

Life Underwriters' Calgary Convention

Want Action to Restrict Part Timers — 1918-1919 has Been Banner Year in Life Insurance—Next Year's Convention to be in Quebec — Association has Made Big Advance in Membership

(Staff Correspondence.)

Calgary, August 23rd, 1919.

THE thirteenth annual convention of the Life Underwriters' Association of Canada, held in Calgary, August 19th to 22nd, inclusive, was pronounced by the delegates to be the best yet held in the history of the association. Nearly four hundred delegates registered from all parts of Canada, which is considerably larger than the number at the Winnipeg convention. A warm western welcome was extended by Mayor Marshall, who handed President Wintemute a large gold key, representing the key of the city of Calgary. He assured the delegates it was theirs during their stay in the Alberta metropolis, that the city was wide open to them, and he wished all a pleasant and profitable visit.

There was no livelier body of men in Calgary, said Mayor Marshall, than the members of the Life Underwriters' Association. He considered insurance such a good thing that no man had ever had to come after him to convince him of the need and necessity of life insurance. When he could afford it he went and applied for an additional policy. Mayor Marshall also stated that, in his opinion, no young man should be permitted to get married without an insurance policy.

Addresses of welcome were also given by H. S. Ellis, vice-president of the Calgary association, who appeared in cowboy togs as a member of the Circle C Ranch, which the Calgary association had organized. The delegates were given some unique entertainment, among which was a stampede and chuck wagon dinner at P. Burns' large ranch at Midnapore, ten miles from Calgary. An address was also given by W. L. McBeth, past-president of the Edmonton association, who pointed out some of the agricultural and other resources of the province of Alberta. In 1898 only 79,000 acres were under cultivation; in 1908, 837,000 acres under cultivation; and in 1918 there were over 10,000,000 acres. In Alberta, said Mr. McBeth, farm lands had sold as high as $125 an acre, but land could yet be bought as low as from $10 to $25 an acre. Responses were given by Fred McGregor, vice-president of the Victoria, B.C., association; also Geo. E. Archibald, vice-president of the Sydney association, who had travelled over 3,000 miles to attend the convention.

Retiring President's Address

President Wintemute, in his address, said:—

"The association year just closing marks the thirteenth milestone in the activities of the Life Underwriters' Association of Canada. At New York City, last September, some of my friends cautioned me as to what might prove a 'hoodoo,' but, knowing thirteen to be my lucky number, and, in any event, not being superstitious, I made bold to accept the honor conferred upon me, and now, in coming to you to give a report of my stewardship, want, first of all, to say that, while the last twelve months have been possibly the busiest of my experience, they have also been by far the happiest.

"In considering a few of the more recent accomplishments, I am reminded of the fact that, on account of the activities of so many of our members and officials in the promoting of the Victory Loan, most of our locals found it impossible to get under way until after the New Year; and even then, the restrictions placed on the holding of meetings on account of that terrible epidemic, the 'flu,' had its deterring effect. The 'news' brought to you the figures demonstrating the magnitude of operations in connection with the loan, and it was pleasing to have the government, through the Minister of Finance, recognize the fact, although at a late date, that the life men have played their part in the success of the same. At the end of last month, as a member of the Dominion executive, I received an intimation, by wire, from Sir Thomas White that my presence would be appreciated at a meeting to be held in Ottawa on the first day of this month to consider ways and means for organization to sell another Victory Loan. Unfortunately, in view of the nearness to this present occasion, 'our convention,' I was forced to wire, asking to be excused. I deputed W. Lyle Reid, of Ottawa, to act for us. Incidentally, I took the liberty to once more pledge the active and hearty co-operation of the members of the Life Underwriters of Canada.

"We will hear a report from the educational committee. It is rapidly being recognized that the education, not only of the public, but the agent, is a necessity to the proper propagation of our great business. In fact, a great many institutions of learning are providing for the same in their curriculum, and it is significant that the Carnegie Institute of Salesmanship, at Pittsburg, has provided an eleven-weeks' course in insurance salesmanship for the present term. Some day these courses will be universal, but, in the meantime, I am impressed with the fact that our local associations could do a wonderful work in following the example set by one or two who have selected several of their members to deliver lectures to their high schools and collegiates located in their respective cities. I am especially constrained to this suggestion, as, on different occasions during my speaking tour across Canada, in offering the same suggestion, principals of different institutes of learning who happened to be present at the meetings, then and there offered to make a place for, and assist in every way, such an undertaking.

"Companies, too, are becoming more careful, and showing more wisdom in the selection of their agents, and it is noticeable that a number of companies are seeking to aid, in an educational way, their representatives. This is good, and I submit that the local life underwriters' associations could do a wonderful work in supplementing this effort by taking up the study, as a body, under the guidance of one or two of their members, certain text books on the principles of life insurance, as well as salesmanship. My contention is that increased knowledge will not only add to the ability of each individual to sell, but it will also minimize misunderstandings, which are too often interpreted as misrepresentations.

"I learn that considerable progress has been made re institutional advertising. I feel I should not let the opportunity go by without once more commending the Saskatoon association for their pioneer effort in this particular, which has proven such a success. As a result of their work, and, more particularly, the efforts of W. J. Young, their secretary, several other associations are following suit. I believe, as an association, we owe Mr. Young a debt of gratitude, as he has been most willing to give of his time and peculiar ability in assisting any association to make the start, and that without thought of remuneration. The publicity committee will report further on this matter.

"On account of the general inactivity of the local associations, from causes already stated, during the early part of the year, and the resultant limiting of the scope of our work, the executive decided that possibly the most needful thing was increased membership. With this in mind, I arranged my trip at as early a date as feasible, and was thus privileged to meet with most of the local associations; and,

A Newspaper Devoted to Municipal Bonds

THERE is published in New York City a daily and weekly newspaper which has for over twenty-five years been devoted to municipal bonds. Bankers, bond dealers, investors and public officials consider it an authority in its field. Municipalities consider it the logical medium in which to announce bond offerings.

Write for free specimen copies

THE BOND BUYER
67 Pearl Street New York, N.Y.

believe me, it was not only a privilege, but a delight and inspiration to myself. Under the circumstances, my trip was hurried, which meant early and late trains, but at no point where I visited was a train too late or too early for the officials of the local not to be there to receive me with open hearts and hands. Truly, it was glorious, and, while it seemed a long time to be away from a more or less pressing business, I have no regrets. I would not have foregone the privilege for twice the cost, and will always look back upon the year as a bright spot in my life's experience. Truly, I would like to make personal mention of meetings and officials, but to do so would take too long, and even then I could only half say what I would wish to express."
